TOTAL DEBT AS OF DEC. 31, 2024 (IN MIL PESO)	256,349

11. Are any or all of registrant's securities listed on a Stock Exchange?

Yes No

If yes, state the name of such stock exchange and the classes of securities listed therein:

Philippine Stock Exchange-Common and Series 3B, 4A, 4B, 4C, 4D and 4E Preferred Shares; Philippine Dealing & Exchange Corp. - Series D, E and F Bonds

12. Check whether the issuer:

(a) has filed all reports required to be filed by Section 17 of the SRC and SRC Rule 17.1 thereunder or Section 11 of the RSA and RSA Rule 11(a)-1 thereunder, and Sections 26 and 141 of The Corporation Code of the Philippines during the preceding twelve (12) months (or for such shorter period that the registrant was required to file such reports)

Yes No

(b) has been subject to such filing requirements for the past ninety (90) days

Yes No

13. State the aggregate market value of the voting stock held by non-affiliates of the registrant. The aggregate market value shall be computed by reference to the price at which the stock was sold, or the average bid and asked prices of such stock, as of a specified date within sixty (60) days prior to the date of filing. If a determination as to whether a particular person or entity is an affiliate cannot be made without involving unreasonable effort and expense, the aggregate market value of the common stock held by non-affiliates may be calculated on the basis of assumptions reasonable under the circumstances, provided the assumptions are set forth in this Form

As of March 31, 2025 (total of 2,503,927,901 common shares at P2.34 per share:
P5,859,191,288.34

**APPLICABLE ONLY TO ISSUERS INVOLVED IN
INSOLVENCY SUSPENSION OF PAYMENTS PROCEEDINGS
DURING THE PRECEDING FIVE YEARS**

14. Check whether the issuer has filed all documents and reports required to be filed by Section 17 of the Code subsequent to the distribution of securities under a plan confirmed by a court or the Commission.

Yes No

DOCUMENTS INCORPORATED BY REFERENCE

PART I - BUSINESS AND GENERAL INFORMATION

(A) Description of Business

(1) Business Development

(i) The Company

Petron was incorporated in the Philippines on December 22, 1966 as “Esso Philippines Inc.” Petron was renamed “Petrophil Corporation” in 1974 when the Philippine National Oil Company (“PNOC”) acquired it. In 1985, Petrophil and Bataan Refinery Corporation (formerly, the “Standard Vacuum Refining Corporation”) were merged with Petrophil Corporation as the surviving corporation. The Company changed its corporate name to “Petron Corporation” in 1988. The Company’s original 50-year corporate term expired on December 22, 2016. On September 13, 2013, the SEC approved the amendment of the Company’s Articles by extending the corporate term of the Company for another 50 years from and after December 22, 2016. As a general rule under the Revised Corporation Code, which took effect on February 23, 2019, a corporation with a certificate of incorporation prior to the effectivity of the Revised Corporation Code, and which did not elect to retain its specific corporate term under its articles of incorporation, shall have perpetual existence. By operation of law, therefore, the Company shall now have perpetual existence because it did not elect to retain its specific corporate term under its Articles. On December 23, 2022, the SEC approved the amendment to the primary purpose of the Company under its Articles of Incorporation authorizing the Company to produce and deal in biofuels.

As of March 31, 2025, the two (2) principal common shareholders of the Company holding at least 5% of its common stock are SRC (with 52.68%) and SMC (with 19.10%) (in addition to PCD Nominee Corp., with 21.18%), following the buyback by the Company on March 18, 2025 of a total 459,156,097 common shares pursuant to the share buy-back program of the Company approved by the Board of Directors on March 4, 2025. SRC is wholly-owned by SMC. SMC thus holds an aggregate 71.78% ownership of the common shares of the Company.

The registered office address of Petron is at the SMC Head Office Complex, 40 San Miguel Avenue, Mandaluyong City.

(ii) Subsidiaries

The direct subsidiaries of the Company as of December 31, 2024 are listed below:

- **New Ventures Realty Corporation (“NVRC”)** is a realty firm established on August 24, 1995. NVRC is authorized to acquire and develop land but it does not engage in the subdivision business. Land suitable for use as service station sites, bulk plants or sales offices are purchased by NVRC, which are then leased to Petron for use in the latter’s operation. NVRC’s wholly-owned subsidiary, Las Lucas Development Corporation, which was acquired in 2003, was later renamed “Las Lucas Construction and Development Corporation” upon approval by the SEC in September 2009. In 2012, NVRC acquired 100% of Parkville Estates and Development Corporation and 60% of Mariveles Landco Corporation. In 2013, NVRC further acquired 100% of South Luzon Prime Holdings Incorporated, MRGVeloso Holdings, Inc. and Abreco Realty Corp.
- **Overseas Ventures Insurance Corporation Ltd. (“Ovincor”)** was incorporated on November 16, 1995 under the laws of Bermuda for the purpose of expediting the reinsurance of Petron’s insurable interests and other insurances covered by Petron affiliate Petrogen Insurance Corporation. Reinsurance includes the insurance cover for the Petron Bataan Refinery, the bulk plants and service station properties, petroleum and cargo insurance and performance bonds for Petron contractors and haulers as well.

- **Petron Freeport Corporation** (“PFC”; formerly, “Petron Treats Subic, Inc.”) was incorporated on November 6, 2003. The company is registered with the Subic Bay Metropolitan Authority (“SBMA”) as a Subic Bay Freeport (“SBF”) enterprise. PFC is engaged in the business of operating and/or managing retail service stations and non-fuel businesses such as convenience stores. PFC handles the operations (*i.e.*, forecourt, quick-service restaurant, and locators) of the service stations located at Gimikan and Argonaut.
- **Petron Marketing Corporation** (“PMC”) was incorporated on January 27, 2004 with the same business purpose as PFC but operated outside the SBF. PMC is a wholly-owned subsidiary of Petron. PMC turned over to Petron the operation of service stations that PMC held and the operation of Treats stores, effective August 1, 2016 and November 30, 2016, respectively. PMC also terminated its franchises to the fast food stores. On August 2, 2024, the SEC approved the shortening of the corporate term of PMC to December 31, 2025.
- **Mema Holdings Inc.** (“Mema”) was acquired by Petron in 2022. It is a holding company intended for the hauling and logistics requirements of Petron.
- **Petron Singapore Trading Pte. Ltd.** (“PSTPL”) was established in 2010 as Petron’s trading subsidiary in Singapore. The subsidiary aims to optimize crude and petroleum product procurement and participate in Singapore’s Global Trader Program, which allows the Company access to a wider selection of crude and petroleum product alternatives, resulting in further optimization of Petron’s crude and petroleum product selection.
- **Petron Global Limited** (“Petron Global”) is a holding company incorporated under the laws of the British Virgin Islands acquired by the Company on February 24, 2012.
- **Petron Finance (Labuan) Limited** (“Petron Finance”) is a holding company incorporated under the laws of Labuan, Malaysia acquired by the Company on March 2, 2012.
- **Petrochemical Asia (HK) Limited** (“PAHL”) is a holding company incorporated under the laws of Hong Kong over which the Company obtained control in January 2013.
- **Petron Oil & Gas Mauritius Ltd.** (“POGM”) is a holding company incorporated under the laws of Mauritius acquired by the Company on February 8, 2012.

Petron Oil & Gas International Sdn. Bhd. (“POGI”) is a subsidiary of POGM and incorporated under the laws of Malaysia. It owns 73.4% of Petron Malaysia Refining & Marketing Bhd. (“PMRMB”), a public company listed on Malaysia’s Stock Exchange (“Bursa”). POGI also wholly owns Petron Fuel International Sdn. Bhd. (“PFISB”) and Petron Oil (M) Sdn. Bhd. (“POMSB”). PMRMB, PFISB and POMSB (collectively, the “Petron Malaysia”) are companies incorporated under the laws of Malaysia and are engaged in the downstream petroleum business in Malaysia.

The Petron Malaysia’s distribution network is comprised of 12 product terminals and facilities all over Malaysia. PMRMB owns and operates the Port Dickson Refinery (“PDR”) with a rated capacity of 88,000 bpd. The PDR produces a range of products, including liquefied petroleum gas (“LPG”), naphtha, gasoline, diesel, jet fuel, and low sulfur waxy residue. Further, it also operates a palm methyl ester (“PME”) plant in Lumut, Perak, with a rated capacity of 78,000 metric tons per year of PME used for biodiesel blend.

Petron Malaysia’s fuels marketing business caters to both retail and commercial segments. The retail business markets fuels and other products through its network of 800 service stations, both company-owned or dealer-owned, located throughout Peninsular and East Malaysia. Retail sells top-of-the line fuel from Blaze 100, the only RON 100 gasoline in Malaysia, Blaze 97 and Blaze

95, all meeting Euro 4M standards specifications, while its premium Turbo Diesel and Diesel Max are all Euro 5-compliant diesel products, with 7% and 10% PME biodiesel blend, respectively. Petron's premier LPG brand, Petron Gasul, is also available in over 200 selected service stations in Peninsular Malaysia to add more convenience to the Malaysian household. Petron also provides one-stop shop service experience for motorists on the road through more than 315 Treats and approximately 451 P-Kedai convenient stores located within its service station network, along with other amenities and restaurant with 30 allied business partners. Retail business also serves more than 35,000 fleet accounts nationwide through Petron Fleet Card utilizing microchip technology participating in Diesel Subsidy program by government.

Petron Malaysia's commercial business serves four (4) segments: industrial and wholesale, aviation fuels, LPG and lubricants/specialties. The industrial business sells diesel and gasoline fuels to mini-stations and power plants, as well as to the manufacturing, plantation, transportation, fisheries, commercial and construction sectors, among others, while the wholesale segment primarily engages in diesel sales to company-appointed resellers catering to other industrial customers. PMRMB's aviation group sells jet fuel to key airline customers which operate at the Kuala Lumpur International Airport where the product is supplied through pipeline connected from the Port Dickson Terminal. PMRMB also markets Gasul LPG in 12-kg and 14-kg cylinders for domestic household use, F14-kg for Forklift use as well as 50-kg and bulk for commercial use. PFISB has its lubricants business selling automotive lubricants both through the retail service stations as well appointed distributors network.

The above-named subsidiaries of the Company have no plans of engaging in lines of products or services other than those provided in connection with the promotion and enhancement of the business of the Company.

The Company and its subsidiaries are not subject of any bankruptcy, receivership or similar proceedings.

Operating Highlights

Sales

For 2024, the Company's consolidated sales volume stood at 139.9 million barrels, 10% higher than 2023's 126.9 million barrels.

Refining

The Petron Bataan Refinery Master Plan Phase-2 Upgrade ("RMP-2") upgraded the Company's refinery located in Limay, Bataan (the "Petron Bataan Refinery") to a full conversion refining complex. RMP-2 started its full commercial operation in January 2016.

Since the closure of the Shell Refinery in May 2020, the Petron Bataan Refinery is the only oil refining facility in the country.

In December 2021, the Petron Bataan Refinery renewed its registration with The Authority of the Freeport Area of Bataan ("AFAB") as a registered enterprise. The registration shall be valid and in effect as long as the registered enterprise remains in good standing or until revoked or cancelled. As a registered domestic market enterprise engaged in the oil refinery facility as its registered business activity, the Petron Bataan Refinery is granted duty-free importation of merchandise, including capital equipment, raw materials, spare parts, and accessories, subject to compliance with conditions specified under the Corporate Recovery and Tax Incentives for Enterprises Act (the "CREATE Act"). Meanwhile, pursuant to Section 295(G) of the Tax Code, as amended by the CREATE Act, the Petron Bataan Refinery's crude oil

importations are exempt from duties and taxes, while applicable taxes are paid upon withdrawal of finished products sourced from the crude oil importation.

Product Supply and Distribution

The Company continues to implement programs to ensure adequate and timely product supply such as storage capacity additions, effective inventory management, a sufficient fleet of tank trucks and marine vessels, and an inter-depot support system during periods of calamities.

Human Resources (“HR”)

Petron aimed at strengthening its development programs to enhance both the hard and soft skills of its talents. The company gradually transitioned back to facilitating live programs while taking advantage of online platforms to employ self-directed learning tools. By year-end, training hours per employee increased by 239.5% from the previous year. Petron dedicated 422,497.75 training hours for all employees or an average of 124 hours training per employee.

To enrich the leadership pipeline, learning opportunities for leadership development offered by SMC were maximized. The growth of key talents was supplemented through Petron’s coaching program. The coaching program is composed of 49 coaches and 53 coachees, and the mentoring program is composed of 14 mentors and 20 mentees. These programs collectively generated 3,082 coaching and mentoring hours in 2024.

Health, Safety and Environment (“HSE”)

The Company’s HSE programs continue to be an important element in the operations of its facilities. HSE programs of the Company include the EcoWatch program on environmental awareness and the Oversight Safety Assessment and Compliance Inspections of the depots/terminals, service stations and third-party LPG filling plants, industrial accounts and contractor’s site, participation in industry-wide oil spill response exercises, emergency drills and exercises, seminars/trainings, and maintenance of management systems and ISO certifications on environment, health and safety.

All 30 terminals are certified in accordance with ISO 9001:2015 (QMS), ISO 14001:2015 (EMS) standards, and ISO 45001:2018 (Occupational Health and Safety (OH&S) Management System). Furthermore, 14 Petron pier facilities are compliant with the International Ship and Port Facility Security Code (ISPS Code) and certified by the Office of the Transport Security under the Department of Transportation (“DOTr”). Additionally, a terminal is in the process of receiving its ISPS Certification. The ISPS certification is a requirement by the International Maritime Organization for all international vessels calling on international ports and for all ports accepting international vessels.

The Terminal Operations Division of the Company implemented the Human Organizational Performance (“HOP”). HOP is a system to prevent or reduce losses using behavior-based tools and proven management techniques. With this new system, the Company aims to improve the over-all safety culture of the division to prevent all types of losses, and eventually apply the same system throughout the organization.

From January to December 2024, a total of 11.5 million safe man hours were achieved by the Head Office, the Petron Bataan Refinery, and the terminals.

Corporate Social Responsibility (“CSR”)

Petron Foundation, Inc. (“PFI” or “Petron Foundation”) continues to be in the forefront of helping Petron Corporation attain its business goals through the practice and advocacy of strategic CSR. Through PFI’s thrusts on education, environment, entrepreneurship and livelihood, and community engagement, it works all year round with Petron’s various business units, employee volunteers, as well as with key

stakeholders to create a positive impact on the lives of our fenceline communities. At the same time, PFI is at the forefront of advocating ESG and sustainability within Petron with its active participation in Petron's ESG Council.

Education

- **Tulong Aral ng Petron ("Tulong Aral")**. Education remains foremost in PFI's CSR thrust, with its flagship education program Tulong Aral ng Petron ("TAP" or "Tulong Aral"). In partnership with the Department of Education ("DepEd") and the Department of Social Welfare and Development ("DSWD"), TAP is sending deserving children and youth through elementary, high school and college. For school year 2023-2024:
 - PFI had over 2,400 TAP scholars from elementary to college nationwide, including 300 new Grade 1 scholars who came from priority areas as recommended by and in support of Petron's Terminal Operations.
 - Just over 92% of TAP scholars successfully transitioned from grade school to high school, while close to 98% of all TAP scholars stayed in school for the same period.
 - PFI resumed the distribution of school supplies for TAP scholars in SM Stores since the pandemic. Scholars in areas inaccessible to nearby SM department stores had their school supplies distributed in their respective schools.
 - PFI resumed the Best U Can Be life skills program for Petron's high school scholars after pausing it prior to the pandemic. This initiative provides the scholars an additional benefit of getting them ready for life post-high school, through developing core skills deemed critical for today's generation: active listening, active reading, effective and concise writing, and effective and empathetic speaking. The workshop designed was developed by AHA! Learning center with activity-driven, class-type sharing and learning sessions not just for our scholars but for their parents as well. The activity also provided opportunities for Petron employee volunteers from different business units of Petron to co-facilitate the activities. Petron employee volunteers were also joined by some TAP parent volunteers during the whole-day activity.
 - For school year ("SY") 2024-2025, there are a total 2,632 TAP scholars: 600 in ES, 2,022 in HS, and ten in college.
- **Bataan scholarships**. Under the Refinery Engineering scholarship program, Petron supported twenty (20) new Electrical and Mechanical Engineering scholars from Bataan Peninsula State University for SY 2023-2024. Four of its previous graduates in electrical engineering passed the Licensure Board Exam in April 2024 and are awaiting the results of their application in Petron for possible hiring.
- **Brigada Eskwela**. PFI continued to support DepEd's Annual Brigada Eskwela National Schools Maintenance Week by donating materials and mobilizing volunteers to clean classrooms or paint tables and chairs in time for the opening of classes. In 2024, PFI supported 121 public schools nationwide together with some 206 Petron employee volunteers from the Petron Bataan Refinery and Terminal Operations, as well as from Head Office.

Environment

- The *Puno ng Buhay* remains PFI's primary program to address Petron's environmental footprint by undertaking long-term mangrove reforestation efforts in select areas in the country. To date, Petron is committed to reforestation in three areas: Hagonoy, Davao del Sur; Obando, Bulacan, and; Ivisan, Roxas or a total of 55 hectares of mangrove areas.
- Relative to this, PFI has secured approval to engage a third-party entity who will undertake carbon sequestration measurement of Petron's reforestation sites. This will be a five-year engagement to be done annually for 10 selected sites, with the pilot site in Hagonoy, Davao, with an initial carbon sequestration report targeted to be produced by the first half of 2024.
- PFI is also supporting the Petron Bataan Refinery in its environmental activities:
 - In 2024, 100% of the activities targeted for the year for the five-hectare mangrove conservation project under Department of Environment and Natural Resources ("DENR")'s Project TRANSFORM was completed. This includes the fence repair and nipa hut construction, as well as regular monitoring and monthly cleanup activities in the project site in Sitio Bakawan, Abucay, Bataan.
 - Also as part of this project funded by Petron, some 50 members of the partner People's Organization -- the Samahan ng Mananahong ng Sitio Bakawan - are now benefiting from the recently constructed *tahungan*, where they now cultivate mussels to sell at the local fish port.
 - Efforts to rehabilitate a 7.5-kilometer fish sanctuary off the coast of Limay resulted in the deployment of nearly 300 artificial reefs, establishment of floating flag markers, and the construction of a floating raft, among others. With the expected nursing of fish in the sanctuary, the 3,600+ fisherfolk in Limay anticipate a bountiful catch in the immediate future.
 - Through PFI, Petron also continued to support the 1Bataan PawiCAN Conservation Alliance Network as part of the Bataan Integrated Coastal Management Program, primarily with sustained advocacy through the annual Pawikan Festival in Morong. In addition, Petron helped establish a Pawikan hatchery in Bo. Luz in Limay, in partnership with LGU Limay, Brgy. Kitang 2 and Luz and the Bataan Provincial Government, with the small hatchery at 90% completion as of end-2024.
- Nationwide, Terminal Operations and Refinery actively participated in activities that celebrate Earth Month, Environment Month and International Coastal Cleanup Day.

All these are consistent with efforts to also comply with government regulations, contribute to operational efficiency, and maintain the sustainable practices of the Company.

Entrepreneurship and Livelihood

- **Petron Automotive Care Education ("ACE")**. PFI re-instated the Petron Automotive Care Education, or ACE program as another avenue to make PFI's mission of alleviating poverty through education possible. For its initial run, Petron ACE targeted to professionally train and certify automotive mechanics that will serve as a pool of talent for Petron Car Care Centers ("CCC") and Lube Bay Stations. In the third quarter of 2024, PFI conducted the first specialized training for automotive servicing together with program partner Don Bosco-OneTVET Philippines and Petron Lube Trade. A total of 18 Petron CCCs and Lube Bay personnel from Cebu, Davao, Iloilo, Surigao and Iligan graduated from their six-day training in Cebu City and are in the process of securing their NC-1 and 2 certifications from TESDA. In December 2024, a second batch of 11 trainees from NCR undertook the same specialized training at the Don Bosco Technical Institute in Makati City.

PFI will continue to evaluate the implementation of the Petron ACE in close consultation with Lube trade in line with the requirements of Petron CCCs. Looking forward, PFI intends to select trainees who are either Out-of-School Youths and Adults, ALS passers, or from TAP high school partner schools. Once certified, these trainees may be deployed in Petron CCCs, Lube Bay stations, or even be able to be of assistance to Petron Terminals.

Health and Human Services

- **Petron Clinics.** Petron Clinics in Rosario, Pandacan and Limay remained closed to the community, still partly due to continuing Covid precautions and also as part of re-evaluating the preparedness of the clinics to meet the requirements of DOH Administrative Order 2021-0037 or the New Rules and Regulations Governing the Regulation of Clinical Laboratories in the Philippines. In the fourth quarter of 2024, the Petron Rosario Clinic renewed its laboratory License to Operate for 2025.
- **Engaging employees and partners.** Petron employees continued to take to heart their responsibility to society through active participation in the Volunteers in Action program. Employee volunteers from various divisions of the Company in 2024 participated in the following:
 - Cleaning of classrooms in Rivera Village Elementary School, Pasay City
 - TAP school supplies distribution nationwide.
 - Co-facilitation of training sessions under the Best U Can Be program.
 - Participated in various activities celebrating Earth Month, Environment Month, and International Coastal Cleanup Day.
 - Repacking of emergency food rations for calamity victims at the DSWD National Relief Operations Center in Pasay.

ESG and Sustainability

PFI continued to serve as the Secretariat to the Petron ESG Council in developing the Company's sustainability report ("SR"), with the 2023 SR adopting the latest Global Reporting Initiative ("GRI") international guidelines. PFI coordinated the activities of the University of Asia & the Pacific-Center for Social Responsibility, which was engaged to develop the SR, including field visits to Petron Bataan Refinery, Petron Tacloban terminal and New Lube Oil Blending Plant, and a major service stations each in Batangas and Bulacan for stakeholder discussions and sustainability briefings. PFI also contributed to the review, finalization and printing of the SR draft.

PFI also actively participated in the first San Miguel Sustainability Fair. Organized by the SMC Corporate Sustainability Office, the two-day activity aimed to further promote the culture of sustainability among employees of the various business units of SMC through exhibitions and forums. PFI represented Petron's efforts under one of San Miguel's sustainability pillars: Kalinga.

Governance

In May 2024, Petron received the Best Community Programme Award (Silver Category) for TAP and the Petron Refinery's Engineering Scholarship programs at the 16th Annual Global CSR & ESG Summit and Awards held in Hanoi, Vietnam. Awarded by the Pinnacle Group International and Sustainable Technology Centre, the Annual Global CSR & ESG Summit and Awards is "Asia's most prestigious recognition awards program for Corporate Social Responsibility and ESG". It recognizes companies for outstanding and innovative products, services, and projects.

Petron Malaysia

Petron Malaysia, in its drive for sustainable operations, has equipped its Port Dickson Refinery with a diesel hydrotreater facility unit, enabling it to produce Euro-5 specifications diesel products in line with the Malaysian government's thrust to provide cleaner and more environment-friendly fuels to consumers. It also has its Marine Fuel Import Facility 2 which allows importation of larger parcel finished products, thereby optimizing freight costs and reducing carbon emission with fewer sea vessel deliveries. Petron has also started to install solar panels in its service stations to reduce electricity consumption from the grid and supplement it from renewable power source. As part of Petron's firm commitment to provide better value to consumers, Petron Malaysia launched the mobile app version of its P-Miles Loyalty Program, offering better experience, more functionalities and tighter security features as compared to the conventional card-based program. The Company has also enhanced its customers' point of sale experience through its new indoor and outdoor payment terminals at the stations which provide better payment features and convenience to the motorists.

(2) Business of Petron

(i) Principal products or services and their markets

Petron's principal business involves the refining of crude oil and the marketing and distribution of refined petroleum products. It sells a full range of refined petroleum products including gasoline, naphtha, LPG, diesel, jet fuel, kerosene, and petrochemicals (benzene, toluene, mixed xylene, propylene and polypropylene). When necessary, some refined petroleum products are imported. Petron also sells other imported products such as aviation gas and asphalt.

The major markets in the petroleum industry are the reseller (service station), industrial, LPG and lube markets. Petron sells its products through a nationwide network of service stations, LPG dealerships and lube outlets and to industrial end-users and bulk off-takers.

The Company also continues to expand its non-fuel businesses through the Treats convenience store and the addition of various food kiosks, restaurants, and other service establishments at its stations.

(ii) Percentage of sales or revenues by foreign sales

Below is the summary of the percentage of sales or revenues of domestic and foreign sales of the Company and its subsidiaries from 2022 to 2024:

	Domestic	Exports/International	Total
2022, in million pesos	412,743	444,895	857,638
2022, in percentage	48%	52%	100%
2023, in million pesos	413,175	387,852	801,027
2023, in percentage	52%	48%	100%
2024, in million pesos	438,900	429,066	867,966
2024, in percentage	51%	49%	100%

(iii) Distribution methods of products or services

From the Petron Bataan Refinery, Petron moves its products, mainly by sea, to depots, terminals and airport installations situated throughout the Philippines. Its distribution network, comprised of 35 terminals and sales offices across the country, is the most extensive one for petroleum products in the country. Through this nationwide network, Petron supplies its various petroleum products such as gasoline, diesel, and LPG to its customers. Petron also supplies jet fuel to international and domestic carriers at key airports in the Philippines through its 12 into-plane facilities.

Petron sells gasoline, diesel, and kerosene to motorists and to the public transport sector through its network of around 1,800 retail service stations in the Philippines as of December 31, 2024.

Petron also sells its LPG brands *Gasul* and *Fiesta Gas* to households and other consumers through its extensive dealership network.

Petron also manufactures lubricants and greases through its blending plant in Manila, and these products are sold through its service stations, Car Care Centers, and various lubes outlets.

(iv) New products or services

The Company's 2024 new products and approvals from accredited global industry certifying bodies and original equipment manufacturers ("OEMs") are described below.

For 2024, Petron was able to secure the renewal of licenses and approvals for industry standards such as the American Petroleum Institute (API) alongside with the International Lubricant Specification Advisory Committee ("ILSAC"), Association des Constructeurs Européens d'Automobiles/Association European Automobile Manufacturers Association ("ACEA"), National Marine Manufacturers Association ("NMMA"), Japan Lubricating Oil Society ("JALOS"), and OEM approvals from Porsche, Volvo, Mack, Renault, Cummins, MTU, and Scania. Petron also obtained industry standard licenses for food-grade products from Halal, Kosher and National Sanitation Foundation ("NSF").

These globally accepted OEM approvals and licenses are not only applicable to the Philippines but also to the Malaysian, Chinese, Brunei, Vietnamese, and Cambodian markets where the products of the Company are being served.

- License with API

Listed below are the Petron automotive engine oil products that have their API service symbol and API certification mark renewed for 2024:

Product	API Quality Level
Blaze Racing Fully Synthetic SAE 0W-20	API SP/SN Plus Resource Conserving, ILSAC GF-6A
Blaze Racing Fully Synthetic SAE 5W-30	API SN
Blaze Racing Fully Synthetic SAE 5W-40	API SN
Blaze Racing Premium Multigrade SAE 20W-50	API SL
Petron Blaze Racing HTP SAE 0W-40	API SN
Rev-X All Terrain SAE 5W-40	API CJ-4/SM
Rev-X Fully Synthetic 5W-40	API CJ-4 / SN
Rev-X Fully Synthetic 5W-40	API CJ-4 / SM

Rev-X Premium Multi-grade 15W-40	API CI-4 / SL
Rev-X Trekker 15W-40	API CI-4 / SL
Rev-X Turbo HTP SAE 5W-40	API CJ-4 / SN
Ultron Fully Synthetic 5W-40	API SN
Ultron Premium Multi-Grade 20W-50	API SL
Ultron Race 5W-40	API SN

- Registration with ACEA

In 2024, Petron renewed the registration for its Petron Blaze Racing and Petron Rev-X automotive lubricants with ACEA in compliance with the European Engine Lubricant Quality Management System (EELQMS).

- NMMA

Renewal was applied in 2024 for Petron Regatta as TC-W3 approved two-stroke cycle outboard engine lubricant.

- Approval with JALOS

Product approval was maintained in 2024 for Sprint 4T HTP SAE 5W-40 as JASO MA2 approved four-stroke motorcycle engine lubricant.

- Food Grade Lubricants Approval with NSF, Halal and Kosher

Product approval was renewed in 2024 for Petron Hydrotur FG H1-68, Petron Hypex FG H1-150, Petron Hypex FG H1-220, Petron Hypex FG H1-320 and Petron Petrogrease EP FG H1-2 food grade lubricants.

- OEM Approval Renewals

The following OEM approvals were renewed in 2024:

- Blaze Racing HTP SAE 0W-40: Porsche A40
- Rev-X Turbo HTP SAE 5W-40: Cummins CES 20081
- Rev-X Premium Multi-grade SAE 15W-40: Volvo VDS-3, Mack EO-N, Renault Trucks RLD-2

(v) Competition

Petron operates in a deregulated oil industry along with over 500 industry players. With this large number of players participating in the market, competition is intense. Retail and depot network expansion, pricing, and various marketing programs are employed to gain a bigger share of the domestic market. However, Petron's wide retail and depot network and its full range of products allow it to reach the domestic market more effectively than competition.

(vi) Sources and availability of raw materials and the names of principal suppliers

In 2024, Petron purchased all of its term and spot crude requirements through its wholly-owned subsidiary, PSTPL. Majority of the crude purchases were sourced under term contracts with five (5) suppliers, with various spot suppliers completing the balance of requirements. For its 2025 crude requirements, Petron, through PSTPL, will continue to source from both term and spot suppliers.

Petron purchased most of its finished product requirements in 2024 also through PSTPL. For 2025, aviation gasoline, asphalt, LPG, gasoline, base oil and sulfur term contracts will be renewed through PSTPL.

For its coco-methyl ester (“CME”) and ethanol supply, Petron continued to support the directive of the Department of Energy (“DOE”) on the prioritization of locally produced CME and ethanol, complying with government regulation. About 46% of the total ethanol and 100% of CME requirements of the Company in 2024 were sourced from various local producers.

(vii) Dependence on one or a few major customers and identity of any such major customers

Petron and its subsidiaries do not have a single external customer from which sales revenue generated amounted to 20% or more of the total revenue.

(viii) Transactions with and/or dependence on related parties

Petron, certain of its subsidiaries and its affiliate, as well as SMC and certain of its subsidiaries, purchase products and services from one another in the normal course of business.

On August 6, 2019, the Board of Directors of the Company approved the Policy on Related Party Transactions of the Company that requires that all related party transactions of the Company be conducted on an arm’s length basis and under fair terms so that no shareholder or stakeholder will be unduly disadvantaged and there will be no prejudice to the interest of the Company’s stakeholders. Under the terms of this policy, board approval is required for related party transactions with the same related party, either individually or in aggregate over a 12-month period from the first transaction, amounting to at least 10% of the Company’s total consolidated assets based on its latest audited financial statements.

On November 5, 2024, upon the recommendation of the Related Party Transaction Committee of the Board of Directors (with the report of the external independent party Punongbayan & Araullo confirming the arm’s length nature of the proposed transactions) and pursuant to the Policy on Related Party Transactions of the Company, the Board of Directors approved the proposed transactions for 2025 between the Company and PSTPL.

For 2024, the proposed transactions for 2024 between the Company and PSTPL were approved by the Board of Directors on November 7, 2023, upon the recommendation of the Related Party Transaction Committee of the Board of Directors (with the report of the external independent party Punongbayan & Araullo confirming the arm’s length nature of the proposed transactions) and pursuant to the Policy on Related Party Transactions of the Company.

Described below are transactions of Petron with related parties as of 2024:

1. Supply agreements with various SMC subsidiaries. Under these agreements, Petron supplies the fuel and lube requirements of selected SMC plants and subsidiaries.
2. Purchase of goods and services, such as those related to construction, information technology, shipping and terminaling, from various SMC subsidiaries.

3. Lease agreements with San Miguel Properties, Inc. for office space covering 6,747 square meters and certain parcels of lands where service stations are located.
4. Lease agreements with SMC covering certain parcels of lands where service stations are located.
5. Payment to SMC for its share in common expenses such as utilities and management fees.
6. Long-term lease agreements with NVRC covering certain parcels of lands where some of its depots, terminals and service stations are located.
7. Retail of fuel products through its subsidiary PFC and of lube products through PFISB.
8. Insurance coverage from its affiliate Petrogen Insurance Corporation ("Petrogen") which, in turn, obtains reinsurance coverage from Ovincor and other local reinsurers.
9. Certain advances to PCERP for investment opportunities.
10. Certain advances to NVRC and South Luzon Prime Holdings Inc. ("SLPHI").
11. Trading agreement with PSTPL for the procurement of crude oil, and trading of finished petroleum products and other materials such as ethanol, coal, catalysts and additives.
12. Engagement of PSTPL to perform the chartering function such as the renewal and negotiation of contract of affreightments and commodity risk management via hedging transactions.
13. General management services to PFISB.
14. NVRC and SMC subsidiaries entered into various lease agreements for portions of lands located at Limay, Bataan.
15. Logistics and freight forwarding agreement with PLI.
16. Short-term loans from Bank of Commerce.
17. Certain advances from San Miguel Insurance Co. Lt. and Ovincor.

(ix) Patents, trademarks, licenses, franchises, concessions, royalty agreements

The Company's intellectual property registrations and applications as of December 31, 2024 are described below.

Trademark. Petron has registered the following trademarks for a term of 10 years: Petron (word mark), Petron (logo), P logo (color), P logo (black and white), Petron Canopy Fascia, Petron Canopy Fascia (color), Petron Canopy Fascia (black and white), Blaze, Diesel Max, Petron Blaze 100, Blaze 100 Octane Euro 6, Petron XCS3, Petron Super Xtra Gasoline, Xtra Advance (inside a rectangle device), Blaze Racing, Thermal Control System, Tri-Action Advantage, Petron XCS3, Triangle Device, Boomerang Device, Gasul (stylized), Gasulite, LPG Gasul Cylinder 50 kg, Gasul and Device, LPG Gasul Cylinder 11 kg, Petron Gasul 11-kg POL-VALVED Cylinder, New Gasulito (word mark), Petron Gasul Elite (wordmark), Petron Gasul Elite (Black & white), Petron Gasul Elite Blue Pantone 298, Fiesta Gas with device, Xtra, Fiesta Gas 2.7kg cylinder, Fiesta Gas 5kg cylinder, Fiesta Gas 5kg POL-VALVED, Fiesta Gas 11kg cylinder, Fiesta Gas 11kg POL-VALVED, Fiesta Gas 22kg POL-VALVED, Fiesta Gas 50kg POL-VALVED, REV-X, Rev-X Hauler, Rev-X HD, Rev-X Turbo, Ultron Rallye, Ultron Extra, Ultron Touring, Sprint 4T, Clean 'n Shine, Rider, Rider 4T, ADVANSTRASSE MOTO (word mark), ADVANSTRASSE MOTO (logo), 3D Engine Oil Lubricant Bottle 1L

and 6L (black), 3D Engine Oil Lubricant Bottle 1L and 6L (red), 3D Engine Oil Lubricant Bottle 1L and 6L (silver), 3D Engine Oil Lubricant Bottle 1L and 6L (blue), 3D Specialty Lubricant Bottle 1L (silver), 3D Specialty Lubricant Bottle 1L (black), Petron Value Card and Device, Petron Super Driver, Petron Fleet Card & device, e-fuel, Car Care Center & Logo, Treats (word mark), Treats & device, Treats & device with blue background, Lakbay Alalay (word mark), LakbayAlalay (logo), LakbayAlalay, LakbayLigtas, LakbayAlalay Para sa Kalikasan, Sagip Alalay, Tulong Aral ng Petron & Device, Puno ng Buhay, Fuel Hope, Fuel Trust, Fuel Experience, Fuel Drive, Fuel Excellence, Fuel Efficiency, I fuel (logo), I Fuel Hope, I Fuel Communities, Petron Blaze Spikers, Petron Lakbay Pinoy, Ultimate Release from Engine Stress, Your friend on the Road, Super Tsuper, Road Safety & device, Ronnie Mascot, Seat Belts Save Lives, Pay with Points Save your Cash, Thermal Stress Stabilizing System, Dynamic Cleaning Technology, Your Fleet Your Rules, Blu & Device, Blu with Gasul Tank, Performance Run, Petron Best Day, Super Saya, Power that Persists, Mean Clean Machine, Petron Motorsports, Fuel Wise (long form), Fuel Wise (flag type), Fuel Wise (long form in black), Fuel Wise (flag type in black), Fuel Wise, Kalmakina (colored), Kalmakina (word mark), Kalmakina (black and white), Hypex, 2T, Turnol, Gearfluid, Petron Autokote, GEP, Marinekote, Petron 2040, Pchem, Xtend, HTP, Petrolene, PCHEM DEF (Diesel Exhaust Fluid), Petromate, TCS and Device, TDH50 (word mark), Petron Pinoy Fuels & Device, Maxi Gas, Xtra Exceed, Xtra Ultra, Xtra Prime, Xtra Miles, Pinoy HP Gasoline, Xtra Excel, UnliPower Saver Gasoline, Petron PMB, Reyna (logo), and Reyna (word mark), Turbo Diesel (logo), Vision Petron, 3D Gasul 2.7kg, 3D Fiesta 2.7kg, 3D Gasul 2.7kg (colored), 3D Fiesta 2.7kg (colored), AUTO ADVANSTRASSE, AUTO ADVANSTRASSE logo, REV-X HD4X, REV-X HD, Sprint 4T (logo), ELITE (logo), Fe Dela Fiesta (logo), New Petron Logo, Vision Petron (logo), 2T (logo), Zerflo and Puno ng Buhay (updated mark), Petron Sagip Alalay (new logo), XCS (logo), Reyna and Reyna Gas, Ultron (logo), Petron Super Driver Card (logo-long form), Petron Super Driver Card (logo-flag form), Car Care Center (logo), Rev-X Hauler (word mark), Ultron Touring (word mark), Voltran (word mark), Spinol (word mark), Petron XD3, Blaze 100 Octane (logo), Petron Motorsports (word mark), Petrogrease (wordmark); HiComp, Hydrotur, Sprint 4T Racer, Gearkote (word mark), Airlube (word mark), Petromar (word mark), Milrol (word mark), Pchem (word mark), Petron HDX (word mark), Petrokut (word mark), Petron GEP (word mark), Petromul (word mark), Petrotherm (word mark), Rubbex (word mark), Petrocyl 680 (word mark), Xtra Advance, Petron Chinese name (logo - long form), Petron Chinese name (logo - flag form), Petron Value Card (word mark), Petron ATF Premium, Petron Super Driver (word mark), Turnol, Petron STM, Petron Marinekote, Gasulette (word mark), Xtra Excel, Hypex (word mark), Motorsports with the P-swoosh logo, Best Day @ Petron, Petrogrease EP, Stemol, Treats Packaging Design, Petron Ronnie Mascot (logo), Greasolve, Sprint 4T Rider, Sprint 4T Enduro, Sprint 4T Extra, Petromate Power Booster, Best Day@Petron (logo), Petron GX (word mark), Petromate Oil Saver, Petron TF, Xtra Ultra, Xtra Exceed, Captain Booster (word mark), Tri Action Advantage (word mark); PShop (logo); Petron Railroad Extra, Engine Stress Reliever, Ultron Race; Petron GST; Petron Penetrating Oil, Rev-X Trekker, Tapat Sa'Yo (logo); Maxi-Gas; Sprint (word mark), Sprint (logo); Pay with Points, Save Your Cash (word mark), Grease Away; Performance Run (logo), Hi-Torq TX, Petron Tapat Sa'yo.

Pending Trademark Applications. Petron has pending applications for registration of the following trademarks: Miles Better (word mark), 3D Petron Engine Oil Jerry Can Bottle 1L and 800ml (black), 3D Petron Engine Oil Jerry Can Bottle 1L and 800ml (dark grey), 3D Petron Engine Oil Jerry Can Bottle 1L and 800ml (blue), 3D Petron Engine Oil Jerry Can Bottle 1L and 800ml (red), 3D Petron Engine Oil Jerry Can Bottle 1L and 800ml (silver), CCC Automotive Fluids Specialist, XTEND (logo), Petron Value Card (logo - long form), Petron Value Card (logo - flag form), Gas Up & Dine, Petron Pinoy Fuels (wordmark), and Turbo Plus (logo), Lakbay Alalay Para sa Kalikasan-A Journey of Nurturing Nature, Performance Run, Gasulite, Petromul, Molygrease, Gearfluid, Hypex, Unli Power-saver Gasoline, Pinoy HP Gasoline, Treats to Go, and 3D Petron Gasul Elite, Treats logo (colored), Treats logo (B&W), Fuel Trust (word mark), Fuel Hope (word mark), Seat Belts Save Lives (word mark), Your Fleet Your Rules (word mark).

Petron also has registered and pending trademarks in other countries such as Malaysia, Indonesia, Cambodia, Thailand, Australia, China, United Kingdom, India, Japan, Republic of Korea, Singapore, Hong Kong, China and Saudi Arabia. The Company has filed trademark applications in Malaysia relating to its Malaysian operations. It has obtained copyright protection for the stylized letter "P" and has registered trademarks in Malaysia, including but not limited to the Petron, Petron Logo, Gas Miles, Gasul, Fiesta

Gas, Energen, Petron Plus, Perks, Miles, Propel, XCS, Petromate, Hydrotur, Miles with P-Logo, MILES with P Logo and 'Privilege Miles Card' words, Petroil, Fuel Journeys, Better by Miles, Petron Cares, DCL 100, Petromar, Energy, Treats with Crocodile Logo, and Petron Greenfuel, Kedai Mart with P logo, Rider, Rider 4T, Petrolaysia, Prime, Petron with Canopy Fascia logo, Petron Racing, Sprint 4T, Rev-X Diesel Engine Oils, Prestige, Xtra Mile, Xtra Unleaded, Treats and Device, Petron Value Card Rewards & Benefits, Turbo Diesel, Diesel Maz, Blaze Gasoline, Petron XCS3, Powerburn 2T & Device, Racing, Powerburn, Petrogrease, Greaseway, GEP, Gearfluid, Clean 'n Shine, ATF, Treats & Device, Powered by Petron, Miles with P Logo & Petrol Word, Petromar HD, Blaze with P Logo and Petrol, Fuel Trust, Fuel Success, Fuel Hope, Blaze Racing, Fuel Care, Treats, Petron Motorsports, Fuel Life, Fueled by Petron, Miles Better, Your Fleet Your Rules, 5th year Anniversary Fuel Happy, and Petron Car Care Center.

Copyright. Petron has copyrights for its seven (7)-kg LPG container, Gasulito with stylized letter "P" and two (2) flames, Powerburn 2T, Petron New Logo (22 styles), Philippine Card Designs and Malaysian Card Designs, and Petron font. Copyrights are protected during the lifetime of the creator and for 50 years after the creator's death.

Industrial Design. Petron has registered the following industrial designs: Petron Specialty Lubricant Bottle (1Liter container), Petron Engine Oil Bottles (4L and 6L container), Petron Fiesta 2.7kg LPG Cylinder, Petron Gasul 2.7kg LPG cylinder and Petron Engine Oil Bottles (1L and 800ML Jerry can bottle container), Gas Cylinder, Gas Cylinder Valve.

Pending Industrial Design Applications. Petron has a pending application for registration of the industrial designs for its Service Station Canopy Design.

(x) Government Approval of Principal Products or Services

Government approval of Petron products and services is not generally required. Petroleum products, both locally refined and imported, however, must conform to specifications under the Philippine National Standards. Importations of petroleum products and additives are reported to the DOE, in accordance with the Downstream Oil Industry Deregulation Act of 1998 and its implementing rules and regulations. Clearances are secured from concerned government authorities for importations of restricted goods. The supply of products or services to government and government agencies undergo a bidding process in accordance with law.

(xi) Effect of existing or probable government regulations on the business

- Extended Producer's Responsibility Act of 2022 ("EPR Law"). Republic Act No. 11898 or the "EPR Law" lapsed into law on July 23, 2022. The law, which amends Republic Act No. 9003, otherwise known as "The Ecological Solid Waste Management Act of 2000", requires product manufacturers and obliged companies to recover a certain portion of their plastic packaging wastes to reduce their plastic footprint. As required under the law, the Company is obliged to comply with target recovery rates starting with 20% in 2023 and gradually increasing to 80% until 2028.
- Electric Vehicle Industry Development Act ("EVIDA"); Department Circular 2021-07-0023. Republic Act No. 11697 or EVIDA lapsed into law on April 15, 2022. The law provides for a national policy framework to develop the electric vehicle ("EV") industry in the Philippines. The DOE issued the above circular on July 2, 2021 which provides the framework for the adoption and development of EVs and electric charging stations in the Philippines, including the installation of EVCs in retail stations. The promotion of the purchase and use of electric vehicles may impact oil industry demand.
- Corporate Recovery and Tax Incentives for Enterprise Act ("CREATE Act"). Republic Act No. 11534 or the CREATE Act took effect on April 11, 2021. The CREATE Act lowers corporate income taxes and rationalizes fiscal incentives.

The corporate income tax rate for domestic corporations and resident foreign corporations has been reduced to 25% effective July 1, 2020 and on January 1, 2021 for non-resident foreign corporations. Domestic corporations and resident foreign corporations no longer have an option to be taxed at 15% on gross income and the rate of the minimum corporate income tax ("MCIT") shall be lowered to 1% from July 1, 2020 to June 30, 2023.

Subsequently, commencing on July 1, 2023, the MCIT has reverted to its former rate of 2%. Under the CREATE Act, persons who directly import petroleum products for resale in the Philippine customs territory and/or in free zones will be subject to applicable duties and taxes. However, importers can file for the refund of duties and taxes for direct or indirect export of petroleum products, including the subsequent export of fuel, subject to the appropriate rules of the fuel marking program and/or other tax-exempt sales by the importer.

The CREATE Act also provides for the rationalization of tax incentives that may be granted by investment promotion agencies (such as the Authority of the Freeport Area of Bataan or AFAB) to qualified registered business enterprises. As part of the rationalization of tax incentives, the CREATE Act provides that, any law to the contrary notwithstanding, (i) the importation of petroleum products by any person will be subject to the payment of applicable duties and taxes under the Customs Modernization and Tariff Act and the National Internal Revenue Code, respectively, upon importation into the Philippine customs territory and/or into free zones (as defined in the Customs Modernization and Tariff Act), subject to the right of the importer to file claims for refund of duties and taxes under applicable law; and (ii) the importation of crude oil that is intended to be refined at a local refinery—including the volumes that are lost and not converted to petroleum products when the crude oil actually undergoes the refining process—will be exempt from payment of applicable duties and taxes, provided that the applicable duties and taxes on the refined petroleum products shall be paid upon the lifting of the petroleum products produced from the imported crude oil in accordance with the rules and regulations that may be prescribed by the Bureau of Customs and the Bureau of Internal Revenue.

Under the CREATE Act, the Company shall be entitled to, among others: (i) a lower corporate income tax and (ii) the tax exemption for the importation of crude oil to be refined at a local petroleum refinery.

The law also provides that domestic refiners pay VAT on finished petroleum products sourced from crude importation upon withdrawal from the refinery. Prior to the CREATE Act, VAT was required to be paid upon crude importation. With this change, the timing of the payment of VAT by domestic refiners has been aligned with oil importers who pay VAT upon importation of finished petroleum products.

- Amendments to the CREATE Law ("CREATE MORE"). Republic Act No. 12066, or the CREATE Maximize Opportunities for Reinvigorating the Economy, was signed on November 11, 2024. The law amended several provisions of the CREATE Law to enhance the tax regime and incentive framework to attract both domestic and international investments, particularly, in strategic industries and provide clearer guidelines on excise tax exemptions, VAT zero-rating, and tax refund claims, among others. Some provisions are expected to have an impact on the Company, as follows:
 - Removal of the minimum creditable withholding tax rate and reducing the maximum creditable withholding tax rate to 15%
 - Reduction of the BIR's period to process excise tax refund claims to a period of ninety (90) days from filing of the application by the taxpayers.

The law also provided for an increased threshold for investments that will fall within the approval of Investment Promotion Activities (IPA) instead of the Fiscal Incentives Review Board (FIRB). In particular, only those investments amounting to above Php15 billion will go thru the FIRB for approval.

- LPG Industry Regulation Act. Republic Act No. 11592 or the “LPG Industry Regulation Act”, enacted into law on October 14, 2021, aims to ensure health, safety, security, environmental and quality standards in the LPG industry by instituting reforms in the existing standards and practices. The law defines prohibited acts such as engaging in LPG industry activities without the required licenses, certificates, and permits; selling, fabricating, or refilling unfilled LPG cylinders without the approval of the trademark owner; selling, exchanging, possessing empty LPG cylinders that belong to another trademark owner; and non-compliance with standards such as those relating to safety, materials, and markings. It also provides for the establishment of an LPG Cylinder Exchange and Swapping Program for the exchange, swapping or buy-back of LPG cylinders among industry participants and the establishment of accredited swapping centers. As of date, various circulars are in their implementation stage, including the application guidelines for License to Operate (DOE DC 2022-11-037), establishment of LPG Cylinder Exchange and Swapping Program (DOE Department Circular 2022-11-0002), and Guidelines for the Recognition of LPG Training Institutions (DOE Department Circular 2023-08-0025).
- Tax Reform for Acceleration and Inclusion (the “TRAIN Law”). Republic Act No. 10963 or the TRAIN Law, which took effect on January 1, 2018, imposed a phased increase in excise taxes on petroleum products from 2018 to 2020. The schedule of increase for this three (3)-year period was as follows:
 - P2.65-P2-P1 per liter (“/li”) per year for gasoline;
 - P2.50-P2-P1.50/li for diesel and fuel oil;
 - P1-P1-P1/kg for LPG; and
 - P0.33-P0-P0/li for jet fuel.

The incremental excise tax is further subject to 12% VAT. Higher excise taxes can potentially constrain demand growth, especially for LPG given there are substitutes such as charcoal, kerosene and electric, and gasoline with public transportation as alternative.

The TRAIN Law also mandates the implementation of a fuel marking program for diesel, gasoline and kerosene to help curb illicit trading of fuel products. While the cost for the fuel marker was shouldered by the government in the initial year of implementation, this cost was eventually passed on to oil companies beginning 2020 which resulted in higher fuel prices.

- Biofuels Act of 2006 (the “Biofuels Act”). Republic Act No. 10745 or the Biofuels Act and its implementing circulars mandate that gasoline and diesel volumes contain 10% bioethanol and 2% biodiesel/CME components, respectively. To produce compliant fuels, the Company invested in CME injection systems at the Petron Bataan Refinery and the depots. On the bioethanol component, the DOE issued in June 2015 “Amending Department Circular No. 2011-02-0001 entitled Mandatory Use of Biofuel Blend” (Department Circular No. 2015-06-0005) that currently exempts premium plus gasoline from the 10% blending requirement.

In terms of reportorial requirements, the DOE issued the “Revised Circular for the Accreditation and Submission of Notices and Reports of the Philippine Downstream Oil Industry Pursuant to the Biofuels Act” on July 2, 2021 (Department Circular 2021-06-0014), requiring oil companies to submit notices and accreditation and reportorial requirements using revised templates in relation to the utilization of biofuels. The new circular provides for more stringent penalties and additional monthly and quarterly reports for DOE to monitor compliance on the utilization of biofuels, including compliance with local monthly allocation for ethanol.

For the CME component, the DOE issued last May 7, 2024 Department Circular 2024-05-0014 which mandates all oil industry players to implement a 3% (CME blend), from current B2, beginning October 1, 2024. This percentage will gradually increase to 4% by October 1, 2025 and to 5% by October 1, 2026. While increase in CME blend is mandatory, the shift to E20 from E10 is on a voluntary basis.

- Renewable Energy Act of 2008 (the “Renewable Energy Act”). Republic Act No. 9513 or the Renewable Energy Act aims to promote development and commercialization of renewable and environment-friendly energy resources (e.g., biomass, solar, wind, hydro, geothermal) through various tax incentives such as seven (7)-year income tax holiday and duty-free importation of renewable energy equipment and machinery. The sale of power generated from these sources is also exempt from value-added tax under the TRAIN Law. The growth in renewable energy may displace or reduce use of oil-based power plants affecting the Company’s sales to the power sector.
- Clean Air Act of 1999 (the “Clean Air Act”). Republic Act No. 8749 or the Clean Air Act established air quality guidelines and emission standards for stationary and mobile equipment. It also included the required specifications for gasoline, diesel and IFO to allow attainment of emission standards. Petron invested in a gasoil hydrotreater plant and an isomerization plant to enable it to produce diesel and gasoline compliant with the standards set by law.
- Laws on Controlled Chemicals (Presidential Decree No. 1866 as amended by Republic Act No. 9516). The implementing rules and regulations for this amended law were approved on June 9, 2016 and listed the chemicals under the control of the Philippine National Police. These rules reduced the controlled list from 101 to 32 chemicals and further classified 15 chemicals as high-risk and 17 as low-risk substances. The rules also outline the procedures for regulating, storing, handling and transporting chemicals.
- Compliance with Euro 4 standards. In September 2010, the DENR issued Administrative Order 2010-23 mandating that, by 2016, all new motor vehicles that would be introduced in the market shall comply with Euro 4 emission limits, subject to Euro 4 fuel availability.

In June 2015, the DOE issued Circular 2015 - 06-0004 entitled “Implementing the Corresponding Philippine National Standard Specifications (PNS) for the Euro 4/IV PH Fuels Complying with the Euro 4/IV Emissions” directing all oil companies to adopt Euro4-compliant fuels. With its RMP-2, Petron is now producing Euro 4-compliant fuels ahead of the 2016 mandate.

- Laws on Oil Pollution. To address issues on marine pollution and oil spillage, the Maritime Industry Authority (“MARINA”) mandated the use of double-hull vessels for transporting black products beginning end-2008 and white products by 2011. Petron has been using double-hull vessels in transporting all its products.
- Oil Marine Pollution Circulars. The Philippine Coast Guard has memorandum circulars prescribing the rules and regulations on the prevention, containment, abatement and control of oil marine pollution by all marine vessels, coastal and offshore facilities and other facilities utilizing or storing petroleum products. The circulars identify the prohibited acts and provide the penalties.
- Anti-Competition Law (the “Philippine Competition Act”). The Philippine Competition Act, approved in July 2015, prohibits anti-competitive agreements, abuses of dominant positions, and mergers and acquisitions that limit, prevent, and restrict competition. To implement the national competition policy and attain the objectives and purposes of the law, the Philippine Competition Commission (“PCC”) was created. Among the powers of the PCC is the review of mergers and acquisitions based on factors it may deem relevant. The PCC, after due notice and hearing, may impose administrative

finer on any entity found to have violated the provisions of the law on prohibited arrangements or to have failed to provide prior notification to the PCC of certain mergers and acquisitions.

The PCC is empowered to impose criminal penalties on an entity that enters into any anti-competitive agreement and, when the entities involved are juridical persons, on its officers, directors, or employees holding managerial positions who are knowingly and willfully responsible for such violation. Currently pending with the House of Representatives are two bills to amend the Philippine Competition Act to, among others, legislate competition policy, amend requirements for PCC notification, and strengthen the powers of the PCC.

- Amended Price Freeze Act of 2013. Republic Act No. 10623 or the Amended Price Freeze Act was signed on September 6, 2013. This law mandates the implementation of a 15-day price freeze for basic necessities, including LPG and kerosene, for areas declared under a state of emergency or calamity. Further to this, senior citizens and persons with disabilities (“PWDs”) are entitled to a discount for LPG and kerosene as mandated by the following:
 - Joint Administrative Order 17-01. Issued on February 17, 2021, this order provides for 5% special discount for basic necessities, including household LPG and kerosene.
 - Joint Memorandum Circular No. 01, s. 2022. Issued on May 6, 2022, this joint circular ensures that the discounts and privileges of senior citizens and PWDs are recognized if transactions are made online.
- Executive Order (“EO”) 890: Removing Import Duties on All Crude and Refined Petroleum Products. After the ASEAN Trade in Goods Agreement was implemented in 2010, the tariff rate structure in the oil industry was distorted with crude and product imports from ASEAN countries enjoying zero tariff while crude and product imports from outside the ASEAN were levied a 3% tariff.

To level the playing field, Petron filed a petition with the Tariff Commission to apply the same tariff duty on crude and petroleum product imports, regardless of source. In June 2010, the government approved Petron’s petition and issued EO 890 which eliminated import duties on all crude and petroleum products regardless of source. The reduction of duties took effect on July 4, 2010.

- Oil Deregulation Law. Approved on February 10, 1998, the law provides for a liberalized and deregulated framework for the downstream oil industry. Recent circulars that serve as additional and more updated guidelines in implementing the law include the following:
 - Department Circular 2019-05-008. This DOE circular requires oil companies to submit a detailed computation, with corresponding explanation and supporting documents, of the cost components of liquid fuel and LPG on a per liter and per product basis. The circular has not been implemented following the temporary restraining orders and writs of preliminary injunction issued by the Regional Trial Courts of Taguig and Mandaluyong. Last September 10, 2024, the Supreme Court made public its decision dated July 31, 2024 affirming the validity of the circular in one of the cases filed against its implementation.
 - Department Circular 2021-09-0029. The “Revised Guidelines on Notices and Reportorial Requirements Pursuant to the Oil Deregulation Law” was published on November 5, 2021 requires the submission of monthly and annual reports using revised templates for DOE to monitor importation and/or production of oil companies (and for Petron as a refiner) and includes additional reportorial requirements for lubes and blending plants, with more stringent penalties for non-compliance.

- Energy Regulatory Commission Resolution 17 (Series of 2003). The Energy Regulatory Commission issued a resolution in September 13, 2023 that provides for revised guidelines for the application and issuance of a Certificate of Compliance for generation facilities.

(xii) Estimate of the amount spent during each of the last three fiscal years on research and development activities

The Company's Research and Development ("R&D") is responsible for all product development that complies with government laws and regulations such as the Clean Air Act and the Biofuels Act. Other drivers of product innovations are the requirements of original engine manufacturers and the latest technological trends in the industry.

In 2024, Petron R&D spent a total of Php87.46 million, an increase from the Php87.42 million spent in 2023 and the Php61.07 million expended in 2022.

(xiii) Costs and effects of compliance with environmental laws

Compliance with the various environmental laws such as the Renewable Energy Act, the Biofuels Act, the Clean Air Act, and the Clean Water Act entails costs and additional investments on the part of the Company, resulting in higher production costs and operating expenses.

In 2024, the Company spent a total of Php49.34 million for treatment of wastes, monitoring and compliance, permits, and personnel training at the Petron Bataan Refinery while in 2023, it spent a total of Php50.63 million.

(xiv) Total number of employees and labor relations matters

As of December 31, 2024, the Company and its subsidiaries had 4,149 employees, with 2,343 employees in the Company (comprising one president, one general manager, 31 vice presidents and assistant vice presidents, 1,691 managerial, supervisory, professional and technical employees, and 619 rank-and-file employees); 716 employees of the Company's Malaysian operations; 23 in PSTPL; 1,058 in PLI; and 9 in PFC.

Petron has CBAs with its three (3) labor unions, namely: (i) Bataan Refiners Union of the Philippines ("BRUP"), which is affiliated with the Philippine Transport and General Workers Organization; (ii) Petron Employees Labor Union ("PELU"), affiliated with the Philippine Transport and General Workers Organization, and (iii) Petron Employees Association ("PEA"), which is affiliated with the National Association of Trade Unions. The CBAs of BRUP and PELU, which cover the period January 1, 2022 to December 31, 2024, are under negotiation for renewal. While PEA's CBA covers the period from January 1, 2023 to December 31, 2025.

In addition to the statutory benefits, the Company provides medical and life insurance, vacation, sick and emergency leaves, computer and emergency loans to employees, and a savings plan program.

(xv) Major Risks Involved

The Company's Enterprise-Wide Risk Management ("ERM") framework and programs are designed to enable the organization to achieve its corporate objectives while managing risks that may adversely impact the attainment of such objectives. Risk management is integrated in the daily operations and performance of the entire organization. Identified risks are analyzed and evaluated and major risks are regularly reported and raised to top management level for continuous monitoring and decision-making. The risk management process is integrated in the yearly business planning of all major divisions and departments, with the resulting annual business plan formulated being presented to the Board of

Directors for approval. The ERM framework, which is based on ISO 31000, likewise searches for strategic risks that present opportunities and may create or add value to the Company.

The Company has a Chief Risk Officer who supervises the entire enterprise risk management process of the Company and spearheads the development, implementation, and continuous improvement of the Company's enterprise risk management processes and documentation. He heads the Enterprise-wide Risk Management Group, tasked to lead the enterprise risk management program of the Company. All the heads of the Company's divisions are designated owners of all the risks emanating from their respective groups and each group is represented in the Risk Management Committee, the working group which is the conduit in cascading risk management efforts of Management to all employees and in receiving any feedback from them.

Major Risks

The Company, in assessing the risks that confront each Division and the entire Company in general, is guided by its risk appetite and tolerances such that risks that pose high likelihood of occurrence and huge financial impact are immediately addressed for elimination or at least mitigation so as not to pose hindrances in attaining the Company's business objectives. In 2024, the following risks were given such priority attention.

1. **Crude and Product Price Volatility.** The Company is exposed to uncontrollable price fluctuations in input crude and output finished products. Price movements and volatility are brought about by changes in global supply and demand for crude oil and finished products, international economic conditions, global conflicts and geopolitical issues, and other factors over which the Company has no control. Currently, events such as the war in Gaza, conflicts at the Red Sea, the Russia-Ukraine war, and US tariff imposition and trade war have resulted in oil price swings. Such volatility may result in cash flow variability and an increase in financing expenses.

The Company mitigates this risk by entering into commodity hedging for its crude and product exposure. The Company has a Commodity Risk Management Committee that actively evaluates hedging policies and strategies to protect the Company from risks of inventory losses and margin contraction. The Company also regularly assesses refinery utilization considering the latest price outlook and demand forecasts, and prudently manages its capital and operating expenses and receivables, particularly during times of high volatility.

2. **Financial Risks.** The Company is capital intensive and spends substantially on the processing and purchase of crude oil and other fuel products, and investments in upgrading and maintaining the Company's facilities, which requires Petron to incur debt to finance these expenses. With loan levels both in the peso and foreign currencies, the Company faces financial risks from an increase in interest rates and fluctuations in foreign exchange. An increase in interest rate would mean an increase in interest payments to the lenders, while swings in foreign exchange would impact our foreign-denominated debt and interest payments in peso terms.

To manage these financial risks, the Company maintains an optimum mix of fixed and floating rate loans, and peso and foreign-denominated loans. The Company also engages in hedging activities using forwards and other derivative instruments, and generating dollar-denominated sales to reduce foreign exchange exposure. Finally, the Company negotiates for tighter spreads of loan facilities for long-term loans.

Moreover, the Company uses an enterprise resource planning software that monitors financial transactions. This planning tool allows real-time awareness and response to contain losses posed by foreign exchange exposure.

3. **Operational Risk.** These may be caused by unplanned events such as serious process or machine failure, accidents, weather-related events, or human error at the Company's refinery, terminals, depots and other facilities. These disruptions may result in injury or loss of life, damage to Company property, or damage to other properties in the immediate area where the facility is situated or in financial losses from product run-outs, loss of sales or loss of margins from required spot purchases.

To mitigate these risks, the Company ensures that the Petron Bataan Refinery and the terminals adopt best practices in operations and adhere to a program of planned, preventive and predictive maintenance. For the Petron Bataan Refinery, in 2024 a scheduled shutdown maintenance was completed which is periodically carried out in accordance with an established turnaround planning cycle. In addition, routine, preventive and corrective reliability and maintenance programs are implemented, supported by adequate and advanced instrumentation with the appropriate tools and equipment. The Petron Bataan Refinery, the country's only oil refining facility, continues to be Integrated Management System ("IMS")-certified which demonstrates the Company's continuous adherence to global standards on safety, health, quality and environmental management. The Company's IMS certification covers the Environmental Management System (EMS, ISO 14001:2004), Quality Management System (QMS, ISO 9001:2008S) and Occupational Health and Safety Management System (OHSMS, 18001:2007).

All of the Company's 30 terminals have been certified under the ISO 9001:2015 (QMS), while 29 terminals received certification for ISO 14001:2015 (EMS), and ISO 45001:2018 (Occupational Health and Safety Management System) standards. Moreover, the Petron pier facilities are compliant with the International Ship and Port Facility Security or ISPS Code which is certified by the Office for Transportation Security under the Department of Transportation.

The Company likewise maintains insurance which covers property, marine cargo and third-party liability, as well as personal injury, accidental death and dismemberment, sabotage and terrorism, and machinery breakdown. One of the main insurance policies of the Company, the Industrial All Risk policy, covers the Petron Bataan Refinery for material damages, including machinery breakdown cover.

4. **Cyber Security.** As the Company becomes more reliant on technology to support operations and enable efficiency and innovation, Petron becomes susceptible to information technology ("IT") security threats that may impact business continuity, data integrity, and regulatory compliance. These threats may come from inside and outside of the organization, can be intentional, as with cybercriminals, or unintentional, as with employees, contractors or vendors who accidentally click malicious links or download malware. And as these IT security and cybersecurity threats continue to escalate in ferocity and complexity, the Management Information Systems Department ("MISD") of the Company has implemented IT security strategies that combine a range of security systems, framework/programs and technologies to protect Petron's entire IT infrastructure, including hardware systems, software applications and endpoints, to prevent or mitigate the impact of known and unknown threats.

Since these threats are fast-evolving, the Company has been continuously working on strengthening its foundation and improving the response plan to maintain a confident security posture. The Company also implemented proactive measures to further improve our threat detection, response and prevention capabilities. As cyberattacks, such as phishing attacks exploit human vulnerabilities, the Company is also focused on user training and empowerment to educate employees to recognize security threats and practice secure workplace habits.

(B) Description of Property

Petron operates an extensive network of terminals, depots, LPG refilling plants and aviation installations which are located in Luzon, Visayas and Mindanao. As of December 31, 2024, its bulk fuel terminals were in Limay, Bataan; Mabini, Batangas; Mandaue City, Cebu; Poro Point, San Fernando, La Union; Navotas, Metro Manila; Rosario, Cavite; Puerto Princesa, Palawan; Culasi, Roxas City; Lapuz, Iloilo City; Bacolod City, Negros Occidental; Ormoc City, Leyte; Anibong, Tacloban City; Isabel, Leyte; Tagoloan, Misamis Oriental; Sasa, Davao City; Iligan City, Lanao del Norte; Jimenez, Misamis Occidental; Bawing, General Santos City; Nasipit, Agusan del Norte; and Zamboanga City. It has third-party facilities at Harbor Center, Tondo, Manila; Limay, Bataan; Subic, Zambales; and PHIVIDEC, Tagoloan, Misamis Oriental. Its sales offices are located in Calapan, Oriental Mindoro; San Jose in Occidental Mindoro; Odiongan, Romblon; Pasacao, Camarines Sur; Mobo, Masbate; Amlan, Negros Oriental; and Tagbilaran City, Bohol. Petron has LPG bulk refilling plants in Ugong, Pasig City; San Fernando, Pampanga; San Pablo City, Laguna; and Legazpi City, Albay. Among its other installations are aviation depots at JOCASP-NAIA, Pasay City; Mactan, Cebu; Laguindingan, Misamis Oriental; Panglao, Bohol; and Davao City; third-party aviation facilities at Kalibo, Aklan and Clark, Pampanga; airport installations at Laoag City; Puerto Princesa, Palawan; Iloilo City; Caticlan, Aklan; and Zamboanga City; an additive plant in Subic, Zambales, a grease plant in Pandacan Manila, and a lube oil blending plant in Harbor Center, Tondo, Manila. Petron owns the largest petroleum refinery complex in the Philippines located in Limay, Bataan, with a crude distillation capacity of 180,000 barrels per day. In addition to major process units, the refinery also has several crude and product storage tanks, along with its own piers and other berthing facilities, one of which can accommodate very large crude carriers.

The Company entered into commercial leases with the PNOC for parcels of land occupied by the Petron Bataan Refinery, depots, terminals and some of its service stations. The lease agreements include upward escalation adjustment of the annual rental rates. In 2009, the Company renewed its lease with PNOC (through NVRC) for the continued use of the Petron Bataan Refinery for 30 years starting January 1, 2010 (renewable upon agreement of the parties for another 25 years). In 2015, the Company also entered into another 25-year lease agreement with PNOC effective August 1, 2014 for additional lots near the Petron Bataan Refinery for its expansion projects. Expenses relating to the PNOC leases amounted to Php393 million in 2024.

On October 20, 2017, the Company filed with the Regional Trial Court of Mandaluyong City a complaint against PNOC for Resolution and Reconveyance, and Damages, with Verified Ex Parte Application for 72-hour Temporary Restraining Order and Verified Applications for 20-day Temporary Restraining Order and Writ of Preliminary Injunction. In its complaint, the Company sought the reconveyance of the various landholdings it conveyed to PNOC in 1993 as a result of the government-mandated privatization of the Company. These landholdings consist of the refinery lots in Limay, Bataan, 23 bulk plant sites and 66 service station lots located in different parts of the country. The Deeds of Conveyance covering the landholdings provide that the transfer of these lots to PNOC was without prejudice to the continued long-term use by the Company of the conveyed lots for its business operation. Thus, PNOC and the Company executed three lease agreements covering the refinery lots, the bulk plants, and the service station sites, all with an initial lease term of 25 years to expire in August 2018, with a provision for automatic renewal for another 25 years. Earlier in 2009, the Company, through its realty subsidiary, NVRC, had an early renewal of the lease agreement for the refinery lots with an initial lease term of 30 years, renewable for another 25 years.

The complaint stemmed from PNOC's refusal to honor both the automatic renewal clause in the lease agreements for the bulk plants and the service station sites and the renewed lease agreement for the refinery lots on the alleged ground that all such lease agreements were grossly disadvantageous to PNOC, a government-owned and -controlled corporation. The Company alleged that by unilaterally setting aside both the renewal clauses of the lease agreements for the bulk plants and the service station sites and the renewed lease agreement for the refinery lots, and by categorically declaring its refusal to honor them, PNOC committed a fundamental breach of such lease agreements with the Company. On December

11, 2017, the trial court granted the Company's prayer for a writ of preliminary injunction, enjoining PNOC from committing any act aimed at ousting the Company of possession of the subject properties until the case is decided, conditioned upon the posting by the Company of a bond in the amount of Php100 million. The Company has posted the required bond.

The court-mandated mediation and judicial dispute resolution proceedings were terminated without any agreement between the parties. Without prejudice to any further discussion between the parties regarding settlement, the case was remanded to the trial court for trial proper.

The Company also filed a motion for summary judgment on May 17, 2019. In a resolution dated November 13, 2019, the trial court granted the Company's motion for summary judgment and ordered (i) the rescission of the Deeds of Conveyance dated 1993 relating to the Company's conveyance of such leased premises to PNOC pursuant to a property dividend declaration in 1993, (ii) the reconveyance by PNOC to the Company of all such properties, and (iii) the payment by the Company to PNOC of the amount of Php143 million, with legal interest from 1993, representing the book value of the litigated properties at the time of the property dividend declaration. PNOC filed a motion for reconsideration. The Company also filed a motion for partial reconsideration seeking a modification of the judgment to include an order directing PNOC to return to the Company all lease payments the latter had paid to PNOC since 1993. Following the trial court's denial of their separate motions for reconsideration, both PNOC and the Company filed their notices of appeal with the trial court.

In a decision dated December 13, 2021, the Court of Appeals dismissed both appeals of the Company and PNOC and affirmed the resolution of the trial court. In a resolution promulgated on October 6, 2022, the Court of Appeals denied the respective motions for reconsideration of the Company and PNOC. The PNOC filed a petition for review with the Supreme Court in December 2022, which the Supreme Court denied on July 25, 2023 on the ground that PNOC failed to sufficiently show that the Court of Appeals committed any reversible error in the challenged decision and resolution as to warrant the Supreme Court's exercise of its discretionary appellate jurisdiction.

In a resolution dated November 25, 2024, the Supreme Court denied with finality the motion for reconsideration and the motion to refer to the Supreme Court En Banc that the PNOC filed in December 2023. The November 2024 resolution also ordered the immediate issuance of the entry of judgment and declared that no further pleadings or motions shall be entertained. The November 2024 resolution has become final and executory and recorded in the Book of Entries of Judgment of the Supreme Court on November 25, 2024. In January 2025, PNOC filed a second motion for reconsideration.

Petron anticipates that it may lease desirable lots for development as service stations in the next 12 months.

(C) Contingent Liabilities

Petron is involved in certain cases that may trigger a direct or contingent financial obligation, the material of which is discussed below based on information available to the Company as of the date of this report:

1. Guimaras Oil Spill

a. In the Matter of the Sinking of the MT Solar I SBMI No. 936-06 Special Board of Marine Inquiry ("SBMI")

Background: Petron hired on a "single voyage basis" the vessel MT Solar I owned by Sunshine Maritime Development Corporation ("SMDC") for the transport of industrial fuel oil from the Petron Bataan Refinery to Zamboanga. Petron, as a shipper of the cargo, conducted inspection

of the vessel MT Solar I and likewise, relied on the documents presented by SMDC as carrier. Petron also relied on the implied warranties of SMDC as a carrier with respect to the seaworthiness of the vessel MT Solar I and other statutory/trading certificates issued by MARINA and other pertinent government agencies.

SMDC, taking into consideration the vessel's trim, stability and draft, declared to Petron that the vessel MT Solar I can safely load approximately 13,500 barrels of cargo as stated in the Fixture Note, Notice of Readiness and Seaworthiness Certificate. On this basis and relying on the declaration of SMDC, Petron loaded the quantity as specified by SMDC. Unfortunately, the vessel MT Solar I sank off Guimaras when it encountered bad weather on or about August 11, 2006.

In September 2006, the SBMI was created by the Philippine Coast Guard for the purpose of determining the administrative liability of the crew, owner of the vessel and other involved parties. The SBMI in its initial findings found Petron liable for allegedly overloading the vessel.

On November 21, 2006, Petron filed a Memorandum of Appeal with the DOTC, elevating the disputed ruling of the SBMI for review.

Exposure: Considering the nature of this investigation, no potential liability exists for Petron at this point.

Relief sought: Reversal of the SBMI's initial finding that Petron was liable for allegedly overloading the vessel.

Status: The appeal to the DOTC (now the Department of Transportation, "DOTr") of the finding of the SBMI that Petron was negligent and responsible for overloading the MT Solar I remained pending as of the date of this report.

b. Rogelio Arsenal, Jr., et al. V. SMDC, Petron, et al.
Civil Case No. 09-0394;
RTC Br. 65, Jordan, Guimaras

Oliver S. Chavez, et al. V. SMDC, Petron, et al.
Civil Case No. 09-0395;
RTC Br. 65, Jordan, Guimaras

Background: These are complaints for damages filed on August 6, 2009 by a total of 1,063 plaintiffs who allegedly did not receive any payment from the defendants of their claims for damages arising from the oil spill due to the sinking of MT Solar 1 on August 11, 2006. Total claims for both cases amount to Php291.9 Million (₱286.4 Million and Php5.5 Million). The reception of plaintiffs' evidence is on-going.

In the Arsenal case, respondents filed a motion to hear affirmative defenses based on lack of jurisdiction for non-payment of docket fees, prescription and lack of cause of action but it was denied. The respondents went to the Court of Appeals ("CA") on a petition for *certiorari*. On May 29, 2014, the CA rendered a decision directing the plaintiffs to file their respective affidavits substantiating their claims of indigency. The plaintiffs filed a motion for partial reconsideration of the decision which was denied by the CA on January 30, 2015.

In the Chavez case, the respondents likewise filed the same motion based on the same grounds. The lower court also denied the motion so the respondents went to the CA on a petition for *certiorari*. The CA dismissed the petition for failing to attach the necessary pleadings and orders.

Status: Both the Arsenal and Chavez cases have been remanded to and are pending with the trial courts. In the course of plaintiffs' presentation of evidence, the plaintiffs moved for trial by commissioner, which was denied by the trial court. The plaintiffs elevated the matter by way of a petition for certiorari to the CA in Cebu City, which, on January 9, 2020 issued a Resolution ordering the Company to file its comment on plaintiffs' petition within 10 days. The Company filed a motion for reconsideration of the said resolution, which remains pending as of the date of this report. In the meantime, proceedings before the trial court continue as of the date of this report.

Other cases involving Petron are discussed in its audited financial statements.

PART II - SECURITIES OF THE REGISTRANT

A) Market Price of and Dividends on Registrant's Common Equity and Related Stockholder Matters

(1) Market Information and Voting Rights of Shares

The Company's common shares, Series 3 preferred shares, and Series 4 preferred shares are traded at the PSE.

As of March 31, 2025, the Company had 143,482 common stockholders. As of December 31, 2024, the total number of common stockholders of the Company was 143,594.

Common Shares

The price of the common shares of the Company as of March 31, 2025 was Php2.34 per share. On March 18, 2025, the Company bought back common shares totaling 459,156,097 pursuant to the share buy-back program of the Company approved by the Board of Directors on March 4, 2025. The price of the common shares of the Company on December 27, 2024, the last trading day of 2024, was Php2.43 per share. And the price of the common shares of the Company on December 29, 2023, the last trading day of 2023, was Php3.55 per share.

The high and low prices of the common shares for each quarter of the last two (2) fiscal years and for the period ended March 31, 2025 are indicated in the table below:

	Highest Close		Lowest Close	
Period	Price (in Peso)	Date	Price (in Peso)	Date
2024				
For period ended March 31, 2025	2.50	January 13-14	2.28	February 24
2024				
1 st Quarter	3.50	January 2-4	3.14	March 20
2 nd Quarter	3.16	April 15	2.72	June 27-28
3 rd Quarter	2.75	July 5 and 8	2.75	July 5 and 8
4 th Quarter	2.88	October 8	2.88	October 8
2023				
1 st Quarter	3.73	March 23	2.37	January 3
2 nd Quarter	4.65	May 26	3.30	April 27 and May 8
3 rd Quarter	3.82	July 17	3.47	August 30
4 th Quarter	3.55	December 29	3.24	November 13-16 and 20

Preferred Shares

Series 2 Preferred Shares issued in 2014 (“Series 2 Shares”)

On November 3, 2014, Petron issued and listed on the PSE 10 million cumulative, non-voting, non-participating, non-convertible peso-denominated perpetual preferred shares at an offer price of Php1,000.00 per share. The preferred shares issue, which reached a total of Php10 billion, was composed of Series 2A Preferred Shares amounting to Php7.12 billion and the Series 2B Preferred Shares amounting to Php2.88 billion.

The Series 2A Preferred Shares were redeemed by the Company on November 4, 2019.

(3) Dividends

It is the policy of the Company under its Corporate Governance Manual to declare dividends when its retained earnings exceed 100% of its paid-in capital stock, except: (a) when justified by definite corporate expansion projects or programs approved by the Board, (b) when the Company is prohibited under any loan agreement with any financial institution or creditor, whether local or foreign, from declaring dividends without its consent and such consent has not been secured, or (c) when it can be clearly shown that such retention is necessary under special circumstances obtaining in the Company, such as when there is a need for special reserve for probable contingencies.

Share Issuances; Redemptions; Buy-back

On November 3, 2014, the Company issued 7,122,320 Series 2A Preferred Shares and 2,877,680 Series 2B Preferred Shares. The dividend on the Series 2A Preferred Shares was at the fixed rate of 6.30% per annum and on the Series 2B Preferred Shares was at the fixed rate of 6.8583% per annum, each as calculated based on the offer price of Php1,000.00 per share on a 30/360-day basis and payable quarterly in arrears, when approved by the Board of Directors. If the dividend payment date was not a banking day, dividends were paid on the next succeeding banking day, without adjustment as to the amount of dividends to be paid. Cash dividends were paid out on the Series 2 Shares since their listing in November 2014. The Series 2A Preferred Shares and the Series 2B Preferred Shares were redeemed on November 4, 2019 and November 3, 2021, respectively.

On June 25, 2019, the Company issued 13,403,000 Series 3A Preferred Shares and 6,596,900 Series 3B Preferred Shares. The dividend on the Series 3A Preferred Shares is at the fixed rate of 6.8713% per annum and on the Series 3B Preferred Shares at the fixed rate of 7.1383% per annum, each as calculated based on the offer price of Php1,000.00 per share on a 30/360-day basis and payable quarterly in arrears, whenever approved by the Board of Directors. If the dividend payment date is not a banking day, dividends will be paid on the next succeeding banking day, without adjustment as to the amount of dividends to be paid. Cash dividends have been paid out on the Series 3 Shares since their listing in June 2019. The Series 3A Preferred Shares were redeemed on December 26, 2024.

On July 7, 2023, the Company issued 5,000,000 Series 4A Preferred Shares, 2,995,000 Series 4B Preferred Shares and 6,005,000 Series 4C Preferred Shares. The dividend on the Series 4A Preferred Shares is at the fixed rate of 6.7079% per annum, 6.7972% per annum on the Series 4B Preferred Shares, and 7.0861% per annum on the Series 4C Preferred Shares, each as calculated based on the offer price of Php1,000.00 per share on a 30/360 basis and payable quarterly in arrears, whenever approved by the Board of Directors. If the dividend payment date is not a banking day, dividends will be paid on the next succeeding banking day, without adjustment as to the amount of dividends to be paid. Cash dividends have been paid out on the first tranche of Series 4 Shares since their listing in July 2023.

On September 23, 2024, the Company issued 8,500,000 Series 4D Preferred Shares and 8,330,000 Series 4E Preferred Shares. The dividend on the Series 4D Preferred Shares is at the fixed rate of 6.8364% per annum, and 7.1032% on the Series 4E Preferred Shares, each as calculated based on the offer price of Php1,000.00 per share on a 30/360 basis and payable quarterly in arrears, whenever approved by the Board of Directors. If the dividend payment date is not a banking day, dividends will be paid on the next succeeding banking day, without adjustment as to the amount of dividends to be paid. Cash dividends have been paid out on the second tranche of Series 4 Shares since their listing in September 2024.

On March 18, 2025, the Company bought back common shares totaling 459,156,097 pursuant to the share buy-back program of the Company approved by the Board of Directors on March 4, 2025.

Distributions

Under the terms and conditions of the undated unsubordinated capital securities issued by the Company on January 19, 2018 and April 19, 2021 (collectively, the “Capital Securities”), more particularly described below in “*Recent Sales of Unregistered or Exempt Securities Including Recent Issuances of Securities Constituting an Exempt Transaction*,” the Company cannot declare dividends on any Junior Securities (as defined thereunder), which include any class of shares of the Company, in case the payment of all distributions scheduled to be made on the Capital Securities is not made in full by reason of the Company deferring such distributions in accordance with the terms of the Capital Securities.

(4) Recent Sales of Unregistered or Exempt Including Recent Issuances of Securities Constituting an Exempt Transaction

Under the Code, securities are not permitted to be sold or offered for sale or distribution within the Philippines unless such securities are approved for registration by the SEC or are otherwise exempt securities under Section 9 of the Code or sold pursuant to an exempt transaction under Section 10 of the Code.

The securities discussed below were sold in the Philippines by the Company in the past three (3) years (from 2021). These securities were offered to institutional lenders not exceeding 19 or to not more than 19 non-qualified buyers or to any number of qualified buyers as defined in the Code and their offer and sale therefore qualified as exempt transactions pursuant to Sections 10.1(k) and 10.1(l) of the Code. A confirmation of exemption from the SEC that the offer and sale of the securities in the Philippines qualified as an exempt transaction under the Code was not required to be, and had not been, obtained.

The securities discussed below were not registered with the SEC under the Code. Any future offer or sale thereof is subject to registration requirements under the Code, unless such offer or sale qualifies as an exempt transaction.

US\$550 Million Undated Unsubordinated Capital Securities

- a. On April 19, 2021, the Company issued US\$550 million undated unsubordinated capital securities (the “2021 Capital Securities”).
- b. The sole global coordinator for the transaction was The Hongkong and Shanghai Banking Corporation Limited and the joint lead managers were DBS Bank Ltd., HSBC, MUFG Securities Asia Limited, SMBC Nikko Capital Markets Limited, Standard Chartered Bank and UBS AG Singapore Branch.
- c. The offer price for the 2021 Capital Securities was at 100%.
- d. As the 2021 Capital Securities were offered to qualified buyers in the Philippines, the issuance of such securities was considered an exempt transaction and no confirmation or notice of exemption from the registration requirements of the Code was required to be filed with the SEC pursuant to the Code and the 2015 SRC rules. The capital securities were listed with the Singapore Exchange Securities Trading Limited on April 20, 2021.

(B) Description of Petron’s Shares

The Company has an authorized capital stock of Php10 billion divided into 9,375,104,497 common shares and 624,895,503 preferred shares, with a par value of Php1 each. As of the date of this report, the outstanding shares of the Company are composed of 8,915,948,400 common shares, 6,597,000 Series 3B Preferred Shares, 5,000,000 Series 4A Preferred Shares, 2,995,000 Series 4B Preferred Shares, 6,005,000 Series 4C Preferred Shares, 8,500,000 Series 4D Preferred Shares and 8,330,000 Series 4E Preferred Shares. The Company has 89,403,000 preferred treasury shares and 459,156,097 common treasury shares.

Common shares totaling 459,156,097 were bought back by the Company on March 18, 2025 pursuant to the share buy-back program of the Company approved by the Board of Directors on March 4, 2025.

The Series 2 Preferred Shares, with an aggregate Issue value of Php10 billion, were offered during the period October 20-24, 2014 pursuant to the order of registration and the permit to sell issued by the SEC on October 17, 2014. The Series 2 Preferred Shares were issued and listed on the PSE on November 3, 2014. The Series 2A Preferred Shares and the Series 2B Preferred Shares were redeemed by the Company on November 4, 2019 and November 3, 2021, respectively.

The Series 3 Preferred Shares, with an aggregate issue value of Php20 billion, were offered during the period June 3-18, 2019 pursuant to the order of registration and the permit to sell issued by the SEC on May 31, 2019 and issued out of the treasury shares of the Company. The Series 3 Preferred Shares were issued and listed on the PSE on June 25, 2019. The Series 3A Preferred Shares were redeemed by the Company on December 26, 2024.

The first tranche of the Series 4 Preferred Shares, with an aggregate issue value of Php14 billion, were offered during the period June 15-27, 2023 pursuant to the order of registration and the permit to sell issued by the SEC on June 14, 2023. The first tranche of Series 4 Preferred Shares was issued and listed on the PSE on July 7, 2023.

The second tranche of the Series 4 Preferred Shares, with an aggregate value of Php16.83 billion, were offered during the period September 5-13, 2024 pursuant to the order of registration and the permit to sell issued by the SEC on September 4, 2024. The second tranche of Series 4 Preferred Shares was issued and listed on the PSE on September 23, 2024.

The common shares of the Company are voting shares while preferred shares are generally non-voting, except in cases provided by law.

(C) Stock Ownership Plan

Petron currently does not have a stock ownership plan or program. In 1994, when Petron's initial public offering was undertaken, a special secondary sale of Petron's shares was offered to its employees. The entitlement of shares at the listing price of Php9.00 per share was made equivalent to the employee's base pay factored by his/her service years with Petron. Petron's executive officers, except the Chairman, the President and the Vice President for Corporate Planning, were entitled to own Petron shares under this stock ownership plan. Preparatory to the listing of the Company's preferred shares, availment of said shares was offered to employees from February 15 to 19, 2010.

(D) Public Ownership

Based on the report provided by SMC Stock Transfer Services Corporation, the stock transfer agent of the Company, 26.71% of the outstanding common shares of the Company was owned by the public as of December 31, 2024 in compliance with the minimum public ownership set by the PSE and the SEC. Attached as Annexes A and B are the public ownership reports of the Company as of December 31, 2024 and March 31, 2025, respectively.

and Financial Performance" follows on next page]*

PART I-I - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL POSITION AND FINANCIAL PERFORMANCE

Financial Performance

2024 vs 2023

International oil prices remained volatile in 2024 as the market continued to be affected by the persisting geopolitical conflicts in the Middle East, increased production from non-OPEC countries and prevailing weak domestic demand in China which also put pressure on regional refining margins. Petron's refinery in Malaysia was also on shut down for maintenance in the last quarter of the year limiting production and exports. Amidst these challenges, the Group sustained earnings due to growth in sales volume realizing an operating income of **₱ 29.22 billion**, nearly matching 2023 at **₱ 30.71 billion**. Consolidated net income of **₱ 8.47 billion** for the year ended December 31, 2024 was 16% lower than the **₱ 10.11 billion** posted in the previous year.

Consolidated Sales Volume for the year increased by 10% to **139.85 million barrels (MMB)** from 126.91 MMB in 2023 fueled by strong demand and strategic marketing efforts. The Company's Philippine operations and Singapore trading subsidiary led this growth with a combined 16% incremental volume. Petron Malaysia's volume was flat as the additional domestic sales volume were offset by reduced exports.

	Years Ended December 31		Horizontal Analysis Increase (Decrease)		Vertical Analysis	
	2024	2023 (As Restated)	Amount	%	2024	2023 (As Restated)
	(in Millions)					
Sales	867,966	801,027	66,939	8%	100%	100%
Cost of Goods Sold	(821,753)	(754,429)	67,324	9%	(95%)	(94%)
Gross Profit	46,213	46,598	(385)	(1%)	5%	6%
Selling and Administrative Expenses	(18,757)	(17,568)	1,189	7%	(2%)	(2%)
Other Operating Income	1,767	1,683	84	5%	0%	0%
Interest Expense and Other Financing Charges	(20,961)	(19,095)	1,866	10%	(2%)	(2%)
Interest Income	1,201	1,284	(83)	(6%)	0%	0%
Share in Net Income of an Associate and Joint Ventures	114	89	25	28%	0%	0%
Other Income - net	3,417	119	3,298	high	0%	0%
Income Before Income Tax	12,994	13,110	(116)	(1%)	1%	2%
Income Tax Expense	(4,523)	(2,998)	1,525	51%	0%	(1%)
Net Income	8,471	10,112	(1,641)	(16%)	1%	1%
Attributable to Equity Holders of the Parent Company	8,469	9,229	(760)	(8%)	1%	1%
Attributable to Non-controlling Interests	2	883	(881)	(100%)	0%	0%
	8,471	10,112	(1,641)	(16%)	1%	1%
Sales Volume in Thousand Barrels	139,853	126,914	12,939	10%		

Consequent to the growth in volume, **Net Sales** went up by 8% to **₱ 867.97 billion** from **₱ 801.03 billion** in prior year. Average USD/PHP exchange rate was higher by **₱ 1.67** or 3% from **₱ 55.63** to **₱ 57.30** this year further augmenting revenues despite the continuous correction in fuel prices.

Similarly, **Cost of Goods Sold (COGS)** rose from ₱ 754.43 billion to **₱ 821.75 billion** or by 9% because of the higher volume sold and the weaker PHP against the USD. The effect of these factors to COGS was partly moderated by the decrease in average cost per liter owing to the 3% decline in benchmark Dubai crude's average price of US\$80 per barrel in 2024.

Despite the increase in sales revenue, **Gross Profit** slightly decreased to **₱ 46.21 billion** from last year's ₱ 46.60 billion mainly attributable to lower refining margins.

The growth in sales volume resulted in higher **Selling and Administrative Expenses** by 7% to **₱ 18.76 billion** traced to storage and terminalling costs, maintenance and repairs of service stations, contracted services and promotional activities.

Other Operating Income increased by 5% to **₱ 1.77 billion** on account of higher rental income.

Interest Expense and Other Financing Charges aggregated **₱ 20.96 billion**, posting a 10% rise from the previous year owing to higher borrowing levels and interest rates.

Conversely, **Interest Income** of **₱ 1.2 billion** slid by ₱ 83 million or 6% due to the lower average placement level.

Share in Net Income of an Associate and Joint Ventures of **₱ 114 million** was 28% more than the ₱ 89 million recorded in 2023 as Petrogen Insurance Corporation (Associate) reported higher earnings in 2024.

Other Income - net climbed to **₱ 3.42 billion** mainly following the reversal of previously booked lease and asset retirement liabilities in relation to the reconveyance of PNOC lots to Petron.

Income tax expense escalated by 51% to **₱ 4.52 billion** primarily due to the Parent's additional provision for partial impairment of Deferred Tax Asset related to the NOLCO and MCIT which are due to expire in 2025.

2023 vs 2022

The Group posted consolidated net income of **₱ 10.11 billion** in 2023, surpassing previous year's net earnings of ₱ 6.93 billion by 46%, fueled by Petron's continuing efforts to capture continued demand recovery, optimize assets and resources, and respond to market volatility amidst persistent geopolitical tensions and global inflationary concerns pressuring the market. The 57% increase in operating income to ₱ 30.71 billion allowed the Company to absorb higher expenses yet still end 2023 with improved financial results compared with the previous year.

Consolidated Sales Volume grew by 13% to **126.9 million barrels (MMB)**, 14.1 MMB more than the previous year. Petron's strong volume performance was driven by the remarkable growth in its sale of Jet Fuel and LPG. As economic activities returned to pre-pandemic levels, domestic demand also bounced back. The incremental sales volume was backed by higher production at the Bataan and Port Dickson refineries in the Philippines and Malaysia, respectively. Exports and PSTPL trading volume also contributed to the overall volume growth.

Income Tax Expense	(2,998)	(1,480)	1,518	high	(1%)	(0%)
Net Income	10,112	6,925	3,187	46%	1%	1%
Attributable to Equity Holders of the Parent Company	9,229	5,952	3,277	55%	1%	1%
Attributable to Non-controlling Interests	883	973	(90)	(9%)	0%	0%
	10,112	6,925	3,187	46%	1%	1%
Sales Volume in Thousand Barrels	126,914	112,812	14,102	13%		

Despite the growth in sales volume, **Net Sales** dropped by 7% to **₹ 801.03 billion** from **₹ 857.64 billion** in the previous year traced mainly to lower average selling price per liter as market prices further corrected from the peak levels in 2022.

Cost of Goods Sold also declined by **₹ 69.36 billion** or 8% to **₹ 754.43 billion** attributable to lower average cost per liter, partly offset by the increase in sales volume. Price of benchmark Dubai crude oil decreased by 15% to US\$82/bbl in 2023 from the 2022 average of US\$96/bbl.

Gross profit was up by 38% from **₹ 33.85 billion** to **₹ 46.60 billion** largely from incremental sales volume and improved margins.

Selling and Administrative Expenses climbed 11% to **₹ 17.57 billion** as the Company spent more on maintenance and repairs of service stations and terminal facilities, advertising and promotions, operation of company-owned services stations and other operating requirements to support volume growth.

Other Operating Income amounted to **₹ 1.68 billion**, higher by 9% or **₹ 145 million** versus last year's **₹ 1.54 billion** due to increase in rental income.

Interest Expense and Other Financing Charges escalated by 46% from **₹ 13.09 billion** in 2022 to **₹ 19.10 billion** primarily due to higher interest rates in 2023.

Interest Income of **₹ 1.28 billion** was 43% more than 2022's **₹ 898 million** on account of higher interest.

Share in Net Earnings of an Associate and Joint Ventures (JV) was 35% higher at **₹ 89 million**, representing the Company's share in net income of Petrogen Insurance Corporation (associate) and Terminal Bersama Sdn. Bhd. (JV).

Other Income - net was lower at **₹ 119 million** from last year's **₹ 1 billion**, chiefly attributed to lower mark-to-market valuation gain on commodity hedges.

Income tax expense of ₹ 3 billion was more than double of previous year's **₹ 1.48 billion**, mainly traced to higher pre-tax income combined with minimal tax incentives available by Petron Malaysia in 2023.

Total Equity	104,210	99,660	4,550	5%	22%	22%
Total Liabilities and Equity	₱ 468,802	₱ 445,769	₱ 23,033	5%	100%	100%

As of end-2024, total **Asset** stood at **₱ 468.80 billion**, 5% or **₱ 23.03 billion** higher than end-2023 level of **₱ 445.77 billion**. The increase mainly came from higher inventories and other current assets.

Cash and cash equivalents was up by **₱ 2.87 billion** to **₱ 30.39 billion** traced to excess cash generated from operations after satisfying working capital requirements, interest payments and various capital project spendings.

Financial assets at fair value declined by 10% to **₱ 1.04 billion** as a result of lower mark-to-market valuation of outstanding commodity hedges.

Inventories rose by **₱ 13.25 billion** to **₱ 90.57 billion** primarily traced to crude.

Other current assets increased to **₱ 51.11 billion** from **₱ 40.53 billion** traced to creditable withholding taxes, input VAT and prepayments during the year.

Right of use asset - net dropped by 45% to **₱ 2.93 billion** primarily due to pretermination of lease contracts with Philippine National Oil Company (PNOC) as a result of the reconveyance of the landholdings. Similarly, due to the aforesaid lease pre-terminations, **Lease liabilities** and **Asset retirement obligation** dropped by 16% and 63% to **₱ 13.42 billion** and **₱ 1.32 billion**, respectively.

The change in the net tax position of the Parent Company from net asset to net liability led to the reduction in **Deferred tax assets - net** from **₱ 1.11 billion** to **₱ 560 million** and increase in **Deferred tax liabilities - net** from **₱ 4.46 billion** to **₱ 6.72 billion**. The reversal in the tax position resulted from the utilization of NOLCO and write-off of lapsed MCIT as well as provision for partial impairment of NOLCO and MCIT expiring in 2025. These were partly offset by the temporary differences in depreciation per tax accounting versus financial reporting.

Goodwill increased to **₱ 8.73 billion** from **₱ 8.09 billion** owing to currency translation gains with the appreciation of the Malaysian Ringgit versus the Philippine peso.

Liabilities for crude oil and petroleum products rose by **₱ 6.78 billion** to **₱ 51.63 billion** principally from the higher volume of outstanding crude purchases as of end of 2024 vis-a-vis the prior year.

Trade and other payables climbed by 10% to **₱ 29.01 billion** from higher outstanding liabilities to contractors and vendors.

Derivative liabilities, which pertain to accrued settlements of commodity and currency hedges, more than doubled to **₱ 1.70 billion**.

Income tax payable rose to **₱ 304 million** from **₱ 132 million** from increased tax liabilities of foreign subsidiaries.

Long-term debt including current portion increased by 8% to **₱ 117.44 billion** mainly from additional loans and impact of revaluation of outstanding US Dollar-denominated loans to Philippine peso, net of maturities paid during the year.

Retirement benefits liability grew by 40% to **₱ 3.66 billion** on account of remeasurement losses on plan assets and accrued benefits recognized during the year, partly offset by the contributions paid in 2024.

Additional paid-in capital increased by **₱ 16.71 billion** to **₱ 57.70 billion** as a result of the issuance of preferred shares series 4.

Treasury stock went up by **₱ 13.40 billion** to **₱ 21.00 billion** following the redemption of preferred shares series 3A.

Capital securities went down by **₱ 2.97 billion** to **₱ 34.56 billion** because of the partial repurchase of redeemable perpetual securities.

Retained earnings increased by 6% to **₱ 33.72 billion** due to the net earnings for the year, partly offset by the cash dividends and distributions declared during the year.

The negative balance of **Equity reserves** went down from **₱ 21.26 billion** to **₱ 19.35 billion** on account of the translation gain on investments in foreign subsidiaries following the appreciation of US dollars versus Philippine peso, partly countered by the remeasurement loss of retirement plan assets.

Non-controlling interests also increased by 5% to **₱ 9.09 billion** mainly from translation gains offset by the dividends paid during the year.

Total Equity	99,660	113,601	(13,941)	(12%)	22%	25%
Total Liabilities and Equity	₱ 445,769	₱ 461,417	(₱ 15,648)	(3%)	100%	100%

The Consolidated assets of Petron Corporation and its Subsidiaries as of end-2023 stood at **₱ 445.77 billion**, 3% or **₱ 15.65 billion** lower than end-2022 level of **₱ 461.42 billion**. The decrease in total assets can be traced primarily to lower cash and cash equivalents and inventories.

Cash and cash equivalents decreased by **₱ 9.66 billion** to **₱ 27.52 billion** from **₱ 37.18 billion** as cash was used for the settlement of loans, redemption of capital securities, and cash dividends and distribution.

Financial assets at fair value dropped to **₱ 1.16 billion** from **₱ 1.75 billion** primarily from lower mark-to-market valuation of outstanding currency hedges.

Trade and other receivables - net went up by 5% to **₱ 86.48 billion** attributable to higher government receivables of Parent company partly offset by the reduction in trade accounts receivables.

Inventories declined by **₱ 8.03 billion** to **₱ 77.32 billion** mainly from lower prices of crude and finished product prices coupled with reduced volume.

Other current assets rose by 9% to **₱ 40.53 billion** from additional creditable withholding taxes, input VAT and prepayments.

Investment in shares of stock of an associate and joint ventures increased by 7% to **₱ 1.16 billion** after the recognition of the Company's share in net income and other comprehensive income for the year.

Deferred tax assets - net went down from **₱ 1.74 billion** to **₱ 1.11 billion** owing to the temporary differences in inventory valuation and depreciation per tax accounting vis-à-vis financial reporting, application of Net Operating Loss Carry-Over (NOLCO) from prior years, partly offset by Minimum Corporate Income Tax (MCIT) for the year.

Goodwill dropped by 5% to **₱ 8.09 billion** due to currency translation losses with the depreciation of the Malaysian Ringgit versus the US dollar and Philippine peso.

Other noncurrent assets - net went up to **₱ 1.93 billion** from **₱ 1.39 billion** mainly from additional catalyst materials and the reclassification of proprietary membership shares from current assets.

Liabilities for crude oil and petroleum products stood lower at **₱ 44.84 billion** compared to end-2022 level of **₱ 51.07 billion** owing primarily to lower level of outstanding crude purchases at the end of 2023 vs 2022.

Trade and other payables rose by 6% to **₱ 26.45 billion** mainly due to higher outstanding liabilities to contractors and vendors, dividend payable, and cylinder deposits.

Income tax payable dropped from **₱ 204 million** to **₱ 132 million** as tax liabilities of foreign subsidiaries decreased.

Total Lease liabilities increased by **₱ 850 million** to **₱ 15.94 billion** primarily from new leases, partly offset by payments made during the year.

Retirement benefits liability declined by 20% to **₱ 2.62 billion** on account of the contributions made to the fund during the year partly offset by the remeasurement losses on plan assets and accrual of expenses for the period.

Deferred tax liabilities - net went up by 22% to **₱ 4.46 billion** from **₱ 3.64 billion** attributable to Petron Malaysia's utilization of deferred tax on reinvestment allowance.

Other noncurrent liabilities rose by 6% to **₱ 495 million** vis-a-vis 2022 year-end level traced to higher cash bond.

Additional paid-in capital increased by **₱ 3.49 billion** to **₱ 40.99 billion**, while the negative balance of **Treasury stock** decreased by **₱ 10.40 billion** to **₱ 7.60 billion** as a result of the reissuance of preferred treasury shares.

Retained earnings rose by 5% to **₱ 31.85 billion** traced to the net income realized in 2023 partly offset by the cash dividends and distributions declared during the year.

The negative balance of **Equity reserves** went up from **₱ 16.89 billion** to **₱ 21.26 billion** on account of the translation losses related to the redemption of US\$500 million capital securities as well as the investment in Petron Malaysia.

Cash Flows

2024 vs 2023

Cash and cash equivalents amounted to **₱ 30.39 billion** as of end 2024, **₱ 2.87 billion** higher versus end 2023 balance. Cash generated from operating activities of **₱ 45.15 billion** were used for working capital requirement (**₱ 11.76 billion**), payment interest and taxes (**₱ 20.34 billion**), and various capital projects (**₱ 10.34 billion**) of the Company during the year. Meanwhile, proceeds from the issuance of preferred shares series 4 of **₱ 16.73 billion** were mainly used to redeem preferred shares series 3A.

In Million Pesos	December 31, 2024	December 31, 2023 As restated	Change

Discussion of the company's key performance indicators:

Ratio	December 31, 2024	December 31, 2023 (As restated)	December 31, 2022 (As restated)
Current Ratio	1.0	1.0	1.1
Debt to Equity Ratio	3.5	3.5	3.1
Return on Equity (%)	8.3	9.5	6.2
Interest Rate Coverage Ratio	1.6	1.7	1.6
Assets to Equity Ratio	4.5	4.5	4.1

Current Ratio - Total current assets divided by total current liabilities.

This ratio is a rough indication of a company's ability to service its current obligations. Generally, higher current ratio indicates greater ability of the company to pay currently maturing obligations.

Debt to Equity Ratio - Total liabilities divided by total stockholders' equity (including non-controlling interest).

This ratio expresses the relationship between capital contributed by creditors and that contributed by owners. It indicates the degree of protection provided by the owners for the creditors. The higher the ratio, the greater the risk being assumed by creditors. A lower ratio generally indicates greater long-term financial safety.

Return on Equity - Net income divided by average total stockholders' equity.

This ratio reveals how much profit a company earned in comparison to the total amount of shareholder equity fund in the statements of financial position. A business that has a high return on equity is more likely capable of generating cash internally. For the most part, the higher a company's return on equity compared to its industry, the better.

Interest Rate Coverage Ratio - Earnings before interests and taxes divided by interest expense and other financing charges.

This ratio is used to assess the company's financial stability by examining whether it is profitable enough to pay off its interest expenses. A ratio greater than 1 indicates that the company has more than enough interest coverage to pay off its interest expense.

Assets to Equity Ratio - Total assets divided by total equity (including non-controlling interest).

This ratio is used as a measure of financial leverage and long-term solvency. The function of the ratio is to determine the value of the total assets of the company less any portion of the assets that are owned by the shareholders of the corporation.

BUSINESS ENVIRONMENT

Philippine Economy

The Philippines ended 2024 with a GDP growth rate of 5.6%, lower than the government's target range of 6% to 6.5%. This shortfall was primarily driven by extreme weather events, geopolitical tensions, and sluggish global demand. Despite missing its target, the country remained one of the fastest growing economies in Asia, alongside Vietnam and China, which posted GDP growth rates of 7.5% and 5.4%, respectively. The country's economic growth was largely fueled by wholesale and retail trade, financial services, and construction, which helped offset a 1.6% decline in agriculture due to weather-related disruptions. On the expenditure side, government spending rose by 7.2%, reflecting the administration's commitment to infrastructure and public services. Gross capital formation also increased by 7.5%, signaling continued investment activities. Household consumption grew by 4.8%, despite inflationary pressures, while exports and imports expanded by 3.4% and 4.3%, respectively, despite global economic headwinds.

The peso averaged Php57.28/USD in 2024, a 3.0% depreciation from Php55.63/USD in 2023, as the US federal interest rate remained high and as the dollar strengthened following the re-election of former US President Donald Trump who has expressed protectionist trade policies. Moreover, the weakening of the peso can be attributed to the continued current account deficit as the country's imports outpaced exports.

Headline inflation for fiscal year 2024 averaged 3.2%, lower than the 6.0% average in 2023 and within the government's target of 2% to 4%. While slower inflation was felt in almost all commodity groups except for education services, the downtrend was heavily influenced by softening food and electricity prices.

Oil Market

Oil demand in the country grew by 6.1% to 91,771 thousand barrels ("MB") in the first half of 2024 from 86,502 MB in the first half of 2023 as economic activities continued to expand after the pandemic. Crude price benchmark Dubai averaged \$79.58 per barrel ("/bbl") in 2024, a decline from its 2023 average of \$82.09/bbl, amid slower global demand growth. Product cracks also weakened from \$16.7/bbl to \$13.4/bbl for gasoline, from \$24.3/bbl to \$16.7/bbl for diesel, and from \$22.5/bbl to \$15.6/bbl for kero-jet.

Any event that will trigger direct or contingent financial obligation that is material to the Company, including any default or acceleration of an obligation.

Guimaras Oil Spill Incident

On August 11, 2006, MT Solar I, a third-party vessel contracted by the Company to transport approximately two million liters of industrial fuel oil, sank 13 nautical miles southwest of Guimaras, an island province in the Western Visayas region of the Philippines. In separate investigations by the Department of Justice ("DOJ") and the Special Board of Marine Inquiry ("SBMI"), both agencies found the owners of MT Solar I liable. The DOJ found the Company not criminally liable, but the SBMI found the Company to have overloaded the vessel. The Company has appealed the findings of the SBMI to the Department of Transportation and Communication ("DOTC"), now the Department of Transportation ("DOTr"), and is awaiting its resolution. The Company believes that SBMI can impose administrative penalties on vessel owners and crew, but has no authority to penalize other parties, such as the Company, which are charterers.

Other complaints for non-payment of compensation for the clean-up operations during the oil spill were filed by a total of 1,063 plaintiffs who allegedly did not receive any payment of their claims for damages arising from the oil spill. The total claims for both cases amount to Php292 million. The cases are still pending.

Any significant elements of income or loss (from continuing operations)

There are no significant elements of income or loss from continuing operations.

Seasonal aspects that have material effect on the financial statement

There were no seasonal items that have material effect on the financial statement.

All material off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships of the company with unconsolidated entities or other persons created during the reporting period.

There were no off-balance sheet transactions, arrangements and obligations with unconsolidated entities or persons during the reporting period.

Audit and Audit-Related Fees

The Company paid KPMG the fees set out below for 2024 and 2023:

	2024 (in Pesos)	2023 (in Pesos)
Audit fees for professional services - Annual Financial Statement (tax-exempt and exclusive of out-of-pocket expenses)	9,720,863	9,349,781
Professional fees for due diligence and study on various internal projects	4,270,500	3,000,000
Professional fees for tax consulting services	492,999	476,246

KPMG, the external auditor of SMC, was first appointed by the Company in 2010. With a common external auditor, the consolidation of results of operations and account balances among the subsidiaries of SMC using a uniform audit approach was facilitated.

For 2024, the Audit Committee, at its meeting held on March 5, 2024, endorsed the re-appointment of KPMG as external auditor of the Company for 2023 and the approval of KPMG's proposed fees. At its meeting held later on the same day, the Board of Directors, finding the recommendation of the Audit Committee to be in order, endorsed the re-appointment of KPMG as external auditor of the Company for 2024 and approved its fees for the approval and ratification, respectively, of the stockholders at the annual stockholders' meeting. At the 2024 annual stockholders' meeting held on May 21, 2024, the re-appointment of KPMG as external auditor of the Company for 2024 and KPMG's fees were approved and ratified, respectively, by the stockholders.

The engagement partner of KPMG, Ms. Rohanie C. Galicia, was assigned to the Company beginning with the 2022 audit of financial statements.

Set out in the next page is the report of the Audit Committee for the year 2024.

AUDIT COMMITTEE REPORT

The Board of Directors
Petron Corporation

The Audit Committee assists the Board of Directors in its oversight function with respect to the adequacy and effectiveness of internal control environment, compliance with corporate policies and regulations, integrity of the financial statements, the independence and overall direction of the internal audit function, and the selection and performance of the external auditor.

In the performance of our responsibilities, we report that in 2024:

- We reviewed and discussed with Controllers management the quarterly and annual financial statements of Petron Corporation and Subsidiaries and endorsed these for approval by the Board;
- We endorsed the re-appointment of R.G. Manabat & Co./KPMG as the Company's independent auditors for 2024;
- We reviewed with R.G. Manabat & Co./KPMG the scope and timing of their annual audit plan, audit methodology, and focus areas related to their review of the financial statements;
- We reviewed with R.G. Manabat & Co./KPMG, the audit observations and recommendations on the Company's internal controls and management's response to the issues raised;
- We reviewed with the Internal Audit Head the annual internal audit plan, approved the same, and satisfied ourselves on the independence of the internal audit function; and
- We reviewed on a quarterly basis Internal Audit's report on the adequacy and effectiveness of the internal control environment in the areas covered during the period.

The Board Audit Committee is satisfied with the scope and appropriateness of the Committee's mandate and that the Committee substantially met its mandate in 2024.

Commitments for Capital Expenditure

In 2024, the Company spent Php6.26 billion on capital investments. Php5.09 billion was spent on refinery projects, including major refinery turnaround, Php432 million was used for projects in depots, Php364 million was spent for service station-related projects, and Php371 million was used for other commercial, maintenance and miscellaneous projects.

Any Known Trends, Events or Uncertainties with Material Impact on Liquidity and Net Sales or Revenues or Income

The Company is in a healthy liquidity position with sufficient cash balances, and strong support from domestic and international banks for its working capital lines. The Company is not in default or in breach of any covenants of its loans or other financing arrangements, does not anticipate any cash flow or liquidity problems, and does not have a significant amount of trade payables that have not been paid within agreed trade terms. Working capital requirements are sufficiently addressed by the Company's cash balances, available credit lines from financial institutions, and continuous and prudent management of the Company's cash position.

Crude oil accounts for over 30% of the Company's total cost of goods sold. Because of the commodity nature of oil, the cost of the Company's refined products is highly dependent on international crude oil and product prices. Fluctuations in the price of crude oil and finished products in the global market arise from factors that are beyond the Company's control, such as changes in global oil supply and demand. The Company's financial results are primarily affected by the differential or margin between the prices for its refined petroleum products and the prices for the crude oil that is the main raw material for these refined petroleum products, geopolitical factors (such as the current Russia-Ukraine conflict), global economic conditions, weather, and government regulations. The Company holds approximately two months of crude oil and finished petroleum products inventory in the Philippines, which is accounted for using the first in-first-out method. Thus, a sharp drop in crude oil prices, for example, will result in losses, as the Company sells products produced from higher-priced crude oil at lower prices.

Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

There are no changes in and disagreements with accountants on accounting and financial disclosures.

* Previously served as a director of the Company from 1974 to 1986; re-elected from 2009 and held the position of director until his passing in March 2025.

Directors as of December 31, 2024

Set out below are the directors of the Company as of December 31, 2024 and their profiles as of the date of this report.

Ramon S. Ang, Filipino, born 1954, has served as the Chief Executive Officer and an Executive Director of the Company since January 8, 2009 and the President of the Company since February 10, 2015. He is also a member of the Company's Executive Committee. In relation to the oil and gas industry, Mr. Ang holds the following positions, among others: Chairman of SEA Refinery Corporation ("SEA Refinery"), New Ventures Realty Corporation ("NVRC"), Petron Fuel International Sdn. Bhd. (Malaysia) ("PFISB"), Petron Malaysia Refining & Marketing Bhd. (Malaysia) ("PMRMB"), and Petron Oil (M) Sdn. Bhd. ("POMSB") (Malaysia); Chairman and President of Mariveles Landco Corporation ("MLC"), Petrochemical Asia (HK) Ltd. ("PAHL"), and Robinson International Holdings Ltd. (Cayman Islands); Director of Las Lucas Construction and Development Corporation ("LLCDC") and Petron Oil & Gas Mauritius Ltd. ("POGM"), and Director of Petron Oil & Gas International Sdn. Bhd. ("POGI"). He also holds the following positions, among others: Chairman and Chief Executive Officer and President and Chief Operating Officer of San Miguel Global Power Holdings Corp. (formerly, SMC Global Power Holdings Corp.), Chairman and

President of San Miguel Holdings Corp., SMC SLEX Inc. (formerly, South Luzon Tollway Corporation), San Miguel Equity Investments Inc., San Miguel Properties, Inc., San Miguel Aerocity Inc. and Privado Holdings Corporation; Chairman of San Miguel Brewery Inc. (“SMB”), San Miguel Foods, Inc., San Miguel Yamamura Packaging Corporation (“SMYPC”), Clariden Holdings, Inc., Anchor Insurance Brokerage Corporation, Petrogen Insurance Corporation (“Petrogen”), Philippine Diamond Hotel and Resort, Inc., and Eagle Cement Corporation; Chairman, President and Chief Executive Officer of SMC TPLEX Corporation (formerly, Private Infra Dev Corporation); Chairman and Chief Executive Officer of SMC Asia Car Distributors Corp.. He is also the sole director and shareholder of Master Year Limited. Mr. Ang formerly held the following positions, among others: Chairman of Cyber Bay Corporation and Liberty Telecoms Holdings, Inc.; President and Chief Operating Officer of PAL Holdings, Inc., and Philippine Airlines, Inc.; Director of Air Philippines Corporation; Chairman of Manila North Harbour Port Inc. (“MNHPI”) (2015 - 2017); Vice Chairman and Director of the Manila Electric Company (“MERALCO”); and Vice Chairman of Northern Cement Corporation. Mr. Ang has held directorships in various domestic and international subsidiaries of SMC in the last five (5) years. He has a Bachelor of Science degree in Mechanical Engineering from the Far Eastern University. He holds a doctoral degree in Business Engineering (Honoris Causa, 2018) from the Far Eastern University and a Ph.D. in Humanities (Honoris Causa, October 1, 2006) from the National University.

Mr. Ang also holds the following positions in other publicly listed companies: Chairman and Chief Executive Officer of San Miguel Corporation (“SMC”); Chairman of San Miguel Food and Beverage, Inc. (“SMFB”); President and Chief Executive Officer of Top Frontier Investment Holdings Inc. (“Top Frontier”); Chairman of PMRMB (a company publicly listed in Malaysia), and San Miguel Brewery Hongkong Limited (a company publicly listed in Hong Kong); and President of Ginebra San Miguel, Inc. (“GSMI”).

Lubin B. Nepomuceno, Filipino, born 1951, has served as a Director of the Company since February 19, 2013 and the General Manager of the Company since February 10, 2015. He is also a member of the Company’s Executive Committee. He holds the following positions, among others: Chairman, President and Chief Executive Officer of Petron Marketing Corporation (“PMC”); Director and Chief Executive Officer of PMRMB and member of its Sustainability Committee; Director and Chief Executive Officer of PFISB and POMSB; Director of POGI, LLCDC, NVRC, Philippine Polypropylene Inc. (“PPI”), PAHL, Mariveles Landco Corporation, Robinson International Holdings, Ltd., Petron Singapore Trading Pte. Ltd. (“PSTPL”), SMYPC and San Miguel Yamamura Packaging International, Ltd.; Chairman and Chief Executive Officer of Petron Foundation, Inc. (“PFI”); Chairman and President of Mema Holdings, Inc.; Chairman of Overseas Ventures Insurance Corporation Ltd. (“Ovincor”), Petron Freeport Corporation (“PFC”) and Petrofuel Logistics, Inc. (“PLI”). Mr. Nepomuceno has held various board and executive positions in the San Miguel Group. He started with SMC as a furnace engineer at the Manila Glass Plant in 1973 and rose to the ranks to become the General Manager of the San Miguel Packaging Group in 1998. He was also formerly the Senior Vice President and General Manager of the Company (September 2009 - February 2013) and the President of the Company (February 2013 - February 2015). He also served as the Chairman of Petrogen (until 2021) and a Director of MNHPI (2012 - 2014). Mr. Nepomuceno holds a Bachelor of Science degree in Chemical Engineering and master’s degree in Business Administration from the De La Salle University. He also attended the Advanced Management Program at the University of Hawaii, University of Pennsylvania and Japan’s Sakura Bank Business Management.

Mr. Nepomuceno does not hold a directorship in any company listed with the PSE other than Petron.

Estelito P. Mendoza, Filipino, born 1930, served as a Director of the Company from 1974 to 1986; thereafter, from January 8, 2009 until his passing on March 26, 2025. He was a member of the Corporate Governance Committee and the Audit Committee. He was likewise a member of the Board of Directors of SMC and Philippine National Bank (“PNB”). He was engaged in the practice of law for more than 70 years, and presently under the firm name Estelito P. Mendoza and Associates. He was consistently listed for several years as a “Leading Individual in Dispute Resolution” among lawyers in the Philippines in the following directories/journals: “The Asia Legal 500”, “Chambers of Asia” and “Which Lawyer?” yearbooks. He was also a Professorial Lecturer of law at the University of the Philippines and served as

Solicitor General, Minister of Justice, Member of the Batasang Pambansa and Provincial Governor of Pampanga. He was also the Chairman of the Sixth (Legal) Committee, 31st Session of the UN General Assembly and the Special Committee on the Charter of the United Nations and the Strengthening of the Role of the Organization. He obtained a Bachelor of Laws degree from the University of the Philippines (*cum laude*) and a Master of Laws degree from Harvard University. He was the recipient on June 28, 2010 of a Presidential Medal of Merit as Special Counsel on Marine and Ocean Concerns and was also awarded by the University of the Philippines Alumni Association its 1975 “Professional Award in Law” and in 2013 its “Lifetime Distinguished Achievement Award”.

Of the companies in which Atty. Mendoza held directorships other than Petron until March 2025, SMC and PNB are also listed with the PSE.

Jose P. de Jesus, Filipino, born 1934, has served as a Director of the Company since May 20, 2014. He is an Independent Director and the Chairman of Converge ICT Solutions, Inc. He was the Chairman of Clark Development Corporation (March 2017 - November 2020), the President and Chief Executive Officer of Nationwide Development Corporation (September 2011 - June 2015), the Secretary of the Department of Transportation and Communications (July 2010 - June 2011), the President and Chief Operating Officer of MERALCO (February 2009 - June 2010), the President and Chief Executive Officer of Manila North Tollways Corporation (January 2000 - December 2008), Executive Vice President of the Philippine Long Distance Telephone Company (1993 - December 1999), Chairman of the Manila Waterworks & Sewerage System (1992 - 1993), the Secretary of the Department of Public Works and Highways (January 1991 - February 1993), and the President of the Development Academy of the Philippines (December 1987 - January 1991). He was awarded the Philippine Legion of Honor, Rank of Commander in June 1992 by then President Corazon C. Aquino. He was *Lux in Domino* Awardee (Most Outstanding Alumnus) of the Ateneo de Manila University in July 2012. He is also a Director of SMC Skyway Corporation, SMC TPLEX Corporation, SMC SLEX, Inc., Comstech Integration Alliance, Inc., AirAsia, Inc., Philippines AirAsia, Inc., as well as an Independent Director of Alviera Country Club. He is a Trustee of the Kapampangan Development Foundation and Holy Angel University, a Member of the Board of Advisors of Bantayog ng mga Bayani Foundation, an Eisenhower Exchange Fellow (1977 - present), and a member of the Management Association of the Philippines. Mr. de Jesus earned his Bachelor of Arts degree in Economics and holds a Master of Arts in Social Psychology from the Ateneo de Manila University. He also finished Graduate Studies in Human Development from the University of Chicago under university scholarship and Fulbright grant.

Of the companies in which Mr. de Jesus currently holds directorships, Converge Information and Communications Technology Solutions, Inc. is also listed with the PSE.

Ron W. Haddock, American, born 1940, has served as a Director of the Company since December 2, 2008. He holds the following positions, among others: Chairman and Chief Executive Officer of AEI; and lead independent director of the board of Delek Logistics Partners LP. Mr. Haddock was formerly Honorary Consul of Belgium in Dallas, Texas. He also served as Chairman of Safety-Kleen Systems; Chairman and Chief Executive Officer of Prisma Energy International and FINA, and held various management positions in Exxon Mobil Corporation including as Manager of Baytown Refinery, Corporate Planning Manager, Vice President for Refining, and Executive Assistant to the Chairman; and Vice President and Director of Esso Eastern, Inc. He holds a degree in Mechanical Engineering from Purdue University.

Mr. Haddock does not hold a directorship in any company listed with the PSE other than Petron.

Mirzan Mahathir, Malaysian, born 1958, has served as a Director of the Company since August 13, 2010. He is the Chairman and Chief Executive Officer of Crescent Capital Sdn. Bhd and Managing Director of Betamek Berhad. He holds directorships in several public and private companies. He was formerly the Executive Chairman of SBI Offshore Ltd., which is listed on the Singapore Stock Exchange (2017 - 2020) and the Executive Chairman and President of Konsortium Logistik Berhad (1992 - 2007). Mr. Mirzan graduated with a Bachelor of Science (Honours) degree in Computer Science from Brighton Polytechnic,

United Kingdom and obtained his master's degree in Business Administration from the Wharton School, University of Pennsylvania, USA.

Mr. Mirzan does not hold a directorship in any company listed with the PSE other than Petron.

Aurora T. Calderon, Filipino, born 1954, has served as a Director of the Company since August 13, 2010. She is a member of the Executive Committee, the Audit Committee, the Risk Oversight Committee and the Related Party Transaction Committee. She holds the following positions, among others: Senior Vice President and Senior Executive Assistant to the Chairman and Chief Executive Officer of SMC; President of Petrogen; Director of SMC, PMRMB, POGM, POGI, PSTPL, SEA Refinery, NVRC, LLCDC, SMYPC, Thai San Miguel Liquor Co., Ltd., SMC Global Power Holdings Corp., Rapid Thoroughfares Inc., Trans Aire Development Holdings Corp., and various subsidiaries of SMC; Non-Executive Director of San Miguel Brewery Hong Kong Limited; and Director and Treasurer of Petron-affiliate Top Frontier. She has served as a Director of MERALCO (January 2009 - May 2009), Senior Vice President of Guoco Holdings (1994 - 1998), Chief Financial Officer and Assistant to the President of PICOP Resources (1990-1998) and Assistant to the President and Strategic Planning at the Elizalde Group (1981 - 1989). She is a certified public accountant and is a member of the Capital Market Development Committee of the Financial Executives Institute of the Philippines and the Philippine Institute of Certified Public Accountants. She is also a director of the Market Governance Board of the Philippine Dealing System Holdings. Ms. Calderon graduated *magna cum laude* from the University of the East in 1973 with a degree in Business Administration major in Accounting and earned her master's degree in Business Administration from the Ateneo de Manila University in 1980.

Of the companies in which Ms. Calderon currently holds directorships other than Petron, SMC and Petron-affiliate Top Frontier are also listed with the PSE, while PMRMB is publicly listed in Malaysia and San Miguel Brewery Hong Kong Limited is publicly listed in Hong Kong.

Francis H. Jardeleza, Filipino, born 1949, has served as a Director of the Company since August 4, 2020. He is likewise a Director of GSMI and SMFB. He is also a director of MORE Electric and Power Corporation. He has been a Professorial Lecturer in Constitutional, Administrative, Remedial and Corporation Law at the University of the Philippines College of Law since 1993. Justice Jardeleza is also currently a member of the International and Maritime Law Department of the Philippine Judicial Academy. He was formerly the Senior Vice President and General Counsel of SMC (1996 - 2010), a partner of Angara Abello Concepcion Regala and Cruz Law Offices (1975 - 1987), Roco Buñag Kapunan Migallos and Jardeleza Law Offices (1992 - 1995), Jardeleza Sobreviñas Diaz Hayudini and Bodegon Law Offices (1987 - 1990) and Jardeleza Law Offices (1990 - 1992). He is a retired Associate Justice of the Supreme Court of the Philippines (August 19, 2014 - September 25, 2019). He also served as Solicitor General of the Office of the Solicitor General of the Philippines (February 20, 2012 - August 18, 2014) and Deputy Ombudsman for Luzon of the Office of the Ombudsman of the Philippines (July 7, 2011 - February 19, 2012). Justice Jardeleza earned his Bachelor of Laws degree (*salutatorian* and *cum laude*) from the University of the Philippines in 1974, placed third in the bar exam that same year, and earned his Master of Laws degree from Harvard Law School in 1977.

Of the companies in which Justice Jardeleza currently holds directorships other than Petron, Petron-affiliates GSMI and SMFB are also listed with the PSE.

Virgilio S. Jacinto, Filipino, born 1956, has served as a Director of the Company since August 13, 2010. He is a member of the Corporate Governance Committee of the Company and an alternate member of the Executive Committee. He holds the following positions, among others: Corporate Secretary, Compliance Officer, Senior Vice President and General Counsel of SMC; Corporate Secretary and Compliance Officer of Top Frontier; Corporate Secretary of GSMI and the other subsidiaries and affiliates of SMC; and Director of various other local and offshore subsidiaries of SMC. Atty. Jacinto has served as a Director and Corporate Secretary of United Coconut Planters Bank, a Director of SMB, and San Miguel Northern Cement, Inc., a Partner of Villareal Law Offices (June 1985 - May 1993) and an Associate of

SyCip Salazar Feliciano & Hernandez Law Office (1981 - 1985). Atty. Jacinto was an Associate Professor of Law at the University of the Philippines until October 2021 and is currently a Professorial Lecturer. He obtained his law degree from the University of the Philippines in 1981 (*cum laude*) where he was the class salutatorian and placed sixth in the 1981 bar examinations. He holds a Master of Laws degree from Harvard University.

Atty. Jacinto does not hold a directorship in any company listed with the PSE other than Petron.

Nelly Favis-Villafuerte, Filipino, born 1937, has served as a Director of the Company since December 1, 2011. She was a columnist with two columns in the Manila Bulletin for more than 34 years and resigned recently. She was also a former Member of the Monetary Board of the Bangko Sentral ng Pilipinas from 2005 until July 2011. She is the President and General Manager of LRV Agri-Science Farm, Inc., a family-owned corporation involved in organic farming, and a Director of Bicol Broadcasting Systems, Inc. (also a family-owned corporation). She is an author of business handbooks on microfinance, credit card transactions, exporting and cyberspace and a four (4)-volume series on the laws on banking and financial intermediaries (Philippines). Atty. Villafuerte has served as Governor of the Board of Investments (1998 - 2005), Undersecretary for the International Sector (Trade Promotion and Marketing Group) of the Department of Trade and Industry (“DTI”) (July 1998 - May 2000), and Undersecretary for the Regional Operations Group of the DTI (May 2000 - 2005). She holds a master’s degree in Business Management from the Asian Institute of Management (“AIM”) and was a professor of international law/trade/marketing at the graduate schools of AIM, Ateneo Graduate School of Business and De La Salle Graduate School of Business and Economics. Atty. Villafuerte obtained her Associate in Arts and law degrees from the University of the Philippines, Diliman, Quezon City and ranked seventh place in the bar examinations held immediately after graduation.

Atty. Villafuerte does not hold a directorship in any company listed with the PSE other than Petron.

Horacio C. Ramos, Filipino, born 1945, has served as a Director of the Company since May 2018. He was previously the President of Clariden Holdings, Inc. (2012 - 2024), a Director of SMC (2014 to 2016), the Secretary of the Department of Environment and Natural Resources (February 12 - June 30, 2010), and the Director of Mines and Geosciences Bureau (June 1996 - February 2010). Mr. Ramos has a Bachelor of Science degree in Mining Engineering from the Mapua Institute of Technology obtained in 1967, and has a Graduate Diploma in Mining and Mineral Engineering from the University of New South Wales, Australia in 1976, and a Master of Engineering in Mining Engineering also from the University of New South Wales, Australia in 1978.

Mr. Ramos does not hold a directorship in any company listed with the PSE other than Petron.

John Paul L. Ang, Filipino, born 1980, was elected as a Director of the Company on March 9, 2021. He is the President and Chief Operating Officer of SMC and has been a director since January 21, 2021. He is Chairman, President and Chief Executive Officer of Southern Concrete Industries, Inc. since May 28, 2024, Vice Chairman of SMC Global Power Holdings Corp. since June 1, 2021 and a member of its Executive Committee, Audit and Risk Oversight Committee, Related Party Transaction Committee and Corporate Governance Committee. He is President and Chief Executive Officer of SMFB since June 5, 2024 and a Director since June 2, 2021; President of San Miguel Equity Investments, Inc. since December 7, 2023; President of Guimaras Ridge Property Development Inc., Lucky Nine Properties, Inc. and Mabini Properties Inc. since September 10, 2024. He is a Director of Top Frontier since July 9, 2021 and a member of its Audit and Risk Oversight Committee, Related Party Transaction Committee and Corporate Governance Committee. He is also a Director of San Miguel Brewery since May 28, 2024 and various SMC subsidiaries such as San Miguel Holdings Corp., SMC Slex Inc., SMC Skyway Corporation, SMC NAIA Corporation, San Miguel Aerocity Inc. and SMC Tollways Corporation. He holds and has held various positions in Eagle Cement Corporation, such as the President and Chief Executive Officer since 2008, a Director since 2010, a member of the Audit Committee since 2020 and the Chairman of the Executive Committee since February 2017. He also served as a member of the Nomination and Remuneration

Committee (February 13, 2017 - July 15, 2020) and the General Manager and Chief Operating Officer (2008 - 2016). He has been the President and Chief Executive Officer of South Western Cement Corporation since 2017 and a Director of KB Space Holdings, Inc. since 2016. He was the Managing Director of Sarawak Clinker Sdn. Bhd. Malaysia (2002 - 2008) and the Purchasing Officer of Basic Cement (2002 - 2003). Mr. Ang has a Bachelor of Arts in Interdisciplinary Studies from the Ateneo de Manila University.

Of the companies in which Mr. Ang currently holds directorships, parent companies Top Frontier and SMC and Petron affiliate SMFB are also listed with the PSE.

Artemio V. Panganiban, Filipino, born 1936, has served as an Independent Director of the Company since October 21, 2010. He is the Chairman of the Related Party Transaction Committee and a member of the Audit and Corporate Governance Committees. He is a columnist of the Philippine Daily Inquirer, and an officer, adviser or consultant to several other business, civic, educational and religious organizations. He was the Chief Justice of the Philippines in 2005 - 2006; Associate Justice of the Supreme Court (1995 - 2005); Chairperson of the Philippine House of Representatives Electoral Tribunal (2004 - 2005); Senior Partner of Panganiban Benitez Parlade Africa & Barinaga Law Office (1963-1995); President of Baron Travel Corporation (1967 - 1993); and professor at the Far Eastern University, Assumption College and San Sebastian College (1961 - 1970). He authored over a dozen books and received various awards for his numerous accomplishments, most notably the “Renaissance Jurist of the 21st Century” conferred by the Supreme Court in 2006 and the “Outstanding Manilan” for 1991 by the City of Manila. On September 18, 2024, he was also conferred the Pro Ecclesia Et Pontifice Award granted by Pope Francis and handed to him by Jose F. Cardinal Advincula at the Manila Cathedral. Chief Justice Panganiban earned his Bachelor of Laws degree (*cum laude*) from the Far Eastern University in 1960, placed sixth in the bar exam that same year, and holds honorary doctoral degrees in law from several universities. He co-founded and headed the National Union of Students of the Philippines in 1957-1959.

He is also an independent advisor of Metro Pacific Investments Corporation and an Independent Director of non-listed companies Asian Hospital, Inc., Metro Pacific Tollways Corporation, and TeaM Energy Corporation.

Apart from Petron, Chief Justice Panganiban is an Independent Director of the following listed companies: MERALCO, JG Summit Holdings, Inc., PLDT, Inc., RL Commercial REIT, Inc., GMA Network, Inc., GMA Holdings, Inc., and Asian Terminals, Inc. and is a non-executive Director of Jollibee Foods Corporation.

Margarito B. Teves, Filipino, born 1943, has served as an Independent Director of the Company since May 20, 2014 and currently sits as the Lead Independent Director of the Company. He is the Chairman of the Audit Committee and is a member of the Corporate Governance, the Related Party Transaction, and the Risk Oversight Committees of the Company. He is also an Independent Director of SMC and Atok Big Wedge Corporation, as well as Alphaland Corporation, Alphaland Balesin Island Club, Inc., and Atlantic Atrium Investments Philippines Corporation. He was the Secretary of the Department of Finance of the Philippine government (2005 - 2010), and was previously the President and Chief Executive Officer of the Land Bank of the Philippines (2000 - 2005), among others. He was awarded as “2009 Finance Minister of Year/Asia” by the London-based *The Banker* Magazine. He holds a Master of Arts degree in Development Economics from the Center for Development Economics, Williams College, Massachusetts and is a graduate of the City of London College, with a degree of Higher National Diploma in Business Studies which is equivalent to a Bachelor of Science in Business Economics.

Of the companies in which Mr. Teves currently holds directorships other than Petron, SMC and Atok are also listed with the PSE.

Ricardo C. Marquez, Filipino, born 1960, has served as independent director of the Company since May 17, 2022. He currently holds the following positions: an independent director and the Chairman of the Risk Oversight Committee of SMFB (since March 2017); an independent director and the Chairman of the Corporate Governance Committee and Nomination Committee of Eagle Cement Corporation; an independent director of Top Frontier (since June 2022) and a member of the Board of Trustees of the Public Safety Mutual Benefit Fund, Inc. (beginning July 2015), after serving as its Chairman from July 2015 to June 2016. He served the Philippine National Police (“PNP”) in various capacities before he became the PNP Chief in July 2015. He was awarded twice the Philippine Legion of Honor by the President of the Philippines, and feted by his alma mater with her highest award, the Cavalier Award as the Most Outstanding Alumnus in Special Operations. He completed the Senior Leadman Course of the University of the Philippines Open University; Leaders in Development Executive Program of the Harvard Kennedy School; the Strategic Business Economics Program of the University of Asia and the Pacific; the 224th Session of the Federal Bureau of Investigation National Academy; and the Senior Crisis Management Course of the Anti-Terrorism Assistance Program, Department of Homeland Security in Washington, D.C. He graduated from the Philippine Military Academy and holds a Master in Management degree from the Philippine Christian University.

Of the companies in which Gen. Marquez currently holds directorships other than Petron, Petron-affiliate SMFB is also listed with the PSE.

Board Attendance and Trainings/Corporate Governance Seminars in 2024

The schedule of the meetings for any given year is presented to the directors the year before.

The Board of Directors was therefore advised of the schedule of the board meetings for 2025 at the board meeting held on November 5, 2024. Similarly for 2023, the schedules of the meetings for this year was approved by the Board of Directors on November 7, 2023. Should any matter requiring immediate approval by the Board of Directors arise in between meetings, such matters are reviewed, considered and approved at meetings of the Executive Committee, subject to the Company’s by-laws. Special meetings of the Board of Directors may also be called when necessary in accordance with the Company’s by-laws.

In keeping abreast of the latest best practices in corporate governance and complying with applicable legal requirements, including SEC Memorandum Circular No. 13 (Series of 2013), all the directors of the Company (including all its executive officers and the Internal Auditor) attended a corporate governance seminar in 2024 conducted by providers duly accredited by the SEC and conducted in accordance with SEC Memorandum Circular No. 20, Series of 2013.

The list of the directors of the Company and the directors’ attendance at meetings held in 2024 are set out below.

She has also acted as Corporate Secretary and Assistant Corporate Secretary of various subsidiaries of SMC. She was a former associate at the law firm Sycip Salazar Hernandez & Gatmaitan. Atty. Javier-Elacio holds a Bachelor of Arts degree in English (*cum laude*) and a Bachelor of Laws degree from the University of the Philippines, and a master's degree in law from the Kyushu University in Fukuoka, Japan.

Officer Trainings in 2024

All the executive officers of the Company completed a corporate governance seminar for year 2024 conducted in accordance with SEC Memorandum Circular No. 20, Series of 2013.

(ii) Board Committees; Board and Committee Charters

Pursuant to the new Corporate Governance Manual of the Company approved by the Board on May 8, 2017 (the "Corporate Governance Manual"), the Company has Executive, Audit, Corporate Governance, Risk Oversight, and Related Party Transaction Committees constituted in accordance with Corporate Governance Manual and the Company's By-Laws.

Their respective members were appointed at the organizational meeting held on May 21, 2024.

The Board charter and the charter of each of the board committees were adopted on May 16, 2017.

- **Executive Committee.** The Executive Committee is composed of not less than three (3) members, which shall include the Chairman of the Board of Directors and the President, with two (2) alternate members. The Executive Committee, when the Board of Directors of Directors is not in session, may exercise the powers of the latter in the management of the business and affairs of the Company, except with respect to (a) the approval of any action for which stockholders' approval is also required, (b) the filling of vacancies in the Board of Directors, (c) the amendment or repeal of the by-laws of the adoption of new by-laws; (d) the amendment or repeal of any resolution of the Board of Directors which by its express terms is not so amendable or repealable, (e) a distribution of dividends to the stockholders, and (f) such other matters as may be specifically excluded or limited by the Board of Directors.

As of the date of this Annual Report, the members of the Executive Committee are Mr. Ramon S. Ang, Ms. Aurora T. Calderon, and Mr. Lubin B. Nepomuceno. Mr. John Paul L. Ang and Atty. Virgilio S. Jacinto are the two (2) alternate members of the Executive Committee.

The Executive Committee held three (3) meetings in 2024, with attendance as shown below. The resolutions approved by the Executive Committee were passed with the unanimous vote of the committee members in attendance (whether regular members or alternate members) and later presented to and ratified by the Board of Directors at the board meeting held after each approved resolution.

Members	March 13	April 29	September 24
Ramon S. Ang (Chairperson)	✓	✓	✓
Lubin B. Nepomuceno (Member)	✓	✓	✓
Aurora T. Calderon (Member)	✓	✓	✓
Virgilio S. Jacinto (Alternate Member)	-	-	-
John Paul L. Ang (Alternate Member)	-	-	-

- **Corporate Governance Committee.** The Corporate Governance Committee, created on May 8, 2017, is composed of at least three (3) independent directors as members. The Chairperson of the committee is an independent director.

The Corporate Governance Committee is tasked to assist the Board of Directors in the performance of its corporate governance, nomination and remuneration responsibilities and ensure compliance with and proper observance of corporate governance principles and practices.

As of the date of this Annual Report, the Corporate Governance Committee is chaired by independent director former Chief Justice Artemio V. Panganiban, with independent directors Mr. Margarito B. Teves and Mr. Ricardo C. Marquez, and Atty. Virgilio S. Jacinto as a member. Atty. Estelito P. Mendoza was also a member of the Corporate Governance Committee until March 26, 2025.

In 2024, the Corporate Governance Committee held one (1) meeting, with the following members in attendance:

Members	March 5
Artemio V. Panganiban (Chairperson, Independent Director)	✓
Margarito B. Teves (Independent Director)	✓
Ricardo C. Marquez (Independent Director)	✓
Estelito P. Mendoza	✓
Virgilio S. Jacinto	✓

- **Audit Committee.** The Audit Committee is composed of at least three (3) appropriately qualified non-executive directors, majority of whom are independent directors. The Chairperson is an independent director and is not the Chairperson of the Board of Directors or of any other board committee. The members of the Audit Committee are required to have relevant background, knowledge, skills, and/or experience in the areas of accounting, auditing and finance.

The Audit Committee is responsible for overseeing the senior Management in establishing and maintaining an adequate, effective and efficient internal control framework. The Audit Committee ensures that systems and processes are designed to provide assurance in areas including reporting, monitoring compliance with laws, regulations and internal policies, efficiency and effectiveness of operations, and safeguarding of assets.

Among its functions set out in the Corporate Governance Manual and the Audit Committee Charter, the Audit Committee primarily recommends to the Board each year the appointment of the external auditor to examine the accounts of the Company for that year and performs oversight functions over the Company's internal and external auditors to ensure that they act independently from each other or from interference of outside parties and that they are given unrestricted access to all records, properties and personnel necessary in the discharge of their respective audit functions.

As of the date of this Annual Report, the Audit Committee is chaired by independent director Mr. Margarito B. Teves, and its members are independent directors former Chief Justice Artemio V. Panganiban and Mr. Ricardo C. Marquez, and Ms. Aurora T. Calderon (who is also an accountant). Atty. Estelito P. Mendoza was also a member of the Corporate Governance Committee until March 26, 2025. Mr. Ferdinand K. Constantino acted as advisor to the committee.

In 2024, the Audit Committee held four (4) meetings, with attendance as indicated below.

Members	March 5	May 7	August 6	November 5
Margarito B. Teves (Independent Director; Chairperson)	✓	✓	✓	✓
Artemio V. Panganiban (Independent Director)	✓	✓	✓	✓
Ricardo C. Marquez (Independent Director)	✓	✓	✓	✓
Estelito P. Mendoza	✓	✓	✓	✓
Aurora T. Calderon	✓	✓	✓	✓
Ferdinand K. Constantino - Advisor	✓	✓	✓	✓

- **Risk Oversight Committee.** The Risk Oversight Committee, created on May 8, 2017, is composed of at least three (3) members, the majority of whom are independent directors. The Chairperson is an independent director and is not the Chairperson of the Board of Directors or any other board committee. At least one member of the committee has relevant thorough knowledge and experience on risk and risk management.

The Risk Oversight Committee that shall be responsible for the oversight of the enterprise risk management system of the Company to ensure its functionality and effectiveness.

As of the date of this Annual Report, the Risk Oversight Committee is chaired by independent director Mr. Ricardo C. Marquez, with independent director Mr. Margarito B. Teves and Ms. Aurora T. Calderon as members. No meeting was held by the Risk Oversight Committee in 2024.

- **Related Party Transaction Committee.** The Related Party Transaction Committee, created on May 8, 2017, is composed of at least three (3) non-executive directors, two (2) of whom are independent directors. The Chairperson is an independent director.

The Related Party Transaction Committee is tasked with reviewing all material related party transactions of the Company.

As of the date of this Annual Report, the Related Party Transaction Committee is chaired by independent director former Chief Justice Artemio V. Panganiban, with independent director Mr. Margarito B. Teves and Ms. Aurora T. Calderon as members.

In 2024, the Related Party Transaction Committee held one (1) meeting, with attendance indicated below:

Members	November 5
Artemio V. Panganiban (Independent Director; Chairperson)	✓
Margarito B. Teves (Independent Director)	✓
Aurora T. Calderon	✓

(3) Significant Employees

There was no significant employee or personnel who was not an executive officer but was expected to make a significant contribution to the business.

(4) Family Relationships

Director John Paul L. Ang is the son of Director Ramon S. Ang, while Vice President for Procurement (and nominee for election as director at the 2025 annual stockholders' meeting on May 2, 2025) Jacqueline L. Ang is the daughter of Director Ramon S. Ang. Other than this, the Company has no director or executive officer related to any other director or executive officer up to the fourth degree of consanguinity or affinity.

(5) Involvement in Certain Legal Proceedings

The Company is not aware that any one of the incumbent directors and executive officers and persons nominated to become a director or executive officer has been the subject of a bankruptcy petition or a conviction by final judgment in a criminal proceeding, domestic or foreign, excluding traffic violations and other minor offenses, or has been by final judgment or decree, found to have violated securities or commodities law and enjoined from engaging in any business, securities, commodities or banking activities for the past five (5) years until the date of this Annual Report.

(B) Executive Compensation

Standard Arrangements. Petron's executive officers are also regular employees of the Company and are similarly remunerated with a compensation package comprising of 12 months base pay. They also receive whatever gratuity pay the Board of Directors extends to the managerial, supervisory and technical employees of the Company.

The members of the Board of Directors who are not executive officers are elected for a term of one year. They receive remuneration for 12 months in director's fees and gas allowance, in addition to compensation on a per meeting participation.

Other Arrangements. There are no other arrangements for which the directors are compensated by the Company for services other than those provided as a director.

Warrants or Options. There are no warrants or options held by directors or officers.

Employment Contract. In lieu of an employment contract, the directors are elected at the annual meeting of stockholders for a one-year term until their successors shall have been duly elected and qualified pursuant to the Company's By-Laws. Any director elected in the interim will serve for the remaining term until the next annual meeting of the stockholders.

The aggregate compensation paid or estimated to be paid to the executive officers and the aggregate fees and *per diem* allowances paid or estimated to be paid to the directors of the Company during the periods indicated below are as follows (in million pesos):

(a) Name & Principal Position		(b) Year	(c) Salary (including Fee and Per Diem Allowance of Directors)	(d) Bonus	(e) Other Annual Compensation
Ramon S. Ang	President & CEO	2025 (est)	131.39	12.46	0.53

As of the date of this report, the current directors and executive officers of the Company owned 1,474,382 common shares, 8,300 Series 3B Preferred Shares, 1,000 Series 4A Preferred Shares, 3,500 Series 4B Preferred Shares, 7,500 Series 4C Preferred Shares, 22,700 Series 4D Preferred Shares and 13,250 Series 4E Preferred Shares, for a total of 1,530,632 or 0.0002% of the Company's total outstanding capital stock. No one of these directors and executive officers of the Company directly owns 5% or more of the outstanding capital stock of the Company.

(2) Voting Trust Holders of 5% or more

The Company is not aware of any person holding 5% or more of the Company's outstanding shares under a voting trust agreement.

(3) Changes in Control

The Company is not aware of any change in control or arrangement that may result in a change in control of the Company since the beginning of its last fiscal year.

(D) Certain Relationships and Related Transactions

The major related stockholders of the Company as of March 31, 2025 holding at least 5% of the common stock were as follows:

• SEA Refinery Corporation	-	52.68%
• San Miguel Corporation	-	19.10%

The basis of control is the number of the percentage of voting shares held by each.

The Company had no transactions or proposed transactions with any of its directors or officers.

Related party transactions are discussed under Part I(A)(2)(viii) (*Transactions with and/or dependence on related parties*).

*[Rest of page intentionally left blank;

PART IV - CORPORATE GOVERNANCE AND SUSTAINABILITY

(A) Corporate Governance

Corporate Governance Manual

On May 8, 2017, the Board of Directors approved the new Corporate Governance Manual of the Company primarily based on the Code of Corporate Governance for Publicly-Listed Companies approved by the SEC pursuant to its Memorandum Circular No. 19 (2016) (the "Corporate Governance Manual"). A copy of the Corporate Governance Manual was submitted to the SEC on May 29, 2017.

Various Corporate Policies; Adoptions and Revisions in 2023

In 2023, in furtherance of good governance, the Company adopted and revised various policies of the Company and its subsidiaries (the "Petron Group"), as described below.

Revised Whistle-blowing and Non-Retaliation Policy

The Revised Whistle-blowing and Non-Retaliation Policy of the Petron Group expanded the coverage of the original policy. In addition to concerns on accounting, internal controls, auditing or financial reporting matters such as malpractice, impropriety, theft or fraud, gross mismanagement or waste of funds, the policy now also covers illegal or non-compliant conduct and misconduct such as violations of any law or regulation, violations of the Revised Code of Business Conduct and Ethical Business Policy and other policies of the Company, and improper or unethical behavior likely to cause financial loss or prejudice to company reputation or constituting abuse of authority, harassment or duress. A Whistleblowing Relations Officer and a Whistleblowing Committee have been designated for the conduct of investigations.

The Company also reiterated under this policy its commitment against retaliation, which action will be subject to appropriate sanctions that include dismissal or termination of contractual relations with the Company.

Policy on Anti-Corruption and Anti-Money Laundering and Sanctions Compliance

Under this policy, the Petron Group reiterated its compliance with all applicable laws on anti-corruption and -bribery, anti-money laundering and combating terror financing ("AML-CTF"), and trade and economic sanctions. This policy also sets forth the Petron Group's policy of zero-tolerance for bribery, corruption, money-laundering, terror financing, and sanctions violations.

Anti-Sexual Harassment Policy

The Petron Group values the dignity of every individual, strives to enhance the development of their human resources, guarantees full respect for human rights and uphold the dignity of their employees, applicants for employment, consultants and service providers. Towards this end, all forms of sexual harassment against any personnel in the workplace are prohibited. The Petron Group is committed to upholding the rights and dignity of all its personnel through the creation of a work environment characterized by professionalism, fairness, openness, trust and respect. In addition, the Petron Group has adopted procedures for the handling and investigation of sexual harassment cases. Not only does this policy document the Petron Group's zero-tolerance policy for any form of sexual harassment in the workplace, it also expressly states the position of the Petron Group against victimization for making a reasonable complaint.

Policy on Conflict of Interest

This policy highlights and reiterates the principle in the Company's Revised Code of Conduct and Ethical Business Policy that officers and employees of the Petron Group have a duty to act in the best interest of the Petron Group. The Petron Group shall be protected by identifying and resolving any possible conflict of interest between the Petron Group and officers and employees that will negatively affect current and future business, legal obligations, and good governance. The officers and employees of the Petron Group agree and acknowledge that they are not influenced by personal, family, financial or other considerations which might affect their judgment as to what is best for the Petron Group and that there is a conflict of interest if they compromise their exclusive commitment to the Petron Group. In the event that the personal business interests of an officer or employee may conflict with the interests of the Petron Group, the proper disclosure by the relevant officer or employee and a review by higher Management are required to resolve the conflict.

Diversity, Equity, and Inclusion Policy

This policy documents the dedication of the Petron Group to foster a welcoming and positive working environment. Recognizing that the workplace is an extension of an employee's social and cultural identity, the Petron Group aligns this with its core values and cultivates an open and safe space for its most valuable asset, its human capital. With this policy, the Petron Group expressly and consciously advocates an inclusive organization which is representative of all the sectors of society and which promotes an equal and inclusive workplace, respects diversity, and accepts differences in order to attract and retain skilled employees, enhance productivity, and foster loyalty and unity within the Petron Group.

Policy on Child and Forced Labor

This policy reiterates the Petron Group's commitment to value the dignity of every human person, including children, and guarantees the respect of individual rights. Children shall be afforded special protection from all forms of exploitation and other conditions prejudicial to their development, including child labor. Moreover, the Company expressly commits that it shall not engage, tolerate, or support forced or involuntary labor.

Board Diversity Policy

This policy provides a framework for inclusion to promote diversity in the Board of Directors of Petron by promoting the inclusion of a wide range of perspectives and ideas that can inspire creativity and drive innovation and improve decision-making and corporate governance. In determining the structure and composition of the Board of Directors, diversity will be considered from varied aspects, including, but not limited to, gender, age, ethnicity, religion, culture, sexual orientation, skills, backgrounds, competencies, knowledge, experience, length of service of directors, and applicable regulatory rules and regulations. The Board of Directors is also tasked to strive to maintain a balanced mix of executive, non-executive, and independent directors, having due regard to the requirements of the Company and the Board of Directors.

Revised Code of Conduct and Ethical Business Policy

The Company's Code of Conduct and Ethical Business Policy was likewise updated to specifically include in its anti-bribery coverage all commercial or private transactions of the Company. A conflict of interest in relation to the employment by another person also now extends to any organization engaged in a business that is directly in competition with any of the businesses of the Petron Group.

Policy on Dealings in Securities

On May 6, 2013, the Company adopted this policy, under which the directors, officers and employees of the Company are obliged to exercise extreme caution when dealing in the Company's securities and ensure that such dealings comply with this policy and the requirements under the Securities Regulation Code ("SRC"). The policy sets out the conditions and rules under which the directors, officers and employees of the Company should deal in securities of the Company.

Board Assessment; Summary of 2024 Assessment

Board Assessment Form and Coverage

In August 2013, the Board of Directors adopted a new format for the annual self-assessment by each director of his/her performance and that of the Board of Directors and the board committees.

The self-assessment forms covers the evaluation of the (i) fulfillment of the key responsibilities of the Board of Directors including the consideration of the interests of minority shareholders and stakeholders and their equitable treatment in its decision-making processes, the pursuit of good corporate governance, the establishment of a clear strategic direction for the Company designed to maximize long-term shareholder value, the review and approval of financial statements and budgets, and the appointment of directors who can add value and contribute independent judgment to the formulation of sound policies and strategies of the Company and officers who are competent and highly motivated; (ii) relationship between the Board of Directors and the Management of the Company including having a clear understanding of where the role of the Board of Directors ends and where that of Management begins, the participation of the Board of Directors and the board committees in major business policies or decisions, the continuous interaction with Management for an understanding of the businesses better, and the consideration of the correlation between executive pay and Company performance; (iii) effectiveness of board process and meetings through the adequacy of the frequency, duration and scheduling of board and committee meetings, the ability of the Board of Directors to balance and allocate its time effectively in discussing issues related to the Company's strategy and competitiveness, the attendance at board and committee meetings and the conduct of meetings in a manner that ensures open communication, meaningful participation, and timely resolution of issues, the wide and diverse range of expertise and occupational and personal backgrounds of the directors, and the institutionalization of a formal review process for monitoring the effectiveness of the Board of Directors and the individual directors; and (iv) individual performance of the directors including a director's understanding of the mission, values and strategies of the Company, his/her duties as a director and the Company's Articles, the Company's By-Laws and governing policies and applicable law, rules and regulations, the attendance at meetings and the conscious effort to avoid entering into situations where a director may be placed in a conflict of interest with that of the Company.

Results of the 2024 Board Assessment

All the 15 directors accomplished the annual self-assessment for 2024. The average self-rating by the Directors covering all four (4) topics discussed above was 4.77 (out of a possible 5.0), broken down as follows: (1) Fulfilment of Board Key Responsibilities - The ratings averaged 4.80 based on a series of nine (9) questions; (2) Board-Management Relationship - The ratings averaged 4.70 based on a series of four (4) questions; (3) Effectiveness of Board Processes and Meetings-- The ratings averaged 4.79 based on a series of nine (9) questions; and (4) Individual Performance of Directors-- The ratings averaged 4.79 based on a series of 10 questions.

Compliance with the Corporate Governance Manual

The Company is in compliance with the provisions of the Corporate Governance Manual.

- Its directors possess all the qualifications and none of the disqualifications of a director under the Corporate Governance Manual, the Company's By-laws and applicable laws and regulations.
- The Company had three (3) independent directors (Retired Supreme Court Chief Justice Artemio V. Panganiban, Mr. Margarito B. Teves, and Mr. Ricardo C. Marquez) and a Compliance Officer (Atty. Jhoanna Jasmine M. Javier-Elacio).
- The Company had a Lead Independent Director (Mr. Margarito B. Teves).
- The Company regularly held board meetings and board committee meetings, at which a quorum was always present.
- The directors properly discharge their duties and responsibilities as directors and attended a corporate governance seminar.
- Each director accomplished a self-assessment form for 2024.
- The Company has an external auditor.
- The Company has an Internal Audit Department.
- The Company respects and observes the rights of its stockholders under applicable law.
- The Company is in material compliance with laws and regulations applicable to its business operations, including applicable accounting standards and disclosure requirements.

Pursuit of Corporate Governance

As above-discussed, the Company adopted on May 8, 2017 its new Corporate Governance Manual to align with the Code of Corporate Governance for Publicly Listed Company approved by the SEC and which took effect on January 1, 2017.

The Company is committed to pursuing good corporate governance by keeping abreast of new developments in and leading principles and practices on good corporate governance. The Company also continuously reviews its own policies and practices as it competes in a continually evolving business environment while taking into account the Company's corporate objectives and the best interests of its stakeholders and the Company.

To further instill good governance in the Company, the Company will continue to coordinate with accredited providers for the attendance of the directors and officers in more extensive corporate governance programs to keep them updated with the latest developments in and best practices on good corporate governance. The Office of the General Counsel and Corporate Secretary will also continue to periodically release internal memoranda to explain and/or reiterate the Company's corporate governance practices and the latest good corporate governance practices in general.

Recipient of Golden Arrow Award of the Institute of Corporate Directors for Governance

In 2024, the Company once again received a Golden Arrow award (two arrows) from the Institute of Corporate Directors in recognition of the Company as a top-performing Philippine publicly-listed company. This award was for the ASEAN Corporate Governance Scorecard for 2023.

Integrated Annual Corporate Governance Report ("i-ACGR")

Other matters relating to the governance of the Company are discussed in the i-ACGR of the Company filed with the SEC and posted on the company website.

(B) Sustainability Report

Please find attached as Annex D the Sustainability Report of the Company for 2024.

Further, non-receipt of Notice of Deficiencies shall not excuse the corporation from liability for its deficiencies.

STATEMENT OF MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS

The management of **Petron Corporation** (the "Company") is responsible for the preparation and fair presentation of the separate financial statements including the schedules attached therein, for the years ended **December 31, 2024 and 2023**, in accordance with the prescribed financial reporting framework indicated therein, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors (the "Board") is responsible for overseeing the Company's financial reporting process.

The Board reviews and approves the financial statements including the schedules attached therein, and submits the same to the stockholders.

R.G. Manabat & Co., the independent auditor appointed by the stockholders, has audited the financial statements of the Company in accordance with Philippine Standards on Auditing, and in its report to the stockholders, has expressed its opinion on the fairness of presentation upon completion of such audit.

REPORT OF INDEPENDENT AUDITORS

The Board of Directors and Stockholders
Petron Corporation
SMC Head Office Complex
40 San Miguel Avenue
Mandaluyong City

Opinion

We have audited the separate financial statements of Petron Corporation (the "Company"), which comprise the separate statements of financial position as at December 31, 2024 and 2023, and the separate statements of comprehensive income, separate statements of changes in equity and separate statements of cash flows for the years then ended, and notes, comprising material accounting policies and other explanatory information.

In our opinion, the accompanying separate financial statements present fairly, in all material respects, the unconsolidated financial position of the Company as at December 31, 2024 and 2023, and its unconsolidated financial performance and its unconsolidated cash flows for the years then ended, in accordance with Philippine Financial Reporting Standards (PFRS) Accounting Standards.

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSA). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Separate Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audits of the financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Firm Regulatory Registration & Accreditation:

PRC-BOA Registration No. 0003, valid until September 20, 2026

IC Accreditation No. 0003-IC, Group A, valid for five (5) years covering the audit of 2020 to 2024

financial statements (2019 financial statements are covered by IC Circular Letter (CL) No. 2019-39, Transition clause)

BSP Accreditation No. 0003-BSP, Group A, valid for five (5) years covering the audit of 2020 to 2024

financial statements (2019 financial statements are covered by BSP Monetary Board Resolution No. 2161, Transition clause)

Responsibilities of Management and Those Charged with Governance for the Separate Financial Statements

Management is responsible for the preparation and fair presentation of the separate financial statements in accordance with PFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the separate financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease its operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Separate Financial Statements

Our objectives are to obtain reasonable assurance about whether the separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these separate financial statements.

As part of an audit in accordance with PSA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audits in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the separate financial statements, including the disclosures, and whether the separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audits.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

The engagement partner on the audit resulting in this independent auditors' report is Rohanie C. Galicia.

PETRON CORPORATION

NOTES TO THE SEPARATE FINANCIAL STATEMENTS

(Amounts in Thousand Pesos, Except Par Value, Number of Shares and Per Share Data, Exchange Rates and Commodity Volumes)

1. Reporting Entity

Petron Corporation (the "Company" or "Petron") was incorporated under the laws of the Republic of the Philippines and registered with the Philippine Securities and Exchange Commission (SEC) on December 22, 1966. On September 13, 2013, the SEC approved the extension of the Company's corporate term to December 22, 2066. Under its Articles of Incorporation (AOI), the Company has a corporate life of 50 years or for such longer period as may hereafter be authorized by the laws of the Philippines. Pursuant to the Revised Corporation Code of the Philippines, which took effect in February 2019, the Company shall have a perpetual existence because the Company did not elect to retain its specific corporate term under its AOI.

Petron is the only oil refining and the leading marketing company in the Philippines. Petron envisions an energy-secure and prosperous nation where everyone's journey is fueled by opportunities for meaningful experiences and sustainable success.

The Company operates the modern refinery in Bataan, with a rated capacity of 180,000 barrels a day. Petron's refinery processes crude oil into a full range of world-class petroleum products including liquefied petroleum gas (LPG), gasoline, diesel, jet fuel, kerosene, and petrochemicals. From the refinery, Petron moves its products mainly by sea to more than 30 terminals and facilities strategically located across the country. Through this network, Petron supplies fuels to its service stations and various essential industries such as power-generation, transportation, manufacturing, agriculture, etc. Petron also supplies jet fuel at key airports to international and domestic carriers.

With around 1,800 service stations and hundreds of industrial accounts, Petron remains the leader in the Philippine fuel market. The Company retails gasoline and diesel to motorists and public transport operators. Petron also sells its LPG brands "Gasul" and "Fiesta" to households and other industrial consumers through an extensive dealership network. In line with efforts to increase its presence in the regional market, Petron exports various products to Asia-Pacific countries.

Petron sources its fuel additives from its blending facility in Subic Bay. This gives the Company the capability to formulate unique additives suitable for the driving conditions in the Philippines. The Company also has a facility in Mariveles, Bataan where the refinery's propylene production is converted into higher-value polypropylene resin.

The Company is a public company under Section 17.2 of the Securities Regulation Code (SRC) and its shares of stock are listed for trading at the Philippine Stock Exchange (PSE). As of December 31, 2024, the Company's public float stood at 26.71%.

The intermediate parent company of Petron is San Miguel Corporation (SMC) while its ultimate parent company is Top Frontier Investment Holdings, Inc. (TF). Both companies are incorporated in the Philippines.

As of December 31, 2024, the three (3) principal common shareholders of the Company holding at least 5% of its common stock were SEA Refinery Corporation (“SEA Refinery”) (50.10%), PCD Nominee Corporation - Filipino (20.11%), and SMC (18.16%). SEA Refinery is wholly-owned by SMC. SMC thus holds an aggregate 68.26% ownership of the common shares of the Company.

The registered office address of Petron is SMC Head Office Complex, 40 San Miguel Avenue, Mandaluyong City.

2. Basis of Preparation

Statement of Compliance

The accompanying separate financial statements have been prepared in compliance with Philippine Financial Reporting Standards (PFRS) Accounting Standards. PFRS Accounting Standards are based on International Financial Reporting Standards (IFRS) Accounting Standards issued by the International Accounting Standards Board (IASB). PFRS Accounting Standards consist of PFRS Accounting Standards, Philippine Accounting Standards (PAS) and Philippine Interpretations issued by the Financial and Sustainability Reporting Standards Council (FSRSC).

The Company also prepares and issues consolidated financial statements for the same period as the separate financial statements presented in compliance with PFRS Accounting Standards. These may be obtained at the Company’s registered office address (Note 1).

The separate financial statements were approved and authorized for issuance by the Board of Directors (BOD) on March 4, 2025.

Basis of Measurement

The separate financial statements of the Company have been prepared on the historical cost basis of accounting except for the following items which are measured on an alternative basis at each reporting date:

Items	Measurement Bases
Derivative financial instruments	Fair value
Financial assets at fair value through profit or loss (FVPL)	Fair value
Retirement benefits liability	Present value of the defined benefit obligation less fair value of plan assets

Functional and Presentation Currency

The separate financial statements are presented in Philippine peso, which is the Company’s functional currency. All financial information presented in Philippine peso is rounded off to the nearest thousand (P000), except when otherwise indicated.

3. Summary of Material Accounting Policies

The accounting policies set out below have been applied consistently to all periods presented in the separate financial statements, except for the changes in accounting policies as explained below.

Adoption of Amended Standards

The FSRSC approved the adoption of a number of amended standards as part of PFRS Accounting Standards.

The Company has adopted the following amendments to PFRS Accounting Standards effective January 1, 2024 and accordingly, changed its accounting policies in the following areas:

- Lease Liability in a Sale and Leaseback (Amendments to PFRS 16, *Leases*). The amendments confirm the following:
 - On initial recognition, the seller-lessee includes variable lease payments when it measures a lease liability arising from a sale and leaseback transaction.
 - After initial recognition, the seller-lessee applies the general requirements for subsequent accounting of the lease liability such that it recognizes no gain or loss relating to the right-of-use asset it retains.

A seller-lessee may adopt different approaches that satisfy the new requirements on subsequent measurement.

- Classification of Liabilities as Current or Noncurrent - 2020 Amendments and Noncurrent Liabilities with Covenants - 2022 Amendments (Amendments to PAS 1, *Presentation of Financial Statements*). To promote consistency in application and clarify the requirements on determining whether a liability is current or noncurrent, the amendments:
 - removed the requirement for a right to defer settlement of a liability for at least 12 months after the reporting period to be unconditional and instead require that the right must have substance and exist at the reporting date;
 - clarified that only covenants with which the entity must comply on or before the reporting date affect the classification of a liability as current or noncurrent and covenants with which the entity must comply after the reporting date do not affect a liability's classification at that date;
 - provided additional disclosure requirements for noncurrent liabilities subject to conditions within 12 months after the reporting period to enable the assessment of the risk that the liability could become repayable within 12 months; and
 - clarified that settlement of a liability includes transferring an entity's own equity instruments to the counterparty, but conversion options that are classified as equity do not affect classification of the liability as current or noncurrent.

- Supplier Finance Arrangements (Amendments to PAS 7, *Statement of Cash Flows*, and PFRS 7, *Financial Instruments: Disclosures*). The amendments introduce new disclosure objectives to provide information about the supplier finance arrangements of an entity that would enable users to assess the effects of these arrangements on the liabilities and cash flows, and the exposure to liquidity risk.

Under the amendments, an entity discloses in aggregate for its supplier finance arrangements:

- the terms and conditions of the arrangements;
- beginning and ending carrying amounts and associated line items of the financial liabilities that are part of a supplier finance arrangement, distinguishing those for which suppliers were already paid, and range of payment due dates including those for comparable trade payables not part of a supplier finance arrangement; and
- the type and effect of non-cash changes in the carrying amounts.

The amendments also add supplier finance arrangements as an example to the existing disclosure requirements in PFRS 7 on factors an entity might consider when providing specific quantitative liquidity risk disclosures about its financial liabilities.

The adoption of the amendments to standards did not have a material effect on the separate financial statements.

New and Amended Standards Not Yet Adopted

A number of new and amendments to standards are effective for annual reporting periods beginning after January 1, 2024 and have not been applied in preparing the separate financial statements. Unless otherwise stated, none of these are expected to have a significant effect on the separate financial statements.

The Company will adopt the following new and amendments to standards on the respective effective dates:

- Lack of Exchangeability (Amendments to PAS 21, *The Effects of Changes in Foreign Exchange Rates*). The amendments clarify that a currency is exchangeable into another currency when an entity is able to obtain the other currency within a time frame that allows for a normal administrative delay and through a market or exchange mechanism in which an exchange transaction would create enforceable rights and obligations.

When a currency is not exchangeable, an entity needs to estimate a spot rate. The objective in estimating the spot rate is to reflect the rate at which an orderly exchange transaction would take place at the measurement date between market participants under prevailing economic conditions. The amendments do not specify how to estimate the spot exchange rate to meet the objective and an entity can use an observable exchange rate without adjustment or another estimation technique.

The amendments require new disclosures to help users assess the impact of using an estimated exchange rate on the financial statements, including the nature and financial impacts of the currency not being exchangeable, the spot exchange rate used, the estimation process, and risks to the entity because the currency is not exchangeable.

The amendments apply for annual reporting periods beginning on or after January 1, 2025. Earlier application is permitted. Comparative information is not restated and the effect of initially applying the amendments are adjusted to the opening balance of retained earnings, or to the cumulative amount of translation differences if the entity uses a presentation currency other than its functional currency.

- Classification and Measurement of Financial Instruments (Amendments to PFRS 9, *Financial Instruments*, and PFRS 7, *Financial Instruments: Disclosures*). The amendments clarify that financial assets and financial liabilities are recognized and derecognized on the settlement date, except for regular way purchases or sales of financial assets and financial liabilities that meet the conditions for an exception. The exception allows entities to elect to derecognize certain financial liabilities settled through an electronic payment system before the settlement date.

The amendments also provide guidelines for assessing the contractual cash flow characteristics of financial assets that include environmental, social, and governance-linked features and other similar contingent features.

Entities are required to disclose additional information about financial assets and financial liabilities with contingent features, and equity instruments classified at fair value through other comprehensive income.

The amendments are effective for annual reporting periods beginning on or after January 1, 2026, with early application permitted.

- Annual Improvements to PFRS Accounting Standards – Volume 11. This cycle of improvements contains amendments to new standards: Gain or Loss on Derecognition (Amendments to PFRS 7 *Financial Instruments: Disclosure*). The amendments replaced the reference to 'inputs that were not based on observable market data' in the obsolete paragraph 27A of PFRS 7, with reference to 'unobservable inputs' in paragraphs 72-73 of PFRS 13 *Fair Value Measurement*.
 - Introduction, Disclosure of Difference Between Fair Value and Transaction Price, and Credit Risk Disclosures (Amendments to Guidance on implementing PFRS 7 *Financial Instruments: Disclosure*). The amendments:
 - clarified that the Guidance on implementing PFRS 7 does not necessarily illustrate all the requirements in the referenced paragraphs of PFRS 7;
 - made the wordings on the disclosure of deferred difference between fair value and transaction price in paragraph IG14 of PFRS 7 consistent with the requirements in paragraph 28 of PFRS 7 and with the concepts in PFRS 9 *Financial Instruments* and PFRS 13 *Fair Value Measurement*; and
 - simplified the wordings on credit risk disclosures in paragraph IG20B that the illustration does not include financial assets that are purchased or originated credit impaired.

- Derecognition of Lease Liabilities and Transaction Price (Amendments to PFRS 9 Financial Instruments). The amendments:
 - added a cross-reference to clarify that when a lessee has determined that a lease liability has been extinguished in accordance with PFRS 9, the lessee applies the requirement that the difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, shall be recognized in profit or loss; and
 - replaced the term 'their transaction price (as defined in IFRS 15)' with 'the amount determined by applying IFRS 15' because a receivable might be initially measured at an amount that differs from the transaction price recognized as revenue, for example, when you recognize full amount for consideration that's unconditionally receivable but at the same time recognize expected refund liability with respect to retrospective rebates. Consequently, the definition of the transaction price has been deleted.
- Determination of 'De Facto Agent' (Amendments to PFRS 10 Consolidated Financial Statements). The amendments revised the wording on whether a party is a de facto agent when directed by 'those that direct the activities of the investor' to be non-conclusive given this may require judgement.
- Cost Method (Amendments to PAS 7 Statement of Cash Flows). The amendments replaced the term 'cost method' with 'at cost' given the definition of 'cost method' has previously been removed from PFRS Accounting Standards.

The amendments apply for annual reporting periods beginning on or after January 1, 2026. Earlier application is permitted. The amendment on derecognition of lease liabilities applies only to lease liabilities extinguished on or after the beginning of the annual reporting period in which the amendment is first applied.

- PFRS 17, *Insurance Contracts*, replaces the interim standard, PFRS 4, *Insurance Contracts*, and establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts within the scope of the standard. The new standard applies to all insurance contracts, regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

PFRS 17 aims to increase transparency and to reduce diversity in the accounting for insurance contracts. In contrast to the requirements in PFRS 4, which are largely based on grandfathering previous local accounting policies, PFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of PFRS 17 is the general model, supplemented by a specific adaptation for contracts with direct participation features (the variable fee approach) and simplified approach (the premium allocation approach) mainly for short-duration contracts.

On December 15, 2021, the FSRSC amended the mandatory effective date of PFRS 17 from January 1, 2023 to January 1, 2025. This is consistent with Circular Letter No. 2020-62 issued by the Insurance Commission which deferred the implementation of PFRS 17 by two years after its effective date as decided by the International Accounting Standards Board (IASB).

On February 14, 2025, the FSRSC further deferred the date of initial application by two years, making PFRS 17 effective for annual reporting periods beginning on or after January 1, 2027, with comparative figures required. Early adoption is permitted. The Insurance Commission issued CL No. 2025-04, aligning with this deferral.

- PFRS 18, *Presentation and Disclosure in Financial Statements*, replaces PAS 1, *Presentation of Financial Statements*. The new standard introduces the following key requirements:
 - Entities are required to classify all income and expenses into five categories in the statement of income: operating, investing, financing, income tax, and discontinued operations. Subtotals and totals are presented in the statement of income for operating profit or loss, profit or loss before financing and income taxes, and profit or loss.
 - Management-defined performance measures are disclosed in a single note to the financial statements.
 - Enhanced guidance is provided on how to group information in the financial statements. Additionally, entities are required to use the operating profit or loss subtotal as the starting point for the statement of cash flows when presenting cash flows from operating activities under the indirect method.

PFRS 18 is effective for annual reporting periods beginning on or after January 1, 2027, with retrospective application required. Early adoption is permitted. The Company is still in the process of assessing the impact of the new standard.

Deferral of the local implementation of Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Investments in Associates and Joint Ventures: Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*.

- The amendments address an inconsistency in the requirements in PFRS 10 and PAS 28 in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The amendments require that a full gain or loss is recognized when a transaction involves a business (whether it is housed in a subsidiary or not). A partial gain or loss is recognized when a transaction involves assets that do not constitute a business, even if these assets are housed in a subsidiary.

Originally, the amendments apply prospectively for annual reporting periods beginning on or after January 1, 2016, with early adoption permitted. However, on January 13, 2016, the FSRSC decided to postpone the effective date of these amendments until the IASB has completed its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

Current versus Noncurrent Classification

The Company presents assets and liabilities in the separate statements of financial position based on current and noncurrent classification. An asset is current when it is: (a) expected to be realized or intended to be sold or consumed in the normal operating cycle; (b) held primarily for the purpose of trading; (c) expected to be realized within 12 months after the reporting period; or (d) cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period.

A liability is current when: (a) it is expected to be settled in the normal operating cycle; (b) it is held primarily for trading; (c) it is due to be settled within 12 months after the reporting period; or (d) there is no right to defer the settlement of the liability for at least 12 months after the reporting period.

The Company classifies all other assets and liabilities as noncurrent. Deferred tax assets and liabilities are classified as noncurrent.

Financial Instruments

Recognition and Initial Measurement. A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

The Company recognizes a financial asset or a financial liability in the separate statements of financial position when it becomes a party to the contractual provisions of the instrument.

A financial asset (unless a trade receivable without a significant financing component) or financial liability is initially measured at the fair value of the consideration given or received. The initial measurement of financial instruments, except for those designated as at FVPL, includes transaction costs. A trade receivable without a significant financing component is initially measured at the transaction price.

Financial Assets

The Company classifies its financial assets, at initial recognition, as subsequently measured at amortized cost, FVOCI and FVPL. The classification depends on the contractual cash flow characteristics of the financial assets and the business model of the Company for managing the financial assets.

Financial Assets at Amortized Cost. A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVPL:

- it is held within a business model with the objective of holding financial assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognized in the separate statements of comprehensive income when the financial asset is derecognized, modified or impaired.

The Company's cash and cash equivalents, trade and other receivables, noncurrent receivables and deposits, restricted cash and advances to a subsidiary are included under this category.

Financial Assets at FVPL. All financial assets not classified as measured at amortized cost or FVOCI are measured at FVPL. This includes derivative financial assets that are not designated as cash flow hedge. Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVPL.

At initial recognition, the Company may irrevocably designate a financial asset as at FVPL if the designation eliminates or significantly reduces an accounting mismatch that would otherwise arise from measuring assets or liabilities or recognizing the gains and losses on different bases.

The Company carries financial assets at FVPL using their fair values. Attributable transaction costs are recognized in the separate statements of comprehensive income as incurred. Changes in fair value and realized gains or losses are recognized in the separate statements of comprehensive income. Fair value changes from derivatives accounted for as part of an effective cash flow hedge are recognized in OCI. Any interest earned from investment in debt instrument designated as at FVPL is recognized in the separate statements of comprehensive income. Any dividend income from investment in equity instrument is recognized in the separate statements of comprehensive income when the right to receive payment has been established, unless the dividend clearly represents a recovery of the part of the cost of the investment.

The Company's derivative assets not designated as cash flow hedge and investments in equity instruments at FVPL are classified under this category.

Financial Liabilities

The Company determines the classification of its financial liabilities, at initial recognition, in the following categories: financial liabilities at FVPL and other financial liabilities. All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings, net of directly attributable transaction costs.

Financial Liabilities at FVPL. Financial liabilities are classified under this category through the fair value option. Derivative instruments (including embedded derivatives) with negative fair values, except those covered by hedge accounting relationships, are also classified under this category.

The Company carries financial liabilities at FVPL using their fair values and reports fair value changes in the separate statements of comprehensive income. Any interest expense incurred is recognized as part of "Interest expense and other financing charges" account in the separate statements of comprehensive income.

The Company's derivative liabilities that are not designated as cash flow hedge are classified under this category.

Other Financial Liabilities. This category pertains to financial liabilities that are not designated or classified as at FVPL. After initial measurement, other financial liabilities are carried at amortized cost using the effective interest method. Amortized cost is calculated by taking into account any premium or discount and any directly attributable transaction costs that are considered an integral part of the effective interest rate of the liability. The effective interest rate amortization is included in "Interest expense and other financing charges" account in the separate statements of comprehensive income. Gains and losses are recognized in the separate statements of comprehensive income when the liabilities are derecognized as well as through the amortization process.

Debt issue costs are considered as an adjustment to the effective yield of the related debt and are deferred and amortized using the effective interest method. When a loan is paid, the related unamortized debt issue costs at the date of repayment are recognized in the separate statements of comprehensive income.

The Company's liabilities arising from its trade or borrowings such as loans payable, accounts payable and accrued expenses, long-term debt, lease liabilities and other noncurrent liabilities are included under this category.

Derecognition of Financial Assets and Financial Liabilities

Financial Assets. A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognized when:

- the rights to receive cash flows from the asset have expired; or
- the Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay them in full without material delay to a third party under a "pass-through" arrangement; and either: (a) has transferred substantially all the risks and rewards of the asset; or (b) has neither transferred nor retained substantially all the risks and rewards of the asset but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the Company continues to recognize the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognizes the associated liability. The transferred asset and the associated liability are measured on the basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company is required to repay.

Financial Liabilities. A financial liability is derecognized when the obligation under the liability is discharged, cancelled or expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in separate statements of comprehensive income.

Impairment of Financial Assets

The Company recognizes allowance for expected credit loss (ECL) on financial assets at amortized cost.

ECLs are probability-weighted estimates of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive), discounted at the effective interest rate of the financial asset, and reflects reasonable and supportable information that is available without undue cost or effort about past events, current conditions and forecasts of future economic conditions.

The Company recognizes an allowance for impairment based on either 12-month or lifetime ECLs, depending on whether there has been a significant increase in credit risk since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information.

The Company recognizes lifetime ECLs for receivables that do not contain significant financing component. The Company uses provision matrix that is based on the Company's historical credit loss experience, adjusted for forward-looking factors specific to the borrowers and the economic environment.

At each reporting date, the Company assesses whether financial assets carried at amortized cost are credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit-impaired include observable data about the following events:

- (a) significant financial difficulty of the issuer or the borrower;
- (b) a breach of contract, such as a default or past due event;
- (c) the restructuring of a financial asset by the Company on terms that the Company would not consider otherwise;
- (d) it is becoming probable that the borrower will enter bankruptcy or other financial reorganization; or
- (e) the disappearance of an active market for that financial asset because of financial difficulties.

The Company considers a financial asset to be in default when a counterparty fails to pay its contractual obligations, or there is a breach of other contractual terms, such as covenants.

The Company directly reduces the gross carrying amount of a financial asset when there is no reasonable expectation of recovering the contractual cash flows on a financial asset, either partially or in full. This is generally the case when the Company determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

The ECLs on financial assets at amortized cost are recognized as allowance for impairment losses against the gross carrying amount of the financial asset, with the resulting impairment losses (or reversals) recognized in the separate statements of comprehensive income.

Classification of Financial Instruments between Liability and Equity

Financial instruments are classified as liability or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument or a component that is a financial liability, are reported as expense or income. Distributions to holders of financial instruments classified as equity are charged directly to equity, net of any related income tax benefits.

A financial instrument is classified as liability if it provides for a contractual obligation to:

- deliver cash or another financial asset to another entity;
- exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Company; or
- satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

The components of issued financial instruments that contain both liability and equity elements are accounted for separately, with the equity component being assigned the residual amount after deducting from the instrument as a whole or in part, the amount separately determined as the fair value of the liability component on the date of issue.

Derivative Financial Instruments and Hedge Accounting

The Company uses derivative financial instruments, such as forwards, swaps and options to manage its exposure on foreign currency, interest rate and commodity price risks. Derivative financial instruments are initially recognized at fair value on the date the derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Changes in fair value of derivatives that are not designated as hedging instruments are recognized in separate statements of comprehensive income.

Freestanding Derivatives. The Company designates certain derivatives as hedging instruments to hedge the exposure to variability in cash flows associated with recognized liabilities arising from changes in foreign exchange rates and interest rates.

At the inception of a hedge relationship, the Company formally designates and documents the hedge relationship to which the Company wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The Company also documents the economic relationship between the hedged item and the hedging instrument, including whether the changes in cash flows of the hedging instrument are expected to offset the changes in cash flows of the hedged item.

Cash Flow Hedge. When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in the fair value of the derivative is recognized in OCI and presented in the "Other reserves" account in the separate statements of changes in equity. The effective portion of changes in the fair value of the derivative that is recognized in OCI is limited to the cumulative change in fair value of the hedged item. Any ineffective portion of changes in the fair value of the derivative is recognized immediately in the separate statements of comprehensive income.

The Company designates only the intrinsic value of options and the change in fair value of the spot element of forward contracts as the hedging instrument in cash flow hedging relationships. The change in fair value of the time value of options, the forward element of forward contracts and the foreign currency basis spread of financial instruments are separately accounted for as cost of hedging and recognized in OCI. The cost of hedging is removed from OCI and recognized in separate statements of comprehensive income, either over the period of the hedge if the hedge is time related, or when the hedged transaction affects separate statements of comprehensive income if the hedge is transaction related.

When the hedged transaction subsequently results in the recognition of a non-financial item, the amount accumulated in equity is transferred and included in the initial cost of the hedged asset or liability. For all other hedged transactions, the amount accumulated in equity is reclassified to separate statements of comprehensive income as a reclassification adjustment in the same period or periods during which the hedged cash flows affect separate statements of comprehensive income.

If the hedge no longer meets the criteria for hedge accounting or the hedging instrument expires, is sold, is terminated or is exercised, hedge accounting is discontinued prospectively. The amount that has been accumulated in equity is: (a) retained until it is included in the cost of non-financial item on initial recognition, for a hedge of a transaction resulting in the recognition of a non-financial item; or (b) reclassified to separate statements of comprehensive income as a reclassification adjustment in the same period or periods as the hedged cash flows affect separate statements of comprehensive income, for other cash flow hedges. If the hedged future cash flows are no longer expected to occur, the amounts that have been accumulated in equity are immediately reclassified to separate statements of comprehensive income.

The Company has no outstanding derivatives accounted for as cash flow hedge designated under hedge accounting as at December 31, 2024 and 2023 (Note 34).

Inventories

Inventories are carried at the lower of cost and net realizable value (NRV). For petroleum products and crude oil, the NRV is the estimated selling price in the ordinary course of business, less the estimated costs to complete and/or market and distribute.

For financial reporting purposes, the Company uses the first-in, first-out method in costing petroleum products and crude oil. Cost is determined using the moving-average method in costing lubes and greases, blending components, polypropylene, materials and supplies inventories. For income tax reporting purposes, cost of all inventories is determined using the moving-average method.

For financial reporting purposes, duties and taxes related to the acquisition of inventories are capitalized as part of inventory cost. For income tax reporting purposes, such duties and taxes are treated as deductible expenses in the year these charges are incurred.

Investments in Shares of Stock of Subsidiaries and Associate

The Company's investments in shares of stock of subsidiaries and associate are accounted for under the cost method as provided for under PAS 27, *Consolidated and Separate Financial Statements*. A subsidiary is an entity controlled by the Company. The Company controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. An associate is an entity in which the Company has significant influence. Significant influence is the power to participate in the financial and operating policies of the investee, but not control over those policies.

The investments are carried in the Company's separate statements of financial position at cost less any impairment in value. The Company recognizes dividends from subsidiaries and associate in separate statements of comprehensive income when its right to receive the dividend is established.

The Company's subsidiaries include the following:

Name of Subsidiary	Percentage of Ownership		Country of Incorporation
	2024	2023	
Overseas Ventures Insurance Corporation Ltd. (Ovincor)	100.00	100.00	Bermuda
Petron Freeport Corporation (PFC)	100.00	100.00	Philippines
Petron Singapore Trading Pte., Ltd. (PSTPL)	100.00	100.00	Singapore
Petron Marketing Corporation (PMC)	100.00	100.00	Philippines
New Ventures Realty Corporation (NVRC) and Subsidiaries	85.55	85.55	Philippines
Petron Global Limited (PGL)	100.00	100.00	British Virgin Islands
Petron Finance (Labuan) Limited (PFL)	100.00	100.00	Malaysia
Petron Oil and Gas Mauritius Ltd. (POGM) and Subsidiaries	100.00	100.00	Mauritius
Petrochemical Asia (HK) Limited (PAHL) and Subsidiaries	100.00	100.00	Hong Kong
Mema Holdings Inc. (Mema) and Subsidiaries	100.00	100.00	Philippines

Ovincor is engaged in the business of non-life insurance and re-insurance.

The primary purpose of PFC and PMC is to, among others, sell on wholesale or retail and operate service stations, retail outlets, restaurants, convenience stores and the like.

PSTPL's principal activities include those relating to the procurement of crude oil, ethanol, catalysts, additives, coal and various petroleum finished products; crude vessel chartering and commodity risk management.

NVRC's primary purpose is to acquire real estate and derive income from its sale or lease. As of December 31, 2024 and 2023, NVRC owns 100% of Las Lucas Construction and Development Corporation (LLCDC), Parkville Estates & Development Corporation (PEDC), South Luzon Prime Holdings, Inc. (SLPHI), Abreco Realty Corporation (ARC) and 60% of Mariveles Landco Corporation (MLC).

PGL is a holding company incorporated in the British Virgin Islands.

POGM is a holding company incorporated under the laws of Mauritius. POGM owns an offshore subsidiary Petron Oil and Gas International Sdn. Bhd. (POGI).

As of December 31, 2024 and 2023, POGI owns 73.4% of Petron Malaysia Refining & Marketing Bhd (PMRMB) and 100% of both Petron Fuel International Sdn Bhd (PFISB) and Petron Oil (M) Sdn Bhd (POMSB), collectively hereinafter referred to as "Petron Malaysia".

Petron Malaysia is involved in the refining and marketing of petroleum products in Malaysia.

PFL is a holding company incorporated under the laws of Labuan, Malaysia.

PAHL is a holding company incorporated in Hong Kong in March 2008. As of December 31, 2024 and 2023, PAHL owns 100% of Robinsons International Holdings Limited (RIHL) which owns 100% of Philippine Polypropylene, Inc. (PPI) and 40% of MLC.

Mema is a holding company acquired by the Company on June 30, 2022. As of December 31, 2024 and 2023, Mema owns 100% of Weldon Offshore Strategic Limited Incorporated which owns 100% of Petrofuel Logistics, Inc (PLI). PLI provides logistics and freight forwarding services for the hauling, carriage, transportation, forwarding, and/or storage, and into-plane operation requirements mainly of the Company.

The Company's 25.06% interest in Petrogen Insurance Corporation (Petrogen), accounted for as an investment in an associate as part of "Investments and Advances - net" account in the separate statements of financial position, is accounted for under the cost method of accounting. The investment in associate is carried in the separate statements of financial position at cost less any impairment in value.

Interest in a Joint Venture

A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

The Company's 33.33% joint venture interest in Pandacan Depot Services, Inc. (PDSI), included under "Investments and advances" account in the separate statements of financial position, is accounted for under the cost method of accounting. The interest in joint venture is carried in the separate statements of financial position at cost less any impairment in value. The Company has no capital commitments or contingent liabilities in relation to its interest in this joint venture.

Property, Plant and Equipment

Property, plant and equipment, except land, are stated at cost less accumulated depreciation and any accumulated impairment in value. Such cost includes the cost of replacing part of the property, plant and equipment at the time that cost is incurred, if the recognition criteria are met, and excludes the costs of day-to-day servicing. Land is stated at cost less any impairment value, if any.

The initial cost of property, plant and equipment comprises its construction cost or purchase price, including import duties, taxes and any directly attributable costs in bringing the asset to its working condition and location for its intended use. Expenditures incurred after the asset has been put into operation, such as repairs, maintenance and overhaul costs, are normally recognized as an expense in the period the costs are incurred. Major repairs are capitalized as part of property, plant and equipment only when it is probable that future economic benefits associated with the items will flow to the Company and the cost of the items can be measured reliably.

Capital projects in progress (CPIP) represents structures under construction and is stated at cost. This includes the costs of construction and other direct costs. Borrowing costs that are directly attributable to the construction of plant and equipment are capitalized during the construction period. CPIP is not depreciated until such time that the relevant assets are ready for use.

For financial reporting purposes, depreciation for property, plant and equipment, other than those assets used in production, which commences when the assets are available for its intended use, are computed using the straight-line method. Depreciation of refinery and plant equipment used in production is computed based on the unit of production method (UPM) which considers the expected capacity over the estimated useful lives of these assets. UPM closely reflects the expected pattern of consumption of the future economic benefits embodied in these assets.

The estimated useful lives of the assets are as follows:

	Number of Years
Buildings and improvements and related facilities	7 - 30
Refinery and plant equipment	4 - 35
Service stations and other equipment	3 - 10
LPG cylinders	15
Computers, office and motor equipment	2 - 10
Land leasehold improvements	10 - 12 or the term of the lease, whichever is shorter

For financial reporting purposes, duties and taxes related to the acquisition of property, plant and equipment are capitalized. For income tax reporting purposes, such duties and taxes are treated as deductible expenses in the year these charges are incurred.

In 2024, the Company changed the depreciation method for tax reporting purposes from double-declining balance method to UPM method for production-related assets and straight-line method for all other depreciable assets to align with financial reporting. The alignment of depreciation method aims to simplify the accounting and reporting of depreciation and to eliminate possible discrepancies arising from the use of different methodologies for financial reporting and taxation.

The remaining useful lives, residual values and depreciation method are reviewed and adjusted periodically, if appropriate, to ensure that such periods and methods of depreciation is consistent with the expected pattern of economic benefits from the items of property, plant and equipment.

The carrying amounts of property, plant and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying amounts may not be recoverable.

Fully depreciated assets are retained in the accounts until they are no longer in use.

An item of property, plant and equipment is derecognized either when it has been disposed of or when it is permanently withdrawn from use and no future economic benefits are expected from its use or disposal. Any gain or loss arising from the retirement and disposal of an item of property, plant and equipment (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is recognized in separate statements of comprehensive income in the period of retirement and disposal.

Leases

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset for a period of time, the Company assesses whether, throughout the period of use:

- the Company has the right to obtain substantially all the economic benefits from use of the identified asset; and
- the Company has the right to direct the use of the identified asset.

Company as a Lessee

The Company recognizes a right-of-use asset and a lease liability at the lease commencement date (i.e., the date the underlying asset is available for use). The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise of the following:

- fixed payments, including in-substance fixed payments, less any lease incentives receivable;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and

- the exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

The lease liability is measured at amortized cost using the effective interest method. The carrying amount of the lease liability is remeasured when there is a change in future lease payments arising from a change in an index or rate, a change in the estimate of the amount expected to be payable under a residual value guarantee, or a change in the assessment of whether a purchase or extension option is reasonably certain to be exercised or a termination option is reasonably certain not to be exercised.

When the lease liability is remeasured, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recognized in the separate statements of comprehensive income if the carrying amount of the right-of-use asset has been reduced to zero.

The Company has elected not to recognize right-of-use assets and lease liabilities for short-term leases (i.e., lease that have a lease term of 12 months or less from the commencement date and do not contain a purchase option) and leases of low-value assets, including pallets and computer equipment. The Company recognizes the lease payments associated with these leases as expense on a straight-line basis over the lease term.

At commencement or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property, the Company has elected not to separate non-lease components and account for the lease and non-lease components as a single component.

Company as a Lessor

The Company determines at lease inception whether each lease is a finance lease or an operating lease.

To classify each lease, the Company makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, the lease is classified as a finance lease; if not, it is classified as an operating lease. As part of the assessment, the Company considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

When the Company is an intermediate lessor, it accounts for the head lease and the sublease separately. It assesses the lease classification of a sublease with reference to the right-of-use asset arising from the head lease. If a head lease is a short-term lease to which the Company applies the recognition exemption, it classifies the sublease as an operating lease.

If an arrangement contains lease and non-lease components, the Company applies PFRS 15 to allocate the consideration in the contract.

The Company identified the use of loaned equipment related to the sale of goods to be accounted under PFRS 16. The Company provides equipment such as pumps, tanks, signage and other ancillary equipment necessary for the operation of the business. These are loaned to the customers for the duration of the contract for the sole purpose of storing, handling and selling products and shall, at all times, remain the property of the Company. The Company allocates portion of the revenue to the use of loaned equipment and presented as part of "Sales" in the separate statements of comprehensive income based on adjusted market assessment approach. Lease revenue from the use of loaned equipment is contingent to, and recognized at the same time as, the sale of goods.

The Company recognizes lease payments received under operating leases as rent income on a straight-line basis over the lease term. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognized as an expense over the lease term on the same basis as rent income. Contingent rents are recognized as income in the period in which they are earned.

Investment Property

Investment property consists of property held to earn rentals and/or for capital appreciation but not for sale in the ordinary course of business, used in the production or supply of goods or services or for administrative purposes. Investment property, except for land, is measured at cost including transaction costs less accumulated depreciation and any accumulated impairment in value. Cost also includes any related asset retirement obligation, if any. The carrying amount includes the cost of replacing part of an existing investment property at the time the cost is incurred, if the recognition criteria are met, and excludes the costs of day-to-day servicing of an investment property. Land is stated at cost less any impairment in value.

CPIP represents the amount of accumulated expenditures on unfinished and/or ongoing projects. This includes the costs of construction and other direct costs. CPIP is not depreciated until such time that the relevant assets are ready for use.

Depreciation, which commences when the assets are available for their intended use, are computed using the straight-line method over the following estimated useful lives of the assets:

	Number of Years
Buildings and improvements	7 - 20
Land leasehold improvements	10-12 or the term of the lease, whichever is shorter

The useful lives and depreciation method are reviewed and adjusted, if appropriate, at each reporting date.

Investment property is derecognized either when it has been disposed of or when it is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement and disposal of investment property are recognized in separate statements of comprehensive income in the period of retirement and disposal.

Transfers are made to investment property when, and only when, there is an actual change in use, evidenced by ending of owner-occupation or commencement of an operating lease to another party. Transfers are made from investment property when, and only when, there is an actual change in use, evidenced by commencement of the owner-occupation or commencement of development with a view to sell.

For a transfer from investment property to owner-occupied property or inventories, the cost of property for subsequent accounting is its carrying amount at the date of change in use. If the property occupied by the Company as an owner-occupied property becomes an investment property, the Company accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of an intangible asset acquired in a business combination is its fair value at the date of acquisition. Subsequently, intangible assets are measured at cost less accumulated amortization and any accumulated impairment losses. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditures are recognized in separate statements of comprehensive income in the year in which the related expenditures are incurred.

The useful lives of intangible assets are assessed to be either finite or indefinite.

Intangible assets with finite lives are amortized over the useful life and assessed for impairment whenever there is an indication that the intangible assets may be impaired. The amortization period and the amortization method used for an intangible asset with a finite useful life are reviewed at least at each reporting date. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortization period or method, as appropriate, and are treated as changes in accounting estimate. The amortization expense on intangible assets with finite lives is recognized in separate statements of comprehensive income consistent with the function of the intangible asset.

Amortization is computed using the straight-line method over 5 to 16 years.

Gains or losses arising from the disposal of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset, and are recognized in separate statements of comprehensive income when the asset is derecognized.

As of December 31, 2024 and 2023, the Company has existing and pending trademark registration for its products for a term of 10 and renewable every 10 years. It also has copyrights for its 7-kg LPG container, Gasulito with stylized letter "P" and two flames, Powerburn 2T, Petron New Logo (22 styles), Philippine Card Designs, and Petron font. Copyrights endure during the lifetime of the creator and for another 50 years after creator's death. It also has registered industrial designs for its certain lubricant and oil bottles and containers, and 2.7kg LPG cylinders, Gas Cylinder and Gas Cylinder Valve.

The amount of intangible assets is included as part of "Other noncurrent assets - net" in the separate statements of financial position.

Expenses incurred for research and development of internal projects and internally developed patents and copyrights are expensed as incurred and are part of "Selling and administrative expenses" account in the separate statements of comprehensive income.

Impairment of Nonfinancial Assets

The carrying amounts of property, plant and equipment, right-of-use assets, investment property, intangible assets with finite useful lives, investments in shares of stock of subsidiaries and associate and interest in a joint venture are reviewed for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. If any such indication exists, and if the carrying amount exceeds the estimated recoverable amount, the assets or cash-generating units are written down to their recoverable amounts. The recoverable amount of the asset is the greater of fair value less costs to sell and value in use. The fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less costs of disposal. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash-generating unit to which the asset belongs. Impairment losses are recognized in separate statements of comprehensive income in those expense categories consistent with the function of the impaired asset.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in separate statements of comprehensive income. After such a reversal, the depreciation and amortization charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life. An impairment loss with respect to goodwill is not reversed.

Cylinder Deposits

The Company acquires LPG cylinders which are loaned to dealers upon payment by the latter of an amount approximate to the acquisition cost of the cylinders.

The Company maintains the balance of cylinder deposits at an amount equivalent to the deposit value of the cumulative LPG cylinders held by dealers, contractors, terminals and those estimated to be in circulation.

At the end of each reporting date, cylinder deposits, shown under "Trade and other payables" account in the separate statements of financial position, are adjusted for estimated non-returns. The adjustments are recognized directly in the separate statements of comprehensive income.

Fair Value Measurements

The Company measures financial and non-financial assets and liabilities at fair value at each reporting date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either: (a) in the principal market for the asset or liability; or (b) in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or most advantageous market must be accessible to the Company.

The fair value of an asset or liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the separate financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3: inputs for the asset or liability that are not based on observable market data.

For assets and liabilities that are recognized in the separate financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization at the end of each reporting period.

For purposes of the fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of fair value hierarchy.

Provisions

Provisions are recognized when: (a) the Company has a present obligation (legal or constructive) as a result of past event; (b) it is probable (i.e., more likely than not) that an outflow of resources embodying economic benefits will be required to settle the obligation; and (c) a reliable estimate of the amount of the obligation can be made. Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognized as a separate asset only when it is virtually certain that reimbursement will be received. The amount recognized for the reimbursement shall not exceed the amount of the provision. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessment of the time value of money and the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense.

The Company recognizes provisions arising from legal and/or constructive obligations associated with the cost of dismantling and removing an item of property, plant and equipment and restoring the site where it is located, the obligation for which the Company incurs either when the asset is acquired or as a consequence of using the asset during a particular year for purposes other than to produce inventories during the year.

Capital Stock

Common Shares. Common shares are classified as equity. Incremental costs directly attributable to the issue of common shares and share options are recognized as a deduction from equity, net of any tax effects.

Preferred Shares. Preferred shares are classified as equity if they are non-redeemable, or redeemable only at the Company's option, and any dividends thereon are discretionary. Dividends thereon are recognized as distributions within equity upon approval by the BOD of the Company.

Preferred shares are classified as a liability if they are redeemable on a specific date or at the option of the shareholders, or if dividend payments are not discretionary. Dividends thereon are recognized as interest expense in separate statements of comprehensive income as accrued.

Additional Paid-in Capital

When the shares are sold at premium, the difference between the proceeds and the par value is credited to the "Additional paid-in capital" account. When shares are issued for a consideration other than cash, the proceeds are measured by the fair value of the consideration received. In case the shares are issued to extinguish or settle the liability of the Company, the shares are measured either at the fair value of the shares issued or fair value of the liability settled, whichever is more reliably determinable.

Capital Securities

Senior Perpetual Capital Securities (SPCS) and Redeemable Perpetual Securities (RPS) are classified as equity instruments in the separate financial statements since these securities are perpetual securities in respect of which there is no fixed redemption date and the redemption is at the option of the Company. Also, the Company has the sole and absolute discretion to defer payment of any or all of the distribution (Note 20).

Incremental costs directly attributable to the issuance of capital securities are recognized as a deduction from equity, net of tax. The proceeds received net of any directly attributable transaction costs are credited to capital securities.

Retained Earnings

Retained earnings represent the accumulated net income or losses, net of any dividend distributions and other capital adjustments. Appropriated retained earnings represent that portion which is restricted and therefore not available for any dividend declaration.

Equity Reserve

The equity reserve includes the effect of transactions with equity adjustments.

Reserve for Retirement Plan

The reserve for retirement plan represents re-measurements of net defined benefit retirement liability or asset comprising actuarial gains and losses, return on plan assets, and any change in the effect of the asset ceiling (excluding net interest).

Hedging Reserve

The hedging reserve comprises the effective portion of the cumulative net change in the fair value of hedging instruments used in cash flow hedges pending subsequent recognition in profit or loss or directly included in the initial cost or other carrying amount of a non-financial asset or non-financial liability.

The hedging reserve also includes cost of hedging which reflects gain or loss on the portion excluded from the designated hedging instrument that relates to the forward element of forward contracts, time value of options and foreign currency basis spread which are initially recorded in other comprehensive income.

Treasury Stock

Own equity instruments which are reacquired are carried at cost and deducted from equity. No gain or loss is recognized on the purchase, sale, reissuance or cancellation of the Company's own equity instruments. When the shares are retired, the capital stock account is reduced by its par value and the excess of cost over par value upon retirement is debited to additional paid-in capital to the extent of the specific or average additional paid-in capital when the shares were issued and to retained earnings for the remaining balance.

Revenue

The Company recognizes revenue from contracts with customers when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services, excluding amounts collected on behalf of third parties.

The transfer of control can occur over time or at a point in time. Revenue is recognized at a point in time unless one of the following criteria is met, in which case it is recognized over time: (a) the customer simultaneously receives and consumes the benefits as the Company performs its obligations; (b) the Company's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or (c) the Company's performance does not create an asset with an alternative use to the Company and the Company has an enforceable right to payment for performance completed to date.

The Company assesses its revenue arrangements to determine if it is acting as a principal or as an agent. The Company has assessed that it acts as a principal as it controls the goods or services before transferring to the customer.

The following specific recognition criteria must also be met before revenue is recognized:

Sale of Goods. Revenue is recognized at the point in time when control of petroleum and related products is transferred to the customer, which is normally upon delivery of the goods. The Company provides trade discounts and volume rebates to certain customers based on the level of their purchases which may be applied against the amount of their existing or future payables to the Company. Trade discounts and volume rebates do not result to significant variable consideration and are generally determined based on concluded sales transactions as at the end of each month. The general payment terms with customers are combination of prepayments and credit terms on an average of 45 days from invoice date.

The Company identified several performance obligations related to the sale of goods and accounted for them separately:

- *Provision of Technical Support.* The Company provides technical information, assistance and advice relating to the use, handling and disposition of the products, loaned equipment and the machinery and equipment necessary or appropriate for the customers' needs. Revenue is recognized over time upon rendering of services to the customer. The Company allocates portion of the revenue to the technical support based on expected cost plus a margin approach.
- *Consumer Loyalty Program.* The Company has Consumer Loyalty Programs which allows customers to accumulate points when they purchase products at participating service stations. These points can be redeemed for Company's products, rewards, discounts and other privileges from partner merchants. Revenue is allocated between the goods sold and the points issued that are expected to be redeemed. This allocation is based on the relative stand-alone selling price of the points. A deferred liability account is set up for these points. The liability will be reversed when the Company has fulfilled its obligations to supply the discounted products under the terms of the program or when it is no longer probable that the points under the program will be redeemed. The deferred liability is based on the best estimate of future redemption profile. All the estimates are reviewed on an annual basis or more frequently, where there is indication of a material change.

Other sources of revenue are as follows:

Interest Income. Interest income is recognized using the effective interest method. In calculating interest income, the effective interest rate is applied to the gross carrying amount of the asset.

Dividend Income. Dividend Income is recognized when the Company's right to receive the payment is established.

Rent Income. Rent income from operating leases (net of any incentives given to the lessees), other than from the use of loaned equipment, is recognized on a straight-line basis over the lease terms. Lease incentives granted are recognized as an integral part of the total rent income over the term of the lease.

Other Income. Other income is recognized when there is incidental economic benefit, other than the usual business operations, that will flow to the Company and that can be measured reliably.

Cost and Expense Recognition

Costs and expenses are decreases in economic benefits during the reporting period in the form of outflows or decrease of assets or incurrence of liabilities that result in decreases in equity, other than those relating to distributions to equity participants. Expenses are recognized when incurred.

Borrowing Costs

Borrowing costs directly attributable to the acquisition or construction of an asset that necessarily takes a substantial period of time to get ready for its intended use are capitalized as part of the cost of the respective assets. All other borrowing costs are expensed in the period they occur. Capitalization of borrowing costs commences when the activities to prepare the asset are in progress and expenditures and borrowing costs are being incurred. Borrowing costs are capitalized until the assets are substantially ready for their intended use.

Investment income earned on the temporary investment of specific borrowings pending expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

Employee Benefits

Short-term Employee Benefits. Short-term employee benefits are expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Retirement Benefits Costs and Other Employee Benefit Costs. The Company has a tax qualified and funded defined benefit pension plan covering all permanent, regular, full-time employees administered by trustee banks. Some of its subsidiaries have separate unfunded, noncontributory, retirement plans.

The net defined benefit retirement liability or asset is the aggregate of the present value of the amount of future benefit that employees have earned in return for their service in the current and prior periods, reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of economic benefits available in the form of reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit retirement plan is actuarially determined using the projected unit credit method. Projected unit credit method reflects services rendered by employees to the date of valuation and incorporates assumptions concerning projected salaries of employees. Actuarial gains and losses are recognized in full in the period in which they occur in OCI. Such actuarial gains and losses are also immediately recognized in equity and are not reclassified to profit or loss in subsequent period.

Defined benefit costs comprise the following:

- Service costs;
- Net interest on the defined benefit retirement liability or asset;
- Remeasurements of defined benefit retirement liability or asset; and
- Settlement gain or loss, if any

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in the separate statements of comprehensive income. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuary.

Net interest on the net defined benefit retirement liability or asset is the change during the period as a result of contributions and benefit payments, which is determined by applying the discount rate based on the government bonds to the net defined benefit retirement liability or asset. Net interest on the net defined benefit retirement liability or asset is recognized as expense or income in the separate statements of comprehensive income.

Remeasurements of net defined benefit retirement liability or asset comprising actuarial gains and losses, return on plan assets, and any change in the effect of the asset ceiling (excluding net interest) are recognized immediately in OCI in the period in which they arise. Remeasurements are not reclassified to separate statements of comprehensive income in subsequent periods.

Settlement gain or loss pertains to the difference between the present value of the defined benefit obligation being settled, as determined on the date of settlement and the settlement price, including any plan assets transferred and any payments made directly by the entity in connection with the settlement. Any gain or loss on settlement is recognized as income or expense in the separate statements of comprehensive income.

The Company also provides other benefits to its employees as follows:

Corporate Performance Incentive Program. The Company has a corporate performance incentive program that aims to provide financial incentives for the employees, contingent on the achievement of the Company's annual business goals and objectives. The Company recognizes achievement of its business goals through key performance indicators (KPIs) which are used to evaluate performance of the organization. The Company recognizes the related expense when the KPIs are met, that is when the Company is contractually obliged to pay the benefits.

Savings Plan. The Company established a Savings Plan wherein eligible employees may apply for membership and have the option to contribute 5% to 15% of their monthly base pay. The Company, in turn, contributes an amount equivalent to 50% of the employee-member's contribution. However, the Company's 50% share applies only to a maximum of 10% of the employee-member's contribution. The Savings Plan aims to supplement benefits upon employees' retirement and to encourage employee-members to save a portion of their earnings. The Company accounts for this benefit as a defined contribution pension plan and recognizes a liability and an expense for this plan as the expenses for its contribution fall due. The Company has no legal or constructive obligations to pay further contributions after payments of the equivalent employer-share. The accumulated savings of the employees plus the Company's share, including earnings, will be paid in the event of the employee's: (a) retirement, (b) resignation after completing at least five years of continuous services, (c) death, or (d) involuntary separation not for cause.

Land/Home Ownership Plan. The Company established the Land/Home Ownership Plan, an integral part of the Savings Plan, to extend a one-time financial assistance to Savings Plan members in securing housing loans for residential purposes.

Foreign Currency

Foreign Currency Translations. Transactions in foreign currencies are initially recorded in the Company's functional currency at exchange rates at the dates of the transactions.

Monetary assets and monetary liabilities denominated in foreign currencies are translated to the functional currency at exchange rate at the reporting date.

Nonmonetary assets and nonmonetary liabilities denominated in foreign currencies that are measured at fair value are translated to the functional currency at the exchange rate when the fair value was determined. Nonmonetary items denominated in foreign currencies that are measured based on historical cost are translated using the exchange rate at the date of the transaction.

Foreign currency differences arising on translation are recognized in separate statements of comprehensive income, except for differences arising on the translation of financial assets at FVOCI, a financial liability designated as a hedge of the net investment in a foreign operation that is effective, or qualifying cash flow hedges, which are recognized in OCI.

Taxes

Current Tax. Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Current tax relating to items recognized directly in equity is recognized in equity and not in separate statements of comprehensive income. The Company periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretations and establishes provisions where appropriate.

Deferred Tax. Deferred tax is recognized using the liability method in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- with respect to taxable temporary differences associated with investments in shares of stock of subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, carryforward benefits of unused tax credits - Minimum Corporate Income Tax (MCIT) and unused tax losses - Net Operating Loss Carry Over (NOLCO), to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward benefits of MCIT and NOLCO can be utilized, except:

- where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- with respect to deductible temporary differences associated with investments in shares of stock of subsidiaries, associates and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Current tax and deferred tax are recognized in the separate statements of comprehensive income except to the extent that it relates to a business combination, or items recognized directly in equity or in OCI.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Value-added Tax (VAT). Revenues, expenses and assets are recognized net of the amount of VAT, except:

- where the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case the tax is recognized as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- receivables and payables that are stated with the amount of tax included.

The net amount of tax recoverable from, or payable to, the taxation authority is included as part of “Other current assets” or “Trade and other payables” accounts in the separate statements of financial position.

Related Parties

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control and significant influence. Related parties may be individuals or corporate entities.

Operating Segments

The Company's operating segments are organized and managed separately according to the nature of the products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. Financial information on operating segments is presented in Note 36 to the separate financial statements. The Chief Executive Officer (the chief operating decision maker) reviews management reports on a regular basis.

The measurement policies the Company used for segment reporting under PFRS 8 are the same as those used in its separate financial statements. There have been no changes in the measurement methods used to determine reported segment profit or loss from prior periods. All inter-segment transfers are carried out at arm's length prices.

Segment revenues, expenses and performance include sales and purchases between business segments.

4. Use of Judgments, Estimates and Assumptions

The preparation of the Company's separate financial statements in accordance with PFRS Accounting Standards requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the amounts of assets, liabilities, income and expenses reported in the separate financial statements at the reporting date. However, uncertainty about these judgments, estimates and assumptions could result in outcome that could require a material adjustment to the carrying amount of the affected asset or liability in the future.

Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions are recognized in the period in which the judgments and estimates are revised and in any future period affected.

Judgments

In the process of applying the Company's accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant effect on the amounts recognized in the separate financial statements:

Determining Functional Currency. The Company has determined that its functional currency is the Philippine peso. It is the currency of the primary economic environment in which the Company operates. It is the currency that mainly influences the sales price of goods and services and the costs of providing these goods and services.

Identification of Distinct Performance Obligation. The Company assesses the goods or services promised in a contract with a customer and identifies as a performance obligation either: (a) a good or service (or a bundle of goods or services) that is distinct; or (b) a series of distinct goods or services that are substantially the same and that have the same pattern of transfer to the customer. The Company has determined that it has distinct performance obligations other than the sale of petroleum products such as the provision of technical support and consumer loyalty program and allocates the transaction price into these several performance obligations.

Determining the Incremental Borrowing Rate. The Company cannot readily determine the interest rate implicit in its leases. Therefore, it uses the relevant incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the Company would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR, therefore, reflects what the Company would have to pay, which requires estimation when no observable rates are available (such as for subsidiaries that do not enter into financing transactions) and to make adjustments to reflect the terms and conditions of the lease. The Company estimates the IBR using observable inputs (such as market interest rates) when available and is required to consider certain contract and entity-specific judgement estimates.

Determining the Lease Term of Contracts with Renewal Options - Company as Lessee. The Company determines the lease term as the noncancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised.

The Company has several lease contracts that include extension options. At lease commencement date, the Company applies judgment in evaluating whether it is reasonably certain to exercise the option to renew the lease by considering all relevant factors that create an economic incentive for it to exercise the renewal option. The Company reassesses whether it is reasonably certain to exercise the options if there is a significant event or change in circumstances within its control.

Determining Whether the Company is acting as a Principal or Agent in a Revenue Transaction. The determination whether the Company is a principal or agent in a contract is made by identifying each specified goods or services promised to the customers in the contract and evaluating whether the Company obtains control of the specified goods and services before it is transferred to the customer.

For the sale of petroleum products to dealers, the Company transfers the control of the goods upon delivery, hence, the Company has determined that it is acting as principal in the sales transactions with dealers. The dealers are likewise acting as principal in the sales transactions to end consumers on the basis of the following: (a) the dealers have the primary responsibility to provide specified goods to the end consumers; (b) the dealers bear inventory risk before the goods are transferred to end consumers; and (c) the dealers have discretion to establish prices for specified goods.

For the Company's consumer loyalty program, the Company has determined that it is acting as principal with respect to the loyalty points and the delivery of goods and services to be delivered in exchange for the points. The Company has discretion to establish value of points in the consumer loyalty program and the points issued by the Company can be redeemed for goods and services provided by the Company or by partner merchants at the discretion of the customer.

For the Company's fleet card transactions, the Company has likewise determined that it is acting as principal in the sales transactions with the customers since the Company has the primary responsibility for providing goods purchased through fleet cards and the Company has discretion to establish prices for specified goods in a fleet card transaction.

Determining Impairment Indicators of Other Nonfinancial Assets. PFRS Accounting Standards requires that an impairment review be performed on property, plant and equipment, investments in shares of stock of an associate and interest in joint ventures, investment property, right-of-use assets and intangible assets when events or changes in circumstances indicate that the carrying value may not be recoverable. Determining the recoverable amount of assets requires the estimation of cash flows expected to be generated from the continued use and ultimate disposition of such assets. While it is believed that the assumptions used in the estimation of recoverable amounts are appropriate and reasonable, significant changes in these assumptions may materially affect the assessment of recoverable amounts and any resulting impairment loss could have a material adverse impact on financial performance.

Taxes. Significant judgment is required in determining current and deferred tax expense. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current income tax and deferred tax expenses in the year in which such determination is made.

Contingencies. The Company is currently involved in various pending claims and lawsuits which could be decided in favor of or against the Company. The Company's estimate of the probable costs for the resolution of these pending claims and lawsuits has been developed in consultation with in-house as well as outside legal counsel handling the prosecution and defense of these matters and is based on an analysis of potential results. The Company currently does not believe that these pending claims and lawsuits will have a material adverse effect on its financial position and financial performance. It is possible, however, that future financial performance could be materially affected by changes in the estimates or in the effectiveness of strategies relating to these proceedings.

Estimates and Assumptions

The key estimates and assumptions used in the separate financial statements are based upon the Company's evaluation of relevant facts and circumstances as at the date of the separate financial statements. Actual results could differ from such estimates.

Assessment for ECL on Trade and Other Receivables. The Company, applying the simplified approach in the computation of ECL, initially uses a provision matrix based on historical default rates for trade and other receivables. The Company also uses appropriate groupings if its historical credit loss experience shows significantly different loss patterns for different customer segments. The Company then adjusts the historical credit loss experience with forward-looking information on the basis of current observable data affecting each customer segment to reflect the effects of current and forecasted economic conditions.

The Company adjusts historical default rates to forward-looking default rate by determining the closely related economic factor affecting each customer segment. The Company regularly reviews the methodology and assumptions used for estimating ECL to reduce any differences between estimates and actual credit loss experience. The determination of the relationship between historical default rates and forecasted economic conditions is a material accounting estimate.

The Company has assessed that the forward-looking default rate component of its ECL on trade and other receivables is not material because substantial amount of receivables are normally collected within one year. Moreover, based on Management's assessment, current conditions and forward-looking information does not indicate a significant increase in credit risk exposure of the Company from its trade receivables.

Impairment losses on trade and other receivables amounted to P6,148 and nil in 2024 and 2023, respectively (Notes 7 and 22). Reversal of impairment loss amounted to P15,576 in 2024 and P25,693 in 2023 (Note 7).

The carrying amount of trade and other receivables amounted to P56,408,436 and P56,265,671 as of December 31, 2024 and 2023, respectively (Note 7).

Assessment for ECL on Other Financial Assets at Amortized Cost. The Company determines the allowance for ECL using general approach based on the probability-weighted estimate of the present value of all cash shortfalls over the expected life of financial assets at amortized cost. ECL is provided for credit losses that result from possible default events within the next 12 months unless there has been a significant increase in credit risk since initial recognition in which case ECL is provided based on lifetime ECL.

When determining if there has been a significant increase in credit risk, the Company considers reasonable and supportable information that is available without undue cost or effort and that is relevant for the particular financial instrument being assessed such as, but not limited to, the following factors:

- Actual or expected external and internal credit rating downgrade;
- Existing or forecasted adverse changes in business, financial or economic conditions; and
- Actual or expected significant adverse changes in the operating results of the borrower.

The Company also considers financial assets at day one to be the latest point at which lifetime ECL should be recognized unless it can demonstrate that this does not represent a significant risk in credit risk such as when non-payment was an administrative oversight rather than resulting from financial difficulty of the borrower.

The Company has assessed that the ECL on other financial assets at amortized cost is not material because the transactions with respect to these financial assets were entered into by the Company only with reputable banks, the Government of the Philippines and companies with good credit standing and relatively low risk of defaults. Accordingly, no additional provision for ECL on other financial assets at amortized cost was recognized in 2024 and 2023. The carrying amounts of other financial assets at amortized cost are as follows:

	Note	2024	2023
Cash in banks and cash equivalents	5	P18,520,158	P16,292,300
Advances to a subsidiary	9	977,789	991,423
		P19,497,947	P17,283,723

Net Realizable Values of Inventories. In determining the NRV of inventories, management takes into account the most reliable evidence available at the times the estimates are made. Future realization of the carrying amount of inventories of P71,073,696 and P60,821,016 as of the end of 2024 and 2023, respectively (Note 8), is affected by price changes in different market segments for crude and petroleum products. Both aspects are considered key sources of estimation uncertainty and may cause significant adjustments to the Company's inventories within the next financial year.

The Company recognized loss on inventory write-down amounting to P81,209 and P76,416 in 2024 and 2023, respectively (Note 8).

Allowance for Inventory Obsolescence. The allowance for inventory obsolescence consists of collective and specific valuation allowance. A collective valuation allowance is established at a certain percentage based on the age and movement of stocks. In case there is write-off or disposal of slow-moving items during the year, a reduction in the allowance for inventory obsolescence is made. Review of allowance is done every quarter, while a revised set-up or booking is posted at the end of the year based on evaluations or recommendations of the proponents. The amount and timing of recorded expenses for any year would therefore differ based on the judgments or estimates made.

In 2024 and 2023, the Company increased (reduced) the allowance for inventory obsolescence amounting to (P76,311) and P43,336, respectively (Note 8).

Fair Value Measurements. A number of the Company's accounting policies and disclosures require the measurement of fair values for both financial and non-financial assets and liabilities.

The Company has an established control framework with respect to the measurement of fair values. This includes a valuation team that has the overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values. The valuation team regularly reviews significant unobservable inputs and valuation adjustments. If third party information is used to measure fair values, then the valuation team assesses the evidence obtained to support the conclusion that such valuations meet the requirements of PFRS, including the level in the fair value hierarchy in which such valuations should be classified.

The Company uses market observable data when measuring the fair value of an asset or liability. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques.

If the inputs used to measure the fair value of an asset or a liability can be categorized in different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy based on the lowest level input that is significant to the entire measurement.

The Company recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

The methods and assumptions used to estimate the fair values for both financial and non-financial assets and liabilities are discussed in Note 34.

Estimated Useful Lives of Property, Plant and Equipment, Right-of-Use Asset, Investment Property and Intangible Assets with Finite Useful Lives. The Company estimates the useful lives of property, plant and equipment, right-of-use asset, investment property and intangible assets with finite useful lives based on the period over which the assets are expected to be available for use. The estimated useful lives of property, plant and equipment, right-of-use asset, investment property and intangible assets with finite useful lives are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets.

In addition, estimation of the useful lives of property, plant and equipment, right-of-use asset, investment property and intangible assets with finite useful lives is based on collective assessment of industry practice, internal technical evaluation and experience with similar assets. It is possible, however, that future financial performance could be materially affected by changes in estimates brought about by changes in factors mentioned above. The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances. A reduction in the estimated useful lives of property, plant and equipment, right-of-use asset, investment property and intangible assets with finite useful lives would increase recorded cost of goods sold and selling and administrative expenses and decrease noncurrent assets.

There is no change in the estimated useful lives of property, plant and equipment, right-of-use asset, investment property and intangible assets with finite useful lives based on management's review at the reporting date.

Property, plant and equipment, net of accumulated depreciation, amounted to P140,360,138 and P141,830,383 as of December 31, 2024 and 2023, respectively. Accumulated depreciation of property, plant and equipment amounted to P108,079,454 and P100,535,281 as of December 31, 2024 and 2023, respectively (Note 10).

Right-of-use of assets, net of accumulated depreciation, amounted to P1,891,286 and P4,878,523 as of December 31, 2024 and 2023, respectively. Accumulated depreciation of right-of-use asset amounted to P1,238,541 and P2,311,756 as of December 31, 2024 and 2023, respectively (Note 11).

Investment property, net of accumulated depreciation, amounted to P10,027,762 and P9,914,652 as of December 31, 2024 and 2023, respectively. Accumulated depreciation of investment property amounted to P12,282,314 and P10,352,003 as of December 31, 2024 and 2023, respectively (Note 12).

Intangible assets with finite useful lives, net of accumulated amortization, amounted to P16,276 and P38,623 as of December 31, 2024 and 2023, respectively (Note 13). Accumulated amortization of intangible assets with finite useful lives amounted to P232,632 and P210,285 as of December 31, 2024 and 2023, respectively.

Fair Value of Investment Property. The fair value of investment property presented for disclosure purposes is based on market values, being the estimated amount for which the property can be sold or based on a most recent sale transaction of a similar property within the same vicinity where the investment property is located.

In the absence of current prices in an active market, the valuations are prepared by considering: (a) the aggregate estimated future cash flows expected to be received from leasing out the property. A yield that reflects the specific risks inherent in the net cash flows is then applied to the net annual cash flows to arrive at the property valuation; or (b) the depreciated replacement cost of the asset, which estimates the current replacement cost of new assets and adjusted for obsolescence, including physical, functional and economic obsolescence.

Estimated fair values of investment property amounted to P19,530,248 and P17,350,061 as of December 31, 2024 and 2023, respectively (Note 12).

Realizability of Deferred Tax Assets. The Company reviews its deferred tax assets at each reporting date and reduces the carrying amount to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilized. The Company's assessment on the recognition of deferred tax assets on deductible temporary differences and carry forward benefits of MCIT and NOLCO is based on the projected taxable income in the following periods.

Deferred tax assets amounted to P9,498,942 and P12,992,205 as of December 31, 2024 and 2023, respectively (Note 26).

Present Value of Defined Benefit Retirement Obligation. The present value of defined benefit retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. These assumptions are described in Note 29 to the separate financial statements and include discount rate and salary increase rate.

The Company determines the appropriate discount rate at the end of each year. It is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the retirement liabilities. In determining the appropriate discount rate, the Company considers the interest rates on government bonds that are denominated in the currency in which the benefits will be paid. The terms to maturity of these bonds should approximate the terms of the related retirement benefits liability.

Other key assumptions for the defined benefit retirement obligation are based in part on current market conditions.

While it is believed that the assumptions of the Company are reasonable and appropriate, significant differences in actual experience or significant changes in assumptions may materially affect the Company's retirement benefits liability.

Retirement benefits costs recognized in separate statements of comprehensive income amounted to P284,863 and P330,368 in 2024 and 2023, respectively. Remeasurement losses of the net defined retirement obligation recognized in OCI amounted to P1,184,927 and P35,407 in 2024 and 2023, respectively. The retirement benefits liability amounted to P2,069,591 and P1,623,193 as of December 31, 2024 and 2023, respectively (Note 29).

Asset Retirement Obligation (ARO). The Company has ARO arising from the refinery, leased service stations, terminals and blending plant. Determining ARO requires estimation of the costs of dismantling, installing and restoring leased properties to their original condition. The Company determined the amount of ARO, based on the dismantling costs as estimated by the operating unit responsible for the asset, discounted at the Company's current credit-adjusted risk-free rate ranging from 7.05% to 7.18% depending on the life of the capitalized costs. The Company also conducts periodic review of the estimates of dismantling costs to consider actual expenses incurred during the actual retirement of assets and uses this as input in determining future liability. While it is believed that the assumptions used in the estimation of such costs are reasonable, significant changes in these assumptions may materially affect the recorded expense or obligation in future periods.

The ARO amounted to P1,055,453 and P3,374,165 as of December 31, 2024 and 2023, respectively (Note 18).

5. Cash and Cash Equivalents

This account consists of:

	Note	2024	2023
Cash on hand		P2,208,598	P3,141,570
Cash in banks		3,262,028	1,767,416
Short-term placements		15,258,130	14,524,884
	33, 34	P20,728,756	P19,433,870

Cash in banks earn annual interest at the respective bank deposit rates. Short-term placements include demand deposits which can be withdrawn at anytime depending on the immediate cash requirements of the Company and earn annual interest at the respective short-term placement rates ranging from 2.50% to 5.63% in 2024 and 1.50% to 6.94% in 2023 (Note 25).

6. Financial Assets at Fair Value

This account consists of:

	<i>Note</i>	2024	2023
Derivative assets not designated as cash flow hedge		P601,696	P542,551
Proprietary membership shares		458,373	388,623
	33, 34	1,060,069	931,174
Less: Noncurrent portion	13	458,373	388,623
		P601,696	P542,551

The fair values presented have been determined directly by reference to published market prices, except for derivative assets which are based on inputs other than quoted prices that are observable (Note 34).

The noncurrent portion pertaining to proprietary membership shares which are not expected to be realized in the next 12 months, is included in "Other noncurrent assets - net" account in the separate statements of financial position (Note 13).

Changes in fair value of assets at FVPL recognized in the separate statements of comprehensive income in 2024 and 2023 amounted to P69,750 and P36,500, respectively (Note 25).

7. Trade and Other Receivables

This account consists of:

	<i>Note</i>	2024	2023
Trade		P41,960,790	P36,296,095
Related parties - trade	27	5,891,268	6,451,620
Allowance for impairment loss on trade receivables		(674,732)	(681,431)
		47,177,326	42,066,284
Government		6,692,652	9,562,950
Related parties - non-trade	27	1,878,636	2,893,570
Others		800,111	1,885,885
Allowance for impairment loss on non-trade receivables		(140,289)	(143,018)
		9,231,110	14,199,387
	33, 34	P56,408,436	P56,265,671

Trade receivables are noninterest-bearing and are generally on a 45-day average term. Penalties are charged when the account becomes overdue.

Government receivables pertain to duty drawback, VAT and specific tax claims. The filing and the collection of claims is a continuous process and is closely monitored.

Related parties - non-trade consists of advances made by the Company to Petron Corporation Employee Retirement Plan (PCERP), noninterest and interest-bearing receivables from its subsidiaries and other receivables from SMC and its subsidiaries.

Others mainly consist of receivables from various non-trade customers and counterparties for matured hedging transactions.

A reconciliation of the allowance for impairment losses at the beginning and end of 2024 and 2023 is shown below:

	Note	2024	2023
Balance at beginning of year		P835,643	P861,336
Additions	4, 22	6,148	-
Reversal of impairment	4, 22	(15,576)	(25,693)
Balance at end of year		826,215	835,643
Less noncurrent portion for long-term receivables		11,194	11,194
		P815,021	P824,449

The Company computes impairment loss on trade and other receivables based on past collection experiences, current circumstances, and the impact of future economic conditions, if any, available at the reporting period. Loss rates are based on actual credit loss experience over the past three years. Economic conditions during the period over which the historical data has been collected, current conditions and the Company's view of the impact of future economic conditions, if any, over the expected lives of the trade and other receivables are also considered.

The following table provides information about the exposure to credit risk and ECL of trade and other receivables as of December 31, 2024 and 2023:

	Weighted Average Loss Rate	Gross Carrying Amount	ECL
December 31, 2024			
Retail	1.12%	P8,188,071	P91,798
Lubes	0.04%	1,994,912	737
Gasul	4.09%	1,543,205	63,171
Industrial	0.94%	23,563,358	220,735
Others	2.00%	21,933,911	438,580
	1.42%	P57,223,457	P815,021

	Weighted Average Loss Rate	Gross Carrying Amount	ECL
December 31, 2023			
Retail	1.29%	P6,362,216	P81,951
Lubes	0.07%	1,442,913	1,015
Gasul	3.71%	1,424,043	52,877
Industrial	1.13%	22,554,942	254,341
Others	1.72%	25,306,006	434,265
	1.44%	P57,090,120	P824,449

8. Inventories

This account consists of:

	2024	2023
Crude oil and others	P37,180,580	P26,594,295
Petroleum	25,326,692	25,018,720
Materials and supplies	4,995,402	4,809,686
Lubes, greases and aftermarket specialties	3,571,022	4,398,315
	P71,073,696	P60,821,016

The cost of these inventories amounted to P71,763,919 and P61,582,757 as of December 31, 2024 and 2023, respectively.

If the Company had used the moving-average method (instead of the first-in, first-out method, which is the Company's policy), the cost of petroleum, crude oil and other products would have decreased by P107,503 and increased by P763,431 as of December 31, 2024 and 2023, respectively.

Inventories (including distribution or transshipment costs) charged to cost of goods sold amounted to P405,816,955 and P381,471,581 in 2024 and 2023, respectively (Note 21).

Research and development costs on these products constituted the expenses incurred for internal projects in 2024 and 2023 (Note 22).

The movements in allowance for write-down of inventories to NRV and inventory obsolescence at the beginning and end of 2024 and 2023 follow:

	Note	2024	2023
Balance at beginning of year		P761,741	P749,553
Addition:			
Obsolescence of non-fuel products, materials and supplies	4	(76,311)	43,336
Loss on inventory write-down	4	81,209	76,416
Reversals		(76,416)	(107,564)
Balance at end of year		P690,223	P761,741

The losses and reversals are included as part of "Cost of goods sold" account in the separate statements of comprehensive income. Reversal of write-down corresponds to inventories sold during the year (Note 21).

9. Investments and Advances

This account consists of:

	Note	2024	2023
Advances to a subsidiary	27, 33, 34	P977,789	P991,423
Investments and advances in shares of stock of subsidiaries - net	(i)	37,562,835	37,564,040
Investment in associate	(ii)	1,003,365	1,003,365
Investment in a joint venture - net	(iii)	-	-
		P39,543,989	P39,558,828

- i. Investments and advances in shares of stock of subsidiaries pertain to the following:

	Note	2024	2023
POGM and Subsidiaries		P26,764,842	P26,764,842
PAHL and Subsidiaries		4,988,402	4,988,402
Mema and Subsidiaries	(b)	4,549,124	4,549,124
PGL		3,700,610	3,700,610
NVRC and Subsidiaries	(c)	3,127,500	3,127,500
Ovincor		351,488	351,488
PMC		289,455	289,455
PFC		50,000	50,000
PSTPL		33,181	33,181
PFL	(a)	2,062	2,062
Total cost		43,856,664	43,856,664
Less: Allowance for impairment loss		6,293,829	6,292,624
Investments in shares of stock - net		P37,562,835	P37,564,040

A reconciliation of the allowance for impairment losses at the beginning and end of 2024 and 2023 is shown below:

	Note	2024	2023
Balance at beginning of year		P6,292,624	P6,292,406
Addition	(a), 25	1,205	218
Balance at end of year		P6,293,829	P6,292,624

The following are the major developments relating to the Company's investment in shares of stock of subsidiaries:

a. *PFL*

The Company recognized impairment loss on the investment in PFL amounting to P1,205 in 2024 and P218 in 2023 (Note 25).

b. *Mema and Subsidiaries*

On February 16, 2022, the Company paid P104,124 for the acquisition of 10,000,000 common shares with par value of P1.00 per share representing 100% of the authorized capital stock of Mema. The Mema group includes the subsidiary engaged in hauling and logistics services (Note 3). On June 30, 2022, control over the investee has been transferred to the Company after the resolution of the substantive pending issues agreed by both the seller and the Company. On October 27, 2022, the Company and Mema executed a Subscription Agreement to subscribe to an additional 1,375,000,000 common shares of Mema for a subscription price of P1,375,000 or P1.00 per common share, of which P899,000 was paid in 2022 as deposit for future stock subscription pending SEC's approval of Mema's increase in authorized capital stock which was obtained in March 2023. The remaining P476,000 was paid in 2023. On December 29, 2022, P300,000 adjustment in purchase price was agreed by the Company and the seller which was settled in February 2023 (Note 40).

On July 19, 2023, the Company and Mema executed another Subscription Agreement to subscribe to an additional 2,770,000,000 common shares of Mema for a subscription price of P2,770,000 or P1.00 per common share, of which P1,305,000 was paid in 2023 and P828,000 was paid in 2024.

c. *LLCDC, PEDC and ARC*

On July 30, 2024, the BOD and Stockholders approved the merger among ARC, PEDC and LLCDC, with LLCDC as the surviving entity, effective (to the extent allowed by applicable law or regulation) on the first day of the month following the issuance by the SEC of the Certificate of Merger.

The application for the merger is ongoing as of December 31, 2024.

The following are the dividends received by the Company in 2024 and 2023:

2024

	Date of Declaration	Date of Receipt	Amount
<i>Subsidiaries</i>			
POGM	January 23, 2024	January 23, 2024	P253,490
POGM	April 08, 2024	April 08, 2024	399,774
POGM	July 15, 2024	July 15, 2024	563,677
POGM	October 28, 2024	October 28, 2024	670,573
PSTPL	June 14, 2024	June 20, 2024	879,450
PSTPL	November 15, 2024	December 12, 2024	588,180
NVRC	November 18, 2024	November 19, 2024	48,335
<i>Associate</i>			
Petrogen	September 24, 2024	October 2, 2024	107,771
Total			P3,511,250

2023

	Date of Declaration	Date of Receipt	Amount
<i>Subsidiaries</i>			
POGM	March 15, 2023	March 21, 2023	P374,899
POGM	July 10, 2023	July 12, 2023	595,866
PSTPL	May 11, 2023	June 20, 2023	445,376
PSTPL	November 16, 2023	December 12, 2023	893,824
Total			P2,309,965

The Company, through its BOD, has appropriated to reinvest the dividends received from POGM and PSTPL in its business operations to fund its working capital requirements. As of December 31, 2024 and 2023, dividends received from POGM and PSTPL in 2024 and 2023 have been fully disbursed in the year of receipt in accordance with the purpose set forth.

- ii. As of December 31, 2024 and 2023, the Company owns 25.06% of Petrogen accounted for as an investment in an associate. Petrogen was incorporated and registered with the Philippine SEC on August 23, 1996 primarily to engage in the business of non-life insurance and re-insurance and has principal place of business in Mandaluyong City.
- iii. The Company has a 33.33% joint venture interest in PDSI, which is engaged in the business of receiving, storing and handling the out-loading of petroleum products of the three major oil companies to serve the fuel requirement of their respective customers. PDSI was incorporated on September 29, 2004 and has a principal place of business in Manila, Philippines. On June 22, 2022, the Bureau of Internal Revenue (BIR) has approved the cancellation of PDSI's registration.

The amount of investment in PDSI is fully impaired as of December 31, 2024 and 2023.

10. Property, Plant and Equipment

The movements and balances of property, plant, and equipment as of and for the years ended December 31 follow:

	Note	Buildings and Improvements and Related Facilities	Refinery and Plant Equipment	Service Stations and Other Equipment	Computers, Office and Motor Equipment	Land and Leasehold Improvements	CPIP	Total

Carrying Amount								
December 31, 2023, as restated	40	P8,811,374	P125,073,852	P2,420,702	P373,060	P804,339	P4,347,056	P141,830,383
December 31, 2024		P8,706,251	P120,862,548	P3,104,947	P545,472	P923,308	P6,217,612	P140,360,138

In 2024 and 2023, certain property, plant and equipment were reclassified to/from investment property due to change in usage of the asset from/to used in operations to/from leased to another party under an operating lease agreement (Note 12).

No impairment loss was required to be recognized in 2024 and 2023 based on management's assessment of impairment indicators.

Certain fully depreciated property, plant and equipment with aggregate costs of P17,723,224 and P15,705,811 as of December 31, 2024 and 2023, respectively, are still being used in the Company's operations.

The Company capitalized interest amounting to P83,877 and P417,192 in 2024 and 2023, respectively (Notes 14, 17, 25 and 28). The capitalization rates used to determine the amount of interest eligible for capitalization ranged from 2.81% to 9.43% in 2024 and from 2.83% to 9.52% in 2023.

Capital Commitments

As of December 31, 2024 and 2023, the Company has outstanding commitments to acquire property, plant and equipment amounting to P3,326,383 and P2,799,062, respectively.

11. Right-of-Use Assets

The movements and balances of right-of-use assets as of and for the years ended December 31 follow:

	Note	Land	Buildings and Improvements and Related Facilities	Service Stations and Other Equipment	Total
Cost					
January 1, 2023		P5,914,885	P1,055,106	P24,331	P6,994,322

Carrying Amount					
December 31, 2023		P4,428,972	P439,180	P10,371	P4,878,523
December 31, 2024		P1,639,315	P244,392	P7,579	P1,891,286

The Company recognized right-of-use assets for leases of office space, buildings, machinery and equipment, service stations and parcels of land. The leases typically run for a period of two to 30 years. Some leases contain an option to renew the lease at the end of the lease term and are being subjected to reviews to reflect current market rentals. The renewal option provides operational flexibility in managing the leased asset portfolio and aligns the business needs of the Company. The Company recognized interest expense related to these leases amounting to P1,265,378 and P1,155,899 in 2024 and 2023, respectively (Note 28).

The Company also has certain leases of property and equipment with lease terms of 12 months or less and leases of equipment with low value. The Company has elected not to recognize right-of-use assets and lease liabilities for these leases. The expenses relating to short-term leases and leases of low-value assets amounted to P616,877 and P14,023, respectively, in 2024 and P538,147 and P30,305, respectively, in 2023 (Note 28).

The Company had total payment for leases of P3,162,336 and P2,972,066 in 2024 and 2023, respectively (Note 28).

The remeasurements pertain mainly to the change in the estimated dismantling costs of ARO during the year (Note 4).

12. Investment Property

The movements and balances as of and for the years ended December 31 follow:

In 2024 and 2023, certain investment property were reclassified from/to property, plant and equipment due to change in usage of the asset from/to used in operations to/from leased to another party under an operating lease agreement (Note 10).

No impairment loss was required to be recognized in 2024 and 2023 based on management's assessment of impairment indicators.

There are no other direct selling and administrative expenses other than depreciation and real property taxes arising from investment property that generated income in 2024 and 2023.

The fair value of investment property amounting to P19,530,248 and P17,350,061 as of December 31, 2024 and 2023, respectively, has been categorized as Level 3 in the fair value hierarchy based on the inputs used in the valuation techniques.

For properties with available appraisal reports, the fair value of investment property amounting to P106,866 and P52,813 as of December 31, 2024 and 2023, respectively, determined by external, independent property appraisers having appropriate recognized professional qualifications and recent experience in the location and category of the property being valued. The independent appraisers provide the fair value of the Company's investment property on a regular basis. The fair value of investment property amounting to P6,119,908 and P6,224,911 as of December 31, 2024 and 2023, respectively, was determined using the depreciated replacement cost method. The net present value of lease liability recognized in investment property represents the remaining fair value amounting to P13,303,474 and P11,072,337 as of December 31, 2024 and 2023, respectively.

Valuation Technique and Significant Unobservable Inputs

The valuation of investment property applied the following approaches below:

Sales Comparison Approach. The market value of the land was determined using the Sales Comparison Approach. The comparative approach considers the sale of similar or substitute property, registered within the vicinity, and the related market data. The estimated value is established through such process of comparing available data. The property being valued is compared with sales transactions involving similar properties in the market. Listings and offerings may also be considered. The observable inputs to determine the market value of the property are the following: location characteristics, size, time element, quality and prospective use, bargaining allowance and marketability.

Depreciated Replacement Cost Method. The fair value of land and leasehold improvements, buildings and improvements and facilities were arrived at using the depreciated replacement cost method, which estimates the current replacement cost of new assets and adjusted for obsolescence, including physical, functional and economic obsolescence.

Income Approach. The rental value of the subject property was determined using the Income Approach. Under the Income Approach, the remaining lease payments on the property is first determined followed by the application of the proper capitalization rate to arrive at its net present value. The rental value of the property is determined on the basis of what a prudent lessor or a prospective lessee are willing to pay for its use and occupancy considering the prevailing rental rates of similar property and/or rate of return a prudent lessor generally expects on the return on its investment.

13. Other Assets

This account consists of:

	<i>Note</i>	2024	2023
Current:			
Prepaid taxes		P41,623,304	P36,229,684
Input VAT		6,543,512	2,009,102
Prepaid expenses	27	1,089,741	1,221,109
Special-purpose fund		350,953	169,750
		P49,607,510	P39,629,645
Noncurrent:			
Catalyst - net		P515,062	P629,043
Proprietary membership shares	6, 33, 34	458,373	388,623
Input VAT		11,658	21,955
Others - net		53,459	86,397
		P1,038,552	P1,126,018

Prepaid taxes include unused creditable withholding taxes and excise taxes paid by the Company for products sold to tax-exempt entities for subsequent filing with the government as refund claims.

Input VAT includes the taxes paid on purchases of goods and services which can be recovered as tax credit against future output VAT liability of the Company.

The “Others - net” under “Noncurrent” account includes licenses, other intangibles and other noncurrent assets amounting to P53,459 and P86,397 as of December 31, 2024 and 2023, respectively, net of amortization amounting to P243,160 and P210,219 in 2024 and 2023, respectively.

Amortization of other intangibles included as part of “Depreciation and amortization” under “Selling and administrative expenses” account in the separate statements of comprehensive income amounted to P15,822 and P15,824 in 2024 and 2023 (Notes 22 and 24).

Amortization of catalysts, licenses and other noncurrent assets included as part of “Depreciation and amortization” under “Cost of goods sold” account in the separate statements of comprehensive income amounted to P234,193 and P310,606 in 2024 and 2023, respectively (Notes 21 and 24).

14. Short-term Loans

This account pertains to unsecured Philippine peso and US dollar-denominated loans obtained from local and foreign banks with maturities ranging from 4 to 178 days and annual interest ranging from 5.30% to 8.00% in 2024 and from 4 to 180 days and 5.00% to 7.53% in 2023 (Note 25). These loans are intended to fund the importation of crude oil and petroleum products (Note 8) and working capital requirements.

Interest expense on short-term loans amounted to P7,741,308 in 2024 and P7,443,724 in 2023 (Note 25). Interest expense capitalized as part of property, plant and equipment amounted to P34,557 and P176,490 in 2024 and 2023, respectively (Note 10).

15. Liabilities for Crude Oil and Petroleum Products

This account pertains to liabilities to suppliers of crude oil, petroleum and other products that are noninterest-bearing and generally settled on a 30-day term. Details of the supply agreements in relation to importations of crude oil requirements of the Company are disclosed in Note 30.

Liabilities for crude oil and petroleum products are payable to the following:

	Note	2024	2023
Related parties	27	P26,683,742	P15,990,355
Third parties		4,464,976	2,707,812
	33, 34	P31,148,718	P18,698,167

16. Trade and Other Payables

This account consists of:

	Note	2024	2023 As restated (Note 40)
Trade		P3,960,071	P4,047,853
Due to related parties	27	10,139,060	6,672,059
Specific taxes and other taxes payable		4,205,792	7,643,178
Cylinder deposits	40	2,947,531	2,160,157
Accrued interest		1,127,645	1,362,751
Dividends payable	32	1,033,590	949,895
Deferred liability on consumer loyalty program		614,279	568,872
Retention payable		240,273	23,251
Accrued payroll		131,303	121,936
Accrued rent		53,270	53,831
Others	38	615,397	170,795
	33, 34	P25,068,211	P23,774,578

Trade payables are liabilities to haulers, contractors and suppliers that are non-interest bearing and are generally settled on a 30-day term.

Cylinder deposits pertain to advances made by the dealers for the LPG cylinders loaned to them. These deposits are non-interest bearing and are refundable to dealers upon surrender of the LPG cylinders subject to certain conditions (Note 40).

Others include provisions (Note 38) and accruals of selling and administrative expenses which are normally settled within a year.

The Company recognized revenue that was included in deferred liability on consumer loyalty program amounting to P475,203 and P427,742 in 2024 and 2023, respectively (Note 36).

17. Long-term Debt

This account consists of:

	<i>Note</i>	2024	2023

Less: current portion		29,418,082	25,641,705
		P88,025,308	P83,253,974

- a. On July 25, 2017, the Company drew P15,000,000 from a P15,000,000 term loan facility which was signed on July 14, 2017 and executed on July 17, 2017. The facility is amortized over 7 years and is subject to a fixed interest rate of 5.5276% per annum. The proceeds were used to refinance the bridge loan availed on December 23, 2016 for the acquisition of the Refinery Solid Fuel-Fired Power Plant in 2016. The company has fully settled the facility as of December 31, 2024.
- b. On October 19, 2018, the Company offered P20,000,000 fixed retail bonds (the "Offer Bonds") divided into Series C (P13,200,000) bearing interest at 7.8183% per annum and Series D (P6,800,000) bearing interest at 8.0551% per annum. The Series C Offer Bonds matured on April 19, 2024 (5.5-year term) while the Series D Offer Bonds is due on October 19, 2025 (7-year term). Interests on these Offer Bonds are payable quarterly, commencing on January 19, 2019, and thereafter, on April 19, July 19, October 19 and January 19 of each year. The net proceeds from the issuance of the Offer Bonds were used primarily to settle short-term loans availed by the Company to fund crude oil purchases and redeem a portion of the Company's remaining Undated Subordinated Capital Securities (USCS) (Note 20), and the balance for general corporate purposes. The Offer Bonds were listed with the Philippine Dealing & Exchange Corp. on October 19, 2018.

- c. On April 22, 2020, the Company drew JP¥15 billion from a JP¥15 billion term loan facility signed and executed on March 27, 2020. The proceeds were used to partially prepay its US\$1 billion term loan facility. The JP¥ facility is amortized over 5 years with a 2-year grace period, after which the total principal will be amortized in 7 equal semi-annual installments beginning March 27, 2022. It is subject to a floating interest rate based on JP¥ LIBOR plus a spread, repriced every 1, 3 or 6 months. Due to the global discontinuation of JPY LIBOR by December 31, 2021, an amendment was made to the JPY Facility adopting the Tokyo Overnight Average Rate (TONA) as the new benchmark rate. Beginning December 29, 2021, the floating interest rate on the JPY15 billion facility is based on TONA plus a spread, repriced every 1, 3 or 6 months. The Company has paid principal amortizations amounting to JP¥4.29 billion each in 2024 and 2023.
- d. On April 27, 2020, the Company drew P5,000,000 from a P5,000,000 term loan facility which was signed and executed on April 23, 2020. The facility is subject to a fixed interest rate of 4.59% per annum and amortized over 5 years with a 12-month grace period, after which the total principal will be amortized in 16 equal quarterly payments beginning July 27, 2021. The proceeds were used for general corporate purposes. The Company has paid principal amortizations amounting to P1,250,000 each in 2024 and 2023.
- e. On October 12, 2021, the Company issued P18,000,000 retail bonds divided into Series E due in 2025 (P9,000,000) and Series F due in 2027 (P9,000,000) with interest rates of 3.4408% p.a. and 4.3368% p.a., respectively. The Bonds are listed on the Philippine Dealing & Exchange Corp. The proceeds were used for the redemption of the Company's Series A Bonds, the partial financing of the power plant project and payment of existing indebtedness.
- f. On May 19, 2022, the Company drew and availed a P5,000,000 term loan facility which was signed and executed on May 17, 2022. The facility is subject to a fixed interest rate of 7.1663% per annum and amortized over 5 years with a 2-year grace period, after which the total principal will be amortized in 7 semi-annual payments beginning May 19, 2024. The proceeds were used for partial financing of the power plant project. The Company has paid principal amortization amounting to P500,000 in 2024.
- g. On June 15, 2022, the Company drew and availed a P5,000,000 term loan facility which was signed and executed on June 10, 2022. The facility is subject to a fixed interest rate of 7.4206% interest per annum and amortized over 5 years with a 15-month grace period, after which the total principal will be amortized in 16 equal quarterly payment beginning September 15, 2023. The proceeds were used to partially pay the US\$1,000 million term loan facility. The Company has paid the principal amortizations amounting to P1,250,000 and P625,000 in 2024 and 2023, respectively.
- h. On June 16, 2022, the Company drew and availed a P5,000,000 term loan facility which was signed and executed on June 7, 2022. The facility is subject to a fixed interest rate of 7.5496% interest per annum and amortized over 5 years with a 15-month grace period, after which the total principal will be amortized in 16 equal quarterly payments beginning September 16, 2023. The proceeds were used to pay balances of the US\$1,000 million and various loan facilities. The Company has paid the principal amortizations amounting to P1,250,000 and P625,000 in 2024 and 2023, respectively.

- i. On September 8, 2022, the Company drew and availed a P2,375,000 term loan facility which was signed and executed on September 6, 2022. The facility is subject to a fixed interest rate of 6.4920% per annum and will be fully paid on September 8, 2025. The proceeds were partially used to pay existing indebtedness.
- j. On September 30, 2022, the Company drew and availed a P625,000 term loan facility which was signed and executed on September 6, 2022. The facility is subject to a fixed interest rate of 6.8672% per annum and will be fully paid on September 8, 2025. The proceeds were used to pay existing indebtedness.
- k. On November 8, 2022, the Company signed and executed a US\$550 million term loan facility. Initial drawdown of US\$117 million was made on November 15, 2022 the proceeds of which were used to partially pay the US\$800 million term loan facility. On November 29, 2022 the Company drew an additional US\$150 million from the facility to fully prepay its US\$150 million term loan facility. Additional US\$228 million was drawn on December 15, 2022 to further partially prepay the US\$800 million term loan facility. The US\$550 million term loan facility is amortized over 5 years with a 2-year grace period, after which the total principal will be amortized in 7 equal semi-annual installments beginning November 8, 2024. The facility is subject to a floating interest rate based on Secured Overnight Financing Rate (SOFR) plus a spread, repriced every 1, 3 or 6 months.

On January 20, 2023, the Company drew US\$30 million to partially prepay its JP¥15 billion term loan facility. Additional US\$25 million was drawn on February 3, 2023, to partially prepay the US\$800 million long-term loan facility.

On February 17, 2023, the Company has upsized its US\$550 million term loan facility to US\$669 million and drew US\$88 million from the additional US\$119 million loan facility on May 15, 2023 to fully preterminate the US\$800 million long-term loan facility. On August 14, 2023, the remaining US\$31 million was drawn. Proceeds were used to redeem the Company's P7,000,000 Series B Bonds on October 27, 2023. As of December 31, 2024, the US\$192 million portion of the facility has already been paid.

- l. On July 13, 2023, the Company made a full drawdown of US\$225 million term loan which was used to partially fund the redemption of US\$500 million SPCS. The facility was signed on March 28, 2023, which subsequently increased from US\$150 million to US\$225 million on June 8, 2023. The facility is amortized over 5 years with a 2-year grace period, after which the total principal will be amortized in 7 equal semi-annual installments beginning on March 28, 2025. The facility is subject to a floating interest rate based on SOFR plus a spread, repriced every 1, 3 or 6 months. In 2024, the Company has prepaid portion of the facility amounting to US\$45 million.
- m. On March 6, 2024, the Company made a full drawdown of P7,000,000 unsecured term loan facility signed and executed on January 16, 2024. The facility is amortized over 5 years with 2 years grace period, after which the total principal will be amortized in 7 equal semi-annual installments beginning March 6, 2026. The facility is subject to interest payable in semi-annual amortizations with fixed interest rate of 7.4941% per annum for the first 2 years and will thereafter be repriced to a new fixed rate until maturity on March 6, 2029. The proceeds were used to partially redeem Series C Offer Bonds on April 19, 2024.

- n. On April 18, 2024, the Company made a full drawdown of P5,000,000 unsecured term loan facility signed and executed on April 15, 2024. The facility is amortized over 5 years with 2.5 years grace period, after which the total principal will be amortized in 6 equal semi-annual installments beginning October 18, 2026. The facility is subject to a floating interest rate payable in semi-annual amortizations. The proceeds were used to partially redeem Series C Offer Bonds on April 19, 2024.
- o. The Company drew US\$133 million, US\$96 million, US\$130 million and US\$141 million on July 23, July 30, September 12 and October 28, 2024, respectively, from a US\$500 million term loan facility signed and executed on July 11, 2024. The facility is amortized over 5 years with 2-year grace period, after which the total principal will be amortized in 7 equal semi-annual installments beginning July 11, 2026. The facility is subject to a floating interest rate payable monthly based on SOFR plus a spread, repriced every 1, 3 or 6 months. The proceeds were partially used to repay outstanding indebtedness and settle liabilities for crude oil importations.

The above-mentioned debt agreements contain, among others, covenants relating to merger and consolidation, maintenance of certain financial ratios, restrictions on loans and guarantees, disposal of a substantial portion of assets, significant changes in the ownership or control of subsidiaries, payments of dividends and redemption of capital stock.

The Company has two financial covenants, namely, net leverage ratio not to exceed 6.5x and ratio of consolidated gross debt to consolidated net worth not to exceed 2.75x. In November 2020, the Company secured consent to amend the testing of its net leverage ratio from semi-annual to incurrence-based, while the ratio of consolidated gross debt to consolidated net worth remained to be tested quarterly.

As of December 31, 2024 and 2023, the Company has complied with the financial covenants of its debt agreements.

Total interest incurred on the above-mentioned long-term loans (including amortization of debt issue costs) amounted to P9,004,828 and P8,331,596 for the years ended 2024 and 2023, respectively (Note 25). Interest amounting to P38,437 and P186,995 was capitalized in 2024 and 2023, respectively (Note 10).

Movements in debt issue costs follow:

	33, 34	P652,985	P1,292,356

Cash bonds represent deposits from customers as a form of collateral.

Others account includes liability to a contractor and supplier.

20. Equity

a. Capital Stock

Common Shares

Pursuant to the registration statement rendered effective by the SEC on May 18, 1995 and the permit to sell issued by the SEC dated May 30, 1995, 10,000,000,000 common shares of the Company with par value of P1.00 per share were offered for sale at an offer price of P1.00 per share. As of December 31, 2024 and 2023, the Company had 97,572 and 97,977 stockholders with at least one board lot at the PSE, respectively, for a total of 9,375,104,497 (P1.00 per share par value) issued and outstanding common shares.

Preferred Shares

On January 21, 2010, the SEC approved the Company's amendment to its AOI to reclassify 624,895,503 unissued common shares into preferred shares with a par value of P1.00 per share, as part of its authorized capital stock. On February 12, 2010, the SEC issued an order permitting the Company's offer and sale of 50,000,000 peso-denominated, cumulative, non-participating and non-voting preferred shares, with an oversubscription option of 50,000,000 preferred shares (collectively, the "2010 Preferred Shares") to the public at an issue price of P100.00 per share. Proceeds from issuance in excess of par value less related transaction costs amounting to P9,764,404 was recognized as additional paid-in capital. Dividend rate of 9.5281% per annum computed in reference to the issue price was payable every March 5, June 5, September 5 and December 5 of each year, when declared by the Company's BOD. The 2010 Preferred Shares were listed with PSE on March 5, 2010.

On October 17, 2014, the SEC issued an order permitting the Company's public offering and sale of 7,000,000 cumulative, non-voting, non-participating, non-convertible, peso-denominated perpetual preferred shares with an oversubscription option of 3,000,000 preferred shares (collectively, the "Series 2 Preferred Shares") at an issue price of P1,000.00 per share.

On November 3, 2014, the Company issued and listed in the PSE 10,000,000 Series 2 Preferred Shares at an offer price of P1,000.00 per share. The Series 2 Preferred Shares were issued in two (2) sub-series, (i) 7,122,320 Series 2A preferred shares (the "Series 2A Preferred Shares") and (ii) 2,877,680 Series 2B preferred shares (the "Series 2B Preferred Shares"). Proceeds from issuance in excess of par value less related transaction costs amounting to P9,888,298 was recognized as additional paid-in capital.

The Series 2A Preferred Shares may be redeemed by the Company starting on the fifth anniversary from the listing date while the Series 2B Preferred Shares may be redeemed starting on the seventh anniversary from the listing date. Series 2A and Series 2B Preferred Shares have dividend rates of 6.3000% and 6.8583%, respectively. Cash dividends are payable quarterly every February 3, May 3, August 3 and November 3 of each year, as and if declared by the Company's BOD.

All shares rank equally as regards to the Company's residual assets, except that holders of preferred shares participate only to the extent of the issue price of the shares plus any accumulated and unpaid cash dividends.

On March 5, 2015, the Company redeemed the 2010 Preferred Shares at P100.00 per share, which were delisted by the PSE on March 6, 2015 in line with the latter's rule on the delisting of redeemed shares which are not re-issuable at the time of redemption under the issuing Company's AOI. On July 6, 2015, the SEC approved the amendment of the AOI of the Company to provide a re-issuability feature of its preferred shares.

On May 31, 2019, the SEC issued a permit for the Company's public offering and sale of 15,000,000 cumulative, non-voting, non-participating, non-convertible, peso-denominated perpetual preferred shares with an oversubscription option of 5,000,000 preferred shares (collectively, the "Series 3 Preferred Shares") at an issue price of P1,000.00 per share.

On June 25, 2019, the Company issued and listed on the PSE 20,000,000 Series 3 Preferred Shares. The net proceeds from the issuance were used for the repayment of the Company's outstanding short-term loans and for general corporate purposes while the remaining balance was allocated for the redemption of the Series 2A Preferred Shares in November 2019.

The Series 3 Preferred Shares were issued in two (2) sub-series: (i) 13,403,000 Series 3A Preferred Shares with dividend rate of 6.8713% per annum and first optional redemption date on its 5.5th anniversary from the issuance date; and (ii) 6,597,000 Series 3B Preferred Shares with dividend rate of 7.1383% per annum and first optional redemption date on its 7th anniversary from the issuance date. Cash dividends are payable quarterly on March 25, June 25, September 25 and December 25 of each year, as and if declared by the Company's BOD. Proceeds from reissuance of treasury stocks in excess of cost less related transaction costs amounting to P17,847,620 was recognized as additional paid-in capital.

On November 4, 2019, the Company redeemed its 7,122,320 Series 2A Preferred Shares issued on November 3, 2014 at a redemption price of P1,000.00 per share, with a record date of October 10, 2019. The redemption was approved by the Company's BOD on March 12, 2019.

On November 3, 2021, the Company redeemed its 2,877,680 Series 2B Preferred Shares issued on November 3, 2014 at a redemption price of P1,000.00 per share, with a record date of October 7, 2021. The redemption was approved by the Company's BOD on March 9, 2021.

On July 7, 2023, the Company issued and listed on the PSE 5,000,000 Series 4A, 2,995,000 Series 4B, and 6,005,000 Series 4C preferred shares (inclusive of the oversubscription of 1,500,000 shares) under the 50,000,000 Series 4 Shelf Registered Preferred Shares at an issue price of P1,000.00 or for a total amount of P14,000,000. The Series 4 Shelf Registered Preferred Shares, which were approved for issue by the SEC on June 14, 2023, are cumulative, deferrable, non-voting, non-participating, non-convertible, redeemable, and reissuable Peso-denominated perpetual preferred shares. Proceeds from reissuance of treasury stocks in excess of cost less related transaction costs amounting to P3,484,919 was recognized as additional paid-in capital. The net proceeds were used to partly fund the full redemption on July 19, 2023 of the remaining US\$477.53 million SPCS issued in 2018.

The Company has the redemption option starting on the second and half, third and fifth year or on any dividend payment date thereafter for Series 4A, Series 4B and Series 4C preferred shares, respectively. Dividend rates are 6.7079%, 6.7972%, 7.0861% per annum for Series 4A, Series 4B and Series 4C preferred shares, respectively.

On September 23, 2024, the Company issued and listed in the PSE additional 16,830,000 Series 4 Preferred Shares at an offer price of P1,000.00 per share for a total amount of P16,830,000. The additional Series 4 Preferred Shares were issued in two (2) sub-series, (i) 8,500,000 Series 4D preferred shares (the "Series 4D Preferred Shares") and (ii) 8,330,000 Series 4E preferred shares (the "Series 4E Preferred Shares"). Proceeds from issuance in excess of par value, less related transaction costs of P100,222, were recognized as additional paid-in capital amounting to P16,712,948. The Series 4D and 4E Preferred Shares are cumulative, deferrable, non-voting, non-participating, non-convertible, redeemable, and reissuable Philippine Peso-denominated perpetual preferred shares with par value of P1.00 per share.

The Company has the redemption option starting on the third and fifth year from the listing date or on any dividend payment date thereafter for Series 4D and Series 4E preferred shares, respectively. Series 4D and Series 4E preferred shares have dividend rates of 6.8364% and 7.1032%, respectively. Cash dividends are payable quarterly every March 23, June 23, September 23 and December 23 of each year, as and if declared by the Company's BOD. The net proceeds were used to fully redeem the Series 3A Preferred Shares on December 26, 2024, refinance maturing obligations, and fund general corporate purposes, including the purchase of crude oil inventory.

On December 26, 2024, the Company redeemed its 13,403,000 Series 3A Preferred Shares issued on June 25, 2019 at a redemption price of P1,000.00 per share, with a record date of November 21, 2024. The redemption was approved by the Company's BOD on June 26, 2024.

As of December 31, 2024 and 2023, the Company had 37,427,000 and 34,000,000 (P1 par value) issued and outstanding preferred shares, respectively. The total number of preferred shareholders with at least one board lot at the PSE as of December 31, 2024 and 2023 are as follows:

	2024	2023
Series 3A Preferred Shares	-	14
Series 3B Preferred Shares	25	25
Series 4A Preferred Shares	4	3
Series 4B Preferred Shares	13	13
Series 4C Preferred Shares	27	27
Series 4D Preferred Shares	22	-
Series 4E Preferred Shares	26	-
	117	82

b. Retained Earnings

Declaration of Cash Dividends

On various dates in 2024 and 2023, the Company's BOD approved the declaration of cash dividends for common and preferred shareholders with the following details:

Type	Per Share	Date of Declaration	Date of Record	Date of Payment
2024				
Common	P0.10000	March 5, 2024	March 19, 2024	April 4, 2024

Series 4C	17.71525	November 7, 2023	March 13, 2024	April 8, 2024

Total cash dividends declared amounted to P3,650,031 and P3,052,753 in 2024 and 2023, respectively.

Appropriation for Capital Projects

On May 5, 2016, the Company's BOD approved the re-appropriation of retained earnings amounting to P15,000,000 for capital projects in 2016 and 2017 which are expected to be completed within five years from the date of the approval.

On March 9, 2021, the BOD of the Company approved the reversal of P8,000,000 of the P15,000,000 appropriated retained earnings of the Company since majority of the 2016 and 2017 capital projects were already completed while the others were deferred. The remaining P7,000,000 is maintained for the Power Plant project.

On May 10, 2023, the Company's BOD approved the reversal of P7,000,000 of the remaining appropriated retained earnings since the Power Plant project no longer needs the subject appropriation to fund its completion.

c. Equity reserves comprise of the following:

Reserve for retirement plan pertains to the cumulative remeasurements of the Company's defined benefit retirement plan.

Other reserves comprise the net loss on cash flows hedges and effect of redemption of capital securities with details as follows:

	Net Loss on Cash Flows Hedges		Redemption of Capital Securities	
	2024	2023	2024	2023
Balance at beginning of year	P -	P50,991	(P11,509,415)	(P9,223,176)
Movement	-	(50,991)	(385,701)	(2,286,239)
Balance at end of year	P -	P -	(P11,895,116)	(P11,509,415)

d. SPCS

On January 19, 2018, the Company issued US\$500 million SPCS with an issue price of 100% for the partial repurchase and redemption of the Company's existing US\$750 million USCS, the repayment of indebtedness and general corporate purposes including capital expenditures. The SPCS were listed with the Singapore Exchange Securities Trading Ltd. on January 22, 2018.

Holders of the SPCS are conferred a right to receive distribution on a semi-annual basis from their issue date at the rate of 4.6% per annum, subject to a step-up rate. The Company has a right to defer the distribution under certain conditions.

The SPCS have no fixed redemption date and are redeemable in whole, but not in part, at their principal amounts together with any accrued, unpaid, or deferred distributions, at the Company's option on or after July 19, 2023 or on any distribution payment date thereafter or upon the occurrence of certain other events.

On January 19, 2023, the Company redeemed US\$22.47 million (P1,118,165) from US\$500 million SPCS issued in 2018 at a purchase price of US\$927 per US\$1,000 in principal amount.

On July 19, 2023, the remaining outstanding SPCS with an aggregate amount of US\$477.53 million (P23,763,115) was fully redeemed at a purchase price of US\$1,000 per US\$1,000 in principal amount. Following such redemption, distributions ceased to accrue and the redeemed securities were cancelled and delisted from the Singapore Exchange Securities Trading Limited.

Payments of distributions pertaining to US\$500 million SPCS were made on the following dates: July 19, 2023 (P796,823), January 19, 2023 (P840,727), July 18, 2022 (P863,895), and January 18, 2022 (P786,907).

On April 19, 2021, the Company issued US\$550 million SPCS at an issue price of 100%, with an initial distribution rate of 5.95% per annum. The securities were listed in the Singapore Exchange Securities Trading Limited on April 20, 2021. The net proceeds were used for the repayment of indebtedness and for general corporate purposes.

Payments of distributions pertaining to US\$550 million SPCS was made on the following dates: October 19, 2024 (P1,257,753), April 19, 2024 (P1,245,623), October 19, 2023 (P1,237,834), April 19, 2023 (P1,223,784), October 18, 2022 (P1,285,656), and April 18, 2022 (P1,139,505).

The SPCS were offered for sale and sold to qualified buyers and not more than 19 institutional lenders. Hence, the sale of SPCS was considered an exempt transaction for which no confirmation of exemption from the registration requirements of the SRC was required to be filed with the SEC.

e. RPS

On November 27, 2019, the Company issued US\$6 million RPS to be used for capital expenditure requirements.

Holders of the RPS are conferred a right to receive distribution on a quarterly basis, every February 27, May 27, August 27 and November 27. The Company has a right to defer the distribution under certain conditions.

On May 26, 2023, the Company fully redeemed its US\$6 million (P301,514) RPS.

Distributions to holders of the RPS were made on May 26, 2023 (P3,350), February 27, 2023 (P3,319), November 25, 2022 (P3,405), August 30, 2022 (P3,375), May 27, 2022 (P3,138), and March 1, 2022 (P3,075).

On June 22, 2020, the Company issued US\$130 million RPS used for general corporate purposes. Holders of the RPS are conferred a right to receive distributions on a quarterly basis every March 22, June 22, September 22 and December 22.

On September 25, 2024 and October 2, 2024, the Company partially repurchased US\$40 million (P1,982,733) and US\$20 million (P991,366) RPS.

Payment of distributions pertaining to RPS were made on December 23, 2024 (P37,153), October 2, 2024 (P1,131), September 25, 2024 (P675), September 23, 2024 (P65,733), June 21, 2024 (P69,315), and March 22, 2024 (P66,205), December 22, 2023 (P65,248), September 22, 2023 (P66,961), June 22, 2023 (P65,498), March 22, 2023 (P64,230), December 22, 2022 (P64,950), September 22, 2022 (P68,810), June 22, 2022 (P64,189), and March 22, 2022 (P61,766).

On August 10, 2020, the Company issued additional US\$100 million RPS used for general corporate purposes. Holders of the RPS are conferred a right to receive distributions on a quarterly basis every February 10, May 10, August 10 and November 10.

Payments of distributions pertaining to RPS were made on November 11, 2024 (P53,058), August 12, 2024 (P51,953), May 10, 2024 (P51,946), and February 10, 2024 (P50,811), November 10, 2023 (P50,709), August 10, 2023 (P51,031), May 10, 2023 (P50,541), February 10, 2023 (P49,430), November 10, 2022 (P52,676), August 10, 2022 (P50,525), May 10, 2022 (P47,489), and February 10, 2022 (P46,461).

The RPS have no fixed redemption date and are redeemable in whole or in part at their principal amounts together with any accrued, unpaid, or deferred distributions, at the Company's option on any distribution payment date after 90 days from issuance date.

	P1,324,298	(P827,526)	P25,849	P522,621

In 2024, the Company made provision for impairment of deferred tax asset for a portion of its NOLCO and MCIT incurred in 2020 and 2022, respectively, which is due to expire in the succeeding year. Details of unrecognized deferred tax assets as of December 31, 2024 are as follows:

Year Incurred	Tax Base		Tax Effect
	NOLCO	MCIT	
2020	P5,206,591	P -	P1,301,648
2022	-	310,661	310,661
	P5,206,591	P310,661	P1,612,309

As of December 31, 2024, the NOLCO and MCIT of the Company that can be claimed as deduction from future taxable income and deduction from corporate income tax due, respectively, are as follows:

Year Incurred/Paid	Carryforward Benefits Up To	NOLCO	MCIT
2020	December 31, 2025	P15,383,628	P -
2021	December 31, 2026	1,677,882	-
2022	December 31, 2025	-	310,661
2023	December 31, 2026	-	512,683
2024	December 31, 2027	-	865,148
		P17,061,510	P1,688,492

As of December 31, 2023, the NOLCO and MCIT of the Company that can be claimed as deduction from future taxable income and deduction from corporate income tax due, respectively, are as follows:

Year Incurred/Paid	Carryforward Benefits Up To	NOLCO	MCIT
2020	December 31, 2025	P23,162,852	P -
2021	December 31, 2026	1,677,882	-
2021	December 31, 2024	-	197,417
2022	December 31, 2025	-	310,661
2023	December 31, 2026	-	512,683
		P24,840,734	P1,020,761

On September 30, 2020, the Bureau of Internal Revenue (BIR) issued Revenue Regulations (RR) No. 25-2020 to implement Section 4 (bbbb) of Republic Act (RA) No. 11494, otherwise known as the Bayanihan to Recover as One Act, relative to NOLCO which provides that the net operating loss of a business or enterprise for taxable years 2020 and 2021 shall be carried over as a deduction from gross income for the next five consecutive taxable years immediately following the year of such loss.

The net operating loss for the said taxable years may be carried over as a deduction even after the expiration of RA No. 11494, provided that the same is claimed within the next five consecutive taxable years following the year such loss was incurred.

A reconciliation of tax on the pretax income computed at the applicable statutory rates to tax expense reported in the separate statements of comprehensive income is as follows:

	2024	2023 As restated (Note 40)
Statutory income tax rate	25.00%	25.00%
Increase (decrease) in income tax rate resulting from:		
Unrecognized deferred tax assets on NOLCO and MCIT	15.68%	-
Nondeductible interest expense	0.08%	0.14%
Nondeductible expense	0.59%	0.24%
Interest income subjected to lower final tax and others	(0.10%)	(0.25%)
Income subject to income tax holiday (ITH)	(0.34%)	-
Nontaxable income	(7.59%)	(7.43%)
Effective income tax rate	33.32%	17.71%

27. Related Party Disclosures

The Company, certain subsidiaries, joint venture, associate and SMC and its subsidiaries in the normal course of business, purchase products and services from one another. Transactions with related parties are made at normal market prices and terms. The Company requires approval of the BOD for certain limits on the amount and extent of transactions with related parties.

Amounts owed by/owed to related parties are collectible/to be settled in cash. An assessment is undertaken at each financial year by examining the financial position of the related party and the market in which the related party operates.

The balances and transactions with related parties as of and for the years ended December 31 follow:

	Note	Year	Revenues from Related Parties	Purchases from Related Parties	Amounts Owed by Related Parties	Amounts Owed to Related Parties	Terms	Conditions

- As of December 31, 2024 and 2023, the Company has interest bearing advances to PCERP, included as part of "Trade and other receivables - net" account in the separate statements of financial position, for some investment opportunities (Notes 7 and 29).
- Sales relate to the Company's supply agreements with the Intermediate Parent, various SMC subsidiaries, and an associate. Under these agreements, the Company supplies diesel fuel, gasoline and lube requirements of selected SMC plants and subsidiaries.
- Purchases relate to purchase of goods and services such as construction, information technology, shipping and terminalling from SMC and various SMC subsidiaries.
- The Company entered into a various lease agreements with San Miguel Properties, Inc. for office space and certain parcels of land where service stations are located.
- The Company has existing lease agreements with SMC covering certain parcels of land where service stations are located.
- The Company also pays SMC for its share in common expenses such as utilities and management fees.
- Petron has existing logistics, freight forwarding and into-plane services agreement with PLI.
- The Company has long-term lease agreements with NVRC and its subsidiaries covering certain parcels of land where the Company's service stations and terminals are located.

- i. The Company also grants unsecured, noninterest and interest-bearing cash advances (interest rates ranging from 5% to 9%) to NVRC, which are payable monthly over an average period of 25 years. The advances are initially recognized at their present values at the time of grant and are subsequently accreted to their maturity values at their effective yields.
- j. The Company obtains insurance coverage from Petrogen, which in turn obtains reinsurance coverage from Ovincor and other local reinsurers.
- k. Petron has an existing trading agreement with PSTPL for the procurement of crude oil and trading of finished petroleum products and other materials such as ethanol, coal, catalysts and additives (Note 30).
- l. The Company has an existing agreements with PSTPL involving renewal and negotiation of contracts of affreightments and commodity risk management through hedging transactions.
- m. Amounts owed to entities under common control include interest-bearing advances from San Miguel Insurance Company Ltd.
- n. Amounts owed to associate of entities under common control include interest-bearing short-term loans payable to Bank of Commerce.
- o. Amounts owed to subsidiaries include interest-bearing advances from Ovincor.
- p. Amounts owed by subsidiaries include long-term interest-bearing advances to SLPHI.
- q. Amounts owed by related parties consist of trade and non-trade receivables, advances and prepaid expenses.
- r. Amounts owed to related parties consist of trade payables, non-trade payables, subscription payable and other noncurrent liabilities.
- s. The compensation and benefits of key management personnel of the Company, by benefit type, included in the "Personnel expenses" account follow (Note 23):

	2024	2023
Salaries and other short-term employee benefits	P887,602	P808,691
Retirement benefits costs - defined benefit plan	104,984	115,731
Retirement benefits costs - defined contribution plan	23,602	21,748
	P1,016,188	P946,170

28. Lease Commitments

Company as Lessee

The Company entered into commercial leases on office space, buildings, machinery and equipment service stations and certain parcels of land for its refinery and service stations (Notes 11 and 30). These leases' life ranges from one to 30 years with renewal options included in the contracts. There are no restrictions placed upon the Company by entering into these leases. The lease agreements include upward escalation adjustments of the annual rental rates.

Amounts recognized in profit or loss.

	Note	2024	2023
Interest on lease liabilities	11	P1,265,378	P1,155,899
Income from sub-leasing		(520,996)	(480,250)
Expenses relating to short-term leases		616,877	538,147
Expenses relating to leases of low-value assets, excluding short-term leases of low-value assets		14,023	30,305
		P1,375,282	P1,244,101

Rent expense included in "Cost of goods sold - others" account amounted to P133,513 in 2024 and P128,286 in 2023 (Note 21). Interest amounting to P5,408 and P26,802 was capitalized as part of property, plant and equipment in 2024 and 2023, respectively (Note 10).

Amounts recognized in separate statements of cashflows.

	Note	2024	2023
Interest expense under operating activities	32	P1,270,786	P1,182,701
Principal lease payments under financing activities	32	1,260,650	1,220,914
Cash outflows for short-term and low-value leases		630,900	568,452
	11	P3,162,336	P2,972,066

Company as Lessor - Operating Lease

The Company has entered into lease agreements on its service stations and other related structures. The non-cancellable leases have remaining terms of between three to ten years. All leases include a clause to enable upward escalation adjustment of the annual rental rates.

The following table sets out a maturity analysis of lease payments, showing undiscounted lease payments to be received after the reporting period.

	2024	2023
Less than one year	P121,389	P118,381
One to two years	15,226	14,999
Two to three years	-	3,051
Three to four years	143,588	-
Four to five years	4,653	-
	P284,856	P136,431

29. Retirement Plan

The succeeding tables summarize the components of net retirement benefits costs (income) under defined benefit retirement plan recognized in separate statements of comprehensive income and the funding status and amounts of retirement plan recognized in the separate statements of financial position. The Company has a funded, noncontributory, defined benefit retirement plan. Contributions and costs are determined in accordance with the actuarial studies made for the plan. Annual cost is determined using the projected unit credit method. The Company's latest actuarial valuation date is as of December 31, 2024. Valuations are obtained on a periodic basis.

The Company's retirement plan is registered with the BIR as a tax-qualified plan under Republic Act (RA) No. 4917, as amended. The control and administration of the retirement plan is vested in the Board of Trustees (BOT), as appointed by the BOD of the Company. The BOT of the retirement plan, who exercise voting rights over the shares and approve material transactions, are also officers of the Company, while one of the BOT is also a BOD. The retirement plan's accounting and administrative functions are undertaken by SMC's Retirement Funds Office.

The following table shows a reconciliation of the net defined benefit retirement liability and its components:

	Present Value of Defined Benefit Obligation		Fair Value of Plan Assets		Net Defined Benefit Retirement Liability

The carrying amounts of the Company's retirement fund approximate fair values as of December 31, 2024 and 2023.

Plan assets consist of the following:

	2024	2023
Shares of stock:		
Quoted	60%	67%
Unquoted	15%	13%
Government securities	19%	14%
Cash and cash equivalents	5%	4%
Others	1%	2%
	100%	100%

Investment in Shares of Stock. As of December 31, 2024 and 2023, the Company's plan assets include 459,156,097 common shares of Petron with fair market value per share of P2.43 and P3.55 as of December 31, 2024 and 2023, respectively, and 14,250,900 common shares of SMC with fair market value per share of P86 and P102.10 as of December 31, 2024 and 2023, respectively.

The Company's plan recognized gain (loss) of (P743,694) and P658,425 in 2024 and 2023, respectively on the investment in marketable securities of Petron and SMC mainly as a result of marked-to-market remeasurements.

Dividend income from the investment in shares of stock of Petron and SMC amounted to P65,867 both in 2024 and 2023.

Government Securities represents debt instruments issued by sovereign government mainly held by two trustee banks of the plan.

Others include receivables, unit investment trust funds, and debt instruments which earn interest.

The BOT reviews the level of funding required for the retirement fund. Such a review includes the asset-liability matching (ALM) strategy and investment risk management policy. The Company's ALM objective is to match maturities of the plan assets to the retirement benefit obligation as they fall due. The Company monitors how the duration and expected yield of the investments are matching the expected cash outflows arising from the retirement benefit obligation. The Company expects to contribute P536,428 to its defined benefit retirement plan in 2025.

The BOT approves the percentage of asset to be allocated for fixed income instruments and equities. The retirement plan has set maximum exposure limits for each type of permissible investments in marketable securities and deposit instruments. The BOT may, from time to time, in the exercise of its reasonable discretion and taking into account existing investment opportunities, review and revise such allocation and limits.

The retirement plan exposes the Company to actuarial risks such as investment risk, interest rate risk, longevity risk and salary risk as follows:

Investment and Interest Risk. The present value of the defined benefit obligation is calculated using a discount rate determined by reference to market yields to government bonds. Generally, a decrease in the interest rate of a reference government bonds will increase the plan obligation. However, this will be partially offset by an increase in the return on the plan's investments and if the return on plan asset falls below this rate, it will create a deficit in the plan. Due to the long-term nature of plan obligation, a level of continuing equity investments is an appropriate element of the Company's long-term strategy to manage the plans efficiently.

Longevity and Salary Risks. The present value of the defined obligation is calculated by reference to the best estimate of the mortality of the plan participants both during and after their employment and to their future salaries. Consequently, increases in the life expectancy and salary of the plan participants will result in an increase in the plan obligation.

The overall expected rate of return is determined based on historical performance of the investments.

The principal actuarial assumptions used to determine retirement benefits are as follows:

	2024	2023
Discount rate	6.15%	6.58%
Future salary increases	5.00%	5.00%

Assumptions for mortality and disability rates are based on published statistics and mortality and disability tables.

The weighted average duration of defined benefit obligation is from 6.6 years and 5.5 years as of December 31, 2024 and 2023, respectively.

The reasonably possible changes to one of the relevant actuarial assumptions, while holding all other assumptions constant, would have affected the defined benefit liabilities/assets by the amounts below:

	Defined Benefit Liabilities	
	1 Percent Increase	1 Percent Decrease
2024		
Discount rate	(P256,928)	P294,020
Salary increase rate	294,466	(261,893)
	Defined Benefit Liabilities	
	1 Percent Increase	1 Percent Decrease
2023		
Discount rate	(P192,085)	P216,723
Salary increase rate	217,985	(196,571)

The Company has advances to PCERP amounting to P981,547 and P937,488 as of December 31, 2024 and 2023, respectively, included as part of "Trade and other receivables - net" account in the separate statements of financial position (Notes 7 and 27). The advances are subject to interest of 5% in 2024 and 2023 (Note 25).

Transactions with the retirement plan are made at normal market prices and terms. Outstanding balances as of December 31, 2024 and 2023 are unsecured and settlements are made in cash. There have been no guarantees provided for any retirement plan receivables. The Company has not recognized any impairment losses relating to the receivables from retirement plan for the years ended December 31, 2024 and 2023.

30. Significant Agreements

Supply Agreements. The Company has assigned all its rights and obligations to PSTPL (as Assignee) to have a term contract to purchase the Company's crude oil requirements from Saudi Arabian Oil Company (Saudi Aramco), Kuwait Petroleum Corporation (KPC) and Abu Dhabi National Oil Company (ADNOC), Chevron USA Inc. Singapore Branch (Chevron) and Shell International Eastern Trading Company (SIETCO). The contract with Saudi Aramco is from January 1, 2024 to December 31, 2024 with an automatic annual extension thereafter, unless terminated at the option of either party, upon at least 60 days written notice. The contract with Saudi Aramco has been extended for another year. Meanwhile, the contract with KPC from July 1, 2023 to December 31, 2024 was renewed from January 1, 2025 to December 31, 2025 while the contract from ADNOC from January 1, 2024 to December 31, 2024 has been terminated. Lastly, the contract with Chevron is from December 1, 2024 to November 30, 2025 and the contract with SIETCO is for three (3) years from November 6, 2023.

Outstanding liabilities of the Company for such purchases are shown as part of "Liabilities for crude oil and petroleum products" account in the separate statements of financial position as of December 31, 2024 and 2023 (Note 15).

Lease Agreements with Philippine National Oil Company (PNOC). On September 30, 2009, Petron through NVRC entered into a 30-year lease with PNOC without rent-free period, covering a property which it shall use as site for its refinery, commencing on January 1, 2010 and ending on December 31, 2039. Based on the latest valuation of the property conducted by a third-party appraiser acceptable to both parties, the annual rental shall be P238,464 retroactive to year 2022, payable on the 15th day of January each year without the necessity of demand. This lease is subject to renewal options and annual escalation clauses of 3% per annum to be applied starting 2018 until the next re-appraisal is conducted. The leased premises shall be reappraised every fifth year in which the new rental rate shall be determined equivalent to 5% of the reappraised value, and still subject to annual escalation clause of 3% for the four years following the re-appraisal. As of December 31, 2024, said lease contract along with the lease contracts for its bulk plants and service stations which are the subject landholdings of the rescinded deeds of conveyance were considered deemed canceled with the Supreme Court's ruling in favor of Petron (Note 38). As of December 31, 2024 and 2023, Petron leases other parcels of land from PNOC for its pipeline right-of-way and service stations.

31. Basic and Diluted Loss Per Share

Basic and diluted loss per share amounts are computed as follows:

	2024	2023 As restated (Note 40)
Net income for the year	P7,712,784	P6,397,624
Dividends on preferred shares for the year	(2,712,521)	(2,115,243)
Distributions to the holders of capital securities	(2,951,356)	(4,569,485)
Net income (loss) attributable to common shareholders of the Company (a)	P2,048,907	(P287,104)
Weighted average number of common shares outstanding (in thousands) (b)	9,375,104	9,375,104
Basic/diluted earnings (loss) per share (a/b)	P0.22	(P0.03)

As of December 31, 2024 and 2023, the Company has no potential dilutive debt or equity instruments.

32. Supplemental Cash Flow Information

Supplemental information with respect to the separate statements of cash flows is presented below:

- a. Changes in noncash current assets, certain current liabilities and others are as follows (amounts reflect actual cash flows rather than increases or decreases of the accounts in the separate statements of financial position):

	Note	2024	2023
Decrease (increase) in assets:			
Trade and other receivables		(P5,459,383)	(P3,428,567)
Inventories		(10,181,161)	6,443,949
Other current assets		(4,149,078)	(2,142,159)
Increase (decrease) in liabilities:			
Liabilities for crude oil and petroleum products		12,593,332	(4,630,424)
Trade and other payables		(2,129,826)	2,917,257
	40	(P9,326,116)	(P839,944)

b. Changes in liabilities arising from financing activities:

	Dividends Payable	Lease Liabilities	Advances from a Related Party	Short-term Loans	Long-term Debt	Total
Balance as of January 1, 2024	P949,895	P15,600,343	P3,362,280	P125,544,000	P108,895,679	P254,352,197

33. Financial Risk Management Objectives and Policies

The Company's principal financial instruments include cash and cash equivalents, equity securities, bank loans and derivative instruments. The main purpose of bank loans is to finance working capital relating to importation of crude and petroleum products, as well as to partly fund capital expenditures. The Company has other financial assets and liabilities such as trade and other receivables and trade and other payables, which are generated directly from its operations.

It is the Company's policy not to enter into derivative transactions for speculative purposes. The Company uses hedging instruments to protect its margin on its products from potential price volatility of crude oil and products. It also enters into forward currency and option contracts to hedge its currency exposure on crude oil importations and long-term dollar loan, respectively.

The main risks arising from the Company's financial instruments are foreign currency risk, interest rate risk, credit risk, liquidity risk and commodity price risk. The BOD regularly reviews and approves the policies for managing these financial risks. Details of each of these risks are discussed below, together with the related risk management structure.

Risk Management Structure

The Company follows an enterprise-wide risk management framework for identifying, assessing and addressing the risk factors that affect or may affect its businesses.

The Company's risk management process is a bottom-up approach, with each risk owner mandated to conduct regular assessment of its risk profile and formulate action plans for managing identified risks. As the Company's operation is an integrated value chain, risks emanate from every process, while some could cut across groups. The results of these activities flow up to the Management Committee and, eventually, to the BOD through the Company's annual business planning process.

Oversight and technical assistance is likewise provided by corporate units and committees with special duties. These groups and their functions are:

- a. The Risk and Insurance Management Group, which is mandated with the overall coordination and development of the enterprise-wide risk management process.
- b. The Treasurers Department, which is in charge of foreign exchange hedging transactions.
- c. The Transaction Management Unit of Controllers Department, which provides backroom support for all hedging transactions.
- d. The Corporate Technical and Engineering Services Department, which oversees strict adherence to safety and environmental mandates across all facilities.
- e. The Internal Audit Department, which has been tasked with the implementation of a risk-based auditing.
- f. The Commodity Risk Management Department (CRMD), which sets new and updates existing hedging policies by the BOD, provides the strategic targets and recommends corporate hedging strategy to the Commodity Risk Management Committee and Steering Committee.
- g. PSTPL executes the hedging transactions involving crude and product imports on behalf of the Company.

The BOD also created separate positions and board-level entities with explicit authority and responsibility in managing and monitoring risks, as follows:

- a. The Audit Committee is responsible for overseeing the Senior Management in establishing and maintaining an adequate, effective and efficient internal control framework. It ensures that systems and processes are designed to provide assurance in areas including reporting, monitoring compliance with laws, regulations and internal policies, efficiency and effectiveness of operations, and safeguarding of assets.

The Internal Audit Department and the External Auditor directly report to the Audit Committee regarding the direction, scope and coordination of audit and any related activities.

- b. The Risk Oversight Committee is responsible for the oversight of the enterprise risk management system of the Company to ensure its functionality and effectiveness.

- c. The Compliance Officer, who is a senior officer of the Company reports to the BOD chairperson. Among other functions, he monitors compliance with the provisions and requirements of the Corporate Governance Manual and relevant laws and regulations and determines any possible violations and recommends corresponding penalties, subject to review and approval of the BOD. The Compliance Officer identifies and monitors compliance risk. Lastly, the Compliance Officer represents the Company before the SEC regarding matters involving compliance with the Corporate Governance Manual and other relevant rules and regulations of the SEC.

Foreign Currency Risk

The Company's functional currency is the Philippine peso, which is the denomination of the bulk of its revenues. The Company's exposures to foreign currency risk arise mainly from US dollar-denominated sales as well as purchases principally of crude oil and petroleum products. As a result of this, the Company maintains a level of US dollar-denominated assets and liabilities during the year. Foreign exchange risk occurs due to differences in the levels of US dollar-denominated assets and liabilities.

The Company pursues a policy of mitigating foreign currency risk by entering into hedging transactions or by substituting US dollar-denominated liabilities with peso-based debt. The natural hedge provided by US dollar-denominated assets is also factored in hedging decisions. As a matter of policy, currency hedging is limited to the extent of 100% of the underlying exposure.

The Company is allowed to engage in active risk management strategies for a portion of its foreign currency risk exposure. Loss limits are in place, monitored daily and regularly reviewed by management.

The Company assesses the existence of an economic relationship between the hedged item and the hedging instrument based on the currency, amount, and timing of their respective cash flows. For derivatives designated in a hedging relationship, the Company determines whether the derivatives are expected to be highly effective in offsetting the changes in the cash flows of the hedged item using the cumulative dollar-offset method. The dollar offset method approximates the changes in the fair value of the hedged item using a hypothetical derivative which mirrors the terms of the derivative used as hedging instrument.

For currency hedges, the Company maintains a 1:1 hedge ratio since a similar amount of hedging instrument is expected to offset the changes in the cash flows of the hedged item. The main sources of ineffectiveness are:

- a. the effect of the counterparty and the Company's own credit risk on the fair value of the swaps, which is not reflected in the change in the fair value of the hedged cash flows attributable to the change in the exchange rates; and
- b. changes in the timing of the hedged transactions.

The Company is exposed to foreign currency risk of its short-term loans and US dollar-denominated sales and purchases. On the other hand, both foreign currency and interest rate risks arise in the Company's long-term debts. The Company determined that foreign currency risk is a separately identifiable and measurable risk component eligible for designation since it is caused by fluctuations in US dollar to Philippine peso exchange rates and benchmark closing prices used to measure the fluctuations are available in the market.

Information on the Company's US dollar-denominated financial assets and liabilities and their Philippine peso equivalents are as follows:

	2024		2023	
	US Dollar	Phil. Peso Equivalent	US Dollar	Phil. Peso Equivalent
Financial Assets				
Cash and cash equivalents	264,392	15,293,785	263,140	14,570,062
Trade and other receivables	178,158	10,305,544	192,958	10,684,084
Other assets	10,402	601,696	9,799	542,571
	452,952	26,201,025	465,897	25,796,717
Financial Liabilities				
Liabilities for crude oil and petroleum products	461,546	26,698,128	274,971	15,225,144
Long-term debt (including current maturities)	1,170,662	67,716,951	939,675	52,029,805
Other liabilities	23,238	1,344,219	10,748	595,117
	1,655,446	95,759,298	1,225,394	67,850,066
Net foreign currency - denominated monetary liabilities	(1,202,494)	(69,558,273)	(759,497)	(42,053,349)

The Company incurred net foreign currency gains (losses) amounting to (P2,216,921) and P18,796 in 2024 and 2023, respectively (Note 25), which were mainly countered by marked-to-market and realized hedging gains (Note 25). The foreign exchange rates from Philippine peso (PHP) to US dollar (US\$) as of December 31 are shown in the following table:

	PHP to US\$
December 31, 2024	57.845
December 31, 2023	55.370

Managing foreign currency risk is also supplemented by monitoring the sensitivity of financial instruments to various foreign currency exchange rate scenarios. Foreign currency movements affect reported equity through the retained earnings and equity reserves arising from increases or decreases in unrealized and realized foreign exchange gains or losses.

The following table demonstrates the sensitivity to a reasonably possible change in the US dollar exchange rate, with all other variables held constant, to profit before tax and equity as of December 31, 2024 and 2023:

	P1 Decrease in the US Dollar Exchange Rate		P1 Increase in the US Dollar Exchange Rate	
	Effect on Income before Income Tax	Effect on Equity	Effect on Income before Income Tax	Effect on Equity
2024				
Cash and cash equivalents	(P264,393)	(P198,295)	P264,393	P198,295
Trade and other receivables	(178,158)	(133,619)	178,158	133,619
Other assets	(10,402)	(7,802)	10,402	7,802
	(452,953)	(339,716)	452,953	339,716
Liabilities for crude oil and petroleum products	461,546	346,160	(461,546)	(346,160)
Long-term debt (including current maturities)	1,170,661	877,996	(1,170,661)	(877,996)
Other liabilities	23,238	17,429	(23,238)	(17,429)
	1,655,445	1,241,585	(1,655,445)	(1,241,585)
	P1,202,492	P901,869	(P1,202,492)	(P901,869)

	P1 Decrease in the US Dollar Exchange Rate		P1 Increase in the US Dollar Exchange Rate	
	Effect on Income before Income Tax	Effect on Equity	Effect on Income before Income Tax	Effect on Equity
2023				
Cash and cash equivalents	(P263,140)	(P197,355)	P263,140	P197,355
Trade and other receivables	(192,958)	(144,719)	192,958	144,719
Other assets	(9,799)	(7,349)	9,799	7,349
	(465,897)	(349,423)	465,897	349,423
Liabilities for crude oil and petroleum products	274,971	206,228	(274,971)	(206,228)
Long-term debt (including current maturities)	939,675	704,756	(939,675)	(704,756)
Other liabilities	10,748	8,061	(10,748)	(8,061)
	1,225,394	919,045	(1,225,394)	(919,045)
	P759,497	P569,622	(P759,497)	(P569,622)

Exposures to foreign currency risk vary during the year depending on the volume of foreign currency denominated transactions. Nonetheless, the analysis above is considered to be representative of the Company's currency risk.

Interest Rate Risk

Interest rate risk is the risk that future cash flows from a financial instrument (cash flow interest rate risk) or its fair value (fair value interest rate risk) will fluctuate because of changes in market interest rates. The Company's exposure to changes in interest rates relates mainly to the long-term borrowings and investment securities. Investments or borrowings issued at fixed rates expose the Company to fair value interest rate risk. On the other hand, investments or borrowings issued at variable rates expose the Company to cash flow interest rate risk.

The Company manages its interest costs by using a combination of fixed and variable rate debt instruments. Management is responsible for monitoring the prevailing market-based interest rates and ensures that the marked-up rates levied on its borrowings are most favorable and benchmarked against the interest rates charged by other creditor banks.

On the other hand, the Company's investment policy is to maintain an adequate yield to match or reduce the net interest cost from its borrowings prior to deployment of funds to their intended use in operations and working capital management. However, the Company invests only in high-quality securities while maintaining the necessary diversification to avoid concentration of risk.

In managing interest rate risk, the Company aims to reduce the impact of short-term volatility on earnings. Over the longer term, however, permanent changes in interest rates would have an impact on separate statements of comprehensive income.

Managing interest rate risk is also supplemented by monitoring the sensitivity of Company's financial instruments to various standard and non-standard interest rate scenarios. Interest rate movements affect reported equity through the retained earnings arising from increases or decreases in interest income or interest expense as well as fair value changes reported in separate statements of comprehensive income, if any.

The sensitivity to a reasonably possible 1% increase in the interest rates, with all other variables held constant, would have decreased the Company's profit before tax (through the impact on floating rate borrowings) and equity by P727,170 and P520,298 in 2024 and 2023, respectively. A 1% decrease in the interest rate would have had the equal but opposite effect.

Interest Rate Risk Table. As of December 31, 2024 and 2023, the terms and maturity profile of the interest-bearing financial instruments, together with its gross undiscounted amounts, are shown in the following tables (Note 17):

2024	<1 Year	1 - <2 Years	2 - <3 Years	3 - <4 Years	4 - <5 Years	>5 Years	Total

*The Company reprices every month but has been given an option to reprice every 3 or 6 months.

Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. In effectively managing credit risk, the Company regulates and extends credit only to qualified and credit-worthy customers and counterparties, consistent with established credit policies, guidelines and credit verification procedures. Requests for credit facilities from trade customers undergo stages of review by Trade Sales and Finance Divisions. Approvals, which are based on amounts of credit lines requested, are vested among line managers and top management that include the President and the Chairman.

Generally, the maximum credit risk exposure of financial assets is the total carrying amount of the financial assets as shown on the face of the separate statements of financial position or in the notes to separate financial statements, as summarized below:

	Note	2024	2023
Cash in banks and cash equivalents	5	P18,520,158	P16,292,300
Derivative assets	6	601,696	542,551
Trade and other receivables - net	7	56,408,436	56,265,671
Advances to a subsidiary	9	977,789	991,423
		P76,508,079	P74,091,945

Cash and Cash Equivalents, Advances to a Subsidiary and Derivative Assets

Cash and cash equivalents, advances to a subsidiary and derivative assets are held with counterparties with high external credit ratings. The credit quality of these financial assets is considered to be high grade. Impairment on cash and cash equivalents, advances to a subsidiary and derivative assets has been measured on a 12-month ECL basis and reflects the short maturities of the exposures. The Company considers that its cash and cash equivalents, advances to a subsidiary and derivative assets have low credit risk based on the external credit ratings of its counterparties.

Trade and Other Receivables and Long-term Receivables

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the factors that may influence the credit risk of its customer base, including the default risk associated with the industry and country in which customers operate. Details of concentration of revenue are included in Note 36.

Credit Quality. In monitoring and controlling credit extended to counterparty, the Company adopts a comprehensive credit rating system based on financial and non-financial assessments of its customers. Financial factors being considered comprised of the financial standing of the customer while the nonfinancial aspects include but are not limited to the assessment of the customer's nature of business, management profile, industry background, payment habit and both present and potential business dealings with the Company.

Class A "*High Grade*" are accounts with strong financial capacity and business performance and with the lowest default risk.

Class B "*Moderate Grade*" refers to accounts of satisfactory financial capability and credit standing but with some elements of risks where certain measure of control is necessary in order to mitigate risk of default.

Class C "*Low Grade*" are accounts with high probability of delinquency and default.

Below is the credit quality profile of the Company's trade accounts receivable as of December 31, 2024 and 2023:

	Trade Accounts Receivables Per Class			
	Class A	Class B	Class C	Total
December 31, 2024				
Retail	P2,866,322	P3,847,588	P1,474,161	P8,188,071
Lubes	679,658	317,833	997,421	1,994,912
Gasul	881,277	493,629	168,299	1,543,205
Industrial	15,072,416	3,281,094	5,209,848	23,563,358
Others	8,062,932	3,639,860	859,720	12,562,512
	P27,562,605	P11,580,004	P8,709,449	P47,852,058

	Trade Accounts Receivables Per Class			
	Class A	Class B	Class C	Total
December 31, 2023				
Retail	P2,013,415	P1,800,340	P2,548,461	P6,362,216
Lubes	358,289	286,692	797,932	1,442,913
Gasul	938,800	329,360	155,883	1,424,043
Industrial	17,292,081	-	5,262,861	22,554,942
Others	1,502,064	3,460,237	6,001,300	10,963,601
	P22,104,649	P5,876,629	P14,766,437	P42,747,715

Collaterals. To the extent practicable, the Company also requires collateral as security for a credit facility to mitigate credit risk in trade and other receivables (Note 7). Among the collaterals held are letters of credit, bank guarantees, real estate mortgages, and cash bonds valued at P3,677,215 and P3,528,956 as of December 31, 2024 and 2023, respectively. These securities may only be called on or applied upon default of customers.

Risk Concentration. The Company's exposure to credit risk arises from default of counterparty. Generally, the maximum credit risk exposure of trade and other receivables is its carrying amount without considering collaterals or credit enhancements, if any. The Company has no significant concentration of credit risk since the Company deals with a large number of homogenous trade customers. The Company does not execute any credit guarantee in favor of any counterparty.

The table below presents the summary of the Company's exposure to credit risk and shows the credit quality of the assets by indicating whether the assets are subjected to 12-month ECL or lifetime ECL. Assets that are credit-impaired are separately presented.

2024					
	Financial Assets at Amortized Cost			Financial Assets at FVPL	Total
	12-month ECL	Lifetime ECL - not credit impaired	Lifetime ECL - credit impaired		
Cash in banks and cash equivalents	P18,520,158	P -	P -	P -	P18,520,158

Liquidity Risk

Liquidity risk pertains to the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

The Company's objectives in managing its liquidity risk are as follows: a) to ensure that adequate funding is available at all times; b) to meet commitments as they arise without incurring unnecessary costs; c) to be able to access funding when needed at the least possible cost; and d) to maintain an adequate time spread of refinancing maturities.

The Company constantly monitors and manages its liquidity position, liquidity gaps or surplus on a daily basis. A committed stand-by credit facility from several local banks is also available to ensure availability of funds when necessary.

The Company also uses derivative instruments such as forwards and swaps to manage liquidity.

The table below summarizes the maturity profile of the Company's financial assets and financial liabilities based on contractual undiscounted payments used for liquidity management as of December 31, 2024 and 2023.

2024	Carrying Amount	Contractual Cash Flow	1 Year or Less	>1 Year - 2 Years	>2 Year - 5 Years	Over 5 Years

**excluding cash bonds and deferred lease

Commodity Price Risk

Commodity price risk is the risk that future cash flows from a financial instrument will fluctuate because of changes in market prices. The Company enters into various commodity derivatives to manage its price risks on strategic commodities. Commodity hedging allows stability in prices, thus offsetting the risk of volatile market fluctuations. Through hedging, prices of commodities are fixed at levels acceptable to the Company, thus protecting raw material cost and preserving margins. For consumer (buy) hedging transactions, if prices go down, hedge positions may show marked-to-market losses, however, any loss in the marked-to-market position is offset by the resulting lower physical raw material cost. While for producer (sell) hedges, if prices go down, hedge positions may show marked-to-market gains, however, any gain in the marked-to-market position is offset by the resulting lower selling price.

To minimize the Company's risk of potential losses due to volatility of international crude and product prices, the Company implemented commodity hedging for crude and petroleum products. The hedges are intended to protect crude inventories from risks of downward price and squeezed margins. Hedging policy (including the use of commodity price swaps, time-spreads, put options, collars and 3-way options) developed by the CRMD is in place. Decisions are guided by the conditions set and approved by the Company's management.

Other Market Price Risk

The Company's market price risk arises from its investments carried at FVPL. The Company manages its risk arising from changes in market price by monitoring the changes in the market price of the investments.

Capital Management

The Company's capital management policies and programs aim to provide an optimal capital structure that would ensure the Company's ability to continue as a going concern while at the same time provide adequate returns to the shareholders. As such, it considers the best trade-off between risks associated with debt financing and relatively higher cost of equity funds.

An enterprise resource planning system is used to monitor and forecast the Company's overall financial position. The Company regularly updates its near-term and long-term financial projections to consider the latest available market data in order to preserve the desired capital structure. The Company may adjust the amount of dividends paid to shareholders, issue new shares as well as increase or decrease assets and/or liabilities, depending on the prevailing internal and external business conditions.

The Company monitors capital via carrying amount of equity as shown in the separate statements of financial position. The Company's capital for the covered reporting period is summarized below:

	2024	2023 As restated (Note 40)
Total assets	P391,281,821	P374,523,778
Total liabilities	315,848,484	299,280,121
Total equity	75,433,337	75,243,657
Debt to equity ratio	4.19:1	3.98:1
Asset to equity ratio	5.19:1	4.98:1

There were no changes in the Company's approach to capital management during the year.

The Company is not subject to externally-imposed capital requirements.

34. Financial Assets and Financial Liabilities

The table below presents a comparison by category of carrying amounts and fair values of the Company's financial instruments as of December 31:

	Note	2024		2023	
		Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets (FA):					
Cash and cash equivalents	5	P20,728,756	P20,728,756	P19,433,870	P19,433,870

Derivative liabilities not designated as cash flow hedge		1,317,010	1,317,010	477,640	477,640
Total financial liabilities		P293,431,503	P293,431,503	P267,112,221	P267,112,221

*excluding specific taxes and other taxes payable, deferred liability on consumer loyalty program, advances from customers, cylinder deposits and others

**excluding cash bonds and deferred lease

The following methods and assumptions are used to estimate the fair value of each class of financial instruments:

Cash and Cash Equivalents, Trade and Other Receivables and Advances to a Subsidiary. The carrying amount of cash and cash equivalents and trade and other receivables approximates fair value primarily due to the relatively short-term maturities of these financial instruments. In the case of the advances to a subsidiary, the fair value is based on the present value of expected future cash flows using the applicable discount rates based on current market rates of identical or similar quoted instruments.

Derivatives. The fair values of freestanding and bifurcated forward currency transactions are calculated by reference to current forward exchange rates for contracts with similar maturity profiles. Marked-to-market valuation of commodity hedges are based on forecasted crude and product prices by third parties. The fair values of derivative instruments designated as cash flow hedges are computed by discounting the future cash flows and using the valuation model based on applicable market rates of similar instruments.

Financial Assets at FVPL. The fair values of publicly traded instruments and similar investments are based on published market prices.

Long-term Debt - Floating Rate. The carrying amount of floating rate loans with quarterly interest rate repricing approximate their fair value.

Cash Bonds and Other Noncurrent Liabilities. Fair value is estimated as the present value of all future cash flows discounted using the applicable market rates for similar types of instruments as of reporting date. Effective rates used is 9.39% for the years 2024 and 2023.

Short-term Loans, Liabilities for Crude Oil and Petroleum Products, Trade and Other Payables and Cylinder Deposits. The carrying amount of short-term loans, liabilities for crude oil and petroleum products, trade and other payables and cylinder deposits approximates fair value due to the relatively short-term maturities of these financial instruments.

Derivative Financial Instruments

The Company's derivative financial instruments according to the type of financial risk being managed and the details of freestanding and embedded derivative financial instruments that are categorized into those accounted for as cash flow hedges and those that are not designated as accounting hedges are discussed below.

The Company enters into various foreign currency, interest rate and commodity derivative contracts to manage its exposure on foreign currency, interest rate and commodity price risks. The portfolio is a mixture of instruments including forwards, swaps and options.

Derivative Instruments Accounted for as Cash Flow Hedges

The Company has no outstanding derivative financial instruments for cash flow hedges as of December 31, 2024.

The table below summarizes the amounts pertaining to the designated hedging instrument as of December 31, 2023.

December 31, 2023	Notional Amount	Carrying Amount		Line Item in the Separate Statement of Financial Position where the Hedging Instrument is Included	Changes in the Fair Value of the Hedging Instrument Recognized in OCI	Cost of Hedging Recognized in OCI	Amount Reclassified from Hedging Reserve	Amount Reclassified from Cost of Hedging Reserve to Profit or Loss	Line Item in the Separate Statements of Comprehensive Income Affected by the Reclassification
		Assets	Liabilities						
Foreign Currency and Interest Rate Risks									
Cross currency swap	US\$ -	P -	P -	Other noncurrent assets, Derivative liabilities and Other noncurrent liabilities	P -	P31,443	P -	(P8,657)	Interest Expense and other financing charges, and other income (expenses) - net
Interest Rate Risk									
Interest rate collar	-	-	-	Other noncurrent assets and Derivative liabilities	-	21,421	-	(21,421)	Interest Expense and other financing charges

No ineffectiveness was recognized in the 2023 separate statements of comprehensive income.

The table below provides a reconciliation by risk category of components of equity and analysis of OCI items, net of tax, resulting from cash flow hedge accounting.

	December 31, 2023	
	Hedging Reserve	Cost of Hedging Reserve
Balance at beginning of year	P68,079	(P17,089)
Changes in fair value:		
Foreign currency risk and interest rate risk	(27,652)	31,443
Interest Rate Risk	(63,122)	21,421
Amount reclassified to profit or loss:		
Foreign currency risk and interest rate risk	-	(8,657)
Interest rate risk	-	(21,421)
Income tax effect	22,695	(5,697)
Balance at end of year	P -	P -

Derivative Instruments not Designated as Hedges

The Company enters into certain derivatives as economic hedges of certain underlying exposures. These include freestanding and embedded derivatives found in host contracts, which are not designated as accounting hedges. Changes in fair value of these instruments are accounted for directly in the separate statements of comprehensive income. Details are as follows:

Cross Currency Swaps

As of December 31, 2023, the Company has an outstanding cross currency swap with notional amount of \$10 million and net fair value of P33,586.

Interest Rate Collar

As of December 31, 2023, the Company has an outstanding interest rate collar with notional amount of \$15 million and net fair value of P11,715.

Freestanding Derivatives

Freestanding derivatives consist of commodity and currency hedges entered into by the Company.

Currency Forwards. As of December 31, 2024 and 2023, the Company has outstanding foreign currency forward contracts with aggregate notional amount of US\$1,117 million and US\$786 million, respectively, and with various maturities in 2025. As of December 31, 2024 and 2023, the net negative fair value of these currency forwards amounted to P1,003,209 and P285,185, respectively.

Commodity Swaps. The Company has outstanding swap agreements covering its oil requirements, with various maturities in 2025. Under the agreements, payment is made either by the Company or its counterparty for the difference between the hedged fixed price and the relevant monthly average index price. Total outstanding equivalent notional quantity covered by the commodity swaps were 73.1 million barrels and 30.03 million barrels for 2024 and 2023, respectively. The estimated net receipts for these transactions amounted to P287,895 and P304,795 as of December 31, 2024 and 2023, respectively.

Commodity Options. As of December 31, 2024 and 2023, the Company has no outstanding 3-way options entered as hedge of forecasted purchases of crude oil.

The call and put options can be exercised at various calculation dates with specified quantities on each calculation date.

Embedded Derivatives

Embedded foreign currency derivatives exist in certain US dollar-denominated sales and purchases contracts for various fuel products of Petron. Under the sales and purchase contracts, the peso equivalent is determined using the average Philippine Dealing System rate on the month preceding the month of delivery.

As of December 31, 2024 and 2023, the total outstanding notional amount of currency forwards embedded in nonfinancial contracts is minimal. These nonfinancial contracts consist mainly of foreign currency-denominated service contracts, purchase orders and sales agreements. The embedded forwards are not clearly and closely related to their respective host contracts. As of December 31, 2024 and 2023, the net fair value of these embedded currency forwards is minimal.

For the years ended December 31, 2024 and 2023, the Company recognized marked-to-market gains (losses) from freestanding and embedded derivatives amounting to P1,498,880 and (P1,489,706), respectively (Note 25).

Fair Value Changes on Derivatives not Designated as Cash Flow Hedge

The net movements in the fair value of derivative transactions in 2024 and 2023 are as follows:

	<i>Note</i>	2024	2023
Fair value at beginning of year		P64,911	P607,624
Net changes in fair value during the year	25	1,498,880	(1,489,706)
Fair value of settled instruments		(2,279,105)	946,993
Fair value at end of year		(P715,314)	P64,911

Fair Value Hierarchy

Financial assets and liabilities measured at fair value in the separate statements of financial position are categorized in accordance with the fair value hierarchy. This hierarchy groups financial assets and liabilities into three levels based on the significance of inputs used in measuring the fair value of the financial assets and liabilities.

The table below analyzes financial instruments carried at fair value, by valuation method as of December 31, 2024 and 2023. The different levels have been defined as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3: inputs for the asset or liability that are not based on observable market data.

	2024	2023
	Level 2	Level 2
Financial assets:		
FVPL	P458,373	P388,623
Derivative assets	601,696	542,551
Financial liabilities:		
Derivative liabilities	(1,317,010)	(477,640)

The Company has no financial instruments valued based on Level 1 and 3 as of December 31, 2024 and 2023. During the years, there were no transfer out of the Level 2 measurement.

35. Registration with the Authority of the Freeport Area of Bataan (AFAB) and Board of Investments (BOI)

Petron Bataan Refinery

In December 2021, the Petron Bataan Refinery (PBR) renewed its registration with the AFAB as a registered enterprise. The registration shall be valid and in effect as long as the registered enterprise remains in good standing or until revoked or cancelled. As a registered domestic market enterprise engaged in the oil refinery facility as its registered business activity, PBR, under Sec. 311 of Republic Act No. 11534 or the Corporate Recovery and Tax Incentives for Enterprises (CREATE) Act, is granted duty-free importation of merchandise, including capital equipment, raw materials, spare parts, and accessories, subject to compliance with conditions specified under the CREATE Act. Meanwhile, pursuant to Section 295(G) of the Tax Code, as amended by the CREATE Act, PBR's crude oil importations are exempt from duties and taxes, while applicable taxes are paid upon withdrawal of finished products sourced from the crude oil importation.

Petron Solid Fuel-Fired Power Plant

On October 11, 2019, the BOI approved the Company's application under Executive Order No. 226, otherwise known as the Omnibus Investment Code of 1987 as a New Operator of its 44.4 MegaWatt Solid Fuel-Fired Power Plant. The BOI is extending the following major incentives:

- a. Income Tax Holiday (ITH) for four years from January 2024 or actual start of commercial operations, whichever is earlier, but availment shall in no case earlier than the date of registration. Income qualified for ITH shall be limited to the income directly attributable to the eligible revenue generated from the net capacity of the registered project; with optional bonus year on specific cases provided that the aggregate ITH availment (regular and bonus year) shall not exceed eight years.
- b. Importation of capital equipment, spare parts and accessories at zero duty under Executive No. 85 and its Implementing Rules and Regulations; provided that such capital equipment shall be for the direct and exclusive use of the registered activity.
- c. Importation of consigned equipment for a period of ten years from date of registration subject to posting of the appropriate re-export bond.

The project commenced its commercial operation in January 2023 and the Company availed of the ITH in 2024.

Certificate of entitlement has been timely obtained by the Company to support its ITH incentive.

36. Segment Information

Management identifies segments based on business and geographic locations. These operating segments are monitored and strategic decisions are made on the basis of adjusted segment operating results. The CEO (the chief operating decision maker) reviews management reports on a regular basis.

The Company's major sources of revenues are as follows:

- a. Sales of petroleum and other related products which include gasoline, diesel and kerosene offered to motorists and public transport operators through its service station network around the country.
- b. Lease of equipment for gasoline service stations and other related structures.
- c. Sales on wholesale or retail and operation of service stations, retail outlets, restaurants, convenience stores and the like.
- d. Export sales of various petroleum and non-fuel products to other countries such as China, Taiwan, Malaysia, United Arab Emirates, Singapore, Vietnam, Indonesia, and India.

Revenues are mainly derived from the sale of petroleum products to retail and commercial customers in various geographical locations.

The Company has no significant remaining performance obligations as it mainly recognized revenues in amounts that correspond directly to the value of completed performance obligations.

Segment Assets and Liabilities

Segment assets include all operating assets used by a segment and consist principally of operating cash, receivables, inventories and property, plant and equipment, net of allowances and impairment. Segment liabilities include all operating liabilities and consist principally of accounts payable, wages, taxes currently payable and accrued liabilities. Segment assets and liabilities do not include deferred taxes.

Major Customer

The Company does not have a single external customer from which sales revenue generated amounted to 10% or more of the total revenue of the Company.

The following table presents information on the business segment of the Company as of and for the years ended December 31, 2024 and 2023:

	Retail	Lubes	Gasul	Industrial	Others	Total
2024						
Revenue	P171,207,607	P7,663,022	P29,891,485	P135,243,529	P117,164,739	P461,170,382
Property, plant and equipment	2,343,669	221,982	2,480,116	79,179	135,235,192	140,360,138
Capital expenditures	988,367	185,573	15,643	55,966	4,972,063	6,217,612
2023, as restated (Note 40)						
Revenue	150,302,857	5,485,557	25,432,424	124,833,304	129,901,761	435,955,903
Property, plant and equipment	4,390,913	60,162	40,261	62,198	137,276,849	141,830,383
Capital expenditures	1,080,584	34,205	9,652	39,827	3,182,787	4,347,055

a. revenues from the use of loaned equipment are presented as part of "Retail", "Gasul" and "Industrial"

b. revenues from provisions of technical support are presented as part of "Retail" and "Industrial"

c. revenues from consumer loyalty program are presented as part of "Others"

Geographical Segments

The following table presents revenue information regarding the geographical segments of the Company for the years ended December 31, 2024 and 2023:

	2024	2023
Local	P439,284,726	P413,440,407
Export/international	21,885,656	22,515,496
Total	P461,170,382	P435,955,903

Disaggregation of Revenue

The following tables shows the disaggregation of revenue by geographical segments and the reconciliation of the disaggregated revenue with the Company's business segments for the years ended December 31, 2024 and 2023:

	Retail	Lubes	Gasul	Industrial	Others	Total
2024						
Local	P171,207,607	P7,355,447	P29,810,767	P135,243,529	P95,667,376	P439,284,726
Export/international	-	307,575	80,719	-	21,497,362	21,885,656
2023						
Local	150,302,857	5,152,869	25,432,424	124,833,304	107,718,953	413,440,407
Export/international	-	332,688	-	-	22,182,808	22,515,496

- a. revenues from the use of loaned equipment are presented as part of "Retail", "Gasul" and "Industrial"
b. revenues from provisions of technical support are presented as part of "Retail" and "Industrial"
c. revenues from consumer loyalty program are presented as part of "Others"

37. Events After the Reporting Date

- a. On February 10, 2025, the Company paid distributions amounting to US\$906,250 (P52,670) to the holders of the US\$100 million RPS.
- b. On February 28, 2025, the Company made a full drawdown from the P5,000,000 unsecured term loan facility signed and executed on February 26, 2025. The facility is amortized over 5 years in 10 equal semi-annual installments beginning August 28, 2025, and is subject to a floating interest rate, payable quarterly. The proceeds were used to refinance the bridge loan availed on September 3, 2024, which had been used to fund working capital requirements and the payment of existing indebtedness. This facility is subject to a financial covenant ratio of consolidated gross debt to consolidated net worth, which must not exceed 2.75x.
- c. On March 4, 2025, the BOD of the Company approved the following:
- Declaration of P0.10 per share cash dividends to common stockholders to be paid on April 2, 2025.
 - Public offer and issuance of up to P25,000,000 peso retails bonds with an oversubscription option of up to P7,000,000, to be taken from the bond shelf registration rendered effective by the SEC and valid until September 2025.
 - Common share buyback program of up to 620 million shares as follows, with terms and conditions to be determined by Management: (a) up to 167 million shares (the "Maximum Volume" or about P400,000 (the "Maximum Amount") and during a period of up to six months or until the Maximum Volume or the Maximum Amount is exhausted or unless earlier terminated by Management; and (b) repurchase of all of the 459.16 million common shares held by PCERP via a block sale based on the simple average of the three-day close prior to the execution date.

38. Litigations, Contingencies and Other Matters

- a. Lease Agreements with PNOG

On October 20, 2017, Petron filed with the Regional Trial Court (RTC) of Mandaluyong City a complaint against the PNOG for the reconveyance of the various landholdings it conveyed to PNOG in 1993 as a result of the government-mandated privatization of Petron.

The subject landholdings consist of the refinery lots in Limay, Bataan, 23 bulk plant sites and 66 service station lots located in different parts of the country. The Deeds of Conveyance covering the landholdings provide that the transfer of these lots to PNOC was without prejudice to the continued long-term use by Petron of the conveyed lots for its business operation. Thus, PNOC and Petron executed three lease agreements covering the refinery lots, the bulk plants, and the service station sites, all with an initial lease term of 25 years which expired in August 2018, with a provision for automatic renewal for another 25 years. In 2009, Petron, through its realty subsidiary, NVRC, had an early renewal of the lease agreement for the refinery lots with an initial lease term of 30 years, renewable for another 25 years.

The complaint alleges that PNOC committed a fundamental breach of the lease agreements when it refused to honor both the automatic renewal clause in the lease agreements for the bulk plants and the service station sites and the renewed lease agreement for the refinery lots on the alleged ground that all such lease agreements were grossly disadvantageous to PNOC, a government-owned-and-controlled corporation.

On December 11, 2017, the trial court granted Petron's prayer for a writ of preliminary injunction, enjoining PNOC from committing any act aimed at ousting Petron from possession of the subject properties until the case is decided.

The court-mandated mediation in 2018 and the judicial dispute resolution proceedings before the court in 2019 were likewise terminated, after the parties failed to agree to a settlement. Petron also filed a motion for summary judgment on May 17, 2019. In a resolution dated November 13, 2019, the trial court granted Petron's motion for summary judgment and ordered: (i) the rescission of the Deeds of Conveyance dated 1993 relating to Petron's conveyance of such leased premises to PNOC pursuant to a property dividend declaration in 1993, (ii) the reconveyance by PNOC to Petron of all such properties, and (iii) the payment by Petron to PNOC of the amount of P143,000, with legal interest from 1993, representing the book value of the litigated properties at the time of the property dividend declaration. PNOC filed a motion for reconsideration. Petron also filed a motion for partial reconsideration seeking a modification of the judgment to include an order directing PNOC to return to Petron all lease payments the latter had paid to PNOC since 1993.

Following the trial court's denial of their separate motions for reconsideration, both PNOC and Petron filed their respective notices of appeal with the trial court. In a decision dated December 13, 2021, the Court of Appeals dismissed both appeals of Petron and PNOC and affirmed the resolution of the trial court as described above. In a resolution promulgated on October 6, 2022, the Court of Appeals denied the respective motions for reconsideration of the Company and PNOC. The PNOC filed a petition for review on certiorari with the Supreme Court in December 2022 which the Supreme Court denied on July 25, 2023 on the ground that PNOC failed to sufficiently show that the Court of Appeals committed any reversible error in the challenged decision and resolution as to warrant the Supreme Court's exercise of its discretionary appellate jurisdiction.

In a resolution dated November 25, 2024, the Supreme Court denied with finality the motion for reconsideration and the motion to refer to the Supreme Court *En Banc* that the PNOC filed in December 2023. The November 2024 resolution also ordered the immediate issuance of the entry of judgment and declared that no further pleadings or motions shall be entertained.

On January 21, 2025, PNOC filed a second motion for reconsideration. A second motion for reconsideration is generally prohibited under the Internal Rules of the Supreme Court.

Given the finality of the Supreme Courts's ruling, the Company recognized in its books the reversal of the conveyance of the land declared as property dividends in 1993 at P143,000 equivalent to the net book value of the land at the time of dividend declaration and instead recognized a liability for cash dividends to PNOC of the same amount plus legal interest of P266,641 computed from 1993 to 2024. The landholdings were recognized as part of "Property, plant and equipment" and "Investment property" at P110,052 and P32,948, respectively (Notes 10 and 12). Correspondingly, all accruals related to the lease contracts with PNOC on the subject landholdings of the rescinded deeds of conveyance, namely, lease liabilities of P3,885,481 (Notes 28 and 32), ARO of P2,600,466 (Note 18) for the cost of land restoration and remediation at the end of lease term, and the corresponding right-of-use assets of P2,796,629 (Notes 11 and 12) recognized previously were reversed which resulted in a gain of P3,689,318 (Note 25).

b. Oil Spill Incident in Guimaras

On August 11, 2006, MT Solar I, a third party vessel contracted by the Company to transport approximately two million liters of industrial fuel oil, sank 13 nautical miles southwest of Guimaras, an island province in the Western Visayas region of the Philippines. In separate investigations by the Philippine Department of Justice (DOJ) and the Special Board of Marine Inquiry (SBMI), both agencies found the owners of MT Solar I liable. The DOJ found the Company not criminally liable, but the SBMI found the Company to have overloaded the vessel. The Company has appealed the findings of the SBMI to the Department of Transportation (DOTr) and is awaiting its resolution. The Company believes that SBMI can impose administrative penalties on vessel owners and crew, but has no authority to penalize other parties, such as the Company, which are charterers.

Complaints for damages for non-payment of compensation for the clean-up operations during the oil spill were filed with the RTC of Guimaras by a total of 1,063 plaintiffs who allegedly did not receive any payment of their claims for damages arising from the oil spill. The total claims amount to P292,000. The cases were pending as of December 31, 2024. In the course of plaintiffs' presentation of evidence, they moved for trial by commissioner, which was denied by the trial court. The plaintiffs elevated the matter by way of a petition for certiorari to the Court of Appeals in Cebu City (CA). On January 9, 2020, the CA issued a Resolution granting plaintiffs' motion for reconsideration of the earlier resolution denying their petition and ordering the Company to file its comment on plaintiffs' petition within 10 days. On February 6, 2020, the Company filed a motion for reconsideration of said Resolution, which remains pending as of December 31, 2024. On September 25, 2024, the CA denied the motion for reconsideration of another respondent International Oil Pollution Compensation ("IOPC") Funds and directed IOPC to file its comment. The CA held in abeyance any further action on the petition pending compliance with the directives of the said resolution. In the meantime, proceedings before the trial court continue. In one of the cases, the plaintiffs have already rested its case and trial dates have been set for the presentation of defendants' evidence. In the other case, plaintiffs are already expected to complete the presentation of their evidence testified so far. As of December 31, 2024 and 2023, the Company has not set up any provision related to this case because while the case is still pending, the Company believes the resolution will be in its favor.

c. Other Proceedings

The Company is also a party to certain other proceedings arising out of the ordinary course of its business, including legal proceedings with respect to tax, regulatory and other matters. While the results of litigation cannot be predicted with certainty, management believes that the final outcome of these other proceedings will not have a material adverse effect on the Company's business, financial condition or results of operations.

- d. The Company has unused letters of credit totaling approximately P20,490,983 and P15,094,196 as of December 31, 2024 and 2023, respectively.

39. Supplementary Information Required by the BIR

The BIR has issued RR No. 15-2010 which requires certain tax information to be disclosed in the notes to the separate financial statements. The Company presented the required supplementary tax information as a separate schedule attached to its annual income tax return.

40. Prior Period Adjustments

In 2024, the Company performed a reassessment of its accounting policy for LPG cylinders which was being recognized as an outright expense. The Company took into consideration the legal ownership of LPG cylinders, compliance with regulatory requirements under the LPG Industry Regulation Act and alignment with the recent interpretation of the Securities and Exchange Commission on the matter. As a result thereof, the Company changed its accounting policy on LPG cylinders to recognize these as assets under PAS 16, *Property, Plant, and Equipment*.

The LPG cylinders are recognized under the "Service station and other equipment" asset class in the "Property, plant and equipment - net" account (Note 10). The related cylinder deposits liability was also recognized (Note 16).

The following table summarizes the impact of the change on the Company's separate statements of financial position as of December 31, 2023 and January 1, 2023:

	December 31 2023 As Previously Reported	Adjustments	December 31 2023 As Restated
<i>Noncurrent Assets</i>			
Property, plant and equipment - net	P139,989,634	P1,840,749	P141,830,383

STATEMENT OF MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS

The management of **Petron Corporation and Its Subsidiaries** (collectively referred to as the "Group") is responsible for the preparation and fair presentation of the consolidated financial statements including the schedules attached therein, for the years ended **December 31, 2024 and 2023**, in accordance with the prescribed financial reporting framework indicated therein, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The Board of Directors (the "Board") is responsible for overseeing the Group's financial reporting process.

The Board reviews and approves the financial statements including the schedules attached therein, and submits the same to the stockholders.

R.G. Manabat & Co., the independent auditor appointed by the stockholders, has audited the financial statements of the Group in accordance with Philippine Standards on Auditing, and in its report to the stockholders, has expressed its opinion on the fairness of presentation upon completion of such audit.

REPORT OF INDEPENDENT AUDITORS

The Board of Directors and Stockholders

Petron Corporation

SMC Head Office Complex
40 San Miguel Avenue
Mandaluyong City

Opinion

We have audited the consolidated financial statements of Petron Corporation and Subsidiaries (the “Group”), which comprise the consolidated statements of financial position as at December 31, 2024 and 2023, the consolidated statements of income, consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for each of the three years in the period ended December 31, 2024, and notes, comprising material accounting policies and other explanatory information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2024 and 2023, and of its consolidated financial performance and its consolidated cash flows for each of the three years in the period ended December 31, 2024, in accordance with Philippine Financial Reporting Standards (PFRS) Accounting Standards.

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSA). Our responsibilities under those standards are further described in the *Auditors’ Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audits of the financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Firm Regulatory Registration & Accreditation:

PRC-BOA Registration No. 0003, valid until September 20, 2026

IC Accreditation No. 0003-IC, Group A, valid for five (5) years covering the audit of 2020 to 2024

financial statements (2019 financial statements are covered by IC Circular Letter (CL) No. 2019-39, Transition clause)

BSP Accreditation No. 0003-BSP, Group A, valid for five (5) years covering the audit of 2020 to 2024

financial statements (2019 financial statements are covered by BSP Monetary Board Resolution No. 2161, Transition clause)

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audits of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Revenue Recognition (P867,966 million)

Refer to Note 3, *Summary of Material Accounting Policies* and Note 37, *Segment Information* to the consolidated financial statements.

The risk

Revenue is an important measure used to evaluate the performance of the Group. It is accounted for when the sales transactions have been completed and control over the goods and services has been transferred to the customer. Whilst revenue recognition and measurement is not complex for the Group, voluminous sales transactions and the sales target which form part of the Group's key performance measure may provide venue to improperly recognize revenue.

Our response

We performed the following audit procedures, among others, on revenue recognition:

- We tested operating effectiveness of the key controls over revenue recognition. We involved our information technology specialists, as applicable, to assist in the audit of automated controls and the design and operating effectiveness of controls over the recording of revenue transactions.
- We checked on a sampling basis, the sales transactions to the delivery documents for the year.
- We checked sales transactions for the last month of the financial year and also the first month of the following financial year to the delivery documents to assess whether these transactions are recorded in the correct financial year.
- We tested journal entries posted to revenue accounts, including any unusual or irregular items.
- We tested credit notes recorded after the financial year to identify potential reversals of revenue which were inappropriately recognized in the current financial year.

Valuation of Inventories (P90,570 million)

Refer to Note 3, *Summary of Material Accounting Policies*, Note 4, *Use of Judgments, Estimates and Assumptions* and Note 8, *Inventories* to the consolidated financial statements.

The risk

There is a risk over the recoverability of the Group's inventories due to market price volatility of crude and petroleum products. Such volatility can lead to potential issues over the full recoverability of inventory balances. In addition, determining the net realizable values of inventories is subject to management's judgment and estimation. This includes estimating the selling price of finished goods and the cost of conversion of raw materials based on available market price forecasts and current costs.

Our response

We performed the following audit procedures, among others, on the valuation of inventories:

- We obtained and reviewed the calculation of write-down of the Group's raw materials and finished goods based on the net realizable values of finished goods at yearend.
- For raw materials, projected production yield was used to estimate the cost of conversion for the raw materials as at yearend. We assessed the projected yield by comparing it to the actual yield achieved from crude oil production runs during the year. We then compared the estimated costs of finished goods to the net realizable values to determine any potential write-down.
- For finished goods, we assessed the reasonableness of estimated selling prices by checking various products' sales invoices issued around and after yearend. Any write-down is computed based on the difference between the net realizable value and the cost of inventory held at yearend.

Valuation of Goodwill (P8,731 million)

Refer to Note 3, *Summary of Material Accounting Policies*, Note 4, *Use of Judgments, Estimates and Assumptions* and Note 12, *Business Combination, Investment in Shares of Stock of Subsidiaries, Goodwill and Non-Controlling Interests* to the consolidated financial statements.

The risk

The Group has significant amount of goodwill arising from business acquisitions. We particularly focused on the valuation of goodwill allocated to Petron Oil and Gas International Sdn. Bhd. Group (Petron Malaysia Group) which accounts for 99% of total goodwill. The annual impairment test was significant to our audit as the assessment process is complex by nature and is based on management's judgment and assumptions on future market and/or economic conditions. The assumptions used include future cash flow projections, growth rates and discount rates.

Our response

We performed the following audit procedures, among others, on the valuation of goodwill:

- We tested the integrity of the discounted cash flow model used by the Group. This involved the review of component auditor's work and use of their own valuation specialist to assist in evaluating the models used and assumptions applied and comparing these assumptions to external data, where applicable. The key assumptions include sales volume, selling price and gross profit margin.
- We also involved our own valuation specialist to evaluate the key assumptions used by the Group. This involved comparing the Group's assumptions to externally derived data, where applicable, including our own assessments in relation to key inputs such as projected economic growth, competition, cost of inflation and discount rates, as well as performing break-even analysis on the assumptions.
- We also assessed the Group's disclosures about the sensitivity of the outcome of the impairment assessment to changes in key assumptions used in the valuation of goodwill.

Other Information

Management is responsible for the other information. The other information comprises the information included in the SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended December 31, 2024, but does not include the consolidated financial statements and our auditors' report thereon. The SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended December 31, 2024 are expected to be made available to us after the date of this auditors' report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audits of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audits, or otherwise appears to be materially misstated.

When we read the other information, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and determine whether the other information needs to be revised.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with PFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with PSA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the group financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditors' report is Rohanie C. Galicia.

PETRON CORPORATION AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in Million Pesos, Except Par Value, Number of Shares and Per Share Data, Exchange Rates and Commodity Volumes)

1. Reporting Entity

Petron Corporation (the “Parent Company” or “Petron”) was incorporated under the laws of the Republic of the Philippines and registered with the Philippine Securities and Exchange Commission (SEC) on December 22, 1966. On September 13, 2013, the SEC approved the extension of the Parent Company’s corporate term to December 22, 2066. Under its Articles of Incorporation (AOI), the Parent Company has a corporate life of 50 years or for such longer period as may hereafter be authorized by the laws of the Philippines. Pursuant to the Revised Corporation Code of the Philippines, which took effect in February 2019, the Parent Company shall have a perpetual existence because the Parent Company did not elect to retain its specific corporate term under its AOI.

Petron is the only oil refining and the leading marketing company in the Philippines. Petron envisions an energy-secure and prosperous nation where everyone’s journey is fueled by opportunities for meaningful experiences and sustainable success.

Petron operates the modern refinery in Bataan, with a rated capacity of 180,000 barrels a day. Petron’s refinery processes crude oil into a full range of world-class petroleum products including liquefied petroleum gas (LPG), gasoline, diesel, jet fuel, kerosene, and petrochemicals. From the refinery, Petron moves its products mainly by sea to more than 30 terminals and facilities strategically located across the country. Through this network, Petron supplies fuels to its service stations and various essential industries such as power-generation, transportation, manufacturing, agriculture, etc. Petron also supplies jet fuel at key airports to international and domestic carriers.

With around 1,800 service stations and hundreds of industrial accounts, Petron remains the leader in the Philippine fuel market. Petron retails gasoline and diesel to motorists and public transport operators. Petron also sells its LPG brands “Gasul” and “Fiesta” to households and other industrial consumers through an extensive dealership network. In line with efforts to increase its presence in the regional market, Petron exports various products to Asia-Pacific countries.

Petron sources its fuel additives from its blending facility in Subic Bay. This gives Petron the capability to formulate unique additives suitable for the driving conditions in the Philippines. Petron also has a facility in Mariveles, Bataan where the refinery’s propylene production is converted into higher-value polypropylene resin.

Today, Petron is one of the leading oil companies in Malaysia with an integrated business which includes an 88,000 barrel-per-day refinery, 10 product terminals and facilities, and a network of 800 service stations.

The Parent Company is a public company under Section 17.2 of Securities Regulation Code (SRC) and its shares of stock are listed for trading at the Philippine Stock Exchange (PSE). As of December 31, 2024, the Parent Company's public float stood at 26.71%.

The intermediate parent company of Petron is San Miguel Corporation (SMC) while its ultimate parent company is Top Frontier Investment Holdings, Inc. Both companies are incorporated in the Philippines.

As of December 31, 2024, the three (3) principal common shareholders of the Company holding at least 5% of its common stock were SEA Refinery Corporation ("SEA Refinery") (50.10%), PCD Nominee Corporation - Filipino (20.11%), and SMC (18.16%). SEA Refinery is wholly-owned by SMC. SMC thus holds an aggregate 68.26% ownership of the common shares of the Company.

The registered office address of Petron is SMC Head Office Complex, 40 San Miguel Avenue, Mandaluyong City.

2. Basis of Preparation

Statement of Compliance

The accompanying consolidated financial statements have been prepared in compliance with Philippine Financial Reporting Standards (PFRS) Accounting Standards. PFRS Accounting Standards are based on International Financial Reporting Standards (IFRS) Accounting Standards issued by the International Accounting Standards Board (IASB). PFRS Accounting Standards consist of PFRS Accounting Standards, Philippine Accounting Standards (PAS) and Philippine Interpretations issued by the Financial and Sustainability Reporting Standards Council (FSRSC).

The consolidated financial statements were approved and authorized for issuance by the Board of Directors (BOD) on March 4, 2025.

Basis of Measurement

The consolidated financial statements of the Group have been prepared on the historical cost basis of accounting except for the following which are measured on an alternative basis at each reporting date:

Items	Measurement Bases
Derivative financial instruments	Fair value
Financial assets at fair value through profit or loss (FVPL)	Fair value
Retirement benefits liability	Present value of the defined benefit obligation less fair value of plan assets

Functional and Presentation Currency

The consolidated financial statements are presented in Philippine peso, which is the Parent Company's functional currency. All financial information presented in Philippine peso is rounded off to the nearest million (P000,000), except when otherwise indicated.

Basis of Consolidation

The consolidated financial statements include the accounts of the Parent Company and its subsidiaries. These subsidiaries are:

Name of Subsidiary	Percentage of Ownership		Country of Incorporation
	2024	2023	
Overseas Ventures Insurance Corporation Ltd. (Ovincor)	100.00	100.00	Bermuda
Petron Freeport Corporation (PFC)	100.00	100.00	Philippines
Petron Singapore Trading Pte., Ltd. (PSTPL)	100.00	100.00	Singapore
Petron Marketing Corporation (PMC)	100.00	100.00	Philippines
New Ventures Realty Corporation (NVRC) and Subsidiaries	85.55	85.55	Philippines
Petron Global Limited (PGL)	100.00	100.00	British Virgin Islands
Petron Finance (Labuan) Limited (PFL)	100.00	100.00	Malaysia
Petron Oil and Gas Mauritius Ltd. (POGM) and Subsidiaries	100.00	100.00	Mauritius
Petrochemical Asia (HK) Limited (PAHL) and Subsidiaries	100.00	100.00	Hong Kong
Mema Holdings, Inc. (Mema) and Subsidiaries	100.00	100.00	Philippines

Ovincor is engaged in the business of non-life insurance and re-insurance.

The primary purpose of PFC and PMC is to, among others, sell on wholesale or retail and operate service stations, retail outlets, restaurants, convenience stores and the like.

PSTPL's principal activities include those relating to the procurement of crude oil, ethanol, catalysts, additives, coal and various petroleum finished products; crude vessel chartering and commodity risk management.

NVRC's primary purpose is to acquire real estate and derive income from its sale or lease. As of December 31, 2024 and 2023, NVRC owns 100% of Las Lucas Construction and Development Corporation (LLCDC), Parkville Estates and Development Corporation (PEDC), South Luzon Prime Holdings, Inc. (SLPHI), Abreco Realty Corporation (ARC) and 60% of Mariveles Landco Corporation (MLC).

PGL is a holding company incorporated in the British Virgin Islands.

POGM is a holding company incorporated under the laws of Mauritius. POGM owns an offshore subsidiary Petron Oil and Gas International Sdn. Bhd. (POGI).

As of December 31, 2024 and 2023, POGI owns 73.4% of Petron Malaysia Refining & Marketing Bhd (PMRMB) and 100% of both Petron Fuel International Sdn Bhd (PFISB) and Petron Oil (M) Sdn Bhd (POMSB), collectively hereinafter referred to as "Petron Malaysia".

Petron Malaysia is involved in the refining and marketing of petroleum products in Malaysia.

PFL is a holding company incorporated under the laws of Labuan, Malaysia.

PAHL is a holding company incorporated in Hong Kong in March 2008. As of December 31, 2024 and 2023, PAHL owns 100% of Robinsons International Holdings Limited (RIHL) which owns 100% of Philippine Polypropylene, Inc. (PPI) and 40% of MLC.

Mema is a holding company acquired by the Parent Company on June 30, 2022. As of December 31, 2024 and 2023, Mema owns 100% of Weldon Offshore Strategic Limited Incorporated which owns 100% of Petrofuel Logistics, Inc. (PLI). PLI provides logistics and freight forwarding services for the hauling, carriage, transportation, forwarding, and/or storage, and into-plane operation requirements mainly of the Group.

Non-controlling interests represent the interests not held by the Parent Company in NVRC and PMRMB in 2024 and 2023.

3. Summary of Material Accounting Policies

The accounting policies set out below have been applied consistently to all periods presented in the consolidated financial statements, except for the changes in accounting policies as explained below.

Adoption of Amended Standards

The FSRSC approved the adoption of a number of amended standards as part of PFRS Accounting Standards.

The Group has adopted the following amendments to PFRS Accounting Standards effective January 1, 2024 and accordingly, changed its accounting policies in the following areas:

- Lease Liability in a Sale and Leaseback (Amendments to PFRS 16, *Leases*). The amendments confirm the following:
 - On initial recognition, the seller-lessee includes variable lease payments when it measures a lease liability arising from a sale and leaseback transaction.
 - After initial recognition, the seller-lessee applies the general requirements for subsequent accounting of the lease liability such that it recognizes no gain or loss relating to the right-of-use asset it retains.

A seller-lessee may adopt different approaches that satisfy the new requirements on subsequent measurement.

- Classification of Liabilities as Current or Noncurrent - 2020 Amendments and Noncurrent Liabilities with Covenants - 2022 Amendments (Amendments to PAS 1, *Presentation of Financial Statements*). To promote consistency in application and clarify the requirements on determining whether a liability is current or noncurrent, the amendments:
 - removed the requirement for a right to defer settlement of a liability for at least 12 months after the reporting period to be unconditional and instead require that the right must have substance and exist at the reporting date;

- clarified that only covenants with which the entity must comply on or before the reporting date affect the classification of a liability as current or noncurrent and covenants with which the entity must comply after the reporting date do not affect a liability's classification at that date;
 - provided additional disclosure requirements for noncurrent liabilities subject to conditions within 12 months after the reporting period to enable the assessment of the risk that the liability could become repayable within 12 months; and
 - clarified that settlement of a liability includes transferring an entity's own equity instruments to the counterparty, but conversion options that are classified as equity do not affect classification of the liability as current or noncurrent.
- Supplier Finance Arrangements (Amendments to PAS 7, *Statement of Cash Flows*, and PFRS 7, *Financial Instruments: Disclosures*). The amendments introduce new disclosure objectives to provide information about the supplier finance arrangements of an entity that would enable users to assess the effects of these arrangements on the liabilities and cash flows, and the exposure to liquidity risk.

Under the amendments, an entity discloses in aggregate for its supplier finance arrangements:

- the terms and conditions of the arrangements;
- beginning and ending carrying amounts and associated line items of the financial liabilities that are part of a supplier finance arrangement, distinguishing those for which suppliers were already paid, and range of payment due dates including those for comparable trade payables not part of a supplier finance arrangement; and
- the type and effect of non-cash changes in the carrying amounts.

The amendments also add supplier finance arrangements as an example to the existing disclosure requirements in PFRS 7 on factors an entity might consider when providing specific quantitative liquidity risk disclosures about its financial liabilities.

The adoption of the amendments to standards did not have a material effect on the consolidated financial statements.

New and Amended Standards Not Yet Adopted

A number of new and amendments to standards are effective for annual reporting periods beginning after January 1, 2024 and have not been applied in preparing the consolidated financial statements. Unless otherwise stated, none of these are expected to have a significant effect on the consolidated financial statements.

The Group will adopt the following new and amendments to standards on the respective effective dates:

- Lack of Exchangeability (Amendments to PAS 21, *The Effects of Changes in Foreign Exchange Rates*). The amendments clarify that a currency is exchangeable into another currency when an entity is able to obtain the other currency within a time frame that allows for a normal administrative delay and through a market or exchange mechanism in which an exchange transaction would create enforceable rights and obligations.

When a currency is not exchangeable, an entity needs to estimate a spot rate. The objective in estimating the spot rate is to reflect the rate at which an orderly exchange transaction would take place at the measurement date between market participants under prevailing economic conditions. The amendments do not specify how to estimate the spot exchange rate to meet the objective and an entity can use an observable exchange rate without adjustment or another estimation technique.

The amendments require new disclosures to help users assess the impact of using an estimated exchange rate on the financial statements, including the nature and financial impacts of the currency not being exchangeable, the spot exchange rate used, the estimation process, and risks to the entity because the currency is not exchangeable.

The amendments apply for annual reporting periods beginning on or after January 1, 2025. Earlier application is permitted. Comparative information is not restated and the effect of initially applying the amendments are adjusted to the opening balance of retained earnings, or to the cumulative amount of translation differences if the entity uses a presentation currency other than its functional currency.

- Classification and Measurement of Financial Instruments (Amendments to PFRS 9, *Financial Instruments*, and PFRS 7, *Financial Instruments: Disclosures*). The amendments clarify that financial assets and financial liabilities are recognized and derecognized on the settlement date, except for regular way purchases or sales of financial assets and financial liabilities that meet the conditions for an exception. The exception allows entities to elect to derecognize certain financial liabilities settled through an electronic payment system before the settlement date.

The amendments also provide guidelines for assessing the contractual cash flow characteristics of financial assets that include environmental, social, and governance-linked features and other similar contingent features.

Entities are required to disclose additional information about financial assets and financial liabilities with contingent features, and equity instruments classified at fair value through other comprehensive income.

The amendments are effective for annual reporting periods beginning on or after January 1, 2026, with early application permitted.

- Annual Improvements to PFRS Accounting Standards - Volume 11. This cycle of improvements contains amendments to new standards:
 - Gain or Loss on Derecognition (Amendments to PFRS 7 Financial Instruments: Disclosure). The amendments replaced the reference to 'inputs that were not based on observable market data' in the obsolete paragraph 27A of PFRS 7, with reference to 'unobservable inputs' in paragraphs 72-73 of PFRS 13 Fair Value Measurement.
 - Introduction, Disclosure of Difference Between Fair Value and Transaction Price, and Credit Risk Disclosures (Amendments to Guidance on implementing PFRS 7 Financial Instruments: Disclosure). The amendments:
 - clarified that the Guidance on implementing PFRS 7 does not necessarily illustrate all the requirements in the referenced paragraphs of PFRS 7;
 - made the wordings on the disclosure of deferred difference between fair value and transaction price in paragraph IG14 of PFRS 7 consistent with the requirements in paragraph 28 of PFRS 7 and with the concepts in PFRS 9 Financial Instruments and PFRS 13 Fair Value Measurement; and
 - simplified the wordings on credit risk disclosures in paragraph IG20B that the illustration does not include financial assets that are purchased or originated credit impaired.
 - Derecognition of Lease Liabilities and Transaction Price (Amendments to PFRS 9 Financial Instruments). The amendments:
 - added a cross-reference to clarify that when a lessee has determined that a lease liability has been extinguished in accordance with PFRS 9, the lessee applies the requirement that the difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, shall be recognized in profit or loss; and
 - replaced the term 'their transaction price (as defined in IFRS 15)' with 'the amount determined by applying IFRS 15' because a receivable might be initially measured at an amount that differs from the transaction price recognized as revenue, for example, when you recognize full amount for consideration that's unconditionally receivable but at the same time recognize expected refund liability with respect to retrospective rebates. Consequently, the definition of the transaction price has been deleted.
 - Determination of 'De Facto Agent' (Amendments to PFRS 10 Consolidated Financial Statements). The amendments revised the wording on whether a party is a de facto agent when directed by 'those that direct the activities of the investor' to be non-conclusive given this may require judgement.
 - Cost Method (Amendments to PAS 7 Statement of Cash Flows). The amendments replaced the term 'cost method' with 'at cost' given the definition of 'cost method' has previously been removed from PFRS Accounting Standards.

The amendments apply for annual reporting periods beginning on or after January 1, 2026. Earlier application is permitted. The amendment on derecognition of lease liabilities applies only to lease liabilities extinguished on or after the beginning of the annual reporting period in which the amendment is first applied.

- PFRS 17, *Insurance Contracts*, replaces the standard, PFRS 4, *Insurance Contracts*, and establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts within the scope of the standard. The new standard applies to all insurance contracts, regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

PFRS 17 aims to increase transparency and to reduce diversity in the accounting for insurance contracts. In contrast to the requirements in PFRS 4, which are largely based on grandfathering previous local accounting policies, PFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of PFRS 17 is the general model, supplemented by a specific adaptation for contracts with direct participation features (the variable fee approach) and simplified approach (the premium allocation approach) mainly for short-duration contracts.

On December 15, 2021, the FSRSC amended the mandatory effective date of PFRS 17 from January 1, 2023 to January 1, 2025. This is consistent with Circular Letter No. 2020-62 issued by the Insurance Commission which deferred the implementation of PFRS 17 by two years after its effective date as decided by the International Accounting Standards Board (IASB).

On February 14, 2025, the FSRSC further deferred the date of initial application by two years, making PFRS 17 effective for annual reporting periods beginning on or after January 1, 2027, with comparative figures required. Early adoption is permitted. The Insurance Commission issued CL No. 2025-04, aligning with this deferral.

- PFRS 18, *Presentation and Disclosure in Financial Statements*, replaces PAS 1, *Presentation of Financial Statements*. The new standard introduces the following key requirements:
 - Entities are required to classify all income and expenses into five categories in the statement of income: operating, investing, financing, income tax, and discontinued operations. Subtotals and totals are presented in the statement of income for operating profit or loss, profit or loss before financing and income taxes, and profit or loss.
 - Management-defined performance measures are disclosed in a single note to the financial statements.
 - Enhanced guidance is provided on how to group information in the financial statements. Additionally, entities are required to use the operating profit or loss subtotal as the starting point for the statement of cash flows when presenting cash flows from operating activities under the indirect method.

PFRS 18 is effective for annual reporting periods beginning on or after January 1, 2027, with retrospective application required. Early adoption is permitted. The Group is still in the process of assessing the impact of the new standard.

Deferral of the local implementation of Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Investments in Associates and Joint Ventures: Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*.

- The amendments address an inconsistency in the requirements in PFRS 10 and PAS 28 in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The amendments require that a full gain or loss is recognized when a transaction involves a business (whether it is housed in a subsidiary or not). A partial gain or loss is recognized when a transaction involves assets that do not constitute a business, even if these assets are housed in a subsidiary.

Originally, the amendments apply prospectively for annual reporting periods beginning on or after January 1, 2016, with early adoption permitted. However, on January 13, 2016, the FSRSC decided to postpone the effective date of these amendments until the IASB has completed its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

Current versus Noncurrent Classification

The Group presents assets and liabilities in the consolidated statements of financial position based on current and noncurrent classification. An asset is current when it is: (a) expected to be realized or intended to be sold or consumed in the normal operating cycle; (b) held primarily for the purpose of trading; (c) expected to be realized within 12 months after the reporting period; or (d) cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period. A liability is current when: (a) it is expected to be settled in the normal operating cycle; (b) it is held primarily for trading; (c) it is due to be settled within 12 months after the reporting period; or (d) there is no right to defer the settlement of the liability for at least 12 months after the reporting period.

The Group classifies all other assets and liabilities as noncurrent. Deferred tax assets and liabilities are classified as noncurrent.

Financial Instruments

Recognition and Initial Measurement. A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

The Group recognizes a financial asset or a financial liability in the consolidated statements of financial position when it becomes a party to the contractual provisions of the instrument.

A financial asset (unless a trade receivable without a significant financing component) or financial liability is initially measured at the fair value of the consideration given or received. The initial measurement of financial instruments, except for those designated as at FVPL, includes transaction costs. A trade receivable without a significant financing component is initially measured at the transaction price.

Financial Assets

The Group classifies its financial assets, at initial recognition, as subsequently measured at amortized cost, FVOCI and FVPL. The classification depends on the contractual cash flow characteristics of the financial assets and the business model of the Group for managing the financial assets.

Financial Assets at Amortized Cost. A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVPL:

- it is held within a business model with the objective of holding financial assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognized in the consolidated statements of income when the financial asset is derecognized, modified or impaired.

The Group's cash and cash equivalents, trade and other receivables, noncurrent receivables and deposits, and restricted cash are included under this category.

Financial Assets at FVPL. All financial assets not classified as measured at amortized cost or FVOCI are measured at FVPL. This includes derivative financial assets that are not designated as cash flow hedge. Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVPL.

At initial recognition, the Group may irrevocably designate a financial asset as at FVPL if the designation eliminates or significantly reduces an accounting mismatch that would otherwise arise from measuring assets or liabilities or recognizing the gains and losses on different bases.

The Group carries financial assets at FVPL using their fair values. Attributable transaction costs are recognized in the consolidated statements of income as incurred. Changes in fair value and realized gains or losses are recognized in the consolidated statements of income. Fair value changes from derivatives accounted for as part of an effective cash flow hedge are recognized in other comprehensive income. Any interest earned from investment in debt instrument designated as at FVPL is recognized in the consolidated statements of income. Any dividend income from investment in equity instrument is recognized in the consolidated statements of income when the right to receive payment has been established, unless the dividend clearly represents a recovery of the part of the cost of the investment.

The Group's derivative assets that are not designated as cash flow hedge and investments in equity instruments at FVPL are classified under this category.

Financial Liabilities

The Group determines the classification of its financial liabilities, at initial recognition, in the following categories: financial liabilities at FVPL and other financial liabilities. All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings, net of directly attributable transaction costs.

Financial Liabilities at FVPL. Financial liabilities are classified under this category through the fair value option. Derivative instruments (including embedded derivatives) with negative fair values, except those covered by hedge accounting relationships, are also classified under this category.

The Group carries financial liabilities at FVPL using their fair values and reports fair value changes in the consolidated statements of income. Fair value changes from derivatives accounted for as part of an effective accounting hedge are recognized in other comprehensive income and presented in the consolidated statements of changes in equity. Any interest expense incurred is recognized as part of "Interest expense and other financing charges" account in the consolidated statements of income.

The Group's derivative liabilities that are not designated as cash flow hedge are classified under this category.

Other Financial Liabilities. This category pertains to financial liabilities that are not designated or classified as at FVPL. After initial measurement, other financial liabilities are carried at amortized cost using the effective interest method. Amortized cost is calculated by taking into account any premium or discount and any directly attributable transaction costs that are considered an integral part of the effective interest rate of the liability. The effective interest rate amortization is included in "Interest expense and other financing charges" account in the consolidated statements of income. Gains and losses are recognized in the consolidated statements of income when the liabilities are derecognized as well as through the amortization process.

Debt issue costs are considered as an adjustment to the effective yield of the related debt and are deferred and amortized using the effective interest method. When a loan is paid, the related unamortized debt issue costs at the date of repayment are recognized in the consolidated statements of income.

The Group's liabilities arising from its trade transactions or borrowings such as loans payable, accounts payable and accrued expenses, long-term debt, lease liabilities and other noncurrent liabilities are included under this category.

Derecognition of Financial Assets and Financial Liabilities

Financial Assets. A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognized when:

- the rights to receive cash flows from the asset have expired; or
- the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay them in full without material delay to a third party under a "pass-through" arrangement; and either: (a) has transferred substantially all the risks and rewards of the asset; or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the Group continues to recognize the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognizes the associated liability. The transferred asset and the associated liability are measured on the basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group is required to repay.

Financial Liabilities. A financial liability is derecognized when the obligation under the liability is discharged or cancelled, or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the consolidated statements of income.

Impairment of Financial Assets

The Group recognizes allowance for expected credit loss (ECL) on financial assets at amortized cost.

ECLs are probability-weighted estimates of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e., the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive), discounted at the effective interest rate of the financial asset, and reflects reasonable and supportable information that is available without undue cost or effort about past events, current conditions and forecasts of future economic conditions.

The Group recognizes an allowance for impairment based on either 12-month or lifetime ECLs, depending on whether there has been a significant increase in credit risk since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and informed credit assessment and including forward-looking information.

The Group recognizes lifetime ECLs for receivables that do not contain significant financing component. The Group uses provision matrix that is based on the Group's historical credit loss experience, adjusted for forward-looking factors specific to the borrowers and the economic environment.

At each reporting date, the Group assesses whether these financial assets at amortized cost are credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit-impaired include observable data about the following events:

- (a) significant financial difficulty of the issuer or the borrower;

- (b) a breach of contract, such as a default or past due event;
- (c) the restructuring of a financial asset by the Group on terms that the Group would not consider otherwise;
- (d) it is becoming probable that the borrower will enter bankruptcy or other financial reorganization; or
- (e) the disappearance of an active market for that financial asset because of financial difficulties.

The Group considers a financial asset to be in default when a counterparty fails to pay its contractual obligations, or there is a breach of other contractual terms, such as covenants.

The Group directly reduces the gross carrying amount of a financial asset when there is no reasonable expectation of recovering the contractual cash flows on a financial asset, either partially or in full. This is generally the case when the Group determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group's procedures for recovery of amounts due.

The ECLs on financial assets at amortized cost are recognized as allowance for impairment losses against the gross carrying amount of the financial asset, with the resulting impairment losses (or reversals) recognized in the consolidated statements of income.

Classification of Financial Instruments between Liability and Equity

Financial instruments are classified as liability or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument or a component that is a financial liability, are reported as expense or income. Distributions to holders of financial instruments classified as equity are charged directly to equity, net of any related income tax benefits.

A financial instrument is classified as liability if it provides for a contractual obligation to:

- deliver cash or another financial asset to another entity;
- exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Group; or
- satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

The components of issued financial instruments that contain both liability and equity elements are accounted for separately, with the equity component being assigned the residual amount after deducting from the instrument as a whole or in part, the amount separately determined as the fair value of the liability component on the date of issue.

Derivative Financial Instruments and Hedge Accounting

The Group uses derivative financial instruments, such as forwards, swaps and options to manage its exposure on foreign currency, interest rate and commodity price risks. Derivative financial instruments are initially recognized at fair value on the date the derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Changes in the fair value of derivatives that are not designated as hedging instruments are recognized in the consolidated statements of income.

Freestanding Derivatives

The Group designates certain derivatives as hedging instruments to hedge the exposure to variability in cash flows associated with recognized liabilities arising from changes in foreign exchange rates and interest rates.

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which the Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The Group also documents the economic relationship between the hedged item and the hedging instrument, including whether the changes in cash flows of the hedging instrument are expected to offset the changes in cash flows of the hedged item.

Cash Flow Hedge. When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in the fair value of the derivative is recognized in other comprehensive income and presented in the “Hedging reserve” account in the consolidated statements of changes in equity. The effective portion of changes in the fair value of the derivative that is recognized in other comprehensive income is limited to the cumulative change in fair value of the hedged item. Any ineffective portion of changes in the fair value of the derivative is recognized immediately in the consolidated statements of income.

The Group designates only the intrinsic value of options and the change in fair value of the spot element of forward contracts as the hedging instrument in cash flow hedging relationships. The change in fair value of the time value of options, the forward element of forward contracts and the foreign currency basis spread of financial instruments are separately accounted for as cost of hedging and recognized in other comprehensive income. The cost of hedging is removed from other comprehensive income and recognized in the consolidated statements of income, either over the period of the hedge if the hedge is time related, or when the hedged transaction affects the consolidated statements of income if the hedge is transaction related.

When the hedged transaction subsequently results in the recognition of a non-financial item, the amount accumulated in equity is transferred and included in the initial cost of the hedged asset or liability. For all other hedged transactions, the amount accumulated in equity is reclassified to the consolidated statements of income as a reclassification adjustment in the same period or periods during which the hedged cash flows affect the consolidated statements of income.

If the hedge no longer meets the criteria for hedge accounting or the hedging instrument expires, is sold, is terminated or is exercised, hedge accounting is discontinued prospectively. The amount that has been accumulated in equity is: (a) retained until it is included in the cost of non-financial item on initial recognition, for a hedge of a transaction resulting in the recognition of a non-financial item; or (b) reclassified to the consolidated statements of income as a reclassification adjustment in the same period or periods as the hedged cash flows affect the consolidated statements of income, for other cash flow hedges. If the hedged future cash flows are no longer expected to occur, the amounts that have been accumulated in equity are immediately reclassified to the consolidated statements of income.

The Group has no outstanding derivatives accounted for as cash flow hedge as at December 31, 2024 and 2023 (Note 35).

Inventories

Inventories are carried at the lower of cost and net realizable value (NRV). For petroleum products and crude oil, the NRV is the estimated selling price in the ordinary course of business, less the estimated costs to complete and/or market and distribute.

For financial reporting purposes, the Group uses the first-in, first-out method in costing petroleum products and crude oil. Cost is determined using the moving-average method in costing lubes and greases, blending components, polypropylene, materials and supplies inventories. For income tax reporting purposes, cost of all inventories is determined using the moving-average method.

For financial reporting purposes, duties and taxes related to the acquisition of inventories are capitalized as part of inventory cost. For income tax reporting purposes, such duties and taxes are treated as deductible expenses in the year these charges are incurred.

Business Combination

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value, and the amount of any non-controlling interests in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred and included as part of "Selling and administrative expenses" account in the consolidated statements of income.

When the Group acquires a business, it assesses the financial assets and financial liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date.

If the business combination is achieved in stages, the acquisition date fair value of the acquirer's previously held equity interest in the acquiree is remeasured at the acquisition date fair value and any resulting gain or loss is recognized in the consolidated statements of income.

The Group measures goodwill at the acquisition date as: a) the fair value of the consideration transferred; plus b) the recognized amount of any non-controlling interests in the acquiree; plus c) if the business combination is achieved in stages, the fair value of the existing equity interest in the acquiree; less d) the net recognized amount (generally fair value) of the identifiable assets acquired and liabilities assumed. When the excess is negative, a bargain purchase gain is recognized immediately in the consolidated statements of income. Subsequently, goodwill is measured at cost less any accumulated impairment in value. Goodwill is reviewed for impairment, annually or more frequently, if events or changes in circumstances indicate that the carrying amount may be impaired.

The consideration transferred does not include amounts related to the settlement of pre-existing relationships. Such amounts are generally recognized in the consolidated statements of income. Costs related to the acquisition, other than those associated with the issuance of debt or equity securities that the Group incurs in connection with a business combination, are expensed as incurred. Any contingent consideration payable is measured at fair value at the acquisition date. If the contingent consideration is classified as equity, it is not remeasured and settlement is accounted for within equity. Otherwise, subsequent changes to the fair value of the contingent consideration are recognized in the consolidated statements of income.

▪ *Goodwill in a Business Combination*

Goodwill acquired in a business combination is, from the acquisition date, allocated to each of the cash-generating units, or groups of cash-generating units that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities are assigned to those units or groups of units.

Each unit or group of units to which the goodwill is allocated:

- represents the lowest level within the Group at which the goodwill is monitored for internal management purposes; and
- is not larger than an operating segment determined in accordance with PFRS 8, *Operating Segments*.

Impairment is determined by assessing the recoverable amount of the cash-generating unit or group of cash-generating units, to which the goodwill relates. Where the recoverable amount of the cash-generating unit or group of cash-generating units is less than the carrying amount, an impairment loss is recognized. Where goodwill forms part of a cash-generating unit or group of cash-generating units and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the cash-generating unit retained. An impairment loss with respect to goodwill is not reversed.

Investments in Shares of Stock of Associates and Joint Ventures

The Group's investments in shares of stock of associates and joint ventures are accounted for using the equity method.

The Group's 25.06% interest in Petrogen, accounted for as an investment in an associate, 33.33% joint venture interest in Pandacan Depot Services, Inc. (PDSI) and 50.00% joint venture interest in Terminal Bersama Sdn Bhd (TBSB), included under "Investment in shares of stock of an associate and joint ventures" account in the consolidated statements of financial position, are accounted for under the equity method of accounting. The investment in associate and interest in joint ventures are carried in the consolidated statements of financial position at cost plus post-acquisition changes in the Group's share in net income (loss) of the joint ventures, less any impairment in value. The consolidated statements of income reflect the Group's share in the results of operations of associate and joint ventures are presented as part of "Share in net income of associate and joint ventures" account. As of December 31, 2024 and 2023, the Group has capital commitments amounting to P1.6 and P1.4 for TBSB, respectively. The Group has no contingent liabilities in relation to its interest in these associate and joint ventures.

Property, Plant and Equipment

Property, plant and equipment, except for land, are stated at cost less accumulated depreciation and any accumulated impairment in value. Such cost includes the cost of replacing part of the property, plant and equipment at the time the cost is incurred, if the recognition criteria are met, and excludes the costs of day-to-day servicing. Land is stated at cost less impairment in value, if any.

The initial cost of property, plant and equipment comprises its construction cost or purchase price, including import duties, taxes and any directly attributable costs in bringing the asset to its working condition and location for its intended use. Expenditures incurred after the asset has been put into operation, such as repairs, maintenance and overhaul costs, are normally recognized as expense in the period the costs are incurred. Major repairs are capitalized as part of property, plant and equipment only when it is probable that future economic benefits associated with the items will flow to the Group and the cost of the items can be measured reliably.

Capital projects in progress (CPIP) represents the amount of accumulated expenditures on unfinished and/or ongoing projects. This includes the costs of construction and other direct costs. Borrowing costs that are directly attributable to the construction of plant and equipment are capitalized during the construction period. CPIP is not depreciated until such time that the relevant assets are ready for use.

For financial reporting purposes, depreciation for property, plant and equipment other than those assets used in production such as refinery and plant equipment, which commences when the assets are available for its intended use, are computed using the straight-line method. Depreciation of refinery and plant equipment used in production is computed based on the unit of production method (UPM) which considers the expected capacity over the estimated useful lives of these assets. UPM closely reflects the expected pattern of consumption of the future economic benefits embodied in these assets.

The estimated useful lives of the assets are as follows:

	Number of Years
Buildings and improvements and related facilities	7 - 50
Refinery and plant equipment	4 - 30
Service stations and other equipment	3 - 30
LPG cylinders	12-15
Computers, office and motor equipment	2 - 15
Land and leasehold improvements	2 - 12 or the term of the lease, whichever is shorter

For financial reporting purposes, duties and taxes related to the acquisition of property, plant and equipment are capitalized. For income tax reporting purposes, such duties and taxes are treated as deductible expenses in the year these charges are incurred.

In 2024, the Parent Company changed the depreciation method for tax reporting purposes from double-declining balance method to UPM method for production-related assets and straight-line method for all other depreciable assets to align with financial reporting. The alignment of depreciation method aims to simplify the accounting and reporting of depreciation and to eliminate possible discrepancies arising from the use of different methodologies for financial reporting and taxation.

The remaining useful lives, residual values, and depreciation methods are reviewed and adjusted periodically, if appropriate, to ensure that such periods and method of depreciation are consistent with the expected pattern of economic benefits from the items of property, plant and equipment.

The carrying amounts of property, plant and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying amounts may not be recoverable.

Fully depreciated assets are retained in the accounts until they are no longer in use.

An item of property, plant and equipment is derecognized when either it has been disposed of or when it is permanently withdrawn from use and no future economic benefits are expected from its use or disposal. Any gain or loss arising from the retirement and disposal of an item of property, plant and equipment (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is recognized in the consolidated statements of income in the period of retirement and disposal.

Leases

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset for a period of time, the Group assesses whether, throughout the period of use:

- the Group has the right to obtain substantially all the economic benefits from use of the identified asset; and
- the Group has the right to direct the use of the identified asset.

Group as a Lessee

The Group recognizes a right-of-use asset and a lease liability at the lease commencement date (i.e., the date the underlying asset is available for use). The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise of the following:

- fixed payments, including in-substance fixed payments, less any lease incentives receivable;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option that the Group is reasonably certain to exercise, lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Group is reasonably certain not to terminate early.

The lease liability is measured at amortized cost using the effective interest method. The carrying amount of the lease liability is remeasured when there is a change in future lease payments arising from a change in an index or rate, a change in the estimate of the amount expected to be payable under a residual value guarantee, or a change in the assessment of whether a purchase or extension option is reasonably certain to be exercised or a termination option is reasonably certain not to be exercised.

When the lease liability is remeasured, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recognized in the consolidated statements of income if the carrying amount of the right-of-use asset has been reduced to zero.

The Group has elected not to recognize right-of-use assets and lease liabilities for short-term leases (i.e., lease that have a lease term of 12 months or less from the commencement date and do not contain a purchase option) and leases of low-value assets, including pallets and computer equipment. The Group recognizes the lease payments associated with these leases as expense on a straight-line basis over the lease term.

At commencement or on modification of a contract that contains a lease component, the Group allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property, the Group has elected not to separate non-lease components and account for the lease

Group as a Lessor

The Group determines at lease inception whether each lease is a finance lease or an operating lease.

To classify each lease, the Group makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, the lease is classified as a finance lease; if not, it is classified as an operating lease. As part of the assessment, the Group considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

When the Group is an intermediate lessor, it accounts for the head lease and the sublease separately. It assesses the lease classification of a sublease with reference to the right-of-use asset arising from the head lease. If a head lease is a short-term lease to which the Group applies the recognition exemption, it classifies the sublease as an operating lease.

If an arrangement contains lease and non-lease components, the Group applies PFRS 15 to allocate the consideration in the contract.

The Group identified the use of loaned equipment related to the sale of goods to be accounted for under PFRS 16. The Group provides equipment such as pumps, tanks, signage and other ancillary equipment necessary for the operation of the business. These are loaned to the customers for the duration of the contract for the sole purpose of storing, handling and selling products and shall, at all times, remain the property of Petron. The Group allocates portion of the revenue to the use of loaned equipment and presented as part of "Sales" in the consolidated statements of income based on adjusted market assessment approach. Lease revenue from the use of loaned equipment is contingent to, and recognized at the same time as, the sale of goods.

The Group recognizes lease payments received under operating leases as rent income on a straight-line basis over the lease term. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognized as an expense over the lease term on the same basis as rent income. Contingent rents are recognized as income in the period in which they are earned.

Investment Property

Investment property consists of property held to earn rentals and/or for capital appreciation but not for sale in the ordinary course of business, used in the production or supply of goods or services or for administrative purposes. Investment property, except for land, is measured at cost including transaction costs less accumulated depreciation and any accumulated impairment in value. Cost also includes any related asset retirement obligation (ARO), if any. The carrying amount includes the cost of replacing part of an existing investment property at the time the cost is incurred, if the recognition criteria are met, and excludes the costs of day-to-day servicing of an investment property. Land is stated at cost less any impairment in value.

CPIP represents the amount of accumulated expenditures on unfinished and/or ongoing projects. This includes the costs of construction and other direct costs. CPIP is not depreciated until such time that the relevant assets are ready for use.

Depreciation, which commences when the assets are available for their intended use, are computed using the straight-line method over the following estimated useful lives of the assets:

	Number of Years
Buildings and improvements	7 - 50
Land and leasehold improvements	10 -12 or the term of the lease, whichever is shorter

The useful lives and depreciation method are reviewed and adjusted, if appropriate, at each reporting date.

Investment property is derecognized either when it has been disposed of or when it is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of investment property are recognized in the consolidated statements of income in the period of retirement or disposal.

Transfers are made to investment property when, and only when, there is an actual change in use, evidenced by ending of owner-occupation or commencement of an operating lease to another party. Transfers are made from investment property when, and only when, there is an actual change in use, evidenced by commencement of the owner-occupation or commencement of development with a view to sell.

For a transfer from investment property to owner-occupied property or inventories, the cost of property for subsequent accounting is its carrying amount at the date of change in use. If the property occupied by the Group as an owner-occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is its fair value at the date of acquisition. Subsequently, intangible assets are carried at cost less accumulated amortization and any accumulated impairment losses. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditures are recognized in the consolidated statements of income in the year in which the related expenditures are incurred.

The useful lives of intangible assets are assessed to be either finite or indefinite.

Intangible assets with finite lives are amortized over the useful life and assessed for impairment whenever there is an indication that the intangible assets may be impaired. The amortization period and amortization method used for an intangible asset with a finite useful life are reviewed at each reporting date. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortization period or method, as appropriate, and are treated as changes in accounting estimate. The amortization expense on intangible assets with finite lives is recognized in the consolidated statements of income consistent with the function of the intangible asset.

Amortization is computed using the straight-line method over the following estimated useful lives of the other intangible assets with finite lives:

	Number of Years
Software	5 - 7
Franchise fee	3 - 10
Other intangibles	3 - 16

Gains or losses arising from the disposal of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset, and are recognized in the consolidated statements of income when the asset is derecognized.

As of December 31, 2024 and 2023, the Group has existing and pending trademark registration for its products for a term of 10 years and renewable every 10 years. It has copyrights for its 7-kg LPG container, Gasulito with stylized letter “P” and two flames, Powerburn 2T, Petron New Logo (22 styles), Philippine Card Designs and Malaysian Card Designs, and Petron font. Copyrights endure during the lifetime of the creator and for another 50 years after creator’s death. It also has registered industrial designs for its certain lubricant and oil bottles and containers, 2.7kg LPG cylinders, gas cylinder and gas cylinder valve.

The amount of intangible assets is included as part of “Other noncurrent assets - net” in the consolidated statements of financial position.

Expenses incurred for research and development of internal projects and internally developed patents and copyrights are expensed as incurred and are part of “Selling and administrative expenses” account in the consolidated statements of income.

Impairment of Nonfinancial Assets

The carrying amounts of property, plant and equipment, right-of-use assets, investment property, intangible assets with finite useful lives, investment in shares of stock of an associate and interest in joint ventures are reviewed for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. Goodwill, licenses and trademarks and brand names with indefinite useful lives are tested for impairment annually either individually or at the cash-generating unit level. If any such indication exists, and if the carrying amount exceeds the estimated recoverable amount, the assets or cash-generating units are written down to their recoverable amounts. The recoverable amount of the asset is the greater of fair value less costs to sell and value in use. The fair value less costs to sell is the amount obtainable from the sale of an asset in an arm’s length transaction between knowledgeable, willing parties, less costs of disposal. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash-generating unit to which the asset belongs. Impairment losses are recognized in the consolidated statements of income in those expense categories consistent with the function of the impaired asset.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the consolidated statements of income. After such a reversal, the depreciation and amortization charge are adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life. An impairment loss with respect to goodwill is not reversed.

Cylinder Deposits

The Group acquires LPG cylinders which are loaned to dealers upon payment by the latter of an amount approximate to the acquisition cost of the cylinders.

The Group maintains the balance of cylinder deposits at an amount equivalent to the deposit value of the cumulative LPG cylinders held by dealers, contractors, terminals and those estimated to be in circulation.

At the end of each reporting date, cylinder deposits, shown under "Trade and other payables" account in the consolidated statements of financial position, are adjusted for estimated non-returns. The adjustments are recognized directly in the consolidated statements of income.

Fair Value Measurements

The Group measures financial and non-financial assets and liabilities at fair value at each reporting date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either: (a) in the principal market for the asset or liability; or (b) in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or most advantageous market must be accessible to the Group.

The fair value of an asset or liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic best interest.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;

- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3: inputs for the asset or liability that are not based on observable market data.

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization at the end of each reporting period.

For purposes of the fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of fair value hierarchy.

Provisions

Provisions are recognized when: (a) the Group has a present obligation (legal or constructive) as a result of past event; (b) it is probable (i.e., more likely than not) that an outflow of resources embodying economic benefits will be required to settle the obligation; and (c) a reliable estimate of the amount of the obligation can be made. Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognized as a separate asset only when it is virtually certain that reimbursement will be received. The amount recognized for the reimbursement shall not exceed the amount of the provision. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessment of the time value of money and the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense.

The Group recognizes provisions arising from legal and/or constructive obligations associated with the cost of dismantling and removing an item of property, plant and equipment and restoring the site where it is located, the obligation for which the Group incurs either when the asset is acquired or as a consequence of using the asset during a particular year for purposes other than to produce inventories during the year.

Capital Stock

Common Shares. Common shares are classified as equity. Incremental costs directly attributable to the issue of common shares and share options are recognized as a deduction from equity, net of any tax effects.

Preferred Shares. Preferred shares are classified as equity if they are non-redeemable, or redeemable only at the option of the Parent Company, and any dividends thereon are discretionary. Dividends thereon are recognized as distributions within equity upon approval by the BOD of the Parent Company.

Preferred shares are classified as a liability if they are redeemable on a specific date or at the option of the shareholders, or if dividend payments are not discretionary. Dividends thereon are recognized as interest expense in the consolidated statements of income as accrued.

Additional Paid-in Capital

When the shares are sold at premium, the difference between the proceeds and the par value is credited to the "Additional paid-in capital" account. When shares are issued for a consideration other than cash, the proceeds are measured by the fair value of the consideration received. In case the shares are issued to extinguish or settle the liability of the Parent Company, the shares are measured either at the fair value of the shares issued or fair value of the liability settled, whichever is more reliably determinable.

Capital Securities

Senior Perpetual Capital Securities (SPCS) and *Redeemable Perpetual Securities (RPS)* are classified as equity instruments in the consolidated financial statements since these securities are perpetual securities in respect of which there is no fixed redemption date and the redemption is at the option of the Parent Company. Also, the Parent Company has the sole and absolute discretion to defer payment of any or all of the distribution (Note 21).

Incremental costs directly attributable to the issuance of capital securities are recognized as a deduction from equity, net of tax. The proceeds received net of any directly attributable transaction costs are credited to capital securities.

Retained Earnings

Retained earnings represent the accumulated net income or losses, net of any dividend distributions and other capital adjustments. Appropriated retained earnings represent that portion which is restricted and therefore not available for any dividend declaration.

Equity Reserve

The equity reserve includes the effect of transactions with non-controlling interests and equity adjustments.

Translation Reserve

The translation reserve comprises of all foreign currency differences arising from the translation of the financial statements of foreign operations.

Reserve for Retirement Plan

The reserve for retirement plan represents re-measurements of net defined benefit retirement liability or asset comprising actuarial gains and losses, return on plan assets, and any change in the effect of the asset ceiling (excluding net interest).

Hedging Reserve

The hedging reserve comprises the effective portion of the cumulative net change in the fair value of hedging instruments used in cash flow hedges pending subsequent recognition in profit or loss or directly included in the initial cost or other carrying amount of a non-financial asset or non-financial liability.

The hedging reserve also includes cost of hedging which reflects gain or loss on the portion excluded from the designated hedging instrument that relates to the forward element of forward contracts, time value of options and foreign currency basis spread which are initially recorded in other comprehensive income.

Treasury Stock

Own equity instruments which are reacquired are carried at cost and deducted from equity. No gain or loss is recognized on the purchase, sale, reissuance or cancellation of the Parent Company's own equity instruments. When the shares are retired, the capital stock account is reduced by its par value and the excess of cost over par value upon retirement is debited to additional paid-in capital to the extent of the specific or average additional paid-in capital when the shares were issued and to retained earnings for the remaining balance.

Revenue

The Group recognizes revenue from contracts with customers when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services, excluding amounts collected on behalf of third parties.

The transfer of control can occur over time or at a point in time. Revenue is recognized at a point in time unless one of the following criteria is met, in which case it is recognized over time: (a) the customer simultaneously receives and consumes the benefits as the Group performs its obligations; (b) the Group's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or (c) the Group's performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date.

The Group also assesses its revenue arrangements to determine if it is acting as a principal or as an agent. The Group has concluded that it acts as a principal as it controls the goods or services before transferring to the customer.

The following specific recognition criteria must also be met before revenue is recognized:

Sale of Goods. Revenue is recognized at the point in time when control of petroleum and related products is transferred to the customer, which is normally upon delivery of the goods. The Group provides trade discounts and volume rebates to certain customers based on the level of their purchases which may be applied against the amount of their existing or future payables to the Group. Trade discounts and volume rebates do not result to significant variable consideration and are generally determined based on concluded sales transactions as at the end of each month. The general payment terms with customers are combination of prepayments and credit terms on an average of 45 days from invoice date.

The Group identified several performance obligations related to the sale of goods and accounted for them separately:

- *Provisions of Technical Support.* The Group provides technical information, assistance and advice relating to the uses, handling and disposition of the products, loaned equipment and the machinery and equipment necessary or appropriate for the customers' needs. Revenue is recognized over time upon rendering of services to the customer. The Group allocates portion of the revenue to the technical support based on expected cost plus a margin approach.

- *Consumer Loyalty Program.* The Group has Consumer Loyalty Programs which allows customers to accumulate points when they purchase products at participating service stations. These points can be redeemed for Group's products, rewards, discounts and other privileges from partner merchants. Revenue is allocated between the goods sold and the points issued that are expected to be redeemed. This allocation is based on the relative stand-alone selling price of the points. A deferred liability account is set up for these points. The liability will be reversed when the Group has fulfilled its obligations to supply the discounted products under the terms of the program or when it is no longer probable that the points under the program will be redeemed. The deferred liability is based on the best estimate of future redemption profile. All the estimates are reviewed on an annual basis or more frequently, where there is indication of a material change.

Service Income. Revenue is recognized over time when the performance of contractually agreed task has been rendered and control over the services has been transferred to the customer. General payment terms is on an average of 45 days from invoice date.

Other sources of revenue are as follows:

Interest Income. Interest income is recognized using the effective interest method. In calculating interest income, the effective interest rate is applied to the gross carrying amount of the asset.

Dividend Income. Dividend income is recognized when the Group's right to receive the payment is established.

Rent Income. Rent income from operating leases (net of any incentives given to the lessees), other than from the use of loaned equipment, is recognized on a straight-line basis over the lease terms. Lease incentives granted are recognized as an integral part of the total rent income over the term of the lease.

Other Income. Other income is recognized when there is incidental economic benefit, other than the usual business operations, that will flow to the Group and that can be measured reliably.

Cost and Expense Recognition

Costs and expenses are decreases in economic benefits during the reporting period in the form of outflows or decrease of assets or incurrence of liabilities that result in decreases in equity, other than those relating to distributions to equity participants. Expenses are recognized when incurred.

Borrowing Costs

Borrowing costs directly attributable to the acquisition or construction of an asset that necessarily takes a substantial period of time to get ready for its intended use are capitalized as part of the cost of the respective assets. All other borrowing costs are expensed in the period they occur. Capitalization of borrowing costs commences when the activities to prepare the asset are in progress and expenditures and borrowing costs are being incurred. Borrowing costs are capitalized until the assets are substantially ready for their intended use.

Investment income earned on the temporary investment of specific borrowings pending expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

Employee Benefits

Short-term Employee Benefits. Short-term employee benefits are expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Retirement Benefits Costs and Other Employee Benefit Costs. Petron has a tax qualified and funded defined benefit pension plan covering all permanent, regular, full-time employees administered by trustee banks. Some of its subsidiaries have separate unfunded, noncontributory, retirement plans.

The net defined benefit retirement liability or asset is the aggregate of the present value of the amount of future benefit that employees have earned in return for their service in the current and prior periods, reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of economic benefits available in the form of reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit retirement plan is actuarially determined using the projected unit credit method. Projected unit credit method reflects services rendered by employees to the date of valuation and incorporates assumptions concerning projected salaries of employees. Actuarial gains and losses are recognized in full in the period in which they occur in OCI. Such actuarial gains and losses are also immediately recognized in equity and are not reclassified to profit or loss in subsequent period.

Defined benefit costs comprise the following:

- Service costs;
- Net interest on the defined benefit retirement liability or asset;
- Remeasurements of defined benefit retirement liability or asset; and
- Settlement gain or loss, if any.

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in the consolidated statements of income. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuary.

Net interest on the net defined benefit retirement liability or asset is the change during the period as a result of contributions and benefit payments, which is determined by applying the discount rate based on the government bonds to the net defined benefit retirement liability or asset. Net interest on the net defined benefit retirement liability or asset is recognized as expense or income in the consolidated statements of income.

Remeasurements of net defined benefit retirement liability or asset comprising actuarial gains and losses, return on plan assets, and any change in the effect of the asset ceiling (excluding net interest) are recognized immediately in OCI in the period in which they arise. Remeasurements are not reclassified to consolidated statements of income in subsequent periods.

Settlement gain or loss pertains to the difference between the present value of the defined benefit obligation being settled, as determined on the date of settlement and the settlement price, including any plan assets transferred and any payments made directly by the entity in connection with the settlement. Any gain or loss on settlement is recognized as income or expense in the consolidated statements of income.

The Group also provides other benefits to its employees as follows:

Corporate Performance Incentive Program. The Group has a corporate performance incentive program that aims to provide financial incentives for the employees, contingent on the achievement of the Group's annual business goals and objectives. The Group recognizes achievement of its business goals through key performance indicators (KPIs) which are used to evaluate performance of the organization. The Group recognizes the related expense when the KPIs are met, that is when the Group is contractually obliged to pay the benefits.

Savings Plan. The Group established a Savings Plan wherein eligible employees may apply for membership and have the option to contribute 5% to 15% of their monthly base pay. The Group, in turn, contributes an amount equivalent to 50% of the employee-member's contribution. However, the Group's 50% share applies only to a maximum of 10% of the employee-member's contribution. The Savings Plan aims to supplement benefits upon employees' retirement and to encourage employee-members to save a portion of their earnings. The Group accounts for this benefit as a defined contribution pension plan and recognizes a liability and an expense for this plan as the expenses for its contribution fall due. The Group has no legal or constructive obligations to pay further contributions after payments of the equivalent employer-share. The accumulated savings of the employees plus the Group's share, including earnings, will be paid in the event of the employee's: (a) retirement, (b) resignation after completing at least five years of continuous services, (c) death, or (d) involuntary separation not for cause.

Land/Home Ownership Plan. The Group established the Land/Home Ownership Plan, an integral part of the Savings Plan, to extend a one-time financial assistance to Savings Plan members in securing housing loans for residential purposes.

Foreign Currency

Foreign Currency Translations. Transactions in foreign currencies are initially recorded in the respective functional currencies of Group entities at exchange rates at the dates of the transactions.

Monetary assets and monetary liabilities denominated in foreign currencies are translated to the functional currency at exchange rate at the reporting date.

Non-monetary assets and non-monetary liabilities denominated in foreign currencies that are measured at fair value are translated to the functional currency at the exchange rate when fair value was determined. Non-monetary items denominated in foreign currencies that are measured based on historical cost are translated using the exchange rate at the date of the transaction.

Foreign currency differences arising on translation are recognized in the consolidated statements of income, except for differences arising on the translation of financial assets at FVOCI, a financial liability designated as a hedge of the net investment in a foreign operation that is effective, or qualifying cash flow hedges, which are recognized in OCI.

Foreign Operations. The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated to Philippine peso at exchange rates at the reporting date. The income and expenses of foreign operations, excluding foreign operations in hyperinflationary economies, are translated to Philippine peso at average exchange rates for the period.

Foreign currency differences are recognized in OCI and presented in the “Other reserves” account in the consolidated statements of changes in equity. However, if the operation is not a wholly-owned subsidiary, the relevant proportionate share of the translation difference is allocated to the non-controlling interests. When a foreign operation is disposed of such that control, significant influence or joint control is lost, the cumulative amount in the translation reserve related to that foreign operation is reclassified to the consolidated statements of income as part of the gain or loss on disposal.

When the Group disposes of only part of its interest in a subsidiary that includes a foreign operation while retaining control, the relevant proportion of the cumulative amount is reattributed to non-controlling interests. When the Group disposes of only part of its investment in share of stock of an associate or joint venture that includes a foreign operation while retaining significant influence or joint control, the relevant proportion of the cumulative amount is reclassified to the profit or loss.

When the settlement of a monetary item receivable from or payable to a foreign operation is neither planned nor likely to occur in the foreseeable future, foreign exchange gains and losses arising from such a monetary item are considered to form part of a net investment in a foreign operation and are recognized in OCI, and presented in the “Other reserves” account in the consolidated statements of changes in equity.

Taxes

Current Tax. Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Current tax relating to items recognized directly in equity is recognized in equity and not in consolidated statements of income. The Group periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretations and establishes provisions where appropriate.

Deferred Tax. Deferred tax is recognized using the liability method in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit taxable profit or loss; and
- with respect to taxable temporary differences associated with investments in shares of stock of subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, carryforward benefits of unused tax credits - Minimum Corporate Income Tax (MCIT) and unused tax losses - Net Operating Loss Carry Over (NOLCO), to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward benefits of MCIT and NOLCO can be utilized, except:

- where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- with respect to deductible temporary differences associated with investments in shares of stock of subsidiaries, associates and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Current tax and deferred tax are recognized in the consolidated statements of income except to the extent that it relates to a business combination, or items recognized directly in equity or in other comprehensive income.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Value-added Tax (VAT). Revenues, expenses and assets are recognized net of the amount of VAT, except:

- where the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case the tax is recognized as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- receivables and payables that are stated with the amount of tax included.

The net amount of tax recoverable from, or payable to, the taxation authority is included as part of "Other current assets" or "Trade and other payables" accounts in the consolidated statements of financial position.

Related Parties

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control and significant influence. Related parties may be individuals or corporate entities.

Operating Segments

The Group's operating segments are organized and managed separately according to the nature of the products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. Financial information on operating segments is presented in Note 37 to the consolidated financial statements. The Chief Executive Officer (the chief operating decision maker) reviews management reports on a regular basis.

The measurement policies the Group used for segment reporting under PFRS 8 are the same as those used in its consolidated financial statements. There have been no changes in the measurement methods used to determine reported segment profit or loss from prior periods.

Segment revenues, expenses and performance include sales and purchases between business segments. Such sales and purchases are eliminated in consolidation.

4. Use of Judgments, Estimates and Assumptions

The preparation of the Group's consolidated financial statements in accordance with PFRS Accounting Standards requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the amounts of assets, liabilities, income and expenses reported in the consolidated financial statements at the reporting date. However, uncertainty about these judgments, estimates and assumptions could result in outcome that could require a material adjustment to the carrying amount of the affected asset or liability in the future.

Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions are recognized in the period in which the judgments and estimates are revised and in any future period affected.

Judgments

In the process of applying the Group's accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant effect on the amounts recognized in the consolidated financial statements:

Determining Functional Currency. The Parent Company has determined that its functional currency is the Philippine peso. It is the currency of the primary economic environment in which the Parent Company operates. It is the currency that mainly influences the sales price of goods and services and the costs of providing these goods and services.

Identification of Distinct Performance Obligation. The Group assesses the goods or services promised in a contract with a customer and identifies as a performance obligation either: (a) a good or service (or a bundle of goods or services) that is distinct; or (b) a series of distinct goods or services that are substantially the same and that have the same pattern of transfer to the customer. The Group has determined that it has distinct performance obligations other than the sale of petroleum products such as the provision of technical support and consumer loyalty program and allocates the transaction price into these several performance obligations.

Determining the Incremental Borrowing Rate. The Group cannot readily determine the interest rate implicit in its leases. Therefore, it uses the relevant incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the Group would pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR, therefore, reflects what the Group would have to pay, which requires estimation when no observable rates are available (such as for subsidiaries that do not enter into financing transactions) and to make adjustments to reflect the terms and conditions of the lease. The Group estimates the IBR using observable inputs (such as market interest rates) when available and is required to consider certain contract and entity-specific judgement estimates.

Determining the Lease Term of Contracts with Renewal Options - Group as Lessee. The Group determines the lease term as the noncancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised.

The Group has several lease contracts that include extension options. At lease commencement date, the Group applies judgment in evaluating whether it is reasonably certain to exercise the option to renew the lease by considering all relevant factors that create an economic incentive for it to exercise the renewal option. The Group reassesses whether it is reasonably certain to exercise the options if there is a significant event or change in circumstances within its control.

Determining Whether the Group is acting as a Principal or Agent in a Revenue Transaction. The determination whether the Group is a principal or agent in a contract is made by identifying each specified goods or services promised to the customers in the contract and evaluating whether the Group obtains control of the specified goods and services before it is transferred to the customer.

For the sale of petroleum products to dealers, the Group transfers the control of the goods upon delivery, hence, the Group has determined that it is acting as principal in the sales transactions with dealers. The dealers are likewise acting as principal in the sales transactions to end consumers on the basis of the following: (a) the dealers have the primary responsibility to provide specified goods to the end consumers; (b) the dealers bear inventory risk before the goods are transferred to end consumers; and (c) the dealers have discretion to establish prices for specified goods.

For the Group's consumer loyalty program, the Group has determined that it is acting as principal with respect to the loyalty points and the delivery of goods and services to be delivered in exchange for the points. The Group has discretion to establish value of points in the consumer loyalty program and the points issued by the Group can be redeemed for goods and services provided by the Group or by partner merchants at the discretion of the customer.

For the Group's fleet card transactions, the Group has likewise determined that it is acting as principal in the sales transactions with the customers since the Group has the primary responsibility for providing goods purchased through fleet cards and the Group has discretion to establish prices for specified goods in a fleet card transaction.

Determining Impairment Indicators of Other Non-financial Assets. PFRS Accounting Standards require that an impairment review be performed on property, plant and equipment, investment in shares of stock of an associate and interest in joint ventures, investment property, right-of-use assets and intangible assets when events or changes in circumstances indicate that the carrying value may not be recoverable. Determining the recoverable amount of assets requires the estimation of cash flows expected to be generated from the continued use and ultimate disposition of such assets. While it is believed that the assumptions used in the estimation of recoverable amounts are appropriate and reasonable, significant changes in these assumptions may materially affect the assessment of recoverable amounts and any resulting impairment loss could have a material adverse impact on financial performance.

Taxes. Significant judgment is required in determining current and deferred tax expense. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current income tax and deferred tax expenses in the year in which such determination is made.

In the determination of the Group's current taxable income, entities within the Group has an option to either apply the optional standard deduction (OSD) or continue to claim itemized standard deduction. Entities within the Group, at each taxable year from the effectivity of the law, may decide which option to apply; once an option to use OSD is made, it shall be irrevocable for that particular taxable year. For 2024, 2023 and 2022, majority of the entities within the Group opted to continue claiming itemized standard deductions except for certain subsidiaries of NVRC such as LLCDC, MLC, SLPHI, ARC and PEDC, as they opted to apply OSD (Note 27).

Contingencies. The Group is currently involved in various pending claims and lawsuits which could be decided in favor of or against the Group. The Group's estimate of the probable costs for the resolution of these pending claims and lawsuits has been developed in consultation with in-house as well as outside legal counsel handling the prosecution and defense of these matters and is based on an analysis of potential results. The Group currently does not believe that these pending claims and lawsuits will have a material adverse effect on its financial position and financial performance. It is possible, however, that future financial performance could be materially affected by the changes in the estimates or in the effectiveness of strategies relating to these proceedings.

Estimates and Assumptions

The key estimates and assumptions used in the consolidated financial statements are based upon the Group's evaluation of relevant facts and circumstances as at the date of the consolidated financial statements. Actual results could differ from such estimates.

Assessment for ECL on Trade and Other Receivables. The Group, applying the simplified approach in the computation of ECL, initially uses a provision matrix based on historical default rates for trade and other receivables. The Group also uses appropriate groupings if its historical credit loss experience shows significantly different loss patterns for different customer segments. The Group then adjusts the historical credit loss experience with forward-looking information on the basis of current observable data affecting each customer segment to reflect the effects of current and forecasted economic conditions.

The Group adjusts historical default rates to forward-looking default rate by determining the closely related economic factor affecting each customer segment. The Group regularly reviews the methodology and assumptions used for estimating ECL to reduce any differences between estimates and actual credit loss experience. The determination of the relationship between historical default rates and forecasted economic conditions is a significant accounting estimate.

The Group has assessed that the forward-looking default rate component of its ECL on trade and other receivables is not material because substantial amount of receivables are normally collected within one year. Moreover, based on Management's assessment, current conditions and forward-looking information does not indicate a significant increase in credit risk exposure of the Group from its trade receivables.

Net reversal of impairment on trade and other receivables amounted to P9, P14 and P8 in 2024, 2023 and 2022, respectively (Notes 7 and 23). Receivables written-off amounted to P2 in 2024, P7 in 2023 and P97 in 2022 (Note 7).

The carrying amount of trade and other receivables amounted to P82,762 and P86,479 as of December 31, 2024 and 2023, respectively (Note 7).

Assessment for ECL on Other Financial Assets at Amortized Cost. The Group determines the allowance for ECL using general approach based on the probability-weighted estimate of the present value of all cash shortfalls over the expected life of financial assets at amortized cost. ECL is provided for credit losses that result from possible default events within the next 12 months unless there has been a significant increase in credit risk since initial recognition in which case ECL is provided based on lifetime ECL.

When determining if there has been a significant increase in credit risk, the Group considers reasonable and supportable information that is available without undue cost or effort and that is relevant for the particular financial instrument being assessed such as, but not limited to, the following factors:

- Actual or expected external and internal credit rating downgrade;
- Existing or forecasted adverse changes in business, financial or economic conditions; and
- Actual or expected significant adverse changes in the operating results of the borrower.

The Group also considers financial assets at day one to be the latest point at which lifetime ECL should be recognized unless it can demonstrate that this does not represent a significant risk in credit risk such as when non-payment was an administrative oversight rather than resulting from financial difficulty of the borrower.

The Group has assessed that the ECL on other financial assets at amortized cost is not material because the transactions with respect to these financial assets were entered into by the Group only with reputable banks, the Government of the Philippines and companies with good credit standing and relatively low risk of defaults. Accordingly, no additional provision for ECL on other financial assets at amortized cost was recognized in 2024 and 2023. The carrying amounts of other financial assets at amortized cost are as follows:

	Note	2024	2023
Cash in banks and cash equivalents	5	P28,177	P24,373
Noncurrent deposits	14	141	124
		P28,318	P24,497

Net Realizable Values of Inventories. In determining the NRV of inventories, management takes into account the most reliable evidence available at the time the estimates are made. Future realization of the carrying amount of inventories of P90,570 and P77,318 as of the end of 2024 and 2023, respectively (Note 8), is affected by price changes in different market segments for crude and petroleum products. Both aspects are considered key sources of estimation uncertainty and may cause significant adjustments to the Group's inventories within the next financial year.

The Group recognized loss on inventory write-down amounting to P107 in 2024, P363 in 2023 and P356 in 2022 (Note 8).

Allowance for Inventory Obsolescence. The allowance for inventory obsolescence consists of collective and specific valuation allowance. A collective valuation allowance is established as a certain percentage based on the age and movement of stocks. In case there is write-off or disposal of slow-moving items during the year, a reduction in the allowance for inventory obsolescence is made. Review of allowance is done every quarter, while a revised set-up or booking is posted at the end of the year based on evaluations or recommendations of the proponents. The amount and timing of recorded expenses for any year would therefore differ based on the judgments or estimates made.

In 2024, 2023 and 2022, the Group increased/(reduced) the allowance for inventory obsolescence amounting to (P76), P43 and P73, respectively (Note 8).

Fair Value Measurements. A number of the Group's accounting policies and disclosures require the measurement of fair values for both financial and non-financial assets and liabilities.

The Group has an established control framework with respect to the measurement of fair values. This includes a valuation team that has the overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values. The valuation team regularly reviews significant unobservable inputs and valuation adjustments. If third party information is used to measure fair values, then the valuation team assesses the evidence obtained to support the conclusion that such valuations meet the requirements of PFRS, including the level in the fair value hierarchy in which such valuations should be classified.

The Group uses market observable data when measuring the fair value of an asset or liability. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques.

If the inputs used to measure the fair value of an asset or a liability can be categorized in different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy based on the lowest level input that is significant to the entire measurement.

The Group recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

The methods and assumptions used to estimate the fair values for both financial and non-financial assets and liabilities are discussed in Note 35.

Estimated Useful Lives of Property, Plant and Equipment, Right-of-Use Asset, Investment Property and Intangible Assets with Finite Useful Lives. The Group estimates the useful lives of property, plant and equipment, right-of-use asset, investment property and intangible assets with finite useful lives based on the period over which the assets are expected to be available for use. The estimated useful lives of property, plant and equipment, right-of-use asset, investment property, intangible assets with finite useful lives are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets.

In addition, estimation of the useful lives of property, plant and equipment, right-of-use asset, investment property, intangible assets with finite useful lives is based on collective assessment of industry practice, internal technical evaluation and experience with similar assets. It is possible, however, that future financial performance could be materially affected by changes in estimates brought about by changes in factors mentioned above. The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances. A reduction in the estimated useful lives of property, plant and equipment, right-of-use asset, investment property, intangible assets with finite useful lives would increase recorded cost of goods sold and selling and administrative expenses and decrease noncurrent assets.

There is no change in estimated useful lives of property, plant and equipment, right-of-use asset, investment property and intangible assets with finite useful lives based on management's review at the reporting date.

Property, plant and equipment, net of accumulated depreciation, amounted to P169,302 and P167,987 as of December 31, 2024 and 2023, respectively. Accumulated depreciation of property, plant and equipment, amounted to P134,309 and P124,531 as of December 31, 2024 and 2023, respectively (Note 9).

Right-of-use assets, net of accumulated depreciation, amounted to P2,925 and P5,286 as of December 31, 2024 and 2023, respectively. Accumulated depreciation of right-of-use asset amounted to P1,679 and P2,628 as of December 31, 2024 and 2023, respectively (Note 10).

Investment property, net of accumulated depreciation, amounted to P28,243 and P27,194 as of December 31, 2024 and 2023, respectively. Accumulated depreciation of investment property amounted to P24,657 and P21,184 as of December 31, 2024 and 2023, respectively (Note 11).

Intangible assets with finite useful lives, net of accumulated amortization, amounted to P68 and P101 as of December 31, 2024 and 2023, respectively (Note 14). Accumulated amortization of intangible assets with finite useful lives amounted to P861 and P780 as of December 31, 2024 and 2023, respectively.

Fair Value of Investment Property. The fair value of investment property presented for disclosure purposes is based on market values, being the estimated amount for which the property can be sold or based on a most recent sale transaction of a similar property within the same vicinity where the investment property is located.

In the absence of current prices in an active market, the valuations are prepared by considering: (a) the aggregate estimated future cash flows expected to be received from leasing out the property. A yield that reflects the specific risks inherent in the net cash flows is then applied to the net annual cash flows to arrive at the property valuation; or (b) the depreciated replacement cost of the asset, which estimates the current replacement cost of new assets and adjusted for obsolescence, including physical, functional and economic obsolescence.

Estimated fair values of investment property amounted to P66,809 and P55,065 as of December 31, 2024 and 2023, respectively (Note 11).

Impairment of Goodwill. The Group determines whether goodwill is impaired at least annually. This requires the estimation of the value in use of the cash-generating units to which the goodwill is allocated. Estimating value in use requires management to make an estimate of the expected future cash flows from the cash-generating unit and to choose a suitable discount rate to calculate the present value of those cash flows.

The recoverable amount of goodwill arising from the acquisition of Petron Malaysia has been determined based on the value in use using discounted cash flows (DCF). Assumptions used in the DCF include terminal growth rate of 3% in 2024 and 2023, respectively, and discount rates of 7.7% and 8.4% in 2024 and 2023, respectively (Note 12).

Management believes that any reasonably possible change in the key assumptions on which the recoverable amount is based would not cause its carrying amount to exceed its recoverable amount.

No impairment losses were recognized in 2024, 2023 and 2022 in relation to the goodwill arising from the acquisition of Petron Malaysia which accounts for almost 99% of goodwill in the consolidated statements of financial position as of December 31, 2024 and 2023.

Realizability of Deferred Tax Assets. The Group reviews its deferred tax assets at each reporting date and reduces the carrying amount to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilized. The Group's assessment on the recognition of deferred tax assets on deductible temporary differences and carry forward benefits of MCIT and NOLCO is based on the projected taxable income in the following periods.

Deferred tax assets amounted to P560 and P1,114 as of December 31, 2024 and 2023, respectively (Note 27).

Present Value of Defined Benefit Retirement Obligation. The present value of defined benefit retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. These assumptions are described in Note 30 to the consolidated financial statements and include discount rate and salary increase rate.

The Group determines the appropriate discount rate at the end of each year. It is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the retirement liabilities. In determining the appropriate discount rate, the Group considers the interest rates on government bonds that are denominated in the currency in which the benefits will be paid. The terms to maturity of these bonds should approximate the terms of the related retirement benefits liability.

Other key assumptions for the defined benefit retirement obligation are based in part on current market conditions.

While it is believed that the assumptions of the Group are reasonable and appropriate, significant differences in actual experience or significant changes in assumptions may materially affect the Group's retirement benefits liability.

Retirement benefits costs recognized in the consolidated statements of income amounted to P417, P454 and P519 in 2024, 2023 and 2022, respectively. Remeasurement losses of the net defined retirement obligation recognized in OCI amounted to P1,655, P38 and P626 in 2024, 2022 and 2022, respectively. The retirement benefits liability amounted to P3,785 and P2,684 as of December 31, 2024 and 2023, respectively (Notes 17 and 30).

Asset Retirement Obligation (ARO). The Group has ARO arising from the refinery, leased service stations, terminals and blending plant. Determining ARO requires estimation of the costs of dismantling, installing and restoring leased properties to their original condition. The Group determined the amount of ARO based on the dismantling costs as estimated by the operating unit responsible for the asset, discounted at the Group's current credit-adjusted risk-free rate ranging from 3.24% to 7.18% depending on the life of the capitalized costs. The Group also conducts periodic review of the estimates of dismantling costs to consider actual expenses incurred during the actual retirement of assets and uses this as input in determining future liability. While it is believed that the assumptions used in the estimation of such costs are reasonable, significant changes in these assumptions may materially affect the recorded expense or obligation in future periods.

The ARO amounted to P1,379 and P3,658 as of December 31, 2024 and 2023, respectively (Notes 17 and 19).

5. Cash and Cash Equivalents

This account consists of:

	Note	2024	2023
Cash on hand		P2,212	P3,146
Cash in banks		9,410	7,899
Short-term placements		18,767	16,474
	34, 35	P30,389	P27,519

Cash in banks earn annual interest at the respective bank deposit rates. Short-term placements include demand deposits which can be withdrawn at any time depending on the immediate cash requirements of the Group and earn annual interest at the respective short-term placement rates ranging from 1.00% to 6.00% in 2024, 1.00% to 6.94% in 2023, and 0.05% to 6.32% in 2022 (Note 26).

6. Financial Assets at Fair Value

This account consists of:

	<i>Note</i>	2024	2023
Derivative assets not designated as cash flow hedge		P1,044	P1,162
Proprietary membership shares		458	389
	34, 35	1,502	1,551
Less: noncurrent portion	14	458	389
		P1,044	P1,162

The fair values presented have been determined directly by reference to published market prices, except for derivative assets which are based on inputs other than quoted prices that are observable (Note 35).

The noncurrent portion pertaining to proprietary membership shares which are not expected to be realized in the next 12 months, is included in "Other noncurrent assets - net" account in the consolidated statements of financial position (Note 14).

Changes in fair value of assets at FVPL recognized in the consolidated statements of income in 2024, 2023, and 2022 amounted to P70, P37, and P54, respectively (Note 26).

7. Trade and Other Receivables

This account consists of:

	<i>Note</i>	2024	2023
Trade	34	P57,652	P55,659
Related parties - trade	28, 34	3,782	3,646
Allowance for impairment loss on trade receivables		(690)	(702)
		60,744	58,603
Government		19,968	24,351
Related parties - non-trade	28	1,049	995
Others		1,205	2,730
Allowance for impairment loss on non-trade receivables		(204)	(200)
		22,018	27,876
	34, 35	P82,762	P86,479

Trade receivables are non-interest bearing and are generally on a 45-day average term. Penalties are charged when the account becomes overdue.

Government receivables pertain to duty drawback, VAT and specific tax claims as well as subsidy receivables from the Government of Malaysia under the Automatic Pricing Mechanism. The filing and the collection of claims is a continuous process and is closely monitored.

Related parties - non-trade consists of advances made by the Parent Company to Petron Corporation Employee Retirement Plan (PCERP) and other receivables from SMC and its subsidiaries.

Others mainly consist of receivables from various non-trade customers and counterparties for matured hedging transactions.

A reconciliation of the allowance for impairment losses at the beginning and end of 2024 and 2023 is shown below:

	Note	2024	2023
Balance at beginning of year		P1,211	P1,251
Additions	23	8	17
Write off	4	(2)	(7)
Reversal		(17)	(31)
Currency translation adjustment		27	(19)
Balance at end of year		1,227	1,211
Less noncurrent portion for long-term receivables	34	333	309
		P894	P902

The Group computes impairment loss on trade and other receivables based on past collection experiences, current circumstances and the impact of future economic conditions, if any, available at the reporting period. Loss rates are based on actual credit loss experience over the past three years. Economic conditions during the period over which the historical data has been collected, current conditions and the Group's view of the impact of future economic conditions, if any, over the expected lives of the trade and other receivables are also considered.

The following table provides information about the exposure to credit risk and ECL of trade and other receivables as of December 31, 2024 and 2023:

	Weighted Average Loss Rate	Gross Carrying Amount	ECL
December 31, 2024			
Retail	1.03%	P9,123	P94
Lubes	0.05%	2,063	1
Gasul	4.05%	1,557	63
Industrial	0.90%	24,437	221
Others	1.11%	46,476	515
		P83,656	P894

	Weighted Average Loss Rate	Gross Carrying Amount	ECL
December 31, 2023			
Retail	1.07%	P7,866	P84
Lubes	0.07%	1,499	1
Gasul	3.67%	1,442	53
Industrial	1.10%	23,106	254
Others	0.95%	53,468	510
		P87,381	P902

8. Inventories

This account consists of:

	2024	2023
Crude oil and others	P46,757	P30,862
Petroleum	34,947	36,997
Materials and supplies	5,295	5,061
Lubes, greases and aftermarket specialties	3,571	4,398
	P90,570	P77,318

The cost of these inventories amounted to P91,288 and P78,363 as of December 31, 2024 and 2023, respectively.

If the Group had used the moving-average method (instead of the first-in, first-out method, which is the Group's policy), the cost of petroleum, crude oil and other products would have increased by P167 and P1,522 as of December 31, 2024 and 2023, respectively.

Inventories (including distribution or transshipment costs) charged to cost of goods sold amounted to P798,698, P731,648, and P803,977 in 2024, 2023, and 2022, respectively (Note 22).

Research and development costs on these products constituted the expenses incurred for internal projects in 2024, 2023 and 2022 (Note 23).

The movements in allowance for write-down of inventories to NRV and inventory obsolescence at the beginning and end of 2024 and 2023 are as follows:

	Note	2024	2023
Balance at beginning of year		P1,045	P999
Additions/reductions:			
Inventory obsolescence	4	(76)	43
Inventory write-down	4	107	363
Reversals		(363)	(356)
Translation adjustment		5	(4)
Balance at end of year		P718	P1,045

The losses and reversals are included as part of "Cost of goods sold" account in the consolidated statements of income. Reversal of write-down corresponds to inventories sold during the year (Note 22).

9. Property, Plant and Equipment

The movements and balances of property, plant and equipment as of and for the years ended December 31 follow:

	Note	Buildings and Improvements and Related Facilities	Refinery and Plant Equipment	Service Stations and Other Equipment	Computers, Office and Motor Equipment	Land and Leasehold Improvements	CPIP	Total
Cost								
January 1, 2023, as previously reported		P27,116	P212,844	P20,478	P7,199	P4,472	P13,630	P285,739
Effect of prior period adjustment	40	-	-	2,165	-	-	-	2,165

December 31, 2024		17,625	92,980	16,384	6,434	886	-	134,309
Carrying Amount								
December 31, 2023, as restated	40	P11,419	P138,722	P6,405	P3,181	P3,203	P5,057	P167,987
December 31, 2024		P11,337	P136,150	P7,546	P3,753	P3,493	P7,023	P169,302

In 2024 and 2023, certain property, plant and equipment were reclassified to/from investment property due to change in usage of the asset from/to used in operations to/from leased to another party under an operating lease agreement (Note 11).

No impairment loss was required to be recognized in 2024, 2023 and 2022 based on management's assessment of impairment indicators.

Certain fully depreciated property, plant and equipment with aggregate costs of P36,040 and of P31,610 as of December 31, 2024 and 2023, respectively, are still being used in the Group's operations.

The Group capitalized interest amounting to P90, P417 and P536 in 2024, 2023, and 2022, respectively (Notes 15, 18, 26 and 29). The capitalization rates used to determine the amount of interest eligible for capitalization ranged from 2.81% to 9.43% in 2024 and from 2.83% to 9.52% in 2023.

Capital Commitments

As of December 31, 2024 and 2023, the Group has outstanding commitments to acquire property, plant and equipment amounting to P6,880 and P7,535, respectively.

10. Right-of-Use Assets

The movements and balances of right-of-use assets as of and for the years ended December 31 follow:

	<i>Note</i>	Land	Buildings and Improvements and Related Facilities	Service Stations and Other Equipment	Total
Cost					
January 1, 2023		P6,434	P1,188	P71	P7,693
Additions		720	40	-	760
Remeasurements/expiration		(491)	(2)	-	(493)
Currency translation adjustment		(40)	(4)	(2)	(46)
December 31, 2023		6,623	1,222	69	7,914
Additions		351	6	-	357
Cancellation/termination	39	(3,796)	-	-	(3,796)
Remeasurements/expiration		469	(419)	-	50
Currency translation adjustment		66	9	4	79
December 31, 2024		3,713	818	73	4,604
Accumulated Depreciation					
January 1, 2023		1,798	482	15	2,295
Remeasurements/expiration		(292)	-	-	(292)
Depreciation		407	228	4	639
Currency translation adjustment		(13)	(1)	-	(14)
December 31, 2023		1,900	709	19	2,628
Remeasurements/expiration		(4)	(421)	-	(425)
Cancellation/termination	39	(1,184)	-	-	(1,184)
Depreciation		407	218	6	631
Currency translation adjustment		26	3	-	29
December 31, 2024		1,145	509	25	1,679
Carrying Amount					
December 31, 2023		P4,723	P513	P50	P5,286
December 31, 2024		P2,568	P309	P48	P2,925

The Group recognized right-of-use assets for leases of office space, buildings, machinery and equipment, service stations and parcels of land. The leases typically run for a period of two to 999 years. Some leases contain an option to renew the lease at the end of the lease term and are being subjected to reviews to reflect current market rentals. The renewal option provides operational flexibility in managing the leased asset portfolio and aligns the business needs of the Group. The Group recognized interest expense related to these leases amounting to P1,259 and P1,124 in 2024 and 2023, respectively (Notes 26 and 29).

The Group also has certain leases of property and equipment with lease terms of 12 months or less and leases of equipment with low value. The Group has elected not to recognize right-of-use assets and lease liabilities for these leases. The expenses relating to short-term leases, leases of low-value assets and variable lease payments that do not depend on an index or a rate amounted to P586, P14 and P6, respectively, in 2024, and P491, P30 and P4, respectively, in 2023 (Note 29).

The Group had total cash outflows for leases of P3,386, P2,988 and P2,746 in 2024, 2023 and 2022, respectively (Note 29).

The remeasurements pertain mainly to the change in the estimated dismantling costs of ARO during the year (Note 4).

11. Investment Property

The movements and balances of investment property as of and for the years ended December 31 follow:

	Note	Land	Land and Leasehold Improvements	Buildings and Improvements	Right-of-Use	CPIP	Total
Cost							
January 1, 2023		P9,326	P4,164	P19,037	P15,525	P350	P48,402

In 2024 and 2023, certain investment property were reclassified from/to property, plant and equipment due to change in usage of the asset from/to used in operations to/from leased to another party under an operating lease agreement (Note 9).

No impairment loss was required to be recognized in 2024, 2023 and 2022 based on management's assessment of impairment indicators.

There are no other direct selling and administrative expenses other than depreciation and real property taxes arising from investment property that generated income in 2024, 2023 and 2022.

The fair value of investment property amounting to P66,809 and P55,065 as of December 31, 2024 and 2023, respectively, has been categorized as Level 3 in the fair value hierarchy based on the inputs used in the valuation techniques.

For properties with available appraisal reports, the fair value of investment property amounting to P34,272 and P24,902 as of December 31, 2024 and 2023, respectively, were determined by external, independent property appraisers having appropriate recognized professional qualifications and recent experience in the location and category of the property being valued. The independent appraisers provide the fair value of the Group's investment property on a regular basis. The fair value of investment property amounting to P19,234 and P19,091 as of December 31, 2024 and 2023, respectively, were determined by using the depreciated replacement cost method. The net present value of lease liability recognized in investment property as of December 31, 2024 and 2023 represents the remaining fair value amounting to P13,303 and P11,072, respectively.

Valuation Technique and Significant Unobservable Inputs

The valuation of investment property applied the following approaches below:

Sales Comparison Approach. The market value of land was determined using the Sales Comparison Approach. The comparative approach considers the sale of similar or substitute property, registered within the vicinity, and the related market data. The estimated value is established through such process of comparing available data. The property being valued is then compared with sales transactions involving similar properties in the market. Listings and offerings may also be considered. The observable inputs to determine the market value of the property are the following: location characteristics, size, time element, quality and prospective use, bargaining allowance and marketability.

Depreciated Replacement Cost Method. The fair value of land and leasehold improvements and buildings and related improvements and facilities were arrived at using the depreciated replacement cost method, which estimates the current replacement cost of new assets and adjusted for obsolescence, including physical, functional and economic obsolescence.

Income Approach. The rental value of the subject property was determined using the Income Approach. Under the Income Approach, the remaining lease payments on the property is first determined followed by the application of the proper capitalization rate is applied to arrive at its net present value. The rental value of the property is determined on the basis of what a prudent lessor or a prospective lessee are willing to pay for its use and occupancy considering the prevailing rental rates of similar property and/or rate of return a prudent lessor generally expects on the return on its investment.

12. Business Combination, Investment in Shares of Stock of Subsidiaries, Goodwill and Non-Controlling Interests

Business Combination and Investment in Shares of Stock of Subsidiaries

The following are the major developments relating to the Parent Company's investment in shares of stock of subsidiaries:

Mema

On February 16, 2022, the Parent Company paid P104 for the acquisition of 10,000,000 common shares with par value of P1.00 per share representing 100% of the authorized capital stock of Mema. The Mema group includes the subsidiary engaged in hauling and logistics services (Note 2). On June 30, 2022, control over the investee has been transferred to the Group after the resolution of the substantive pending issues agreed by both the seller and the Parent Company. On December 29, 2022, P300 adjustment in purchase price was agreed by the Parent Company and the seller which was settled in February 2023.

The fair value of net assets acquired amounted to P426 on June 30, 2022. The Group recognized P22 gain on acquisition, presented under "Other income - net" in the consolidated statement of income in 2022, which pertains to the excess of fair value of assets acquired and liabilities assumed over the consideration paid/accrued.

The following summarizes the recognized amounts of assets acquired and liabilities assumed at the acquisition date:

	June 30, 2022
Assets	
Cash and cash equivalents	P3,406
Accounts and other receivables	2,034
Prepaid expenses and other current assets	69
Property, plant and equipment - net	219
Other noncurrent assets	15
Liabilities	
Accounts and other payables	(5,303)
Other liabilities	(14)
Total Identifiable Net Assets	P426

The fair value of trade and other receivables amounted to P2,034. None of the receivables has been impaired and the full amount is expected to be collected. As of December 31, 2024, P2,034 was already collected and minimal amount is still outstanding.

Accounts and other payables amounting to P5,198 was settled as of December 31, 2024 from the existing cash and the collected receivables.

The fair value of the acquired property, plant and equipment was measured using depreciated replacement cost by considering the current replacement cost of new assets and adjusted for obsolescence, including physical, functional and economic obsolescence.

Mema has contributed to Group's net income of P26 from the acquisition date to December 31, 2022. Had the acquisition occurred on January 1, 2022, the Group's revenue and net income in 2022 would have been P857,638 and P6,921, respectively. Mema has no contribution to consolidated sales since the entity provides hauling and logistics services to the Parent Company.

On October 27, 2022, the Parent Company and Mema executed a Subscription Agreement to subscribe to an additional 1,375,000,000 common shares of Mema for a subscription price of P1,375 or P1.00 per common share, of which P899 was paid in 2022 as deposit for future stock subscription pending SEC's approval of Mema's increase in authorized capital stock which was obtained in March 2023. The remaining P476 was paid in 2023.

On July 19, 2023, the Parent Company and Mema executed another Subscription Agreement to subscribe to an additional 2,770,000,000 common shares of Mema for a subscription price of P2,770 or P1.00 per common share, of which P1,305 was paid in 2023 and P828 was paid in 2024.

LLCDC, PEDC and ARC

On July 30, 2024, the BOD and Stockholders approved the merger among ARC, PEDC and LLCDC, with LLCDC as the surviving entity, effective (to the extent allowed by applicable law or regulation) on the first day of the month following the issuance by the SEC of the Certificate of Merger.

The application for the merger is ongoing as of December 31, 2024.

Goodwill

The movements and balances of goodwill as of and for the years ended December 31 are as follows:

	2024	2023
Cost		
Balance at beginning of year	P8,093	P8,509
Translation adjustments	638	(416)
Net Carrying Amount at End of Year	P8,731	P8,093

Impairment of Goodwill from Petron Malaysia

Goodwill arising from the acquisition of Petron Malaysia, which accounts for 99% of total goodwill in the consolidated statements of financial position as of December 31, 2024 and 2023, is allocated at the POGI Group cash generating unit (CGU) instead of each individual acquiree company's CGU as it is expected that the POGI Group CGU will benefit from the synergies created from the acquiree companies in combination.

The Group tested the goodwill for impairment. Value in use was determined by discounting the future cash flows expected to be generated from the continuing use of the CGU and was based on the following key assumptions:

- Cash flows were projected based on past experience, actual operating results, and reasonable and justifiable assumptions for future business performance but excluding net cash inflows from expansion projects like new stations. The cash flows are based on long range plan anchored on budget approved by the Management for the first five (5) years.
- A discount rate of 7.7% and 8.4% in 2024 and 2023, respectively, was applied based on the weighted average cost of capital using the Capital Asset Pricing Model (CAPM).
- The Group used terminal growth rate of 3% in 2024 and 2023 because it is in the process of increasing its network of service stations and upgrading its facilities and hence foresees growth in cash flows generated perpetually.

The values assigned to the key assumptions represent management's assessment of future trends in the industry and are based on internal sources (historical data).

For purposes of terminal growth rate sensitivity, terminal growth rate scenarios of 2%, 3%, and 4% are applied on the discounted cash flows analysis. Based on the sensitivity analysis, any reasonably possible change in the key assumptions would not cause the carrying amount of goodwill to exceed its recoverable amount.

No impairment losses were recognized in 2024, 2023 and 2022 in relation to the goodwill arising from the acquisition of Petron Malaysia.

Non-controlling Interests

The following table summarizes the financial information relating to each of the Group's subsidiaries that has material non-controlling interests:

	December 31, 2024		December 31, 2023	
	NVRC	PMRMB	NVRC	PMRMB As restated (Note 40)
Non-controlling Interests Percentage	14.45%	26.60%	14.45%	26.60%

Effects of exchange rate changes on cash and cash equivalents	-	-	-	(8)
Net increase (decrease) in cash and cash equivalents	(P34)	P384	P79	(P1,017)

13. Investment in Shares of Stock of an Associate and Joint Ventures

This account consists of:

	2024	2023
Investment in an associate	P1,155	P1,153
Investment in joint ventures	10	5
	P1,165	P1,158

Investment in Shares of Stock of an Associate

As of December 31, 2024 and 2023, the Parent Company owns 25.06% of Petrogen accounted for as an investment in an associate. Petrogen was incorporated and registered with the Philippine SEC on August 23, 1996 primarily to engage in the business of non-life insurance and re-insurance.

Following are the condensed financial information of Petrogen as of and for the years ended December 31, 2024 and 2023:

	2024	2023
Percentage of ownership	25.06%	25.06%
Current assets	P6,955	P5,482
Noncurrent assets	1,990	1,921
Current liabilities	(4,337)	(2,806)
Net assets	P4,608	P4,597
Revenue	P662	P475
Net income	P439	P337
Other comprehensive loss	P -	(P24)
Share in net assets	P1,155	P1,153
Carrying amount of investment in shares of stock of an associate	P1,155	P1,153

The Group recognized P110, P84 and P63 in 2024, 2023 and 2022, respectively, as share in net income of Petrogen and received dividends of P108 in 2024 accounted for using equity method.

Investment in Joint Ventures

Investment in joint ventures pertains to 33.33% and 50.00% equity interest in PDSI and TBSB, respectively. PDSI is a Philippine company engaged in the business of receiving, storing and handling the out-loading of petroleum products of the three major oil companies to serve the fuel requirement of their respective customers. TBSB is a Malaysian company operating as a liquified petroleum gas bottling plant.

On June 22, 2022, the Bureau of Internal Revenue (BIR) has approved the cancellation of PDSI's registration.

The Group recognized P4, P5 and P3 in 2024, 2023 and 2022, respectively, as share in net income of joint ventures accounted for using equity method.

14. Other Assets

This account consists of:

	<i>Note</i>	2024	2023
Current			
Prepaid taxes		P42,212	P36,360
Input VAT		6,946	2,310
Prepaid expenses	28	1,584	1,384
Special-purpose fund		351	170
Others - net	28	15	305
		P51,108	P40,529
Noncurrent			
Catalyst - net		P515	P629
Proprietary membership shares	6	458	389
Prepaid rent		233	165
Noncurrent deposits	34, 35	141	124
Intangibles - net	4	68	101
Input VAT		27	43
Others - net	28	561	479
		P2,003	P1,930

Prepaid taxes include unused creditable withholding taxes and excise taxes paid by the Group for products sold to tax exempt entities for subsequent filing with the government as refund claims.

Input VAT includes the taxes paid on purchases of goods and services which can be recovered as tax credit against future output VAT liability of the Group.

The "Others - net" under "Noncurrent" account includes marketing assistance to dealers and other prepayments amounting to P223, P287 and P256 as of December 31, 2024, 2023 and 2022, respectively, net of amortization amounting to P27, P108 and P47 in 2024, 2023 and 2022, respectively.

The amortization of prepaid rent amounted to P36 in 2024, P70 in 2023 and nil in 2022.

Amortization of intangibles, marketing assistance to dealers, other prepayments included as part of "Depreciation and amortization" under "Selling and administrative expenses" account in the consolidated statements of income amounted to P76, P130 and P58 in 2024, 2023 and 2022, respectively (Notes 23 and 25).

Amortization of catalyst, intangibles and other prepayments included as part of "Depreciation and amortization" under "Cost of goods sold" account in the consolidated statements of income amounted to P256, P334 and P236 in 2024, 2023 and 2022, respectively (Notes 22 and 25).

15. Short-term Loans

This account pertains to unsecured Philippine peso and Malaysian ringgit-denominated loans obtained from various banks with maturities ranging from 3 to 178 days and annual interest ranging from 3.96% to 8.00% in 2024, from 4 to 180 days and 3.71% to 7.53% in 2023, and from 5 to 181 days and 1.28% to 6.88% in 2022 (Note 26). These loans are intended to fund the importation of crude oil and petroleum products (Note 8) and working capital requirements.

Interest expense on short-term loans amounted to P8,144 in 2024, P7,835 in 2023, and P4,316 in 2022 (Note 26). Interest expense amounting to P42 was capitalized as part of property, plant and equipment in 2024 while P176 in 2023 and P169 in 2022 (Note 9).

16. Liabilities for Crude Oil and Petroleum Products

This account pertains to liabilities to suppliers of crude oil, petroleum and other products that are non-interest bearing and generally settled on a 30-day term. Details of the supply agreements in relation to importations of crude oil requirements of the Group are disclosed in Note 31.

Liabilities for crude oil and petroleum products are payable to the following:

	Note	2024	2023
Third parties		P51,601	P44,832
Related parties	28	24	8
	34, 35	P51,625	P44,840

17. Trade and Other Payables

This account consists of:

	Note	2024	2023 As restated (Note 40)
Trade		P8,948	P6,693
Specific taxes and other taxes payable		4,468	7,852
Due to related parties	28	7,788	5,099
Cylinder deposits	40	3,432	2,564
Accrued interest		1,153	1,375
Dividends payable	33	1,039	948
Deferred liability on consumer loyalty program		831	747
Accrued rent		223	499
Accrued payroll		149	211
Retirement benefits liability	30	124	63
Asset retirement obligation - current	19	58	46
Retention payable		241	24
Insurance liabilities		3	3
Others	12, 39	555	330
	34, 35	P29,012	P26,454

Trade payables are liabilities to haulers, contractors and suppliers that are non-interest bearing and are generally settled on a 30-day term.

Cylinder deposits pertain to deposits made by the dealers for the LPG cylinders loaned to them. These deposits are non-interest bearing and are refundable to dealers upon surrender of the LPG cylinders subject to certain conditions (Note 40).

Others include provisions (Note 39), accruals of selling and administrative expenses, advances and other payables which are normally settled within a year.

The Group recognized revenue that was included in the deferred liability on consumer loyalty program amounting to P1,475 and P1,468 in 2024 and 2023, respectively (Note 37).

18. Long-term Debt

This account consists of long-term debt of the Parent Company:

	<i>Note</i>	2024	2023
Unsecured Peso-Denominated (net of debt issue costs)			
Fixed retail bond of 3.4408% due until 2025 and 4.3368% due until 2027	(e)	P17,917	P17,869
Term loan of 7.4941% due in 2029	(m)	6,959	-
Fixed rate retail bonds of 7.8183% due in 2024 and 8.0551% due in 2025	(b)	6,788	19,948
Floating rate term loan due in 2029	(n)	4,969	-
Term loan of 7.1663% due until 2027	(f)	4,483	4,975
Term loan of 7.4206% due until 2027	(g)	3,114	4,355
Term loan of 7.5496% due until 2027	(h)	3,114	4,355

Term loan of 4.5900% due until 2025	(d)	624	1,872
Term loan of 6.8672% due in 2025	(j)	624	622
Term loan of 5.5276% due until 2024	(a)	-	1,606
Unsecured Foreign Currency-Denominated (net of debt issue costs)			
Floating rate dollar loan - US\$500 million due until 2029	(o)	28,347	-
Floating rate dollar loan - US\$669 million due until 2027	(k)	27,118	36,245
Floating rate dollar loan - US\$225 million due in 2028	(l)	10,227	12,172
Floating rate yen loan - JP¥15 billion due until 2025	(c)	788	2,512
	33, 34, 35	117,443	108,896
Less current portion		29,418	25,642
		P88,025	P83,254

- a. On July 25, 2017, the Parent Company drew P15,000 from a P15,000 term loan facility which was signed on July 14, 2017 and executed on July 17, 2017. The facility is amortized over 7 years and is subject to a fixed interest rate of 5.5276% per annum. The proceeds were used to refinance the bridge loan availed on December 23, 2016 for the acquisition of the Refinery Solid Fuel-Fired Power Plant in 2016. The Parent Company has fully settled the facility as of December 31, 2024.

- b. On October 19, 2018, the Parent Company offered P20,000 fixed retail bonds (the "Offer Bonds") divided into Series C (P13,200) bearing interest at 7.8183% per annum and Series D (P6,800) bearing interest at 8.0551% per annum. The Series C Offer Bonds matured on April 19, 2024 (5.5-year term) while the Series D Offer Bonds is due on October 19, 2025 (7-year term). Interests on these Offer Bonds are payable quarterly, commencing on January 19, 2019, and thereafter, on April 19, July 19, October 19 and January 19 of each year. The net proceeds from the issuance of the Offer Bonds were used primarily to settle short-term loans availed by the Parent Company to fund crude oil purchases and redeem a portion of the Parent Company's remaining Undated Subordinated Capital Securities (USCS) (Note 21), and the balance for general corporate purposes. The Offer Bonds were listed with the Philippine Dealing & Exchange Corp. on October 19, 2018.
- c. On April 22, 2020, the Parent Company drew JP¥15 billion from a JP¥15 billion term loan facility signed and executed on March 27, 2020. The proceeds were used to partially prepay its US\$1 billion term loan facility. The JP¥ facility is amortized over 5 years with a 2-year grace period, after which the total principal will be amortized in 7 equal semi-annual installments beginning March 27, 2022. It is subject to a floating interest rate based on JP¥ LIBOR plus a spread, repriced every 1, 3 or 6 months. Due to the global discontinuation of JPY LIBOR by December 31, 2021, an amendment was made to the JPY Facility adopting the Tokyo Overnight Average Rate (TONA) as the new benchmark rate. Beginning December 29, 2021, the floating interest rate on the JPY15 billion facility is based on TONA plus a spread, repriced every 1, 3 or 6 months. The Parent Company has paid the principal amortizations amounting to JP¥4.29 billion each in 2024 and 2023.
- d. On April 27, 2020, the Parent Company drew P5,000 from a P5,000 term loan facility which was signed and executed on April 23, 2020. The facility is subject to a fixed interest rate of 4.59% per annum and amortized over 5 years with a 12-month grace period, after which the total principal will be amortized in 16 equal quarterly payments beginning July 27, 2021. The proceeds were used for general corporate purposes. The Parent Company has paid the principal amortizations amounting to P1,250 each in 2024 and 2023.
- e. On October 12, 2021, the Parent Company issued P18,000 retail bonds divided into Series E due in 2025 (P9,000) and Series F due in 2027 (P9,000) with interest rates of 3.4408% p.a. and 4.3368% p.a., respectively. The Bonds are listed on the Philippine Dealing & Exchange Corp. The proceeds were used for the redemption of the Company's Series A Bonds, the partial financing of a power plant project and payment of existing indebtedness.
- f. On May 19, 2022, the Parent Company drew and availed a P5,000 term loan facility which was signed and executed on May 17, 2022. The facility is subject to a fixed interest rate of 7.1663% per annum and amortized over 5 years with a 2-year grace period, after which the total principal will be amortized in 7 semi-annual payments beginning May 19, 2024. The proceeds were used for partial financing of a power plant project. As of December 31, 2024, the P500 portion of the facility has already been paid.

- g. On June 15, 2022, the Parent Company drew and availed a P5,000 term loan facility which was signed and executed on June 10, 2022. The facility is subject to a fixed interest rate of 7.4206% interest per annum and amortized over 5 years with a 15-month grace period, after which the total principal will be amortized in 16 equal quarterly payment beginning September 15, 2023. The proceeds were used to partially pay the US\$1,000 million term loan facility. The Parent Company has paid the principal amortizations amounting to P1,250 and P625 in 2024 and 2023, respectively.
- h. On June 16, 2022, the Parent Company drew and availed a P5,000 term loan facility which was signed and executed on June 7, 2022. The facility is subject to a fixed interest rate of 7.5496% interest per annum and amortized over 5 years with a 15-month grace period, after which the total principal will be amortized in 16 equal quarterly payments beginning September 16, 2023. The proceeds were used to pay balances of the US\$1,000 million and various loan facilities. The Parent Company has paid the principal amortizations amounting to P1,250 and P625 in 2024 and 2023, respectively.
- i. On September 8, 2022, the Parent Company drew and availed a P2,375 term loan facility which was signed and executed on September 6, 2022. The facility is subject to a fixed interest rate of 6.4920% per annum and will be fully paid on September 8, 2025. The proceeds were used to pay existing indebtedness.
- j. On September 30, 2022, the Parent Company drew and availed a P625 term loan facility which was signed and executed on September 6, 2022. The facility is subject to a fixed interest rate of 6.8672% per annum and will be fully paid on September 8, 2025. The proceeds were used to pay existing indebtedness.
- k. On November 8, 2022, the Parent Company signed and executed a US\$550 million term loan facility. Initial drawdown of US\$117 million was made on November 15, 2022, the proceeds of which were used to partially pay the US\$800 million term loan facility. On November 29, 2022, the Company drew an additional US\$150 million from the facility to fully prepay its US\$150 million term loan facility. Additional US\$228 million was drawn on December 15, 2022 to further partially prepay the US\$800 million term loan facility. The US\$550 million term loan facility is amortized over 5 years with a 2-year grace period, after which the total principal will be amortized in 7 equal semi-annual installments beginning November 8, 2024. The facility is subject to a floating interest rate based on Secured Overnight Financing Rate (SOFR) plus a spread, repriced every 1, 3 or 6 months.

On January 20, 2023, the Parent Company drew US\$30 million to partially prepay its JP¥15 billion term loan facility. Additional US\$25 million was drawn on February 3, 2023, to partially prepay the US\$800 million long-term loan facility.

On February 17, 2023, Parent Company has upsized its US\$550 million term loan facility to US\$669 million and drew US\$88 million from the additional US\$119 million loan facility on May 15, 2023 to fully pre-terminate the US\$800 million long-term loan facility. On August 14, 2023, the remaining US\$31 million was drawn. Proceeds were used to redeem the Parent Company's P7,000 Series B Bonds on October 27, 2023. As of December 31, 2024, the US\$192 million portion of the facility has already been paid.

- l. On July 13, 2023, the Parent Company made a full drawdown of US\$225 million term loan which was used to partially fund the redemption of US\$500 million SPCS. The facility was signed on March 28, 2023, which subsequently increased from US\$150 million to US\$225 million on June 8, 2023. The facility is amortized over 5 years with a 2-year grace period, after which the total principal will be amortized in 7 equal semi-annual installments beginning on March 28, 2025. The facility is subject to a floating interest rate based on SOFR plus a spread, repriced every 1, 3 or 6 months. In 2024, the Parent Company has prepaid portion of the facility amounting to US\$45 million.
- m. On March 6, 2024, the Parent Company made a full drawdown of P7,000 unsecured term loan facility signed and executed on January 16, 2024. The facility is amortized over 5 years with 2 years grace period, after which the total principal will be amortized in 7 equal semi-annual installments beginning March 6, 2026. The facility is subject to interest payable in semi-annual amortizations with fixed interest rate of 7.4941% per annum for the first 2 years and will thereafter be repriced to a new fixed rate until maturity on March 6, 2029. The proceeds were used to partially redeem Series C Offer Bonds on April 19, 2024.
- n. On April 18, 2024, the Parent Company made a full drawdown of P5,000 unsecured term loan facility signed and executed on April 15, 2024. The facility is amortized over 5 years with 2.5 years grace period, after which the total principal will be amortized in 6 equal semi-annual installments beginning October 18, 2026. The facility is subject to a floating interest rate payable in semi-annual amortizations. The proceeds were used to partially redeem Series C Offer Bonds on April 19, 2024.
- o. The Parent Company drew US\$133 million, US\$96 million, US\$130 million and US\$141 million on July 23, July 30, September 12 and October 28, 2024, respectively, from a US\$500 million term loan facility signed and executed on July 11, 2024. The facility is amortized over 5 years with 2-year grace period, after which the total principal will be amortized in 7 equal semi-annual installments beginning July 11, 2026. The facility is subject to a floating interest rate payable monthly based on SOFR plus a spread, repriced every 1, 3 or 6 months. The proceeds were partially used to repay outstanding indebtedness and settle liabilities for crude oil importations.

The above-mentioned debt agreements contain, among others, covenants relating to merger and consolidation, maintenance of certain financial ratios, restrictions on loans and guarantees, disposal of a substantial portion of assets, significant changes in the ownership or control of subsidiaries, payments of dividends and redemption of capital stock.

The Group has two financial covenants, namely, net leverage ratio not to exceed 6.5x and ratio of consolidated gross debt to consolidated net worth not to exceed 2.75x. In November 2020, the Group secured consent to amend the testing of its net leverage ratio from semi-annual to incurrence-based, while the ratio of consolidated gross debt to consolidated net worth remained to be tested quarterly.

As of December 31, 2024 and 2023, the Group has complied with the financial covenants of its debt agreements.

Total interest incurred on the above-mentioned long-term loans (including amortization of debt issue costs) amounted to P9,005, P8,331 and P6,165 in 2024, 2023 and 2022, respectively (Note 26). Interest amounting to P38 was capitalized in 2024, P187 in 2023 and P269 in 2022 (Note 9).

Movements in debt issue costs follow:

	Note	2024	2023
Balance at beginning of year		P1,366	P1,335

	34, 35	P487	P495

Cash bonds represent deposits from customers as a form of collateral.

Others account includes liability to a contractor and supplier.

21. Equity

a. Capital Stock

Common Shares

Pursuant to the registration statement rendered effective by the SEC on May 18, 1995 and the permit to sell issued by the SEC dated May 30, 1995, 10,000,000,000 common shares of the Parent Company with par value of P1.00 per share were offered for sale at an offer price of P1.00 per share. As of December 31, 2024 and 2023, the Parent Company had 97,572 and 97,977 stockholders with at least one board lot at the PSE, respectively, for a total of 9,375,104,497 (P1.00 per share par value) issued and outstanding common shares.

Preferred Shares

On January 21, 2010, the SEC approved the Parent Company's amendment to its AOI to reclassify 624,895,503 unissued common shares into preferred shares with a par value of P1.00 per share, as part of its authorized capital stock. On February 12, 2010, the SEC issued an order permitting the Parent Company's offer and sale of 50,000,000 peso-denominated, cumulative, non-participating and non-voting preferred shares, with an oversubscription option of 50,000,000 preferred shares (collectively, the "2010 Preferred Shares") to the public at an issue price of P100.00 per share. Proceeds from issuance in excess of par value less related transaction costs amounting to P9,764 was recognized as additional paid-in capital. Dividend rate of 9.5281% per annum computed in reference to the issue price was payable every March 5, June 5, September 5 and December 5 of each year, when declared by the Parent Company's BOD. The 2010 Preferred Shares were listed with PSE on March 5, 2010.

On October 17, 2014, the SEC issued an order permitting the Parent Company's public offering and sale of 7,000,000 cumulative, non-voting, non-participating, non-convertible, peso-denominated perpetual preferred shares with an oversubscription option of 3,000,000 preferred shares (collectively, the "Series 2 Preferred Shares") at an issue price of P1,000.00 per share.

On November 3, 2014, the Parent Company issued and listed in the PSE 10,000,000 Series 2 Preferred Shares at an offer price of P1,000.00 per share. The Series 2 Preferred Shares were issued in two (2) sub-series, (i) 7,122,320 Series 2A preferred shares (the "Series 2A Preferred Shares") and (ii) 2,877,680 Series 2B preferred shares (the "Series 2B Preferred Shares"). Proceeds from issuance in excess of par value less related transaction costs amounting to P9,889 was recognized as additional paid-in capital.

The Series 2A Preferred Shares may be redeemed by the Parent Company starting on the fifth anniversary from the listing date while the Series 2B Preferred Shares may be redeemed starting on the seventh anniversary from the listing date. Series 2A and Series 2B Preferred Shares have dividend rates of 6.3000% and 6.8583%, respectively. Cash dividends are payable quarterly every February 3, May 3, August 3 and November 3 of each year, as and if declared by the Parent Company's BOD.

All shares rank equally as regards to the Parent Company's residual assets, except that holders of preferred shares participate only to the extent of the issue price of the shares plus any accumulated and unpaid cash dividends.

On March 5, 2015, the Parent Company redeemed the 2010 Preferred Shares at P100.00 per share, which were delisted by the PSE on March 6, 2015 in line with the latter's rule on the delisting of redeemed shares which are not re-issuable at the time of redemption under the issuing Parent Company's AOI. On July 6, 2015, the SEC approved the amendment of the AOI of the Parent Company to provide a re-issuability feature of its preferred shares.

On May 31, 2019, the SEC issued a permit for the Parent Company's public offering and sale of 15,000,000 cumulative, non-voting, non-participating, non-convertible, peso-denominated perpetual preferred shares with an oversubscription option of 5,000,000 preferred shares (collectively, the "Series 3 Preferred Shares") at an issue price of P1,000.00 per share.

On June 25, 2019, the Parent Company issued and listed on the PSE 20,000,000 Series 3 Preferred Shares. The net proceeds from the issuance were used for the repayment of the Parent Company's outstanding short-term loans and for general corporate purposes while the remaining balance was allocated for the redemption of the Series 2A Preferred Shares in November 2019.

The Series 3 Preferred Shares were issued in two (2) sub-series: (i) 13,403,000 Series 3A Preferred Shares with dividend rate of 6.8713% per annum and first optional redemption date on its 5.5th anniversary from the issuance date; and (ii) 6,597,000 Series 3B Preferred Shares with dividend rate of 7.1383% per annum and first optional redemption date on its 7th anniversary from the issuance date. Cash dividends are payable quarterly on March 25, June 25, September 25 and December 25 of each year, as and if declared by the Parent Company's BOD. Proceeds from reissuance of treasury stocks in excess of cost less related transaction costs amounting to P17,847 was recognized as additional paid-in capital.

On November 4, 2019, the Parent Company redeemed its 7,122,320 Series 2A Preferred Shares issued on November 3, 2014 at a redemption price of P1,000.00 per share, with a record date of October 10, 2019. The redemption was approved by the Parent Company's BOD on March 12, 2019.

On November 3, 2021, the Parent Company redeemed its 2,877,680 Series 2B Preferred Shares issued on November 3, 2014 at a redemption price of P1,000.00 per share, with a record date of October 7, 2021. The redemption was approved by the Parent Company's BOD on March 9, 2021.

On July 7, 2023, the Parent Company issued and listed on the PSE 5,000,000 Series 4A, 2,995,000 Series 4B, and 6,005,000 Series 4C preferred shares (inclusive of the oversubscription of 1,500,000 shares) under the 50,000,000 Series 4 Shelf Registered Preferred Shares at an issue price of P1,000.00 or for a total amount of P14,000. The Series 4 Shelf Registered Preferred Shares, which were approved for issue by the SEC on June 14, 2023, are cumulative, deferrable, non-voting, non-participating, non-convertible, redeemable, and reissuable Peso-denominated perpetual preferred shares. Proceeds from reissuance of treasury stocks in excess of cost less related transaction costs amounting to P3,485 was recognized as additional paid-in capital. The net proceeds were used to partly fund the full redemption on July 19, 2023 of the remaining US\$477.53 million SPCS issued in 2018.

The Parent Company has the redemption option starting on the second and half, third and fifth year or on any dividend payment date thereafter for Series 4A, Series 4B and Series 4C preferred shares, respectively. Dividend rates are 6.7079%, 6.7972%, 7.0861% per annum for Series 4A, Series 4B and Series 4C preferred shares, respectively.

On September 23, 2024, the Parent Company issued and listed in the PSE additional 16,830,000 Series 4 Preferred Shares at an offer price of P1,000.00 per share for a total amount of P16,830. The additional Series 4 Preferred Shares were issued in two (2) sub-series, (i) 8,500,000 Series 4D preferred shares (the "Series 4D Preferred Shares") and (ii) 8,330,000 Series 4E preferred shares (the "Series 4E Preferred Shares"). Proceeds from issuance in excess of par value, less related transaction costs of P100, were recognized as additional paid-in capital amounting to P16,713. The Series 4D and 4E Preferred Shares are cumulative, deferrable, non-voting, non-participating, non-convertible, redeemable, and reissuable Philippine Peso-denominated perpetual preferred shares with par value of P1.00 per share.

The Parent Company has the redemption option starting on the third and fifth year from the listing date or on any dividend payment date thereafter for Series 4D and Series 4E preferred shares, respectively. Series 4D and Series 4E preferred shares have dividend rates of 6.8364% and 7.1032%, respectively. Cash dividends are payable quarterly every March 23, June 23, September 23 and December 23 of each year, as and if declared by the Parent Company's BOD. The net proceeds were used to fully redeem the Series 3A Preferred Shares on December 26, 2024, refinance maturing obligations, and fund general corporate purposes, including the purchase of crude oil inventory.

On December 26, 2024, the Parent Company redeemed its 13,403,000 Series 3A Preferred Shares issued on June 25, 2019 at a redemption price of P1,000.00 per share, with a record date of November 21, 2024. The redemption was approved by the Parent Company's BOD on June 26, 2024.

As of December 31, 2024 and 2023, the Parent Company had 37,427,000 and 34,000,000 (P1 par value) issued and outstanding preferred shares, respectively. The total number of preferred shareholders with at least one board lot at the PSE as of December 31, 2024 and 2023 are as follows:

	2024	2023
Series 3A Preferred Shares	-	14
Series 3B Preferred Shares	25	25
Series 4A Preferred Shares	4	3
Series 4B Preferred Shares	13	13
Series 4C Preferred Shares	27	27
Series 4D Preferred Shares	22	-
Series 4E Preferred Shares	26	-
	117	82

b. Retained Earnings

Declaration of Cash Dividends

On various dates in 2024, 2023 and 2022, the Parent Company's BOD approved the declaration of cash dividends for common and preferred shareholders with the following details:

Type	Per Share	Date of Declaration	Date of Record	Date of Payment
2024

Total cash dividends declared by the Parent Company amounted to P3,650 in 2024, P3,053 in 2023 and P1,044 in 2022.

Appropriation for Capital Projects

On May 5, 2016, the Parent Company's BOD approved the re-appropriation of retained earnings amounting to P15,000 for capital projects in 2016 and 2017 which are expected to be completed within five years from the date of the approval.

On March 9, 2021, the BOD of the Parent Company approved the reversal of P8,000 of the P15,000 appropriated retained earnings of the Parent Company since majority of the 2016 and 2017 capital projects were already completed while others were deferred. The remaining P7,000 was maintained for the Power Plant project.

On May 10, 2023, the BOD of the Parent Company approved the reversal of P7,000 of the remaining appropriated retained earnings for the Parent Company since the Power Plant project no longer needs the subject appropriation to fund its completion.

On October 7, 2021, the BOD of PEDC approved the appropriation of its retained earnings amounting to P3 for acquisition of three lots located in Bulacan. As of December 31, 2024, these lots are expected to be acquired by the second half of 2025.

The appropriated retained earnings attributable to the equity holders of the Parent Company amounted to P3 as of December 31, 2024 and 2023.

- c. The Group's unappropriated retained earnings include its accumulated equity in net earnings of subsidiaries, joint ventures and an associate amounting to P49,533, P48,107 and P43,690 as of December 31, 2024, 2023 and 2022, respectively. Such amounts are not available for declaration as dividends until declared by the respective investees.
- d. Equity reserves comprise of the following:

Reserve for retirement plan pertains to the cumulative remeasurements of the Group's defined benefit retirement plan.

Other reserves comprise the net income (loss) on cash flows hedges, unrealized fair value losses on investments in debt instruments, exchange differences on translation of foreign operations, effect of redemption of capital securities and others with details as follows:

	2024	2023 As restated (Note 40)	2022 As restated (Note 40)
Balance at beginning of year, as previously reported	(P14,786)	(P10,450)	(P12,379)
Effect of prior period adjustments	(8)	(4)	-
Balance at beginning of year, as restated	(14,794)	(10,454)	(12,379)
Net income (loss) on cash flow hedges, net of tax	-	(50)	54
Cumulative translation adjustment	3,499	(2,008)	1,871
Share in other comprehensive income of an associate and joint venture	1	4	-
Repurchase of capital securities	(386)	(2,286)	-
Balance at end of year	(P11,680)	(P14,794)	(P10,454)

e. SPCS

On January 19, 2018, the Parent Company issued US\$500 million SPCS with an issue price of 100% for the partial repurchase and redemption of the Parent Company's existing US\$750 million USCS, the repayment of indebtedness and general corporate purposes including capital expenditures. The SPCS were listed with the Singapore Exchange Securities Trading Ltd. on January 22, 2018.

Holders of the SPCS are conferred a right to receive distribution on a semi-annual basis from their issue date at the rate of 4.6% per annum, subject to a step-up rate. The Parent Company has a right to defer the distribution under certain conditions.

The SPCS have no fixed redemption date and are redeemable in whole, but not in part, at their principal amounts together with any accrued, unpaid, or deferred distributions, at the Parent Company's option on or after July 19, 2023 or on any distribution payment date thereafter or upon the occurrence of certain other events.

On January 19, 2023, the Parent Company redeemed US\$22.47 million (P1,118) from US\$500 million SPCS issued in 2018 at a purchase price of US\$927 per US\$1,000 in principal amount.

On July 19, 2023, the remaining outstanding SPCS with an aggregate amount of US\$477.53 million (P23,763) was fully redeemed at a purchase price of US\$1,000 per US\$1,000 in principal amount. Following such redemption, distributions ceased to accrue and the redeemed securities were cancelled and delisted from the Singapore Exchange Securities Trading Limited.

Payments of distributions pertaining to US\$500 million SPCS were made on the following dates: July 19, 2023 (P797), January 19, 2023 (P841), July 18, 2022 (P864), January 18, 2022 (P787), July 16, 2021 (P770), and January 15, 2021 (P737).

On April 19, 2021, the Parent Company issued US\$550 million SPCS at an issue price of 100%, with an initial distribution rate of 5.95% per annum. The securities were listed in the Singapore Exchange Securities Trading Limited on April 20, 2021. The net proceeds were used for the repayment of indebtedness and for general corporate purposes.

Payments of distributions pertaining to US\$550 million SPCS was made on October 18, 2024 (P1,258), April 18, 2024 (P1,246), October 19, 2023 (P1,238), April 19, 2023 (P1,224), October 18, 2022 (P1,286) and April 18, 2022 (P1,140).

These SPCS were offered for sale and sold to qualified buyers and not more than 19 institutional lenders. Hence, the sale of SPCS was considered an exempt transaction for which no confirmation of exemption from the registration requirements of the SRC was required to be filed with the SEC.

f. RPS

On November 27, 2019, the Parent Company issued US\$6 million RPS to be used for capital expenditures requirements.

Holders of the RPS are conferred a right to receive distributions on a quarterly basis, every February 27, May 27, August 27 and November 27. The Parent Company has a right to defer the distribution under certain conditions.

On May 26, 2023, the Parent Company fully redeemed its US\$6 million (P302) RPS.

Distributions to holders of the RPS were made on May 26, 2023 (P3), February 27, 2023 (P3), November 25, 2022 (P3), August 30, 2022 (P3), May 27, 2022 (P3), March 1, 2022 (P3), November 27, 2021 (P3), August 27, 2021 (P3), May 27, 2021 (P3), and February 27, 2021 (P3).

On June 22, 2020, the Parent Company issued US\$130 million RPS used for general corporate purposes. Holders of the RPS are conferred a right to receive distributions on a quarterly basis every March 22, June 22, September 22 and December 22.

On September 25, 2024 and October 2, 2024, the Parent Company partially repurchased US\$40 million (P1,983) and US\$20 million (P991) RPS.

Payment of distributions pertaining to RPS were made on December 23, 2024 (P37), October 2, 2024 (P1), September 23 and 25, 2024 (P66), June 21, 2024 (P69), and March 22, 2024 (P66), December 22, 2023 (P65), September 22, 2023 (P67), June 22, 2023 (P65), March 22, 2023 (P64), December 22, 2022 (P65), September 22, 2022 (P69), June 22, 2022 (P64) and March 22, 2022 (P62).

On August 10, 2020, the Parent Company issued additional US\$100 million RPS used for general corporate purposes. Holders of the RPS are conferred a right to receive distributions on a quarterly basis every February 10, May 10, August 10 and November 10.

Holders of the RPS were paid on November 11, 2024 (P53), August 12, 2024 (P52), May 10, 2024 (P52), and February 10, 2024 (P51), November 10, 2023 (P51), August 10, 2023 (P51), May 10, 2023 (P51), February 10, 2023 (P49), November 10, 2022 (P53), August 10, 2022 (P50), May 10, 2022 (P47) and February 10, 2022 (P46).

The RPS have no fixed redemption date and are redeemable in whole, or in part, at their principal amounts together with any accrued, unpaid, or deferred distributions, at the Parent Company's option on any distribution payment date after 90 days from issuance date.

22. Cost of Goods Sold

This account consists of:

	Note	2024	2023	2022
Inventories	8	P798,698	P731,648	P803,977
Depreciation and amortization	25	8,824	8,420	7,078
Materials and supplies		5,317	6,209	5,397
Personnel expenses	24	2,275	1,839	1,564
Purchased services and utilities		2,204	2,589	2,683
Others	29, 31	4,435	3,724	3,089
		P821,753	P754,429	P823,788

Distribution or transshipment costs included as part of inventories amounted to P18,974, P17,113 and P13,329 in 2024, 2023 and 2022, respectively.

Others include manufacturing and overhead costs such as maintenance and repairs, taxes and licenses, insurance and rent.

23. Selling and Administrative Expenses

This account consists of:

	Note	2024	2023 As restated (Note 40)	2022 As restated (Note 40)
Depreciation and amortization	25	P4,632	P4,872	P4,927
Purchased services and utilities		5,155	4,309	3,857
Personnel expenses	24	4,378	3,892	3,858

	(P1,612)	(P267)	P137	(P155)	(P1,897)

The above amounts are reported in the consolidated statements of financial position as follows:

	2024	2023 As restated (Note 40)
Deferred tax assets - net	P560	P1,114
Deferred tax liabilities - net	(6,719)	(4,456)
	(P6,159)	(P3,342)

Net deferred taxes of individual companies are not allowed to be offset against net deferred tax liabilities of other companies, or vice versa, for purposes of consolidation.

The components of income tax expense are shown below:

	2024	2023 As restated (Note 40)	2022 As restated (Note 40)
Current	P1,284	P1,513	P1,213
Deferred	3,239	1,485	267
	P4,523	P2,998	P1,480

In 2024, the Parent Company made provision for impairment of deferred tax asset for a portion of its NOLCO and MCIT incurred in 2020 and 2022, respectively, which is due to expire in the succeeding year. Details of unrecognized deferred tax assets as of December 31, 2024 are as follows:

Year Incurred	Tax Base		Tax Effect
	NOLCO	MCIT	
2020	P5,206	P -	P1,302
2022	-	310	310
	P5,206	P310	P1,612

As of December 31, 2024, the NOLCO and MCIT of the Parent Company that can be claimed as deduction from future taxable income and deduction from corporate income tax due, respectively, are as follows:

Year Incurred/Paid	Carryforward Benefits Up To	NOLCO	MCIT
2020	December 31, 2025	P15,384	P -
2021	December 31, 2026	1,678	-
2022	December 31, 2025	-	310
2023	December 31, 2026	-	513
2024	December 31, 2027	-	865
		P17,062	P1,688

As of December 31, 2023, the NOLCO and MCIT of the Parent Company that can be claimed as deduction from future taxable income and deduction from corporate income tax due, respectively, are as follows:

Year Incurred/Paid	Carryforward Benefits Up To	NOLCO	MCIT
2020	December 31, 2025	P23,163	P -
2021	December 31, 2026	1,678	-
2021	December 31, 2024	-	198
2022	December 31, 2025	-	310
2023	December 31, 2026	-	513
		P24,841	P1,021

On September 30, 2020, the Bureau of Internal Revenue (BIR) issued Revenue Regulations (RR) No. 25-2020 to implement Section 4 (bbbb) of Republic Act (RA) No. 11494, otherwise known as the Bayanihan to Recover as One Act, relative to NOLCO which provides that the net operating loss of a business or enterprise for taxable years 2020 and 2021 shall be carried over as a deduction from gross income for the next five consecutive taxable years immediately following the year of such loss.

The net operating loss for the said taxable years may be carried over as a deduction even after the expiration of RA No. 11494, provided that the same is claimed within the next five consecutive taxable years following the year such loss was incurred.

A reconciliation of tax on the pretax income computed at the applicable statutory rates to tax expense reported in the consolidated statements of income is as follows:

	2024	2023 As restated (Note 40)	2022 As restated (Note 40)
Statutory income tax rate	25.00%	25.00%	25.00%
Increase (decrease) in income tax rate resulting from:			
Interest income subjected to lower final tax	(0.09%)	(0.16%)	(0.11%)
Nontaxable income	(6.91%)	(4.47%)	(6.94%)
Nondeductible expense	3.09%	4.33%	(8.13%)
Nondeductible interest expense	0.08%	0.10%	0.09%
Write-off of NOLCO and MCIT	-	-	7.28%
Unrecognized deferred tax assets on NOLCO and MCIT	14.08%	-	-
Income subject to income tax holiday (ITH)	(0.30%)	-	-
Others, mainly income subject to different tax rates	(0.14%)	(1.93%)	0.42%
Effective income tax rate	34.81%	22.87%	17.61%

OSD

Effective July 2008, Republic Act (RA) No. 9504 was approved giving corporate taxpayers an option to claim itemized deduction or OSD equivalent to 40% of gross sales. Once the option to use OSD is made, it shall be irrevocable for the taxable year for which the option was made (Note 4).

Corporate Recovery and Tax Incentives for Enterprises (CREATE) Act.

The CREATE Act, which seeks to reduce the corporate income tax rates and rationalize the current fiscal incentives by making it time-bound, targeted and performance-based, was passed into law on March 26, 2021 and took effect 15 days after its complete publication in the Official Gazette or in a newspaper of general circulation or on April 11, 2021.

Key provisions of the CREATE Act which have an impact on the Group are: (i) reduction of Regular Corporate Income Tax (RCIT) rate from 30% to 25% for domestic and resident foreign corporations effective July 1, 2020; (ii) reduction of MCIT rate from 2% to 1% of gross income effective July 1, 2020 to June 30, 2023; and (iii) repeal of the imposition of improperly accumulated earnings tax.

Effective July 1, 2023, MCIT rate was reverted from 1% to 2% of gross income as prescribed by BIR Revenue Memorandum Circular (RMC) No. 69-2023 issued on June 20, 2023.

28. Related Party Disclosures

The Parent Company, certain subsidiaries, associate, joint ventures and SMC and its subsidiaries in the normal course of business, purchase products and services from one another. Transactions with related parties are made at normal market prices and terms. The Group requires approval of the BOD for certain limits on the amount and extent of transactions with related parties.

Amounts owed by/owed to related parties are collectible/to be settled in cash. An assessment is undertaken at each financial year by examining the financial position of the related party and the market in which the related party operates.

The balances and transactions with related parties as of and for the years ended December 31 follow:

	Note	Year	Revenues from Related Parties	Purchases from Related Parties	Amounts Owed by Related Parties	Amounts Owed to Related Parties	Terms	Conditions

- As of December 31, 2024 and 2023, the Parent Company has interest bearing advances to PCERP, included as part of "Trade and other receivables - net" in the consolidated statements of financial position, for some investment opportunities (Notes 7 and 30).
- Sales relate to the Parent Company's supply agreements with the Intermediate Parent, various SMC subsidiaries, and an associate. Under these agreements, the Parent Company supplies diesel fuel, gasoline and lube requirements of selected SMC plants and subsidiaries.
- Purchases relate to purchase of goods and services such as power, construction, information technology, shipping and terminalling from a joint venture and various SMC subsidiaries.
- The Parent Company entered into various lease agreements with San Miguel Properties, Inc. for office space and certain parcels of land where service stations are located.
- The Parent Company has existing lease agreements with SMC covering certain parcels of land where service stations are located.
- The Parent Company also pays SMC for its share in common expenses such as utilities and management fees.
- TBSB provides bottling services to PFISB and another venturer.
- Amounts owed by related parties consist of trade, non-trade receivables, advances and prepaid expenses.

- i. Amounts owed to related parties consist of trade and non-trade payables.
- j. NVRC leased out certain parcels of its land to SMC Consolidated Power Corporation for a period of 25 years.
- k. Amounts owed to entities under common control include interest-bearing advances from San Miguel Insurance Company Ltd.
- l. Amounts owed to associate of entities under common control include interest-bearing short-term loans payable to Bank of Commerce.
- m. The compensation and benefits of key management personnel of the Group, by benefit type, included in the "Personnel expenses" account as follows (Note 24):

	2024	2023	2022
Salaries and other short-term employee benefits	P1,010	P906	P906
Retirement benefits costs - defined benefit plan	105	116	139
Retirement benefits costs - defined contribution plan	42	37	35
	P1,157	P1,059	P1,080

29. Lease Commitments

Group as Lessee

The Group entered into commercial leases on office space, buildings, machinery and equipment, service stations and certain parcels of land for its refinery and service stations (Notes 10 and 31). These leases' life ranges from one to 999 years with renewal options included in the contracts. There are no restrictions placed upon the Group by entering into these leases. The lease agreements include upward escalation adjustments of the annual rental rates.

Amounts recognized in profit or loss:

	Note	2024	2023	2022
Interest on lease liabilities	10	P1,259	P1,124	P1,065
Income from sub-leasing		(1,696)	(1,608)	(1,275)
Expenses relating to the variable portion of lease payments		6	4	4
Expenses relating to short-term leases		586	491	385
Expenses relating to leases of low-value assets, excluding short-term leases of low-value assets		14	30	10
		P169	P41	P189

Rent expense amounting to P81 is included in "Cost of goods sold – others" account in 2024, P28 in 2023 and P18 in 2022 (Note 22). Interest expense amounting to P5 was capitalized as part of property, plant and equipment in 2024, P26 in 2023 while P52 in 2022 (Note 9).

Amounts recognized in consolidated statements of cashflows:

	Note	2024	2023	2022
Interest paid under operating activities	33	P1,264	P1,150	P1,083
Cash outflows for short term, low value leases and variable portion of lease payments		606	525	399
Principal lease payments under financing activities	33	1,516	1,313	1,264
	10	P3,386	P2,988	P2,746

Group as Lessor - Operating Lease

The Group has entered into lease agreements on its service stations and other related structures. The non-cancellable leases have remaining terms of between three to ten years. All leases include a clause to enable upward escalation adjustment of the annual rental rates.

The following table sets out a maturity analysis of lease payments, showing undiscounted lease payments to be received after the reporting period.

	2024	2023
Less than one year	P1,421	P1,238
One to two years	628	585
Two to three years	378	329
Three to four years	474	289
Four to five years	330	287
More than five years	2,415	2,316
	P5,646	P5,044

Rent income recognized in profit or loss amounted to:

	Note	2024	2023	2022
Other operating income		P1,767	P1,683	P1,538
Others - net	26	69	63	63
		P1,836	P1,746	P1,601

30. Retirement Plan

The succeeding tables summarize the components of net retirement benefits costs (income) under defined benefit retirement plans recognized in consolidated statements of income and the funding status and amounts of retirement plans recognized in the consolidated statements of financial position. The Parent Company has a funded, noncontributory, defined benefit retirement plan while several subsidiaries have unfunded, noncontributory, defined benefit retirement plans. Contributions and costs are determined in accordance with the actuarial studies made for the plans. Annual cost is determined using the projected unit credit method. The Group's latest actuarial valuation date is as of December 31, 2024. Valuations are obtained on a periodic basis.

The Parent Company's Retirement Plan is registered with the BIR as a tax-qualified plan under Republic Act (RA) No. 4917, as amended. The control and administration of the retirement plan is vested in the Board of Trustees (BOT), as appointed by the BOD of the Parent Company. The BOT of the retirement plan, who exercise voting rights over the shares and approve material transactions, are also officers of the Parent Company, while one of the BOT is also a BOD. The retirement plan's accounting and administrative functions are undertaken by SMC's Retirement Funds Office.

The following table shows a reconciliation of the net defined benefit retirement asset (liability) and its components:

	Present Value of Defined Benefit Obligation			Fair Value of Plan Assets			Net Defined Benefit Retirement Asset (Liability)		
	2024	2023	2022	2024	2023	2022	2024	2023	2022
Balance at beginning of year	(P4,815)	(P4,500)	(P4,486)	P2,131	P1,173	P1,027	(P2,684)	(P3,327)	(P3,459)
Recognized in Profit or Loss									
Current service cost	(270)	(257)	(263)	-	-	-	(270)	(257)	(263)
Past service cost - plan amendment*	-	-	(104)	-	-	-	-	-	(104)
Interest expense	(303)	(303)	(225)	-	-	-	(303)	(303)	(225)
Interest income	-	-	-	156	106	73	156	106	73
	(573)	(560)	(592)	156	106	73	(417)	(454)	(519)
Recognized in Other Comprehensive Income									
Remeasurements:									
Actuarial gains (losses) arising from:									
Experience adjustments	(729)	(233)	(127)	-	-	-	(729)	(233)	(127)
Changes in financial assumptions	(209)	(162)	267	-	-	-	(209)	(162)	267
Changes in demographic assumptions	(88)	22	2	-	-	-	(88)	22	2
Return on plan asset excluding interest	-	-	-	(629)	335	(768)	(629)	335	(768)
	(1,026)	(373)	142	(629)	335	(768)	(1,655)	(38)	(626)
Others									
Benefits paid	563	565	476	(526)	(498)	(359)	37	67	117
Contributions	-	-	-	1,023	1,015	1,200	1,023	1,015	1,200
Translation adjustment	(89)	53	(40)	-	-	-	(89)	53	(40)
	474	618	436	497	517	841	971	1,135	1,277
Balance at end of year	(P5,940)	(P4,815)	(P4,500)	P2,155	P2,131	P1,173	(P3,785)	(P2,684)	(P3,327)

*In 2022, the Parent Company added disability benefit for employees hired before January 1, 2022 resulting in the recognition of past service cost.

The above net defined benefit retirement liability was recognized in the consolidated statements of financial position as follows:

	Note	2024	2023
Trade and other payables	17	P124	P63
Retirement benefits liability (noncurrent portion)		3,661	2,621
		P3,785	P2,684

Retirement benefits costs (income) recognized in the consolidated statements of income by the Parent Company amounted to P194, P181, P294 in 2024, 2023 and 2022, respectively, including past service cost on plan amendment amounting to P104 in 2022.

Retirement benefits costs recognized in the consolidated statements of income by the subsidiaries amounted to P76, P76, P73 in 2024, 2023 and 2022, respectively.

The carrying amounts of the Parent Company's retirement fund approximate fair values as of December 31, 2024 and 2023.

Plan assets consist of the following:

	2024	2023
Shares of stock:		
Quoted	60%	67%
Unquoted	15%	13%
Government securities	19%	14%
Cash and cash equivalents	5%	4%
Others	1%	2%
	100%	100%

Investment in Shares of Stock. As of December 31, 2024 and 2023, the Group's plan assets include 459,156,097 common shares of Petron with fair market value per share of P2.43 and P3.55 as of December 31, 2024 and 2023, respectively, and 14,250,900 common shares of SMC with fair market value per share of P86.00 and P102.10 as of December 31, 2024 and 2023, respectively.

The Parent Company's plan recognized a gain (loss) on the investment in marketable securities of Petron and SMC amounting to (P744), P658 and (P666) in 2024, 2023 and 2022, respectively, mainly as a result of marked-to-market remeasurements.

Dividend income from the investment in shares of stock of Petron and SMC amounted to P66 in 2024, P66 in 2023, and P15 in 2022.

Government Securities represents debt instruments issued by sovereign government mainly held by two trustee banks of the plan.

Others include receivables, unit investment trust funds, and debt instruments which earn interest.

The BOT reviews the level of funding required for the retirement fund. Such a review includes the asset-liability matching (ALM) strategy and investment risk management policy. The Parent Company's ALM objective is to match maturities of the plan assets to the retirement benefit obligation as they fall due. The Parent Company monitors how the duration and expected yield of the investments are matching the expected cash outflows arising from the retirement benefit obligation. The Parent Company expects to contribute P536 to its defined benefit retirement plan in 2025.

The BOT approves the percentage of asset to be allocated for fixed income instruments and equities. The retirement plan has set maximum exposure limits for each type of permissible investments in marketable securities and deposit instruments. The BOT may, from time to time, in the exercise of its reasonable discretion and taking into account existing investment opportunities, review and revise such allocation and limits.

The retirement plan exposes the Group to actuarial risks such as investment risk, interest rate risk, longevity risk and salary risk as follows:

Investment and Interest Risk. The present value of the defined benefit obligation is calculated using a discount rate determined by reference to market yields to government bonds. Generally, a decrease in the interest rate of a reference government bonds will increase the plan obligation. However, this will be partially offset by an increase in the return on the plan's investments and if the return on plan asset falls below this rate, it will create a deficit in the plan. Due to the long-term nature of plan obligation, a level of continuing equity investments is an appropriate element of the Group's long-term strategy to manage the plans efficiently.

Longevity and Salary Risks. The present value of the defined obligation is calculated by reference to the best estimate of the mortality of the plan participants both during and after their employment and to their future salaries. Consequently, increases in the life expectancy and salary of the plan participants will result in an increase in the plan obligation.

The overall expected rate of return is determined based on historical performance of the investments.

The principal actuarial assumptions used to determine retirement benefits are as follows:

	2024	2023	2022
Discount rate	4.34% to 6.15%	5.00% to 6.58%	5.00% to 7.41%
Future salary increases	5.00% to 7.00%	5.00% to 8.00%	5.00% to 6.50%

Assumptions for mortality and disability rates are based on published statistics and mortality and disability tables.

The weighted average duration of defined benefit obligation is from 6.60 to 12.30 years as of December 31, 2024 and 5.50 to 14.90 years as of December 31, 2023.

The reasonably possible changes to one of the relevant actuarial assumptions, while holding all other assumptions constant, would have affected the defined benefit assets/liabilities by the amounts below:

	Defined Benefit Liabilities	
	1 Percent Increase	1 Percent Decrease
2024		
Discount rate	(P95)	P155
Salary increase rate	461	(408)
	Defined Benefit Liabilities	
	1 Percent Increase	1 Percent Decrease
2023		
Discount rate	(P91)	P130
Salary increase rate	354	(315)

The Parent Company has advances to PCERP amounting to P982 and P937 as of December 31, 2024 and 2023, respectively, included as part of "Trade and other receivables - net" account in the consolidated statements of financial position (Notes 7 and 28). The advances are subject to interest of 5% in 2024 and 2023 (Note 28).

In 2022, portion of the Parent Company's interest-bearing advances to PCERP were converted into contribution to the retirement plan (Note 28).

Transactions with the retirement plan are made at normal market prices and terms. Outstanding balances as of December 31, 2024 and 2023 are unsecured and settlements are made in cash. There have been no guarantees provided for any retirement plan receivables. The Parent Company has not recognized any impairment losses relating to the receivables from retirement plan for the years ended December 31, 2024, 2023 and 2022.

31. Significant Agreements

Supply Agreements. The Parent Company has assigned all its rights and obligations to PSTPL (as Assignee) to have a term contract to purchase the Company's crude oil requirements from Saudi Arabian Oil Company (Saudi Aramco), Kuwait Petroleum Corporation (KPC), Abu Dhabi National Oil Company (ADNOC), Chevron USA Inc. Singapore Branch (Chevron) and Shell International Eastern Trading Company (SIETCO). The contract with Saudi Aramco is from January 1, 2024 to December 31, 2024 with an automatic annual extension thereafter, unless terminated at the option of either party, upon at least 60 days written notice. The contract with Saudi Aramco has been extended for another year. The contract with KPC from July 1, 2023 to December 31, 2024 was renewed from January 1, 2025 to December 31, 2025 while the contract from ADNOC from January 1, 2024 to December 31, 2024 has been terminated. Lastly, the contract with Chevron is from December 1, 2024 to November 30, 2025 and the contract with SIETCO is for three (3) years from November 6, 2023.

PMRMB acquires crude oil and condensate for the Port Dickson Refinery from various sources through a combination of term purchase contracts and spot market purchases. PMRMB has a term supply contract for Tapis crude oil and Terengganu condensate with Exxon Mobile Exploration and Production Malaysia Inc. ("EMEPMI") for a period of 2 years until March 2026 supplemented by other short-term supply contracts and spot crude purchases. As of December 31, 2024, about 45% of the crude and condensate volume is sourced from EMEPMI, while the balance from other term and spot purchases. Pricing is determined through a formula that is linked to international industry benchmarks. PMRMB also utilizes Port Dickson Refinery spare capacity for crude processing arrangement of third parties to optimize utilization and benefits.

Outstanding liabilities of the Group for such purchases are shown as part of "Liabilities for crude oil and petroleum products" account in the consolidated statements of financial position as of December 31, 2024 and 2023 (Note 16).

Toll Service Agreement with Innospec Limited (Innospec). PFC entered into an agreement with Innospec, a leading global fuel additives supplier, in December 2006. Under the agreement, PFC shall be the exclusive toll blender of Innospec's fuel additives sold in the Asia-Pacific region consisting of the following territories: South Korea, China, Taiwan, Singapore, Cambodia, Japan and Malaysia.

PFC will provide the tolling services which include storage, blending, filing and logistics management. In consideration of these services, Innospec will pay PFC a service fee based on the total volume of products blended at PFC Fuel Additives Blending facility.

Tolling services started in 2008 on which PFC recognized revenue amounting to P49, P76 and P110 in 2024, 2023 and 2022, respectively.

Lease Agreements with Philippine National Oil Company (PNOC). On September 30, 2009, Petron through NVRC entered into a 30-year lease with PNOC without rent-free period, covering a property which it shall use as site for its refinery, commencing on January 1, 2010 and ending on December 31, 2039. Based on the latest valuation of the property conducted by a third-party appraiser acceptable to both parties, the annual rental shall be P238 retroactive to year 2022, payable on the 15th day of January each year without the necessity of demand. This lease is subject to renewal options and annual escalation clauses of 3% per annum to be applied starting 2018 until the next re-appraisal is conducted. The leased premises shall be reappraised every fifth year in which the new rental rate shall be determined equivalent to 5% of the reappraised value, and still subject to annual escalation clause of 3% for the four years following the re-appraisal. As of December 31, 2024, said lease contract along with the lease contracts for its bulk plants and service stations which are the subject landholdings of the rescinded deeds of conveyance were considered deemed canceled with the Supreme Court's ruling in favor of Petron (Note 39). As of December 31, 2024 and 2023, Petron leases other parcels of land from PNOC for its pipeline right-of-way and service stations.

32. Basic and Diluted Earnings Per Share

Basic and diluted earnings per share amounts are computed as follows:

	2024	2023 As restated (Note 40)	2022 As restated (Note 40)
Net income attributable to equity holders of the Parent Company	P8,469	P9,229	P5,952
Dividends on preferred shares for the year	(2,713)	(2,115)	(1,044)
Distributions to the holders of capital securities	(2,951)	(4,569)	(4,545)
Net income attributable to common shareholders of the Parent Company (a)	P2,805	P2,545	P363
Weighted average number of common shares outstanding (in millions) (b)	9,375	9,375	9,375
Basic/diluted earnings per common share attributable to equity holders of the Parent Company (a/b)	P0.30	P0.27	P0.04

As of December 31, 2024, 2023 and 2022, the Parent Company has no potential dilutive debt or equity instruments.

33. Supplemental Cash Flow Information

Supplemental information with respect to the consolidated statements of cash flows is presented below:

- a. Changes in noncash current assets, certain current liabilities and others are as follows (amounts reflect actual cash flows rather than increases or decreases of the accounts in the consolidated statements of financial position):

	Note	2024	2023	2022
Decrease (increase) in assets:				
Trade and other receivables		P5,108	(P5,075)	(P25,889)
Inventories		(12,391)	7,946	(16,479)
Other assets		(9,482)	(2,516)	(4,915)
Increase (decrease) in liabilities:				
Liabilities for crude oil and petroleum products		5,117	(5,696)	(458)
Trade and other payables and others		(110)	355	9,159
	40	(P11,758)	(P4,986)	(P38,582)

b. Changes in liabilities arising from financing activities:

	Dividends Payable	Lease Liabilities	Advances from a Related Party	Short-term Loans	Long-term Debt	Total
Balance as of January 1, 2024	P948	P15,944	P3,362	P137,910	P108,896	P267,060
Changes from financing cash flows:						
Payment of principal	-	(1,516)	-	-	-	(1,516)
Proceeds from availment of loans/advances	-	-	2,243	343,474	40,193	385,910
Payments of loans	-	-	-	(343,142)	(34,517)	(377,659)

Balance as of December 31, 2023	P948	P15,944	P3,362	P137,910	P108,896	P267,060

34. Financial Risk Management Objectives and Policies

The Group's principal financial instruments include cash and cash equivalents, equity securities, bank loans and derivative instruments. The main purpose of bank loans is to finance working capital relating to importation of crude and petroleum products, as well as to partly fund capital expenditures. The Group has other financial assets and liabilities such as trade and other receivables and trade and other payables, which are generated directly from its operations.

It is the Group's policy not to enter into derivative transactions for speculative purposes. The Group uses hedging instruments to protect its margin on its products from potential price volatility of crude oil and products. It also enters into forward currency and option contracts to hedge its currency exposure on crude oil importations and long-term dollar loan, respectively.

The main risks arising from the Group's financial instruments are foreign currency risk, interest rate risk, credit risk, liquidity risk and commodity price risk. The BOD regularly reviews and approves the policies for managing these financial risks. Details of each of these risks are discussed below, together with the related risk management structure.

Risk Management Structure

The Group follows an enterprise-wide risk management framework for identifying, assessing and addressing the risk factors that affect or may affect its businesses.

The Group's risk management process is a bottom-up approach, with each risk owner mandated to conduct regular assessment of its risk profile and formulate action plans for managing identified risks. As the Group's operation is an integrated value chain, risks emanate from every process, while some could cut across groups. The results of these activities flow up to the Management Committee and, eventually, the BOD through the Group's annual business planning process.

Oversight and technical assistance is likewise provided by corporate units and committees with special duties. These groups and their functions are:

- a. The Risk and Insurance Management Group, which is mandated with the overall coordination and development of the enterprise-wide risk management process.
- b. The Treasurers Department, which is in charge of foreign currency hedging transactions.
- c. The Transaction Management Unit of Controllers Department, which provides backroom support for all hedging transactions.
- d. The Corporate Technical and Engineering Services Group, which oversees strict adherence to safety and environmental mandates across all facilities.
- e. The Internal Audit Department, which has been tasked with the implementation of a risk-based auditing.
- f. The Commodity Risk Management Department (CRMD), which sets new and updates existing hedging policies by the BOD, provides the strategic targets and recommends corporate hedging strategy to the Commodity Risk Management Committee and Steering Committee.
- g. PSTPL executes the hedging transactions involving crude and product imports on behalf of the Group.

The BOD also created separate positions and board-level entities with explicit authority and responsibility in managing and monitoring risks, as follows:

- a. The Audit Committee is responsible for overseeing the Senior Management in establishing and maintaining an adequate, effective and efficient internal control framework. It ensures that systems and processes are designed to provide assurance in areas including reporting, monitoring compliance with laws, regulations and internal policies, efficiency and effectiveness of operations, and safeguarding of assets.

The Internal Audit Department and the External Auditor directly report to the Audit Committee regarding the direction, scope and coordination of audit and any related activities.

- b. The Risk Oversight Committee is responsible for the oversight of the enterprise risk management system of the Group to ensure its functionality and effectiveness.
- c. The Compliance Officer, who is a senior officer of the Parent Company reports to the BOD chairperson. Among other functions, he monitors compliance with the provisions and requirements of the Corporate Governance Manual and relevant laws and regulations and determines any possible violations and recommends corresponding penalties, subject to review and approval of the BOD. The Compliance Officer identifies and monitors compliance risk. Lastly, the Compliance Officer represents the Group before the SEC regarding matters involving compliance with the Corporate Governance Manual and other relevant rules and regulations of the SEC.

Foreign Currency Risk

The Parent Company's functional currency is the Philippine peso, which is the denomination of the bulk of the Group's revenues. The Group's exposures to foreign currency risk arise mainly from US dollar-denominated sales as well as purchases principally of crude oil and petroleum products. As a result of this, the Group maintains a level of US dollar-denominated assets and liabilities during the year. Foreign currency risk occurs due to differences in the levels of US dollar-denominated assets and liabilities.

In addition, starting March 31, 2012, the Group's exposure to foreign currency risks also arise from US dollar-denominated sales and purchases, principally of crude oil and petroleum products, of Petron Malaysia whose transactions are in Malaysian ringgit, which are subsequently converted into US dollar before ultimately translated to equivalent Philippine peso amount using applicable rates for the purpose of consolidation.

The Group pursues a policy of mitigating foreign currency risk by entering into hedging transactions or by substituting US dollar-denominated liabilities with peso-based debt. The natural hedge provided by US dollar-denominated assets is also factored in hedging decisions. As a matter of policy, currency hedging is limited to the extent of 100% of the underlying exposure.

The Group is allowed to engage in active risk management strategies for a portion of its foreign currency risk exposure. Loss limits are in place, monitored daily and regularly reviewed by management.

The Group assesses the existence of an economic relationship between the hedged item and the hedging instrument based on the currency, amount, and timing of their respective cash flows. For derivatives designated in a hedging relationship, the Group determines whether the derivatives are expected to be highly effective in offsetting the changes in the cash flows of the hedged item using the cumulative dollar-offset method. The dollar-offset method approximates the changes in the fair value of the hedged item using a hypothetical derivative which mirrors the terms of the derivative used as hedging instrument.

For currency hedges, the Group maintains a 1:1 hedge ratio since a similar amount of hedging instrument is expected to offset the changes in the cash flows of the hedged item. The main sources of ineffectiveness are:

- a. the effect of the counterparty and the Group's own credit risk on the fair value of the swaps, which is not reflected in the change in the fair value of the hedged cash flows attributable to the change in the exchange rates; and
- b. changes in the timing of the hedged transactions.

The Group is exposed to foreign currency risk of its short-term loans and US dollar-denominated sales and purchases. On the other hand, both foreign currency and interest rate risks arise in the Group's long-term debts. The Group determined that foreign currency risk is a separately identifiable and measurable risk component eligible for designation since it is caused by fluctuations in US dollar to Philippine peso exchange rates and benchmark closing prices used to measure the fluctuations are available in the market.

Information on the Group's US dollar-denominated financial assets and liabilities and their Philippine peso equivalents are as follows:

	2024		2023	
	US Dollar	Phil. Peso	US Dollar	Phil. Peso
	(in millions)	Equivalent	(in millions)	Equivalent
Assets				
Cash and cash equivalents	403	23,324	376	20,804
Trade and other receivables	646	37,341	752	41,644
Other assets	20	1,184	23	1,285
	1,069	61,849	1,151	63,733
Liabilities				
Short-term loans	277	16,006	223	12,366
Liabilities for crude oil and petroleum products	814	47,135	767	42,490
Long-term debts (including current maturities)	1,171	67,717	940	52,030
Other liabilities	179	10,340	116	6,425
	2,441	141,198	2,046	113,311
Net Foreign Currency-Denominated Monetary Liabilities	(1,372)	(79,349)	(895)	(49,578)

The Group incurred net foreign currency losses amounting to P1,771, P509, and P3,678 in 2024, 2023 and 2022, respectively (Note 26), which were mainly countered by marked-to-market and realized hedging gains (losses) (Note 26). The foreign currency rates from Philippine peso (PhP) to US dollar (US\$) as of December 31 are shown in the following table:

	PHP to US\$
December 31, 2024	57.845
December 31, 2023	55.370
December 31, 2022	55.755

Managing of foreign currency risk is also supplemented by monitoring the sensitivity of financial instruments to various foreign currency exchange rate scenarios. Foreign currency movements affect reported equity through the retained earnings and equity reserves arising from increases or decreases in unrealized and realized foreign currency gains or losses.

The following table demonstrates the sensitivity to a reasonably possible change in the US dollar exchange rate, with all other variables held constant, to profit before tax and equity as of December 31, 2024 and 2023:

	P1 Decrease in the US Dollar Exchange Rate		P1 Increase in the US Dollar Exchange Rate	
	Effect on Income before Income Tax	Effect on Equity	Effect on Income before Income Tax	Effect on Equity
2024				
Cash and cash equivalents	(P264)	(P337)	P264	P337
Trade and other receivables	(178)	(639)	178	639
Other assets	(10)	(18)	10	18
	(452)	(994)	452	994
Short-term loans	-	277	-	(277)
Liabilities for crude oil and petroleum products	461	1,161	(461)	(1,161)
Long-term debts (including current maturities)	1,171	878	(1,171)	(878)
Other liabilities	22	173	(22)	(173)
	1,654	2,489	(1,654)	(2,489)
	P1,202	P1,495	(P1,202)	(P1,495)
	P1 Decrease in the US Dollar Exchange Rate		P1 Increase in the US Dollar Exchange Rate	
	Effect on Income before Income Tax	Effect on Equity	Effect on Income before Income Tax	Effect on Equity
2023				
Cash and cash equivalents	(P263)	(P310)	P263	P310
Trade and other receivables	(193)	(774)	193	774
Other assets	(10)	(21)	10	21
	(466)	(1,105)	466	1,105
Short-term loans	-	223	-	(223)
Liabilities for crude oil and petroleum products	289	984	(289)	(984)
Long-term debts (including current maturities)	940	705	(940)	(705)
Other liabilities	10	143	(10)	(143)
	1,239	2,055	(1,239)	(2,055)
	P773	P950	(P773)	(P950)

Exposures to foreign currency rates vary during the year depending on the volume of foreign currency denominated transactions. Nonetheless, the analysis above is considered to be representative of the Group's currency risk.

Interest Rate Risk

Interest rate risk is the risk that future cash flows from a financial instrument (cash flow interest rate risk) or its fair value (fair value interest rate risk) will fluctuate because of changes in market interest rates. The Group's exposure to changes in interest rates relates mainly to long-term borrowings and investment securities. Investments or borrowings issued at fixed rates expose the Group to fair value interest rate risk. On the other hand, investments or borrowings issued at variable rates expose the Group to cash flow interest rate risk.

The Group manages its interest costs by using a combination of fixed and variable rate debt instruments. Management is responsible for monitoring the prevailing market-based interest rates and ensures that the marked-up rates levied on its borrowings are most favorable and benchmarked against the interest rates charged by other creditor banks.

On the other hand, the Group's investment policy is to maintain an adequate yield to match or reduce the net interest cost from its borrowings prior to deployment of funds to their intended use in operations and working capital management. However, the Group invests only in high-quality securities while maintaining the necessary diversification to avoid concentration risk.

In managing interest rate risk, the Group aims to reduce the impact of short-term volatility on earnings. Over the longer term, however, permanent changes in interest rates would have an impact on consolidated statements of income.

Managing interest rate risk is also supplemented by monitoring the sensitivity of the Group's financial instruments to various standard and non-standard interest rate scenarios. Interest rate movements affect reported equity through the retained earnings arising from increases or decreases in interest income or interest expense as well as fair value changes reported consolidated statements of income, if any.

The sensitivity to a reasonably possible 1% increase in the interest rates, with all other variables held constant, would have decreased the Group's profit before tax (through the impact on floating rate borrowings) and equity by P727 and P520 in 2024 and 2023, respectively. A 1% decrease in the interest rate would have had the equal but opposite effect.

Interest Rate Risk Table. As of December 31, 2024 and 2023, the terms and maturity profile of the interest-bearing financial instruments, together with its gross amounts, are shown in the following tables:

2024	<1 Year	1 - <2 Years	2 - <3 Years	3 - <4 Years	4 - <5 Years	>5 Years	Total
Fixed Rate

*The Parent Company reprices every month but has been given an option to reprice every 3 or 6 months.

Credit Risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations. In effectively managing credit risk, the Group regulates and extends credit only to qualified and credit-worthy customers and counterparties, consistent with established Group credit policies, guidelines and credit verification procedures. Requests for credit facilities from trade customers undergo stages of review by Trade Sales and Finance Divisions. Approvals, which are based on amounts of credit lines requested, are vested among line managers and top management that include the President and the Chairman.

Generally, the maximum credit risk exposure of financial assets is the total carrying amount of the financial assets as shown on the face of the consolidated statements of financial position or in the notes to the consolidated financial statements, as summarized below:

	Note	2024	2023
Cash in banks and cash equivalents	5	P28,177	P24,373
Derivative assets	6	1,044	1,162
Trade and other receivables - net	7	82,762	86,479
Noncurrent deposits	14	141	124
		P112,124	P112,138

Cash and Cash Equivalents, Derivative Assets and Noncurrent Deposits

Cash and cash equivalents, derivative assets and noncurrent deposits are held with counterparties with high external credit ratings. The credit quality of these financial assets is considered to be high grade. Impairment on cash and cash equivalents, derivative assets and noncurrent deposits has been measured on a 12-month ECL basis and reflects the short maturities of the exposures. The Group considers that its cash and cash equivalents, derivative assets and noncurrent deposits have low credit risk based on the external credit ratings of its counterparties.

Trade and Other Receivables and Long-term Receivables

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the factors that may influence the credit risk of its customer base, including the default risk associated with the industry and country in which customers operate. Details of concentration of revenue are included in Note 37.

Credit Quality. In monitoring and controlling credit extended to counterparty, the Group adopts a comprehensive credit rating system based on financial and non-financial assessments of its customers. Financial factors being considered comprised of the financial standing of the customer while the non-financial aspects include but are not limited to the assessment of the customer's nature of business, management profile, industry background, payment habit and both present and potential business dealings with the Group.

Class A "*High Grade*" are accounts with strong financial capacity and business performance and with the lowest default risk.

Class B "*Moderate Grade*" refers to accounts of satisfactory financial capability and credit standing but with some elements of risks where certain measure of control is necessary in order to mitigate risk of default.

Class C "*Low Grade*" are accounts with high probability of delinquency and default.

Below is the credit quality profile of the Group's trade accounts receivable as of December 31, 2024 and 2023:

Trade Accounts Receivables Per Class				
	Class A	Class B	Class C	Total
December 31, 2024				
Retail	P3,437	P4,155	P1,530	P9,122
Lubes	736	323	1,005	2,064
Gasul	892	494	170	1,556
Industrial	15,375	3,593	5,469	24,437
Others	15,574	7,732	949	24,255
	P36,014	P16,297	P9,123	P61,434

Trade Accounts Receivables Per Class				
	Class A	Class B	Class C	Total
December 31, 2023				
Retail	P2,568	P2,635	P2,663	P7,866
Lubes	405	288	806	1,499
Gasul	947	339	156	1,442
Industrial	17,483	32	5,591	23,106
Others	11,783	7,524	6,085	25,392
	P33,186	P10,818	P15,301	P59,305

Collaterals. To the extent practicable, the Group also requires collateral as security for a credit facility to mitigate credit risk in trade receivables (Note 7). Among the collaterals held are letters of credit, bank guarantees, real estate mortgages, cash bonds, cash deposits and corporate guarantees valued at P6,021 and P5,669 as of December 31, 2024 and 2023, respectively. These securities may only be called on or applied upon default of customers.

Risk Concentration. The Group's exposure to credit risk arises from default of counterparty. Generally, the maximum credit risk exposure of trade and other receivables is its carrying amount without considering collaterals or credit enhancements, if any. The Group has no significant concentration of credit risk since the Group deals with a large number of homogenous trade customers. The Group does not execute any credit guarantee in favor of any counterparty.

The table below presents the summary of the Group's exposure to credit risk and shows the credit quality of the assets by indicating whether the assets are subjected to 12-month ECL or lifetime ECL. Assets that are credit-impaired are separately presented.

2024					
	Financial Assets at Amortized Cost			Financial Assets at FVPL	Total
	12-month ECL	Lifetime ECL - not credit impaired	Lifetime ECL - credit impaired		
Cash in banks and cash equivalents	P28,177	P -	P -	P -	P28,177
Trade and other receivables	-	82,762	894	-	83,656
Derivative assets not designated as cash flow hedge	-	-	-	1,044	1,044
Long-term receivables	-	-	333	-	333

Derivative assets not designated as cash flow hedge	-	-	-	1,162	1,162
Long-term receivables	-	-	309	-	309
Noncurrent deposits	124	-	-	-	124
	P24,497	P86,479	P1,211	P1,162	P113,349

Liquidity Risk

Liquidity risk pertains to the risk that the Group will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

The Group's objectives in managing its liquidity risk are as follows: a) to ensure that adequate funding is available at all times; b) to meet commitments as they arise without incurring unnecessary costs; c) to be able to access funding when needed at the least possible cost; and d) to maintain an adequate time spread of refinancing maturities.

The Group constantly monitors and manages its liquidity position, liquidity gaps or surplus on a daily basis. A committed stand-by credit facility from several local banks is also available to ensure availability of funds when necessary.

The Group also uses derivative instruments such as forwards and swaps to manage liquidity.

The table below summarizes the maturity profile of the Group's financial assets and financial liabilities based on contractual undiscounted payments used for liquidity management as of December 31, 2024 and 2023.

2024	Carrying Amount	Contractual Cash Flow	1 Year or Less	>1 Year - 2 Years	>2 Years - 5 Years	Over 5 Years
Financial Assets						
Cash and cash equivalents	P30,389	P30,389	P30,389	P -	P -	P -

*excluding specific taxes and other taxes payable, retirement benefits liability, deferred income, advances from customers, cylinder deposits and others

Commodity Price Risk

Commodity price risk is the risk that future cash flows from a financial instrument will fluctuate because of changes in market prices. The Group enters into various commodity derivatives to manage its price risks on strategic commodities. Commodity hedging allows stability in prices, thus offsetting the risk of volatile market fluctuations. Through hedging, prices of commodities are fixed at levels acceptable to the Group, thus protecting raw material cost and preserving margins. For consumer (buy) hedging transactions, if prices go down, hedge positions may show marked-to-market losses; however, any loss in the marked-to-market position is offset by the resulting lower physical raw material cost. While for producer (sell) hedges, if prices go down, hedge positions may show marked-to-market gains; however, any gain in the marked-to-market position is offset by the resulting lower selling price.

To minimize the Group's risk of potential losses due to volatility of international crude and product prices, the Group implemented commodity hedging for crude and petroleum products. The hedges are intended to protect crude inventories from risks of downward price and squeezed margins. Hedging policy (including the use of commodity price swaps, time-spreads, put options, collars and 3-way options) developed by the CRMD is in place. Decisions are guided by the conditions set and approved by the Group's management.

Other Market Price Risk

The Group's market price risk arises from its investments carried at fair value (FVPL and FVOCI). The Group manages its risk arising from changes in market price by monitoring the changes in the market price of the investments.

Capital Management

The Group's capital management policies and programs aim to provide an optimal capital structure that would ensure the Group's ability to continue as a going concern while at the same time provide adequate returns to the shareholders. As such, it considers the best trade-off between risks associated with debt financing and relatively higher cost of equity funds.

An enterprise resource planning system is used to monitor and forecast the Group's overall financial position. The Group regularly updates its near-term and long-term financial projections to consider the latest available market data in order to preserve the desired capital structure. The Group may adjust the amount of dividends paid to shareholders, issue new shares as well as increase or decrease assets and/or liabilities, depending on the prevailing internal and external business conditions.

The Group monitors capital via carrying amount of equity as shown in the consolidated statements of financial position. The Group's capital for the covered reporting period is summarized below:

	2024	2023 As Restated
Total assets	P468,802	P445,769
Total liabilities	364,592	346,109
Total equity	104,210	99,660
Debt to equity ratio	3.5:1	3.5:1
Assets to equity ratio	4.5:1	4.5:1

There were no changes in the Group's approach to capital management during the year.

The Group is not subject to externally-imposed capital requirements.

35. Financial Assets and Financial Liabilities

The table below presents a comparison by category of carrying amounts and fair values of the Group's financial instruments as of December 31:

	Note	2024		2023	
		Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets (FA):					
Cash and cash equivalents	5	P30,389	P30,389	P27,519	P27,519
Trade and other receivables	7	82,762	82,762	86,479	86,479
Noncurrent deposits	14	141	141	124	124
FA at amortized cost		113,292	113,292	114,122	114,122
Proprietary membership shares	6	458	458	389	389
Derivative assets not designated as cash flow hedge	6, 14	1,044	1,044	1,162	1,162
FA at FVPL		1,502	1,502	1,551	1,551
Total financial assets		P114,794	P114,794	P115,673	P115,673
	Note	2024		2023	
		Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial liabilities (FL):					
Short-term loans	15	P138,906	P138,906	P137,910	P137,910
Liabilities for crude oil and petroleum products	16	51,625	51,625	44,840	44,840
Trade and other payables*	17	17,060	17,060	12,008	12,008
Long-term debt including current portion	18	117,443	117,443	108,896	108,896
Cash bonds	20	426	426	439	439
Cylinder deposits	17	3,432	3,432	2,564	2,564
"Others" under other noncurrent liabilities	20	61	61	56	56
Other FL		328,953	328,953	306,713	306,713
Derivative liabilities not designated as cash flow hedge		1,699	1,699	749	749
Total financial liabilities		P330,652	P330,652	P307,462	P307,462

*excluding specific taxes and other taxes payable, retirement benefits liability, deferred income, advances from customers, cylinder deposits and others

The following methods and assumptions are used to estimate the fair value of each class of financial instruments:

Cash and Cash Equivalents and Trade and Other Receivables. The carrying amount of cash and cash equivalents and trade and other receivables approximates fair value primarily due to the relatively short-term maturities of these financial instruments.

Derivatives. The fair values of freestanding and bifurcated forward currency transactions are calculated by reference to current forward exchange rates for contracts with similar maturity profiles. Marked-to-market valuation of commodity hedges are based on forecasted crude and product prices by third parties. The fair values of derivative instruments designated as cash flow hedges are computed by discounting the future cash flows and using the valuation model based on applicable market rates of similar instruments.

Financial Assets at FVPL. The fair values of publicly traded instruments and similar investments are based on published market prices.

Long-term Debt - Floating Rate. The carrying amount of floating rate loans with quarterly interest rate repricing approximate their fair value.

Cash Bonds and Other Noncurrent Liabilities. Fair value is estimated as the present value of all future cash flows discounted using the applicable market rates for similar types of instruments as of reporting date. Effective rate of 9.39% is used in 2024 and 2023.

Short-term Loans, Liabilities for Crude Oil and Petroleum Products and Trade and Other Payables and Cylinder Deposits. The carrying amount of short-term loans, liabilities for crude oil and petroleum products, trade and other payables and cylinder deposits approximates fair value due to the relatively short-term maturities of these financial instruments.

Derivative Financial Instruments

The Group's derivative financial instruments according to the type of financial risk being managed and the details of freestanding and embedded derivative financial instruments that are categorized into those accounted for as cash flow hedges and those that are not designated as accounting hedges are discussed below.

The Group enters into various foreign currency, interest rate and commodity derivative contracts to manage its exposure on foreign currency, interest rate and commodity price risks. The portfolio is a mixture of instruments including forwards, swaps and options.

Derivative Instruments Accounted for as Cash Flow Hedges

The Group has no outstanding derivative instruments accounted for as cash flow hedges as of December 31, 2024 and 2023.

The table below summarizes the amounts pertaining to the designated hedging instrument as of December 31, 2023.

December 31, 2023	Notional Amount	Carrying Amount		Line Item in the Consolidated Statement of Financial Position where the Hedging Instrument is Included	Changes in the Fair Value of the Hedging Instrument Recognized in OCI	Cost of Hedging Recognized in OCI	Amount Reclassified from Hedging Reserve to Profit or Loss	Amount Reclassified from Cost of Hedging Reserve to Profit or Loss	Line Item in the Consolidated Statement of Income Affected by the Reclassification
		Assets	Liabilities						
Foreign Currency and Interest Rate Risks Cross currency swap	US\$ -	P -	P -	Other noncurrent assets, Derivative liabilities, Other noncurrent liabilities	P -	P31	P -	(P9)	Interest expense and other financing charges, Other income - net
Interest Rate Risk Interest rate collar	-	-	-	Derivative liabilities, Other noncurrent assets	-	21	-	(21)	Interest expense and other financing charges

No hedging ineffectiveness was recognized in the 2023 consolidated statements of income.

The table below provides a reconciliation by risk category of components of equity and analysis of OCI items, net of tax, resulting from cash flow hedge accounting.

	December 31, 2023	
	Hedging Reserve	Cost of Hedging Reserve
Balance at beginning of year	P67	(P17)
Changes in fair value:		
Foreign currency risk and interest rate risk	(28)	31
Interest rate risk	(62)	21
Amount reclassified to profit or loss:		
Foreign currency risk and interest rate risk	-	(9)
Interest rate risk	-	(21)
Income tax effect	23	(5)
Balance at end of year	P -	P -

Derivative Instruments not Designated as Hedges

The Group enters into certain derivatives as economic hedges of certain underlying exposures. These include freestanding and embedded derivatives found in host contracts, which are not designated as accounting hedges. Changes in fair value of these instruments are accounted for directly in the consolidated statements of income. Details are as follows:

Cross Currency Swaps. As of December 31, 2023, the Group has an outstanding cross currency swap with notional amount of \$10 million and net fair value of P34.

Interest Rate Collar. As of December 31, 2023, the Group has an outstanding interest rate collar with notional amount of \$15 million and net fair value of P12.

Freestanding Derivatives

Freestanding derivatives consist of interest rate, foreign currency and commodity derivatives entered into by the Group.

Currency Forwards. As of December 31, 2024 and 2023, the Group has outstanding foreign currency forward contracts with aggregate notional amount of US\$2,138 million and US\$913 million, respectively, and with various maturities in 2025 and 2024. As of December 31, 2024 and 2023, the net fair value of these currency forwards amounted to (P977) and (P371), respectively.

Commodity Swaps. The Group has outstanding swap agreements covering its oil requirements, with various maturities in 2025 and 2024. Under the agreements, payment is made either by the Group or its counterparty for the difference between the hedged fixed price and the relevant monthly average index price. Total outstanding equivalent notional quantity covered by the commodity swaps were 100.6 million barrels and 51.1 million barrels for 2024 and 2023, respectively. The estimated net receipts for these transactions amounted to P322 and P738 as of December 31, 2024 and 2023, respectively.

Commodity Options. As of December 31, 2024 and 2023, the Group has no outstanding 3-way options entered as hedge of forecasted purchases of crude oil.

The call and put options can be exercised at various calculation dates with specified quantities on each calculation date.

Embedded Derivatives

Embedded foreign currency derivatives exist in certain US dollar-denominated sales and purchases contracts for various fuel products of the Parent Company. Under the sales and purchase contracts, the peso equivalent is determined using the average Philippine Dealing System rate on the month preceding the month of delivery.

As of December 31, 2024 and 2023, the total outstanding notional amount of currency forwards embedded in non-financial contracts is minimal. These non-financial contracts consist mainly of foreign currency-denominated service contracts, purchase orders and sales agreements. The embedded forwards are not clearly and closely related to their respective host contracts. As of December 31, 2024 and 2023, the net fair value of these embedded currency forwards is minimal.

For the years ended December 31, 2024, 2023 and 2022, the Group recognized marked-to-market gains (losses) from freestanding and embedded derivatives amounting to P986, (P133) and P4,673, respectively (Note 26).

Fair Value Changes on Derivatives not Designated as Cash Flow Hedge

The net movements in the fair value of derivative transactions in 2024 and 2023 are as follows:

	Note	2024	2023
Fair value at beginning of year		P413	P534
Net changes in fair value during the year	26	986	(133)
Fair value of settled instruments		(2,054)	12
Fair value at end of year		(P655)	P413

Fair Value Hierarchy

Financial assets and liabilities measured at fair value in the consolidated statements of financial position are categorized in accordance with the fair value hierarchy. This hierarchy groups financial assets and liabilities into three levels based on the significance of inputs used in measuring the fair value of the financial assets and liabilities.

The table below analyzes financial instruments carried at fair value, by valuation method as of December 31, 2024 and 2023. The different levels have been defined as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3: inputs for the asset or liability are not based on observable market data.

	2024	2023
	Level 2	Level 2
Financial Assets		
FVPL	P458	P389
Derivative assets	1,044	1,162
Financial Liabilities		
Derivative liabilities	(1,699)	(749)

The Group has no financial instruments valued based on Level 1 and Level 3 as of December 31, 2024 and 2023. During the years, there were no transfer out of the Level 2 measurement.

36. Registration with the Authority of the Freeport Area of Bataan (AFAB) and Board of Investments (BOI)

Petron Bataan Refinery

In December 2021, the Petron Bataan Refinery (PBR) renewed its registration with the AFAB as a registered enterprise. The registration shall be valid and in effect as long as the registered enterprise remains in good standing or until revoked or cancelled. As a registered domestic market enterprise engaged in the oil refinery facility as its registered business activity, PBR, under Sec. 311 of Republic Act No. 11534 or the Corporate Recovery and Tax Incentives for Enterprises (CREATE) Act, is granted duty-free importation of merchandise, including capital equipment, raw materials, spare parts, and accessories, subject to compliance with conditions specified under the CREATE Act. Meanwhile, pursuant to Section 295(G) of the Tax Code, as amended by the CREATE Act, PBR's crude oil importations are exempt from duties and taxes, while applicable taxes are paid upon withdrawal of finished products sourced from the crude oil importation.

Petron Solid Fuel-Fired Power Plant

On October 11, 2019, the BOI approved the Parent Company's application under Executive Order No. 226, otherwise known as the Omnibus Investment Code of 1987 as a New Operator of its 44.4 MegaWatt Solid Fuel-Fired Power Plant. The BOI is extending the following major incentives:

- a. Income Tax Holiday (ITH) for four years from January 2024 or actual start of commercial operations, whichever is earlier, but availment shall in no case earlier than the date of registration. Income qualified for ITH shall be limited to the income directly attributable to the eligible revenue generated from the net capacity of the registered project; with optional bonus year on specific cases provided that the aggregate ITH availment (regular and bonus year) shall not exceed eight years.
- b. Importation of capital equipment, spare parts and accessories at zero duty under Executive No. 85 and its Implementing Rules and Regulations; provided that such capital equipment shall be for the direct and exclusive use of the registered activity.
- c. Importation of consigned equipment for a period of ten years from date of registration subject to posting of the appropriate re-export bond.

The project commenced its commercial operation in January 2023 and the Parent Company availed of the ITH in 2024.

Certificate of entitlement has been timely obtained by the Parent Company to support its ITH incentive.

37. Segment Information

Management identifies segments based on business and geographic locations. These operating segments are monitored and strategic decisions are made on the basis of adjusted segment operating results. The CEO (the chief operating decision maker) reviews management reports on a regular basis.

The Group's major sources of revenues are as follows:

- a. Sales of petroleum and other related products which include gasoline, diesel and kerosene offered to motorists and public transport operators through its service station network around the country.
- b. Insurance premiums from the business and operation of all kinds of insurance and reinsurance, on sea as well as on land, of properties, goods and merchandise, of transportation or conveyance, against fire, earthquake, marine perils, accidents and all others forms and lines of insurance authorized by law, except life insurance.
- c. Lease of acquired real estate properties and equipment for petroleum, refining, storage and distribution facilities, gasoline service stations and other related structures.
- d. Sales on wholesale or retail and operation of service stations, retail outlets, restaurants, convenience stores and the like.
- e. Export sales of various petroleum and non-fuel products to other countries such as China, Taiwan, Malaysia, South Korea, Singapore, Japan, Indonesia, and India.

Revenues are mainly derived from the sale of petroleum products to retail and commercial customers in various geographical locations.

The Group has no significant remaining performance obligations as it mainly recognized revenues in amounts that correspond directly to the value of completed performance obligations.

Segment Assets and Liabilities

Segment assets include all operating assets used by a segment and consist principally of operating cash, receivables, inventories and property, plant and equipment, net of allowances and impairment. Segment liabilities include all operating liabilities and consist principally of accounts payable, wages, taxes currently payable and accrued liabilities. Segment assets and liabilities do not include deferred taxes.

Inter-segment Transactions

Segment revenues, expenses and performance include sales and purchases between operating segments. Transfer prices between operating segments are set on an arm's length basis in a manner similar to transactions with third parties. Such transfers are eliminated in consolidation.

Major Customer

The Group does not have a single external customer from which sales revenue generated amounted to 10% or more of the total revenue of the Group.

The following tables present revenue and income information and certain asset and liability information regarding the business segments as of and for the years ended December 31, 2024, 2023 and 2022.

	Petroleum	Leasing**	Marketing	Elimination/ Others**	Total

38. Events After the Reporting Date

- a. On February 10, 2025, the Parent Company paid distributions amounting to US\$906 thousand (P53) to the holders of the US\$100 million RPS.
- b. On February 28, 2025, the Parent Company made a full drawdown from the P5,000 unsecured term loan facility signed and executed on February 26, 2025. The facility is amortized over 5 years in 10 equal semi-annual installments beginning August 28, 2025, and is subject to a floating interest rate, payable quarterly. The proceeds were used to refinance the bridge loan availed on September 3, 2024, which had been used to fund working capital requirements and the payment of existing indebtedness. This facility is subject to a financial covenant ratio of consolidated gross debt to consolidated net worth, which must not exceed 2.75x.
- c. On March 4, 2025, the BOD of the Parent Company approved the following:
 - i. Declaration of P0.10/share cash dividends to common stockholders to be paid on April 2, 2025.
 - ii. Public offer and issuance of up to P25,000 peso retail bonds with an oversubscription option of up to P7,000, to be taken from the bond shelf registration rendered effective by the SEC and valid until September 2025.
 - iii. Common share buyback program of up to 620 million shares as follows, with terms and conditions to be determined by Management: (a) up to 167 million shares (the "Maximum Volume" or about P400 (the "Maximum Amount") and during a period of up to six months or until the Maximum Volume or the Maximum Amount is exhausted or unless earlier terminated by Management; and (b) repurchase of all of the 459.16 million common shares held by PCERP via a block sale based on the simple average of the three-day close prior to the execution date.

39. Litigations, Contingencies and Other Matters

- a. Lease Agreements with PNOC

On October 20, 2017, Petron filed with the Regional Trial Court (RTC) of Mandaluyong City a complaint against the PNOC for the reconveyance of the various landholdings it conveyed to PNOC in 1993 as a result of the government-mandated privatization of the Parent Company.

The subject landholdings consisted of the refinery lots in Limay, Bataan, 23 bulk plant sites and 66 service station lots located in different parts of the country. The Deeds of Conveyance covering the landholdings provide that the transfer of these lots to PNOC was without prejudice to the continued long-term use by Petron of the conveyed lots for its business operation. Thus, PNOC and the Parent Company executed three lease agreements covering the refinery lots, the bulk plants, and the service station sites, all with an initial lease term of 25 years which expired in August 2018, with a provision for automatic renewal for another 25 years. In 2009, the Parent Company, through its realty subsidiary, NVRC, had an early renewal of the lease agreement for the refinery lots with an initial lease term of 30 years, renewable for another 25 years.

The complaint alleged that PNOC committed a fundamental breach of the lease agreements when it refused to honor both the automatic renewal clause in the lease agreements for the bulk plants and the service station sites and the renewed lease agreement for the refinery lots on the alleged ground that all such lease agreements were grossly disadvantageous to PNOC, a government-owned-and-controlled corporation.

On December 11, 2017, the trial court granted Parent Company's prayer for a writ of preliminary injunction, enjoining PNOC from committing any act aimed at ousting the Parent Company from possession of the subject properties until the case is decided.

The court-mandated mediation in 2018 and the judicial dispute resolution proceedings before the court in 2019 were likewise terminated, after the parties failed to agree to a settlement. The Parent Company filed a motion for summary judgment on May 17, 2019. In a resolution dated November 13, 2019, the trial court granted the Parent Company's motion for summary judgment and ordered: (i) the rescission of the Deeds of Conveyance dated 1993 relating to the Parent Company's conveyance of such leased premises to PNOC pursuant to a property dividend declaration in 1993, (ii) the reconveyance by PNOC to the Parent Company of all such properties, and (iii) the payment by the Parent Company to PNOC of the amount of P143, with legal interest from 1993, representing the book value of the litigated properties at the time of the property dividend declaration. PNOC filed a motion for reconsideration. The Parent Company also filed a motion for partial reconsideration seeking a modification of the judgment to include an order directing PNOC to return to the Parent Company all lease payments the latter had paid to PNOC since 1993.

Following the trial court's denial of their separate motions for reconsideration, both PNOC and the Parent Company filed their respective notices of appeal with the trial court. In a decision dated December 13, 2021, the Court of Appeals dismissed both appeals of the Parent Company and PNOC and affirmed the resolution of the trial court as described above. In a resolution promulgated on October 6, 2022, the Court of Appeals denied the respective motions for reconsideration of the Parent Company and PNOC. The PNOC filed a petition for review on certiorari with the Supreme Court in December 2022 which the Supreme Court denied on July 25, 2023 on the ground that PNOC failed to sufficiently show that the Court of Appeals committed any reversible error in the challenged decision and resolution as to warrant the Supreme Court's exercise of its discretionary appellate jurisdiction.

In a resolution dated November 25, 2024, the Supreme Court denied with finality the motion for reconsideration and the motion to refer to the Supreme Court *En Banc* that the PNOC filed in December 2023. The November 2024 resolution also ordered the immediate issuance of the entry of judgment and declared that no further pleadings or motions shall be entertained.

On January 21, 2025, PNOC filed a second motion for reconsideration. A second motion for reconsideration is generally prohibited under the Internal Rules of the Supreme Court.

Given the finality of the Supreme Courts's ruling, the Group recognized in its books the reversal of the conveyance of the land declared as property dividends in 1993 at P143 equivalent to the net book value of the land at the time of dividend declaration and instead recognized a liability for cash dividends to PNOC of the same amount plus legal interest of P267 computed from 1993 to 2024. The landholdings were recognized as part of "Property, plant and equipment" and "Investment property" at P110 and P33, respectively (Notes 9 and 11). Correspondingly, all accruals related to the lease contracts with PNOC on the subject landholdings of the rescinded deeds of conveyance, namely, lease liabilities of P3,629 (Notes 29 and 33), asset retirement obligation (ARO) of P2,600 (Note 19) for the cost of land restoration and remediation at the end of lease term, and the corresponding right of use (ROU) assets of P2,720 (Notes 10 and 11) recognized previously were reversed which resulted in the recognition of gain on lease termination of P3,509 (Note 26).

b. Oil Spill Incident in Guimaras

On August 11, 2006, MT Solar I, a third party vessel contracted by the Parent Company to transport approximately two million liters of industrial fuel oil, sank 13 nautical miles southwest of Guimaras, an island province in the Western Visayas region of the Philippines. In separate investigations by the Philippine Department of Justice (DOJ) and the Special Board of Marine Inquiry (SBMI), both agencies found the owners of MT Solar I liable. The DOJ found the Parent company not criminally liable, but the SBMI found the Parent company to have overloaded the vessel. Parent Company has appealed the findings of the SBMI to the Department of Transportation (DOTr) and is awaiting its resolution. Parent Company believes that SBMI can impose administrative penalties on vessel owners and crew, but has no authority to penalize other parties, such as the Parent Company, which are charterers.

Complaints for damages for non-payment of compensation for the clean-up operations during the oil spill were filed with the RTC of Guimaras by a total of 1,063 plaintiffs who allegedly did not receive any payment of their claims for damages arising from the oil spill. The total claims amounted to P292. The cases were pending as at December 31, 2024. In the course of plaintiffs' presentation of evidence, they moved for trial by commissioner, which was denied by the trial court. The plaintiffs elevated the matter by way of a petition for certiorari to the Court of Appeals in Cebu City. On January 9, 2020, the CA issued a Resolution granting plaintiffs' motion for reconsideration of the earlier resolution denying their petition and ordering the Parent Company to file its comment on plaintiffs' petition within 10 days. On February 6, 2020, the Parent Company filed a motion for reconsideration of said Resolution which remains pending as of December 31, 2024. On September 25, 2024, the CA denied the motion for reconsideration of another respondent International Oil Pollution Compensation ("IOPC") Funds and directed IOPC to file its comment. The CA held in abeyance any further action on the petition pending compliance with the directives of the said resolution. In the meantime, proceedings before the trial court continue. In one of the cases, the plaintiffs have already rested its case and trial dates have been set for the presentation of defendants' evidence. In the other case, plaintiffs are already expected to complete the presentation of their evidence testified so far. As of December 31, 2024 and 2023, the Group has not set up any provision related to this case because while the case is still pending, Petron believes the resolution will be in its favor.

c. Other Proceedings

The Group is also a party to certain other proceedings arising out of the ordinary course of its business, including legal proceedings with respect to tax, regulatory and other matters. While the results of litigation cannot be predicted with certainty, management believes that the final outcome of these other proceedings will not have a material adverse effect on the Group's business financial condition or results of operations.

- d. The Group has unused letters of credit totaling approximately P41,164 and P35,445 as of December 31, 2024 and 2023, respectively.

40. Prior Period Adjustments

In 2024, the Group performed a reassessment of its accounting policy for LPG cylinders which was being recognized as an outright expense. The Group took into consideration the legal ownership of LPG cylinders, compliance with regulatory requirements under the LPG Industry Regulation Act and alignment with the recent interpretation of the Securities and Exchange Commission on the matter. As a result thereof, the Group changed its accounting policy on LPG cylinders to recognize these as assets under PAS 16, *Property, Plant, and Equipment*.

The LPG cylinders are recognized under the "Service stations and other equipment" asset class in the "Property, plant and equipment - net" account (Note 9). The related cylinder deposits liability was also recognized (Note 17).

The following table summarizes the impact of the change on the Group's consolidated statements of financial position as of December 31, 2023 and January 1, 2023:

	December 31 2023 As Previously Reported	Adjustments	December 31 2023 As Restated

REPORT OF INDEPENDENT AUDITORS ON SUPPLEMENTARY INFORMATION

The Board of Directors and Stockholders
Petron Corporation
SMC Head Office Complex
40 San Miguel Avenue
Mandaluyong City

We have audited in accordance with Philippine Standards on Auditing, the consolidated financial statements of Petron Corporation and Subsidiaries (the “Group”) as at December 31, 2024 and 2023 and for each of the three years in the period ended December 31, 2024, and have issued our report thereon dated March 19, 2025.

Our audits were made for the purpose of forming an opinion on the consolidated financial statements of the Group taken as a whole. The supplementary information included in the following schedules are the responsibility of the Group’s management:

- Supplementary Schedules of Annex 68-J
- Map of the Conglomerate

Firm Regulatory Registration & Accreditation:
PRC-BOA Registration No. 0003, valid until September 20, 2026
IC Accreditation No. 0003-IC, Group A, valid for five (5) years covering the audit of 2020 to 2024
financial statements (2019 financial statements are covered by IC Circular Letter (CL) No. 2019-39, Transition clause)
BSP Accreditation No. 0003-BSP, Group A, valid for five (5) years covering the audit of 2020 to 2024
financial statements (2019 financial statements are covered by BSP Monetary Board Resolution No. 2161, Transition clause)

These supplementary information are presented for purposes of complying with the Revised Securities Regulation Code Rule 68, and are not required parts of the consolidated financial statements. Such supplementary information have been subjected to the auditing procedures applied in the audits of the consolidated financial statements and, in our opinion, are fairly stated, in all material respects, in relation to the consolidated financial statements taken as a whole.

REPORT OF INDEPENDENT AUDITORS ON COMPONENTS OF FINANCIAL SOUNDNESS INDICATORS

The Board of Directors and Stockholders

Petron Corporation
SMC Head Office Complex
40 San Miguel Avenue
Mandaluyong City

We have audited in accordance with Philippine Standards on Auditing, the consolidated financial statements of Petron Corporation and Subsidiaries (the "Group") as at December 31, 2024 and 2023 and for each of the three years in the period ended December 31, 2024, and have issued our report thereon dated March 19, 2025. Our audits were made for the purpose of forming an opinion on the consolidated financial statements taken as a whole. The Supplementary Schedule of Financial Soundness Indicators, including their definitions, formulas and calculations, is the responsibility of the Group's management. These financial soundness indicators are not measures of operating performance defined by Philippine Financial Reporting Standards (PFRS) Accounting Standards and may not be comparable to similarly titled measures presented by other companies. This schedule is presented for the purpose of complying with the Revised Securities Regulation Code Rule 68 issued by the Securities and Exchange Commission, and is not a required part of the consolidated financial statements prepared in accordance with PFRS Accounting Standards. The components of these financial soundness indicators have been traced to the Group's consolidated financial statements as at December 31, 2024 and 2023 and for each of the three years in the period ended December 31, 2024 and no material exceptions were noted.

REPORT OF INDEPENDENT AUDITORS ON SUPPLEMENTARY INFORMATION

The Board of Directors and Stockholders
Petron Corporation
SMC Head Office Complex
40 San Miguel Avenue
Mandaluyong City

We have audited, in accordance with Philippine Standards on Auditing, the separate financial statements of Petron Corporation (the “Company”) as at and for the years ended December 31, 2024 and 2023, and have issued our report thereon dated March 19, 2025.

Our audits were made for the purpose of forming an opinion on the separate financial statements taken as a whole. The supplementary information included in the *Reconciliation of Retained Earnings Available for Dividend Declaration* is the responsibility of the Company’s management.

Firm Regulatory Registration & Accreditation:
PRC-BOA Registration No. 0003, valid until September 20, 2026
IC Accreditation No. 0003-IC, Group A, valid for five (5) years covering the audit of 2020 to 2024
financial statements (2019 financial statements are covered by IC Circular Letter (CL) No. 2019-39, Transition clause)
BSP Accreditation No. 0003-BSP, Group A, valid for five (5) years covering the audit of 2020 to 2024
financial statements (2019 financial statements are covered by BSP Monetary Board Resolution No. 2161, Transition clause)

This supplementary information is presented for purposes of complying with the Revised Securities Regulation Code Rule 68, and is not a required part of the separate financial statements. Such supplementary information has been subjected to the auditing procedures applied in the audits of the separate financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the separate financial statements taken as a whole.

About the Cover: Leap Forward

Our sustainability journey is dynamic and ever evolving, shaped by global challenges such as climate change, resource scarcity, and shifting market expectations. While uncertainties lie ahead, our purpose remains clear: to be a reliable partner in driving responsible and inclusive growth.

This journey requires more than merely minimizing our impact; it challenges us to lead by example as we embed sustainability into our strategy and operations and set a higher standard for responsible business. We embrace continuous adaptation, strategic decision-making, and collaborative solutions to create meaningful change. Taking a leap forward is going beyond compliance—it means accelerating the transition to a circular economy, improving resource efficiency, and forging strong partnerships that amplify progress. With a clear vision and a bold approach, we reaffirm our commitment to shaping a sustainable future.

The use of abstract elements in our cover is a graphical representation of Petron's values and reflects our move to go beyond what we are accustomed to. The arrow symbolizes positive, upward or outward movement and a firm sense of direction. Relating to our sustainability efforts, the arrow blooms into geometric trees to show our relentless movement—upwards, branching out, and continuously adapting—as we deepen our roots to strengthen the foundation of our commitment to uplift our company, our customers, our communities, and our country.

About the Report (GRI 2-2)

Over the years, we have strengthened our commitment to sustainability, and our progress is now more measurable than ever. Our 2024 Sustainability Report highlights our non-financial performance from January 1 to December 31, 2024, showcasing how our initiatives create tangible environmental, social, and economic impact.

This report is prepared in accordance with the Global Reporting Initiative (GRI) Standards and aligns with GRI 11: Oil and Gas Sector 2021, the United Nations Sustainable Development Goals (UN SDGs), and the Philippine Development Plan (PDP) 2023-2028. Additionally, it complies with the Sustainability Reporting Guidelines of the Philippine Securities and Exchange Commission (SEC), particularly Memorandum Circular No. 4, Series of 2019.

Our report covers our operations in the Philippines, encompassing the following facilities: our corporate offices in Mandaluyong, Pasig, and Pandacan, the Petron Bataan Refinery (PBR or Refinery) and the Polypropylene (PP) Plant, and 30 terminals and sales offices nationwide, 105 service stations, and our corporate social responsibility (CSR) arm, Petron Foundation, Inc (Petron Foundation or PFI).

For consistency, we use the terms “Petron,” “we,” “our Company,” and “our business” to refer to Petron Corporation throughout this report.

How to Read the Report

This report highlights our proactive efforts in sustainability, showcasing measurable progress, innovative strategies, and long-term commitments. We provide insights into how we manage environmental impact, empower employees, strengthen stakeholder partnerships, and contribute to economic and social development.

Beyond numbers, we illustrate the strategic drivers behind our performance—how our governance ensures accountability, how our sustainability strategy fosters long-term growth, and how our risk management approach helps us navigate challenges and seize opportunities. By presenting both data and context, we aim to demonstrate our commitment to sustainability and our vision for a resilient and responsible future.

About the Company (GRI 2-1, 2-6)

Petron Corporation is the sole oil refining and marketing company in the Philippines, playing a key role in fueling the nation’s economy and serving as a major player in Malaysia. With a combined refining capacity of 268,000 barrels per day, we produce a full range of high-quality fuels and petrochemicals that power industries, businesses, and everyday lives. In the Philippines alone, we supply approximately 40% of the country’s total fuel needs.

Since 2010, we have been a subsidiary of San Miguel Corporation (SMC), one of the Philippines’ most diversified and dynamic conglomerates. Our headquarters is located at the SMC Head Office Complex in Mandaluyong City. Petron’s shares are listed on the Philippine Stock Exchange (PSE). Moreover, we operate internationally through our subsidiaries in Malaysia which include Petron Fuel International Sdn. Bhd., Petron Oil (M) Sdn. Bhd., and Petron Malaysia Refining & Marketing Bhd (PMRMB). PMRMB is publicly listed on the Main Board of Bursa Malaysia.

As a proudly homegrown Filipino company, we are dedicated to ensuring energy security, protecting the environment, and uplifting the communities we serve. Every step we take is driven by a commitment to sustainability, ensuring that we fuel the aspirations of future generations.

Guided by our vision and purpose, we focus on our priorities across environmental, social, and governance (ESG) aspects that drive growth for our Company and our stakeholders.

Our Priorities	Our Vision and Purpose	Our Stakeholders	UN Sustainable Development Goals
<ul style="list-style-type: none">• Environmental Stewardship• Social Well-being• Good Governance	<p><i>Our Vision</i></p> <p>As the Philippines’ leading oil company, we envision an energy-secure and prosperous nation where everyone’s journey is fueled by opportunities for meaningful experiences and sustainable success.</p> <p><i>Our Purpose</i></p> <p>We drive the nation’s development and uplift communities towards a sustainable future, by providing innovative fuel and mobility solutions.</p>	<ul style="list-style-type: none">• Shareholders• Government and Regulators• Industry/business groups• Consumers• Employees• Investors and financial institutions• Local/host communities and people’s organizations• Academe• Suppliers, contractors, and third-party service providers• Civil society organizations (CSO) and non-governmental organizations (NGOs)• Media	<p>Through our 20 material topics, we contribute to the 17 UN Sustainable Development Goals, given its interconnected nature.</p>

Towards this end, we commit to:

- Leverage on our refining, distribution and retail assets to achieve competitive advantage and long-term viability;
- Reliably provide superior products and services that meet customers’ needs;
- Ensure excellent customer experience enabled by technology and adapted to local communities;
- Develop and strengthen relationships with our partners towards shared growth and success;
- Reduce our impact on the environment, and advocate for responsible supply chain; and
- Create an inclusive, nurturing, and purposeful work environment.

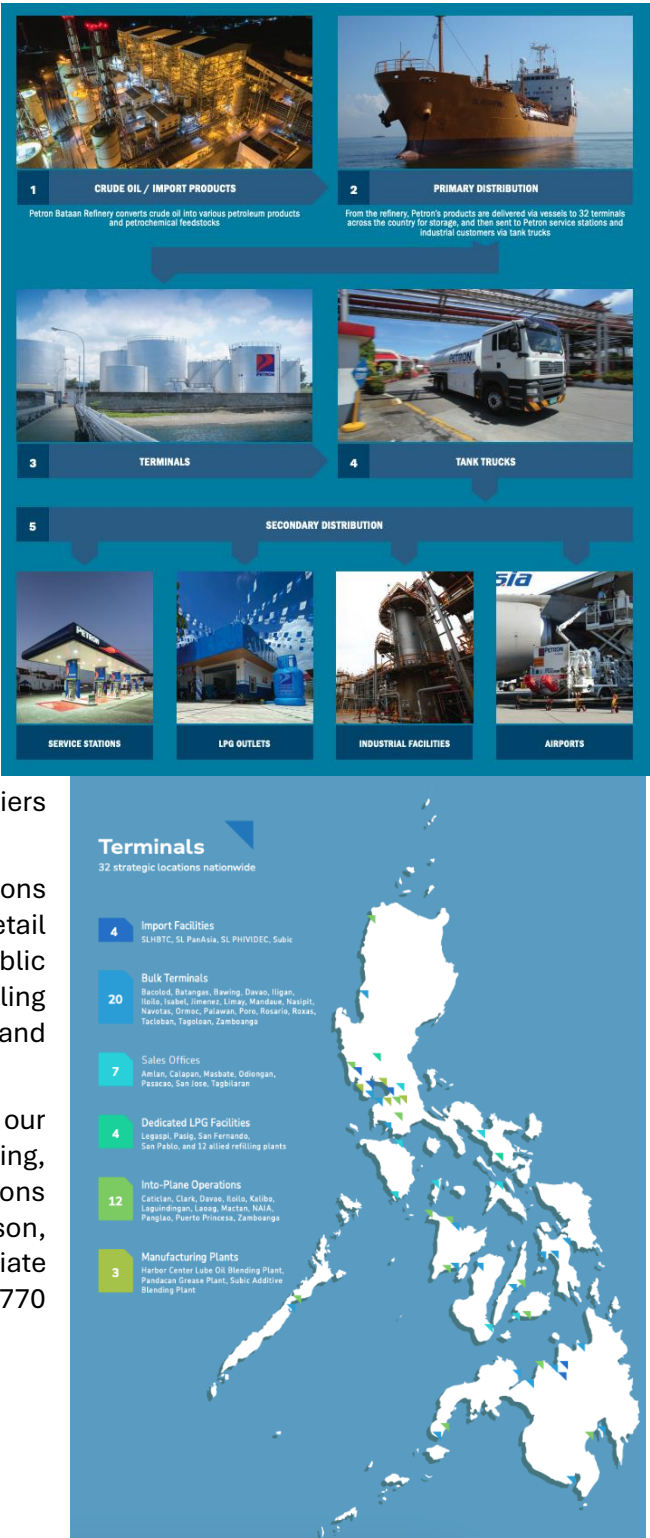

Our Business Areas

Our business operations are strategically positioned across key regions in the Philippines, ensuring a reliable and accessible fuel supply for the nation. Our commitment to customers begins at the refining stage and extends through the delivery of high-quality products. At every step, we integrate sustainability, starting with the careful planning and contracting of crude and product deliveries, all the way to our refinery, where crude oil is transformed into a full range of petroleum products, industrial fuels, and petrochemical feedstock.

From our refinery in Bataan, we transport our products primarily by sea to nearly 30 terminals across the archipelago. This extensive distribution network powers essential industries, including power generation, manufacturing, mining, and agribusiness. Petron is also a key fuel supplier for national government agencies, including the Armed Forces of the Philippines, the Philippine National Police, and the Philippine Coast Guard (PCG). Additionally, we provide jet fuel to both international and domestic carriers at major airports, ensuring seamless air travel.

With approximately 1,800 retail service stations nationwide, we operate the country's largest fuel retail network, serving everyday motorists and the public transport sector. Our stations are more than just fueling stops—they are trusted hubs for mobility, convenience, and quality service.

Beyond the Philippines, we continue to strengthen our presence in Malaysia through an integrated refining, distribution, and marketing network. Our operations include an 88,000-barrel-per-day refinery in Port Dickson, the Lumut PME Plant, 10 terminals (including four affiliate terminals), and a growing retail network of more than 770 service stations.

Our Products and Services

Our long-standing legacy is built on a commitment to quality and world-class fuel products. As an industry leader, we continuously innovate in sourcing and refining fuel to meet the country’s evolving energy needs, ensuring reliability and superior performance for every customer.

Our fuel lineup includes Blaze 100, XCS, Xtra Advance, Turbo Diesel, and Diesel Max—each engineered for peak efficiency and optimal engine performance. Strengthening our competitive edge, we produce and test our premium engine oils locally at our state-of-the-art Lube Oil Blending Plant in Tondo, Manila. Meanwhile, our fuel additives, blended at our Subic Bay Freeport facility, are specifically designed to enhance vehicle performance under Philippine driving conditions. We also offer Liquefied Petroleum Gas (LPG) brands, Gasul and Fiesta Gas, providing safe and efficient energy solutions for households and industries alike.

FUELS			
			
LUBRICANTS			
LPG			
JET A-1 • KEROSENE • PROPYLENE • POLYPROPYLENE • BTX (Benzene, Toulene, Xylene)			

Beyond fuel, we offer comprehensive automotive maintenance and repair services through our Car Care Center (CCC) and CCC Express outlets. Our commitment to enhancing customer experience extends to strategic partnerships with leading food and service chains, transforming our service stations into convenient, one-stop destinations. With Treats convenience stores in select locations, we provide a variety of food, beverages, and essentials for motorists on the go.

2024 ESG Performance at a Glance: How We Are Taking the Leap

Program/Initiative	Starting Year of Implementation	Gains	Savings (PHP)
SMC Water for All	2016	<p>Refinery:</p> <p><u>Scarce Water:</u></p> <p>2016-2024: 25.8 million m³</p> <p>2024 only: 3.4 million m³</p>	<p>Refinery:</p> <p><u>Scarce Water:</u></p> <p>2016-2023: PHP 155 million</p> <p>2024 only: PHP 22 million</p> <p><i>(Using deep well unit variable cost after conversion to BFW (10.37 Php/m³), Desal cost at 12.92 Php/m³).</i></p>
		<p><u>Recycled Water:</u></p> <p>2016-2023: 4.65 million m³</p> <p>2024 only: 0.71 million m³</p>	<p><u>Savings on Recycled Water</u></p> <p>2016-2024: PHP 22.2 million</p> <p>2024 only: PHP 3.2 million</p> <p><i>(using deep well variable cost as raw water at PHP 4.1/m³)</i></p>
		Terminals: 79,633m ³ of harvested rainwater since 2016	Terminals: PHP 7.45 million water savings from rainwater
Use of Waste Energy (Low Pressure Steam) in Desalination Plant	2016	<p>Refinery:</p> <p><u>Avoided GHG</u></p> <p>453,698.682 tons CO₂e since 2016 (114,999.170 tons CO₂e in 2024)</p> <p><u>Avoided Fuel</u></p> <p>34,277 MT of petcoke since 2016 (34,035.24 MT in 2024)</p>	<p>Refinery:</p> <p>Fuel Savings (PHP 580.38 million (PHP 151.85 million in 2024)</p> <p><i>Note: Reason for new values is that total LS absorbed was considered last year's 2022 SR. New values are now based on net LS or the waste energy absorbed by Desalination Plant. Net LS is calculated by Total LS absorbed by desal less LS letdown from MS.</i></p>
Decommissioning of Refinery Co-Generation Facility Phase 3	2022	<p>2023: 53,639.14 kL Fuel Oil savings</p> <p>162,027.19 tones of avoided CO₂e (refinery only boundary)</p>	2023: PHP 1,093 million net savings from avoided fuel
Diversification to Petrochem (Benzene, Toluene, Mixed Xylene,	1999 (Mixed Xylene) 2008	Refinery: In 2024 the avoided GHG as Scope 3 if used as fuel was at 1,391,491.47 tons CO ₂ e

Message of the President and CEO (GRI 2-22)

To our valued stakeholders,

As Petron continues its sustainability journey, we take pride that our past efforts have not only positioned us ahead of our competitors but also equipped us to effectively navigate the evolving challenges of our business environment. While keeping an eye on our triple bottomline, we have also created more opportunities to drive business growth, enhance operational efficiency, strengthen our role as environmental stewards, and better serve both our internal and external communities.

Despite challenges, we have continuously innovated and optimized our operations to ensure that we are prepared for the future while at the same time reinforcing our commitment to national development.

Relentless in growing our business

There were hurdles along the way, as the industry felt the impact of global events in the Middle East and reduced demand from China, resulting in volatile oil prices. At the same time, policy changes in fuel subsidies in Malaysia and a maintenance shutdown in Petron Malaysia's Port Dickson Refinery in the last quarter of 2024 affected production and exports.

Navigating through these challenges, we held steady to post impressive economic gains. Our Philippine and Malaysia operations recorded PHP 867.97 billion in consolidated revenues, up from the PHP 801.03 billion in 2023. Our aggregate sales volume went up 10% to 139.85 million barrels from the previous year's 126.91 million barrels, with Philippine operations and Singapore trading subsidiary leading this charge with total sales of 92.49 million barrels, rising 16% from 2023. We posted a net income of PHP 8.47 billion, down 16% from the previous year. Operating income stood at PHP 29.22 billion, slightly lower than PHP 30.72 billion in 2023. Despite the dip, Petron continued to be financially viable.

We remained the leader in the Philippine oil industry, with a 24.9% share of the market, driven by our relentless efforts to grow Petron. Our dominance extends to the LPG market as well, where we hold a 25.5% share. Retail sales grew by 18%, led by aggressive efforts from our service stations and fleet accounts. Commercial sales also grew by 6%, supported by our record-breaking performance in the aviation segment, which Petron continues to dominate. Aviation sales at the Ninoy Aquino International Airport exceeded 120 million liters in 2024.

Our unrelenting drive to further grow our business meant enlarging our presence, as we built more service stations, added new Petron Gasul and Fiesta Gas stores, and inaugurated more CCCs and engine oil outlets across the country. Alongside our physical expansion were initiatives to gain more customers and retain existing ones. This included exciting rewards and recognition promotions year-round, and tapping new communications platforms and non-traditional channels to keep us constantly connected, visible, and responsive to our diverse audiences. These efforts are embodied in our "*Tapat Sa 'yo*" campaign, building on the insights of a consumer tracking study that reaffirmed Filipino motorists' continuing trust in the Petron brand. The study highlighted Petron's trustworthiness, maintaining its position as the strongest brand in this area. Beyond being a catchphrase, "*Tapat Sa 'yo*" is our promise to our customers to always be their loyal and trustworthy partner in their everyday journeys.

Looking ahead and beyond the horizon

We continue to stay ahead of the curve as we look at the long-term success of the Company. We have set the stage for future growth with strategic investments in our facilities, operations, and our people. Our Petron Ecowatch program, for example, has been elevating the awareness and practice of environmental excellence throughout the Operations workforce across the country. Now on its 10th year, this unique self-audit program is promoting sustainability beyond regulatory compliance by using a color-coded rating system to measure

the progress of our terminals in their environmental performance, efficiency, and self-regulation through environmental management systems. This has greatly improved our facilities' environmental practices, with four terminals – Bawing, Tacloban, Mandaue, and Roxas – earning Hall of Fame status for their sustained and flawless operations over two consecutive years. This continuous compliance and integration of best practices have become fundamental to the implementation of our programs.

In launching the Refinery Technical Forum (RTF), PBR provided a platform to inspire creativity and innovativeness among its employees. Even as our Refinery is at par with the best in the region, we still believe in creating an environment that encourages new ideas to increase our competitiveness, minimize operational costs, heighten safety performance, and better manage our environmental impact. We applaud all the 51 exceptional initiatives pitched by PBR employees and look forward to seeing the proposed programs of the winners implemented.

We likewise reinforced our commitment to enabling renewable energy in all our major facilities. Currently, 70 Petron service stations utilize solar power to supplement their electricity needs to help reduce energy consumption, generate cost savings, and lower their carbon footprint. We also inaugurated our first Electric Vehicle (EV) Charging Station along the North Luzon Expressway (NLEX) with plans to further install AC EV Chargers in select stations to meet the growing demands for these environment-friendly vehicles.

Continuity through our community

We understand that growth becomes more meaningful when shared. Through Petron Foundation, Inc. (PFI), we have achieved significant strides in our banner programs in education (Tulong Aral ng Petron or TAP) and environment (Puno ng Buhay). In 2024, we have supported over 2,400 TAP scholars from elementary to college across the nation, including 300 new Grade 1 scholars. We also had our 13th batch of scholars under the Petron Engineering Scholarship initiative. Through our Puno ng Buhay reforestation program, we take pride in deepening our collaboration with local government units (LGUs) to reduce our environmental impact through our carbon capture efforts.

We are further strengthening our reforestation efforts by engaging the University of the Philippines Los Baños College of Forestry and Natural Resources for the next five years. With their expertise, we will effectively implement a science-based assessment of carbon sequestration and avoided emissions from our reforestation sites in Davao, Roxas and Bulacan. This will also help us be more strategic in developing our targets for reducing our carbon footprint.

Meanwhile, our renewed partnership with the local government of Limay in Bataan, and the Municipal Fisheries Aquatic Resources Management Council reflects our commitment to empowering communities. By restoring the 7.5-hectare fish sanctuary in Barangay Wawa through the installation of floating markers and artificial coral reefs, we protect vital fish habitats and secure food resources for our surrounding communities.

Our contributions to nurturing community development have not gone unnoticed, and we are humbled by the awards that recognize our sustainability achievements. We were once again honored with the Golden Arrow Award from the Institute of Corporate Directors, reaffirming our commitment to corporate governance excellence. This recognition underscores our adherence to global best practices, including transparency, accountability, and upholding our shareholders' rights. Our TAP program and the Refinery Engineering Scholarship Program, which have supported over 18,000 scholars nationwide, received the Best Community Programme Award (Silver Category) at the 16th Annual Global CSR & ESG Summit and Awards in Vietnam. In the 2024 Brand Finance Philippines 30 Report, Petron was recognized as one of the top ten most valuable Filipino brands for 2024 and ranked 83rd among the most valuable brands in the ASEAN region. Notably, we were the only oil company to secure a spot in the top 10 for Sustainability Perceptions Value.

Taking the leap forward

The steps we have taken in over nine decades have established us as the Philippine's oil industry leader. These have emboldened us to take the leap forward and position Petron well into the future, guided by our new vision of ensuring an energy-secure and prosperous nation and driven towards achieving a sustainable future. This aligns with the SMC sustainability agenda where our business fosters a long-term future “that is good for the planet, good for people, and good for progress” to benefit present and future generations of Filipinos.

Thus, we are taking huge strides in measuring, monitoring, and managing our triple bottomline performance, even as we are identifying and managing ESG and climate-related risks and opportunities. As we expect the Securities and Exchange Commission to mandate companies to adopt the International Sustainability Standards Board (ISSB) reporting standards in the next few years, we are already building our capacity to adopt these guidelines. With the help of the University of Asia and the Pacific, members of our ESG technical working group have begun training in transitioning to the ISSB's International Financial Reporting Standards S1 and S2 on sustainability and climate-related disclosures to enable informed investment decisions with Petron.

As we leap forward into a new era of service, we remain dedicated to serving the Filipino people. Our continuing vision and purpose reflect our desire to continue building on the foundations we have established for the Company and the nation at large. With our commitment to excellence guiding us in the years ahead, we are more energized than ever to drive progress and enhance the prosperity of both our communities and stakeholders. This dedication not only strengthens our resilience in the face of environmental challenges but also highlights our ongoing effort to create long-term value for all. Together, we will continue to lead the way; one that is marked by innovation, growth, and shared success.

Maraming salamat po!

Ramon S. Ang

President and Chief Executive Officer

Feature Story

PETRON ECOWATCH PROGRAM: A Decade of Continual Improvement and Commitment to Environmental Excellence

In July 2003, then Department of Environment and Natural Resources (DENR) Secretary Elisea “Bebet” Gozun issued Memorandum Order 2003-26 establishing the implementing guidelines of the Industrial Ecowatch System. This innovative program sought to advocate mandatory self-monitoring, compliance, and self-regulation among key Philippine industries and enjoined them to voluntarily improve their respective environmental performance beyond compliance, even as they built or enhanced their capacity to develop internal environmental management systems or endeavored to subscribe to global environmental standards, such as ISO 14000.

Initially conceptualized in 2003 for San Miguel Corporation, the DPO Ecowatch Program was eventually implemented in 2014 throughout Petron’s 32 depots and terminals. At Petron, we recognize that fueling the nation comes with a profound responsibility, not just to our customers but to the environment and the communities around us. While we work tirelessly to meet the country’s growing energy demands, we are equally committed to minimizing our environmental footprint. Over the years, we have learned that mere compliance is not enough – we need to take proactive measures to ensure that our operations remain consistently environmentally responsible.

With the Ecowatch program, we saw the potential to further green our supply and operations while complementing and completing Petron’s sustainability initiatives: from the PBR’s efforts to measure, manage, and minimize its environmental footprint to the making of Environmental Management Systems-compliant service stations. In 2024, we mark a milestone in that journey as we celebrate the 10th anniversary of the program – now called the Petron Ecowatch.

Measuring environmental performance against national and global standards. Under the program, every Petron terminal and sales office is measured against a much-enhanced rating system based on the DENR’s Industrial Ecowatch Rating System or IERS, which initially focused on assessing companies’ impact on water quality. The Petron Ecowatch went further with its goal of assessing its facilities’ environmental performances in terms of maturity of environmental management, adding more points for programs that lead to improved key environmental indicators, and even more points for continual improvement.

The rating system is essentially based on the following broad parameters:

- ✓ Level of compliance with environmental laws and regulations and their respective implementing rules and regulations, specifically:

Presidential Decree No. 1586 that established the Philippine Environmental Impact Statement (EIS) System	
Republic Act (R.A.) No. 6969 or the “Toxic Substances and Hazardous and Nuclear Wastes Control Act of 1990”	
R.A. No. 8749 or the “Philippine Clean Air Act of 1999”	
R.A. No. 9003 or the “Ecological Solid Wastes Management Act of 2000”	
R.A. No. 9275 or the “Philippine Clean Water Act of 2004”	
R.A. No. 11898 or the “Extended Producer Responsibility on Plastic Packaging Waste Act of 2022	

- ✓ The extent of facility management effort to reduce and control pollution, and to implement environmental management plans and programs to support the Company’s sustainability goals; and
- ✓ The extent of consistency and continual improvement through the years of implementation.

Beyond compliance, we align with internationally recognized standards, including the GRI Standards to ensure that our environmental responsibility is integrated with our broader societal and economic commitments.

Assessment and audit of the facilities’ environmental performance were done internally by a team of select Petron employees trained on the proper implementation of the rating procedures of the program. The team consisted of personnel from CTSG-Environment, Terminal Operations Health, Safety, Security & Environment (HSSE), and the Petron Environment Council. Each year, the team visits all our terminals to evaluate their level of adherence to the parameters set under the Petron Ecowatch program. To ensure a structured evaluation, we have developed an internal color-coded rating system that measures each terminal’s performance.

Making the grade. Over time, we have witnessed remarkable progress across all our terminals in managing their environmental impact.

Since establishing our 2014 baseline of 2.98, we have had a steady increase in ratings, culminating in an overall improvement of 5.88% in 2024 or a 97.4% increase in the environmental management and compliance rating.

Beyond the numbers, our success is driven by the dedication and hard work of our terminal teams. Their commitment to responsible leadership, operational excellence, and sustainability have been instrumental in these achievements.

Recognizing the outstanding commitment of our terminals, we introduced our highest distinction, the Hall of Fame rating for terminals that have demonstrated sustained their Platinum+ rating for two consecutive years, setting the benchmark for environmental responsibility and operational excellence. In 2024, we proudly elevated four terminals into this prestigious category -- Tacloban, Mandaue, Roxas, and Bawing – to recognize their untiring efforts to pioneer best practices, introduce innovative solutions, and integrate sustainability measures to ensure responsible operations while providing a positive impact on their host communities.

While all our terminals adhere to a unified set of environmental standards and procedures, we acknowledge that each facility faces unique challenges. Progress may, at times, be gradual. But what truly sets our teams apart is their resilience—their ability to learn from past experiences and draw inspiration from industry-leading practices. Year after year, they demonstrate that sustainability is a continuous process and a shared journey of improvement and commitment.

Along with these Hall of Fame awardees, 2024 saw the following Operations facilities progress with their color ratings:

Platinum +	Iligan, Jimenez, Subic Fuel Additives Blending Plant
Platinum	Davao, Iloilo, Joint Oil Companies Aviation Fuel Storage Plant (JOCASP), Mactan, Nasipit, New Lube Oil Blending Plant (NLOBP), Pasig, Poro, Ormoc, San Fernando, Tagoloan, Zamboanga
Gold	Bacolod, Limay, Palawan, Rosario
Silver	Mabini, Legazpi
Green	Navotas

As we navigate the complexities of our industry, including managing operational risks, adapting to external challenges, and responding to global and local developments, we understand that environmental stewardship must be an ongoing and proactive effort. This is a collective commitment shared across all our terminals and complements the sustainability initiatives of our Refinery and service stations.

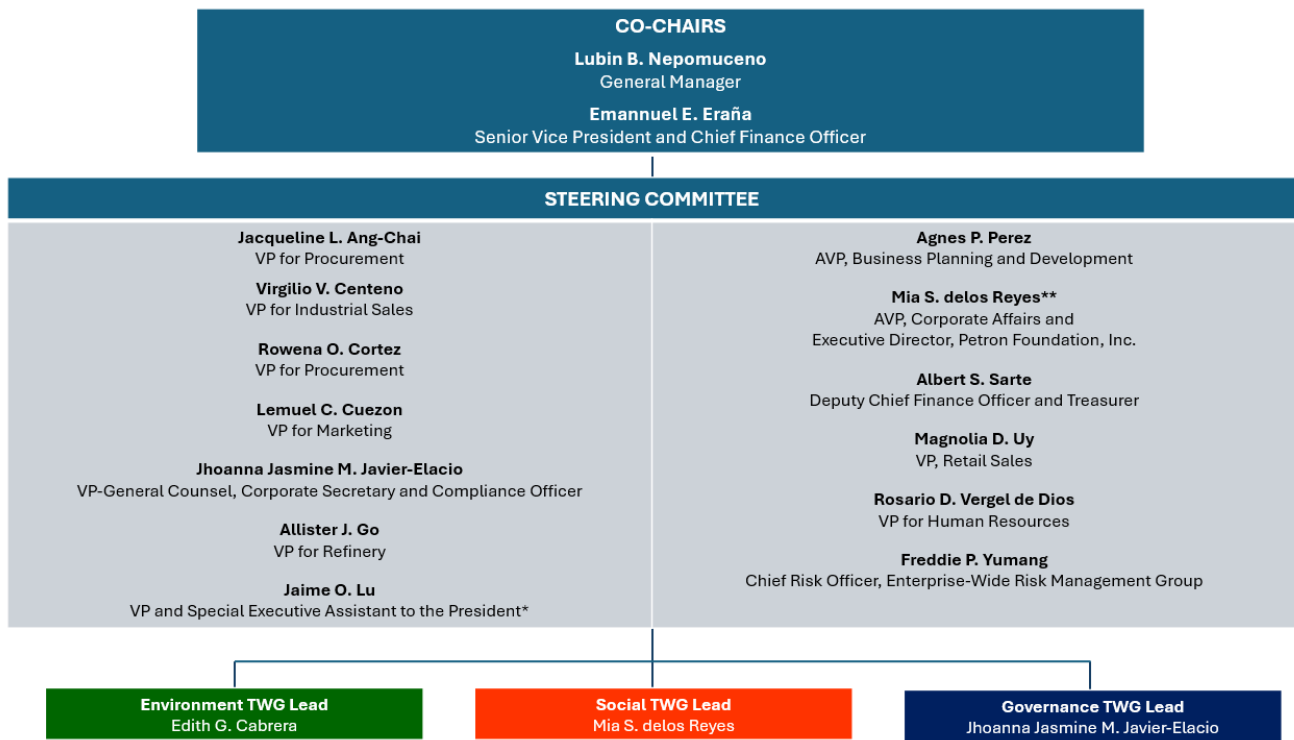

We take pride in the progress we have made as we celebrate a decade of the Petron Ecowatch program,. However, our journey does not end here. We remain committed to enhancing innovation, sustaining excellence, and upholding our responsibility to all our stakeholders. The road ahead will bring new challenges, but the strong foundation we have built over the years has prepared us to navigate these complexities with confidence. Through the Petron Ecowatch program, we stand firm in our purpose: fueling progress while uplifting the communities we serve.

Governing for Growth: Strengthening Sustainability Oversight (GRI 2-13, 2-14)

Our ESG Council’s constant guidance and strategic direction inspire us to take bold steps forward. It ensures we stay on course by embedding sustainability into management’s decision-making, aligning it with our strategic vision, and overseeing our programs and performance.

With its expansion last year, the ESG Council has strengthened cross-departmental collaboration. Led by our General Manager and Chief Finance Officer, alongside senior leaders from various units, the council provides strong leadership in driving sustainability initiatives. Dedicated heads oversee each sustainability pillar—environment, social, and governance—to ensure a holistic and integrated approach across our business.

At the operational level, the Council is composed of subject matter experts from our Technical Working Group (TWG), representing our refinery, terminals, and service stations. This structure enables seamless execution of sustainability initiatives across our operations.

*ESG TWG Overall Lead **Vice Chair

The Blueprint for Progress: Our ESG and Sustainability Framework (GRI 2-22, 2-23)

Taking this leap reflects our deepened commitment to sustainability—one that goes beyond our company to prioritize the well-being of our people and the environment. It reaffirms our legacy of nation-building, a mission we have upheld for over 90 years, while strengthening the corporate values that guide our sustainability initiatives.

Aligned with our parent company SMC’s vision of creating a “World of Good,” we anchor our efforts on three key pillars: environment, social, and governance. Our ESG Policy serves as our guiding compass toward an energy-secure and sustainable future.

ENVIRONMENTAL STEWARDSHIP	SOCIAL WELL-BEING	GOOD GOVERNANCE
<ul style="list-style-type: none">▪ Adhere to all applicable regulatory requirements aimed at minimizing the Company’s impact on the environment;▪ Effectively manage our environmental footprint with focus on reducing greenhouse gas emissions, conserving water, and managing our wastes;▪ Actively support the government’s programs on the use of clean fuel; and▪ Continually develop or embrace additional future technologies that will result in environmentally and socially beneficial offsets.	<ul style="list-style-type: none">▪ Foster a safe, healthy and decent workplace for our employees;▪ Promote a work environment that would provide opportunities for employees’ development and engagement; and▪ Improve the quality of life of our communities and external stakeholders through relevant social responsibility programs in education, environment, entrepreneurship, and health and human services.	<ul style="list-style-type: none">▪ Foster a governance structure that is founded on strong ethical standards, integrity and transparency through our ongoing commitment to all applicable legislation, regulations, and codes of conduct and practices, and exceeding such standards where possible; and▪ Ensure the long-term viability of our business by managing our risks and improving our supply chain to enhance shareholder value, contribute to national development, and the betterment of our fenceline communities.

Stakeholder Engagement and Materiality Assessment (GRI 2-29, 3-1, 3-2)

Advancing our sustainability strategy involves close and continuous collaboration with key stakeholders across various sectors. The insights we achieve through our regular engagement help refine our approach to deliver meaningful and lasting benefits. By fostering open dialogue and integrating stakeholder perspectives, we ensure our strategy remains dynamic, inclusive, and capable of driving long-term positive impact.

Stakeholder Groups	How we engage them
Shareholders	<ul style="list-style-type: none"> ▪ Annual stockholders meeting ▪ Consultations ▪ Distribution of Sustainability Reports ▪ Timely and transparent disclosures
Government and regulators	<ul style="list-style-type: none"> ▪ Dialogues and representations with both executive and legislative branches of government and relevant regulatory agencies
Industry/business groups	<ul style="list-style-type: none"> ▪ Membership in key industry associations
Consumers	<ul style="list-style-type: none"> ▪ Petron website ▪ Social media channels (Facebook, X [formerly Twitter], Instagram) ▪ Product promotions ▪ Consumer information campaigns ▪ Market research ▪ Customer service interaction through PCIC (Petron Customer Interaction Center) ▪ <i>Lakbay Alalay</i> motorist assistance
Employees	<ul style="list-style-type: none"> ▪ Onboarding sessions ▪ Learning sessions and capability-building activities ▪ Regular performance reviews ▪ Labor-management dialogues ▪ PETRONews corporate newsletter ▪ Volunteers In Action (VIA) employee volunteering program
Investors and financial institutions	<ul style="list-style-type: none"> ▪ Annual stockholders meeting ▪ Annual and quarterly financial reports and an annual sustainability report ▪ Regular submission of reports ▪ and disclosures to regulatory agencies (e.g., SEC, PSE)
Local/host communities and people's organizations	<ul style="list-style-type: none"> ▪ Annual and quarterly financial reports and an annual sustainability report ▪ Regular submission of reports and disclosures to regulatory agencies (e.g., SEC, PSE)
Academe	<ul style="list-style-type: none"> ▪ Partnership with schools through the Department of Education (DepEd) for Petron's scholarship programs
Suppliers, contractors, and third-party service providers	<ul style="list-style-type: none"> ▪ Alignment meetings ▪ Demonstration teaching and program walkthroughs ▪ Post program feedback
Civil society organizations (CSO)/ non-governmental organizations (NGO)	<ul style="list-style-type: none"> ▪ Membership in major civil society organization/non-government organization (CSO/NGO) ▪ Partnerships with like-minded organizations
Media	<ul style="list-style-type: none"> ▪ Media advisories/press releases ▪ Annual stockholders meeting

Understanding the needs of our stakeholders has provided valuable insights into the key topics that significantly impact our business. In 2022, we engaged the University of Asia and the Pacific – Center for Social Responsibility (UA&P-CSR) as an independent third-party expert to conduct our materiality assessment. UA&P-CSR employed an innovative approach that considered both Petron’s impact on financial value and its broader socio-economic environment. This aligns with global sustainability reporting standards by adopting the double materiality perspective.

As a result, Petron’s material topics are globally benchmarked, allowing our Company to remain agile in navigating the evolving ESG landscape while effectively addressing the priorities of investors and stakeholders.

Our materiality assessment process followed these key steps:

During this reporting period, UA&P-CSR engaged with the following Petron facilities to assess and discuss the Company’s 2024 ESG performance, along with relevant programs and initiatives. These sessions provided valuable insights to enhance sustainability efforts across our operations.

REFINERY

- **Petron Bataan Refinery** - Limay, Bataan

OPERATIONS

- **Petron Tacloban Terminal** - Tacloban, Leyte
- **New Lube Oil Blending Plant** - Tondo, Manila

SERVICE STATIONS

- **Petron Express Center (PEC) 1** - Marilao, Bulacan
- **Petron Km. 75 Service Station** - Malvar, Batangas

In 2024, we reported on 20 ESG topics based on our previous materiality assessment conducted in 2022. We also aligned our material topics with the United Nations Sustainable Development Goals (UN SDGs) and the Philippine Development Plan 2023-2028. Moving forward, we aim to regularly update our material topics to remain aligned with emerging trends, evolving stakeholder expectations, and the dynamic external landscape.

Amplifying Impact: Measuring Our Leap Forward

We are advancing our environmental initiatives by integrating a circular economy approach into our operations. Beyond minimizing our impact, we aim to be proactive in resource efficiency, waste repurposing, and emissions reduction through innovative solutions.

We continuously strengthen our sustainability efforts by measuring, monitoring, and mitigating emissions as part of our commitment to climate resilience. Through robust tracking and assessment, we gain deeper insights into our carbon footprint, enabling us to take decisive action to reduce greenhouse gas (GHG) emissions and enhance energy efficiency across our operations.

Responsible Material Use

GRI 3-3, 301-1, 301-2, 301-3

Our approach

The oil sector faces challenges such as the volatility of crude oil and refined petroleum product prices—amid evolving global trends. As the largest oil company in the Philippines, we remain steadfast in our commitment to responsible practices, particularly proper materials management.

Effective materials management is essential given that crude oil, our industry's primary raw material, is a non-renewable resource with the potential for future depletion. Therefore, we are dedicated to using resources responsibly and sustainably. To address these challenges, we implement a comprehensive Logistics Management Plan to ensure a stable supply of petroleum products while mitigating risks associated with price fluctuations.

Our progress

Materials used by weight or volume

In 2024, we used a total of 8,492,999.65 metric tons (MT) of non-renewable materials, including crude oil, imported fuels, raw materials, and packaging materials. During the same period, the volume of crude oil processed decreased by 5.2%. However, this decline was partially offset by a rise in finished product imports, resulting in an increase in the use of non-renewable materials.

Meanwhile, our use of renewable materials increased to 176,255.84 MT from 148,003.14 MT in 2023. These renewable materials come from the biofuel components of liquid fuels used in our facilities -- including ethanol and coco methyl ester -- as mandated by Republic Act (R.A.) No. 9367 or the "Biofuels Act of 2006". The increase in 2024 was driven by higher bioethanol purchases, which were necessary due to an increase in gasoline sales, as gasoline contains 10% bioethanol.

Materials used by weight or volume (in MT)			
Requirements	2024	2023	2022
Non-renewable materials used ¹	8,492,999.65	8,443,206.10	7,098,890.15
Renewable materials used ²	176,255.84	148,003.14	148,258.44
¹ resource that does not renew in short time periods ² material that is derived from plentiful resources that are quickly replenished by ecological cycles or agricultural process, so that the services provided by these and other linked resources are not endangered and remain available for the next generation.			

Recycled input materials used

In line with our commitment to managing both actual and potential risks and impacts, we developed our Extended Producer Responsibility (EPR) Program in 2023. This initiative focuses on reducing and recovering plastic packaging materials used in our lube oil products, aligning with the goals of R.A. No. 11898, or the "EPR Act of 2022."

Our program includes the following strategies:

- Redesigning containers to reduce weight and exploring alternative packaging materials to minimize plastic usage
- Partnering with retail stations, lube retail outlets, and distributors to collect and recover used packaging materials from consumers. Additionally, our terminals will facilitate the collection and recycling of tamper-proof seals
- Converting collected containers into plastic pellets by collaborating with plastic recycling facilities. These pellets will be blended with virgin plastic resin to manufacture new bottles with recycled plastic content
- Working with plastic waste management partners to collect and recycle post-consumer plastic, helping offset our plastic packaging footprint

Reclaimed products and their packaging materials

In 2024, we reclaimed a total of 1,032.06 MT of products and packaging materials. Petron partnered with Plastic Credit Exchange, a waste management organization with a network of waste diverters for the recycling of 1,070 MT of Rigid and Flexible plastics.

Additionally, Petron directly collected 31.6 MT of plastic materials and sent them to plastic recyclers. Of this amount:

- 3 MT were upcycled into plastic chairs and donated to a partner school in Davao; and
- 28.6 MT were recycled to produce 19.7 tons of plastic pellets and incorporated into the production of new lube containers
- Our Polypropylene Plant also recovered 2.14 MT of packaging materials from its clients for reuse.

Moving forward, we remain committed to integrating sustainability into our business operations by aligning our practices with environmental regulations and international standards. To this end, we will continue implementing environmental, safety, and quality management systems based on ISO standards to proactively address potential risks and impacts within our Refinery and fuel terminals.

Furthermore, we will seize opportunities to reduce waste, minimize environmental impact, and promote circularity in material use. These efforts will not only strengthen our Company's sustainability performance but also create value for our business partners, customers, and other stakeholders.

Efficient Energy Management

GRI 3-3, 302-1, 302-2, 302-3, 302-4, 302-5

Topic 11.1 GHG emissions

Our approach

As an oil company, we recognize that energy is essential to both our operations and broader economic progress. We aim to maintain a critical balance—optimizing efficiency while protecting ecosystems and uplifting local communities. In pursuit of this goal, we are committed to responsible energy use and continuously exploring innovative solutions. This goes beyond simply reducing consumption; we actively seek opportunities to invest in cleaner energy sources.

Our strategies focus on optimizing energy use across our operations. We prioritize investments in advanced energy-efficient lighting and initiatives that promote conservation at all levels. This commitment includes strict adherence to environmental regulations and industry standards to ensure a responsible and proactive approach to energy management.

Consistent with our objectives, we recognize the importance of cleaner energy resources. We actively implement initiatives across our Refinery, terminals, and service stations to conserve energy and minimize environmental impact. By leveraging efficient technologies and processes, we enhance sustainability in our daily operations.

A big part of the energy management program is the Refinery Solid Fuel Fired Power Plant (RSFFPP) or co-generation (cogen) plant. This facility reduces the refinery's combined scope 1 and 2 emissions with the replacement of thermal boilers by recovering and converting waste heat to produce steam for the process. At the same time, this generates electricity that provides reliable power supply to the refinery, ensuring that plant shutdowns caused by external power interruptions are readily avoidable. In the process, the plant also

enhances plant efficiency. The RSFFB Phase 3 project integrates advanced technology, including a Circulating Fluidized Bed (CFB) Boiler for efficient and clean solid fuel combustion. A heat recovery system further enhances energy conservation by capturing heat from process streams to preheat furnace feeds. Additionally, hot flue gases from furnaces are used to generate steam or heat combustion air. This dual approach improves fuel flexibility, reduces emissions, and promotes more efficient combustion practices.

Our terminals have launched a comprehensive five-year program to enhance the use of renewable energy. This initiative includes strategic measures such as installing and transitioning to LED and solar-powered lighting systems.

Our progress

Energy consumption

Our operations consumed a total of 41,508,886.88 million gigajoules (GJ) in 2024, encompassing both renewable and nonrenewable energy sources. We have recorded a decrease in energy consumption from non-renewable sources in 2024 compared to 2023 at approximately 4.7 million GJ. Improvements in our Fluidized Catalytic Cracking-2 (FCC-2) led to the decommissioning of the Direct Fired Air Heater (DFAH), which resulted in the reduction in refinery fuel consumption equivalent to 126,366 GJ. The improvement in fuel gas network also allowed maximization of fuel gas consumption of process heaters eliminating the need for supplemental fuel and operations of process boilers.

Alongside this was the reduction of steam demand of the Refinery through the Steam Leaks Abatement Initiative or Steam Watch program launched in early 2024. This program was intended to help PBR mitigate steam losses in the refinery and reduce energy wastage, conserve water and minimize economic penalties by establishing and maintaining a centralized and up-to-date database of refinery-wide steam leaks with periodic updates on vital information, such as leak locations, respective leak rates, associated penalties, root causes, and current status. By the end of 2024, we realized savings of PHP 7.63 million in avoided penalties from arrested steam leaks equivalent to 200,696 GJ Energy or 19,241 tons CO₂e reduction in the refinery. This is lower by 10.33 versus 2023 due to a decrease in volume of crude oil processed at the refinery (5.2%), reduced electricity sold by 234,776 GJ (16.8% versus 2023), and other energy efficient initiatives.

There was also a significant decrease in our electricity sold in 2024 compared to the previous year, with a reduction of 234,776 GJ. Energy consumption from renewable sources, on the other hand, showed a significant increase in 2024 compared to 2023, rising by 852.68 GJ.

These operational changes have significantly enhanced the Refinery's overall energy efficiency.

The net energy consumption is lower by 10.33% versus 2023 due to a decrease in volume of crude oil processed at the Refinery (5.2%), reduced electricity sold by 234,776 GJ (16.8% versus 2023), and other energy efficient initiatives.

For their part, 133 of our service stations have already upgraded to LED lighting, achieving around 80–90% completion this year. Three service stations also have successfully integrated solar energy, with each service station having the potential to reduce carbon emissions by up to 77 MT. The solar panels are capable of powering service station buildings, under-canopy lighting, and Treats Convenience Stores. These initiatives started in 2018 and have since resulted in the following:

- 8,184 MWH/5,829 tons CO₂e reduced for 1,057 service stations (7,743 kWh/5.52 tons CO₂e per service station) from conversion of Under Canopy Lighting to LED in 2024
- 446,504 KWH solar power generated or 318 tons CO₂e emissions avoided from Solar Panels installed at three Petron service stations

Petron Corporation 2024 Sustainability Report

As an oil company dedicated to fostering a sustainable tomorrow, we remain steadfast in our commitment to implement practices and technologies that reduce environmental impact while enhancing operational efficiency, thereby ensuring a reliable and long-term fuel supply.

Energy consumption within the organization (in GJ)			
Requirements	2024	2023	2022
Total energy consumption from non-renewable sources	40,784,475.15	45,528,188.72	41,463,853.50
Total energy consumption from renewable sources*	3,666.81	2,814.13	7169.10
Electricity sold	513,943.99	748,720.37	262,824.80
Total energy consumption within the organization (includes 1,241,589.33 GJ from flare gas burned in 2023)	41,508,886.88	46,292,863.83	42,376,468.40

Amount of reductions in energy consumption achieved as a direct result of conservation and efficiency initiatives (in GJ)			
Requirements	2024	2023	2022
Fuel	366,932.95	65,481.43	27,781.87
Electricity	3,432.67	1,232.19	493.00
Total	370,365.62	66,713.62	28,274.88

Feature Story

MANAGING OUR ENERGY TO CREATE A SMALLER CARBON FOOTPRINT

As our facility that processes crude oil into a host of petroleum products, PBR is responsible for 99% of the Company's greenhouse gas emissions and nearly 99.8% of our total energy consumption.

To address these, PBR has a dedicated Energy Engineering Department tasked to "promote an energy-efficient refinery and powerplant operations through innovative, sustainable programs and proficient technical assistance concerning Oil Loss, Utilities, Combustion Engineering and Energy Efficiency". Energy Management in PBR covers three (3) major areas: improving energy efficiency, minimizing oil loss, and optimizing utility use. The refinery continuously implements energy initiatives such as energy recovery, managing resource consumption, and enhancing fuel use in combustion processes to improve its overall energy performance, leading to reduced costs and faithful compliance with R.A. 11285 or the Energy Efficiency Act. In the process, it furthers Petron's sustainability goals, specifically in reducing energy utilization and GHG emissions.

Managing our energy streams. The refinery operates mainly on fuels and utilities. Fuel gas generated internally from its process units supply the required heat for the process furnaces and heaters. Fuel oil or LPG supplement the required fuel when fuel gas supply is lower than demand. We reduce the need to use fuel oil and LPG as alternative fuel by maximizing the use of available fuel gas, minimizing flaring loss, and efficiently operating our process heaters.

Steam and power being supplied to the refinery are internally produced via the Thermal Power Plant (TPP) and the RSFFPP, which is fueled by petcoke, a by-product from the refinery and coal. Fuel gas and liquid fuel are used in TPP. In PBR, we ensure that steam and power are being efficiently managed both from the supply and demand side. When necessary, PBR is capable of both importing power from grid and exporting power to it in excess of refinery demand.

The refinery aims to ensure efficient use of fuels and utilities and to minimize our energy losses. With efficient use of energy, we reduce our energy consumption and minimize our environmental impact such as reduction in GHG footprint.

Enhancing energy efficiency. Coming from the recent 2024 Refinery Turnaround, DFAH was decommissioned after FCC-2 was stabilized. The equipment was usually running in the past years to support FCC-2's heat requirement. Per unit design, the equipment is only required during FCC-2 start-up and thus can be decommissioned during normal operations. After a thorough review of unit operation and the implementation of necessary modifications, DFAH was successfully decommissioned in May 2024. This has resulted in annual savings of approximately 5.68 million standard cubic meters of fuel gas per year and an avoidance of some 11,745 tons of CO₂e emissions per year.

Also part of the refinery's Sustainability Roadmap is its transition to energy-efficient LED lighting to reduce energy consumption. A total of 420 conventional bulbs across the refinery have already been replaced with LED units. We are also conducting trial installations of solar-powered LED streetlights and exploring the viability of renewable-powered lighting options for future scalability.

Engaging stakeholders in energy management. In support of these main efforts, PBR is also actively engaging its stakeholders as partners in energy management through the following programs:

Energy Portal	Launched in early 2024, the Energy Portal centralizes all the latest worksheets, references, and documents related to Energy to ensure easy access by the public of the most up-to-date worksheets for energy related calculations and programs. The portal serves as the primary communication platform for Energy Engineering, facilitating collaboration and information exchange among all involved groups and stakeholders.
Fuel, Steam, Water, and Power Balances (FSWaPB)	Held one a week, this meeting aims to deliver valuable projections for fuel, steam, water, and power usage to guide refinery operations and analyze variances, enabling optimized performance. Specifically, FSWaPB: <ul style="list-style-type: none"> • Provides a data-driven framework for guiding the weekly operational performance and decision-making within the refinery to ensure proactive management of energy sources. • Analyzes deviations in fuel, steam, and power consumption to identify inefficiencies and potential areas for process optimization. • Discusses concerns or any clarifications, as well as critical items relating to the optimization.
Fuel, Utilities, Loss, and Conservation Activities (FULCA)	This monthly meeting aims to keep the Refinery informed of the progress of Energy Engineering programs. Additionally, it seeks to address challenges in implementing these initiatives and gather feedback and support from other departments to enhance program effectiveness.
Empower Change (Water & Electricity Conservation)	A monthly energy awareness campaign material that provides Refinery personnel with visually engaging & informative infographics to foster awareness and a shared understanding of energy conservation activities, ongoing projects, and refinery developments. These materials are also discussed weekly prior to the start of FSWaPB meetings.
Fuel Insights and Recommendations for Efficiency (FIRE)	A bi-monthly report designed to drive collaborative actions towards achieving efficient and sustainable furnace operation, leading to optimized performance and continuous improvement. Monitoring results are presented, and action items are agreed upon with Operations and other concerned groups on matters involving Furnace Efficiency and Utilization, Furnace Parameters, Opportunity Savings, as well as Action Items for each Furnace

PBR also has continuing and sustained initiatives to reduce energy consumption and carbon footprint.

Spent Caustic Treater Batch Operation

From a 24/7 operation, SCT started operating batchwise to save on fuel starting 2020.

IMPACT

Operating days were reduced to 190 days in 2023
Resulted to savings of 1.52 million Liters of fuel oil equivalent, translated to 4,590 ton CO₂e in 2023
Equivalent to 0.11% reduction in total refinery GHG

Cleaning of Pre-heat Exchangers

Preheat exchangers of crude distillation units need to be maintained clean and foulant-free to decrease fuel consumption of main crude furnace, saving costs and reducing emissions

IMPACT

1.53 million Liters of fuel oil equivalent saved, translated to 4,612 ton CO₂e in 2023
equivalent to a reduction of 0.12% in total refinery GHG

All told, these initiatives being spearheaded by PBR's Energy Engineering Department and implemented throughout the facility all lead to a more efficient and responsible refinery that supports Petron's purpose of driving national development and uplifting communities towards sustainable future.

Sustainable Water Management

GRI 3-3, 303-1, 303-2, 303-3, 303-4, 303-5

Topic 11.6 Water and Effluents

Our approach

Our commitment to water stewardship reflects our dedication to environmental protection and our support for local communities that depend on these resources. Effective water management and responsible effluent discharge are crucial for operational continuity, minimizing environmental impact, and maintaining our social license to operate. With increasing regulatory scrutiny and rising stakeholder expectations, proactive and transparent water management is essential across our industry. This includes reducing freshwater consumption, maximizing water reuse and recycling, and ensuring the safe treatment and discharge of effluent to protect water quality and aquatic ecosystems.

At Petron, we recognize that access to clean water is a fundamental human right, and we are committed to minimizing our impact on local water resources through initiatives such as Project CODy (in reference to Chemical Oxygen Demand) and the adoption of waterless receiving in terminals to actively reduce water consumption, maximize reuse, and ensure responsible effluent discharge. We remain focused on achieving our water reduction targets, investing in innovative water management technologies, and continuously enhancing our monitoring and reporting practices to uphold transparency and accountability in our water stewardship.

Our progress

We take proactive measures to reduce our reliance on freshwater sources, enhance wastewater treatment, and promote the recycling of water. In 2024, we strengthened these efforts by improving water efficiency, expanding the use of alternative sources, and implementing strategies to minimize our environmental impact.

Water withdrawal

In 2024, our total water withdrawal increased to 151,568.60 megaliters (ML) compared to the previous year. This rise was primarily driven by the increased utilization of seawater at our Refinery. Of the total water withdrawn, 92.87% came from infinite or non-scarce resources, such as seawater and rainwater.

We recognize that 99.99% of the total water withdrawn comes from water-stressed areas. We optimize our water sources by prioritizing seawater and rainwater harvesting over groundwater extraction. We have sustained the implementation of water conservation programs to reduce scarce water consumption, particularly groundwater. In 2024, we further improved our performance in the SMC Water for All program by reducing our scarce water consumption by 29.64% compared to our 2016 baseline, better than our 28.47% reduction performance in 2023. By optimizing our water usage, we have reduced our use of scarce water by 24.74 thousand ML since the program began. Including previous reduction efforts in 2016 of 3.86 thousand megaliters, we have reduced our scarce water use by a total of 28.60 ML.

Water withdrawal from all areas (in ML)								
Year	Surface water	Groundwater	Seawater	Rainwater	Third-party water	Total	Breakdown of total water withdrawal in megaliters according to:	
							Freshwater	Other water
2024	0	10,756.89	140,605.55	7.75	198.40	151,568.60	10,963.04	140,605.55
2023	0	10,058.74	134,968.28	10.64	692.30	145,729.96	10,761.25	134,968.70
2022	4.34	10,497.77	131,622.16	16.99	500.04	142,641.31	11,019.61	131,622.16

Water withdrawal from all areas with water stress (in ML)								
Year	Surface water	Groundwater	Seawater	Rainwater	Third-party water	Total	Breakdown of total water withdrawal in megaliters according to:	
							Freshwater	Other water
2024	0	10,754.83	140,596.94	6.71	191.68	151,550.16	10,953.22	140,596.94
2023	0	10,057.17	134,960.26	7.40	685.19	145,710.01	10,749.75	134,960.26
2022	0	10,459.85	131,615.81	12.72	493.20	142,581.58	11,019.30	131,622.16

Water discharge

Our total water discharge in 2024 reached 143,062.49 ML, reflecting an increase primarily due to higher seawater use at the Refinery. Of this amount, 142,898.07 ML was discharged into seawater, 164.28 ML into surface water, and 0.14 ML through third-party sources. In water-stressed areas, the total water discharge amounted to 143,044.60 ML, with 142,883.98 ML released into seawater and 160.48 ML into surface water.

To ensure compliance with stringent environmental standards, we have continued to enhance our wastewater treatment processes. In 2024, we upgraded wastewater treatment facilities at selected terminals and service stations, further improving treatment efficiency and compliance with the Clean Water Act. Additionally, our Refinery's Project CODy reduced wastewater generation and enabled wastewater treatment facilities to comply with more stringent effluent standards. This underscores our ongoing commitment to wastewater management improvements.

Water discharge to all areas (in ML)							
Year	Surface water	Groundwater	Seawater	Third-party water	Total	Breakdown of total water discharge in megaliters according to:	
						Freshwater	Other water
2024	164.28	0	142,898.07	0.14	143,062.49	164.42	142,898.07
2023	234.57	0	136,828.67	0.07	137,063.31	6,596.79	130,466.52
2022	155.22	0	133,834.04	0.73	135,716.65	5,997.42	127,992.56

Water discharge to all areas with water stress (in ML)							
Year	Surface water	Groundwater	Seawater	Third-party water	Total	Breakdown of total water discharge in megaliters according to:	
						Freshwater	Other water
2024	160.48	0	142,883.98	0.14	143,044.60	6,151.95	136,892.65
2023	229.74	0	136,815.57	0.07	137,045.39	6,586.89	130,458.49
2022	116.54	0	133,816.99	0.73	133,934.27	5,948.06	127,986.21

Water consumption

Our total water consumption in 2024 was 8,506.26 ML, marking a decrease from the previous year. Specifically, consumption in water-stressed areas totaled 8,505.63 ML. This reduction was primarily attributed to a lower volume of crude oil processed at the Refinery along with water conservation initiatives such as maximizing the use of recycled water and proactive replacement of Reverse Osmosis (RO) membranes for more efficient operations of RO units and reducing steam/water losses with the rectification of steam leaks via the Steam Watch program

Our Refinery and Terminals maintained strict compliance with regulatory limits and the renewal of discharge permits. Looking ahead, we remain dedicated to strengthening our water conservation and management strategies. We are actively exploring advanced water recycling technologies and expanding our rainwater harvesting infrastructure. By continuously enhancing our water efficiency initiatives, we aim to contribute to long-term water security while ensuring responsible stewardship of this essential resource.

Water consumption (in ML)			
Requirements	2024	2023	2022
Total water consumption from all areas	8,506.26	8,666.75	8,651.47
Total water consumption from all areas with water stress	8,505.63	8,664.62	8,647.46
Change in water storage	0.16	0	0

Biodiversity Conservation

GRI 3-3, 304-1, 304-2, 304-3, 304-4

Topic 11.4 Biodiversity

Our approach

Recognizing the direct and indirect impacts of our operations on ecosystems, we prioritize sustainable resource management in our business activities. We proactively take part in the preservation and restoration of local biodiversity to safeguard the natural environment given the proximity of some of our operational sites to designated protected areas.

Our initiatives include comprehensive reforestation efforts, such as mangrove and tree-planting programs, and coastal cleanup drives aimed at reducing our ecological footprint. These proactive measures not only contribute to habitat protection and restoration but also support the long-term health of the environment. To

amplify our impact, we work closely both with the DENR at the national level and with LGUs and key stakeholders at the local level to ensure the effectiveness and sustainability of our programs.

At Petron, we recognize that collaboration is a key driver of meaningful change. We are committed to partnering with other terminals to identify additional reforestation sites, while ensuring continuous engagement with local DENR offices, LGUs, and community organizations. Through these efforts, we aim to mitigate environmental impacts, enhance biodiversity conservation, and foster a sustainable future, all while balancing our operational responsibilities.

An indicator of our commitment is the remarkable performance of our Petron Terminals within our 10-year Terminal Ecowatch program, where they target to surpass governmental environmental compliance standards. Our facilities are tasked with integrating innovative practices to reduce carbon emissions, optimizing energy efficiency, and effectively managing pollutants while adopting circular economy principles and activities that help preserve nearby natural habitats and their flora and fauna. These initiatives are designed to enhance operational efficiency, contribute to a safer work environment, and preserve critical ecosystems to reinforce our commitment to sustainability and the well-being of the communities we serve.

Our progress

We acknowledge the critical importance of our operations within the Sarangani Bay Protected Seascape in Bawing, General Santos City, particularly concerning the potential environmental risks associated with pollution from maritime activities and our fuel terminal operations. In response, we commit to mitigating the environmental impact of our Bawing Terminal activities.

We have instituted proactive measures which include the systematic maintenance and continuous monitoring of engineered coral domes installed along the Bawing Terminal Pier. For three consecutive years, we have been conducting weekly shoreline cleaning and monitoring initiatives. Furthermore, we are undertaking the rehabilitation of the terminal’s perimeter fencing and implementing robust shoreline protection measures. These initiatives reflect our dedication to enhancing our defenses against potential pollution incidents and ensuring the sustainability of the surrounding marine environment.

Operational sites owned, leased, managed in, or adjacent to, protected areas and areas of high biodiversity value outside protected areas			
Type of Operation	Location	Name of Protected Area	Protection Status
Sales Office	Amlan, Negros Oriental	Tañon Strait Protected Seascape	• Protected under National Integrated Protected Areas System (NIPAS) • International Union for Conservation of Nature (IUCN) Category V
Fuel Terminal	Bawing, General Santos City	Saranggani Bay Protected Seascape	

In 2024, our personnel, together with volunteers from Refinery and Terminal Operations, again did their share to enhance environmental sustainability through the planting of over 36,700 tree seedlings and mangrove propagules. This initiative aligned with the observance of Earth Month, Environment Month, and International Coastal Cleanup Day.

In 2022, we initiated our habitat restoration and protection initiative by safeguarding an initial area of 2.137 hectares. By 2023, the scope of this initiative expanded significantly to cover 57 hectares, which continued in 2024. The program, which commenced in two municipalities, has since scaled to five: Bawing in General

Santos City; Tagoloan in Misamis Oriental; Hagonoy in Davao del Sur; Ivisan in Roxas City; and Obando in Bulacan.

Habitats protected or restored						
Location	Bawing, General Santos City	Tagoloan, Misamis Oriental	Hagonoy, Davao del Sur	Ivisan, Roxas City	Obando, Bulacan	Total
2024						
Size (in hectares)	1	1	20	25	10	57
Status	5,395 mangrove propagules planted	800 fruit and hardwood trees planted	12,000 mangrove propagules planted	31,250 mangrove propagules planted	On-going site preparation and nursery establishment	
2023						
Size (in hectares)	1	1	20	25	10	57
Status	5,395 mangrove propagules planted	800 fruit and hardwood trees planted	12,000 mangrove propagules planted	31,250 mangrove propagules planted	On-going site preparation and nursery establishment	
2022						
Size (in hectares)	1	1	-	-	-	2.137
Status	500 mangrove propagules planted	150 seedlings and bamboo				

In 2024, our operations recorded no significant adverse impacts on local biodiversity, with no species reported as being directly or indirectly affected. The extent of the impacts observed was confined strictly to the immediate vicinity of the terminals. These impacts were determined to be short-term in nature, with no irreversible effects identified—underscoring our focus on maintaining ecological stability and aligning with our broader sustainability and biodiversity conservation goals.

Integrating climate risks into the Business Continuity Plan for the Bawing Terminal is a strategic measure to mitigate the impacts of climate change and support biodiversity conservation efforts. As part of this commitment, we have prioritized mangrove reforestation in Barangay Minanga, Buayan, General Santos. During the 2023 and 2024 planting seasons, a total of 43,250 mangrove propagules and seedlings were successfully planted, in accordance with the Work and Financial Plan (WFP) designated for each site.

Moreover, Petron’s "Puno ng Buhay" program continues to advance mangrove restoration in Abucay, Bataan, as part of our efforts to strengthen environmental conservation and community resilience. In collaboration with the Abucay LGU, DENR, and local stakeholders, the initiative restores coastal ecosystems, enhances biodiversity, and provides sustainable livelihoods for fisherfolk. Our efforts include expanding mangrove forests, establishing seedling nurseries, and fostering community engagement, reinforcing Petron’s commitment to sustainability.

Over the past year, the project achieved a 70% mangrove survival rate, reflecting improved planting techniques and community dedication. Biodiversity gains were evident, with fishermen reporting increased

and more diverse fish populations, while strengthened coastal defenses underscored the initiative's impact. Through DENR's Project TRANSFORM, government-private sector collaboration engaged 400 fisherfolk in restoration efforts. Despite the occurrence of typhoons, red tides, and resource constraints, the initiative adapts through enhanced funding, capacity-building, and scientific assessments. The annual meeting, scheduled every December, facilitated discussions on challenges and future strategies.

Looking ahead, the program will emphasize comprehensive mangrove profiling for better monitoring and eco-tourism development. Addressing red tide, pest infestations, and other ecological threats remains a priority, with DENR and environmental experts playing a key role. Petron's continued financial support, combined with LGU expertise, will drive sustainability efforts. Our workshops and feedback mechanisms will maintain community engagement, fostering climate resilience and long-term socio-economic benefits. The 2024 progress reflects a strategic, community-driven approach to coastal resilience and demonstrate the power of partnerships in safeguarding vital ecosystems.

Climate Resilience

GRI 3-3, 302-3, 305-1, 305-2, 305-3, 305-4, 305-5, 305-6, 305-7

Topic 11.1 GHG emissions

Topic 11.2 Climate adaptation, resilience, and transition

Topic 11.3 Air emissions

Our approach

The growing urgency to address climate change is reshaping the socio-economic landscape, including the business sector. Emissions from the oil and gas industry contribute to GHG accumulation, driving climate-related impacts such as rising temperatures, shifting weather patterns, and more frequent extreme weather events. These changes disrupt livelihoods and economic growth, posing significant challenges to communities. As a key player in the oil sector, we acknowledge the direct impact of our operations on the environment and the communities we serve. This underscores our commitment to aligning with global climate action goals and integrating sustainable practices into our operations.

For Petron, addressing emissions is both a responsibility and a strategic imperative for remaining resilient and competitive in a transitioning low-carbon economy. In line with our commitments, we continue to prioritize initiatives that reduce GHG emissions, including improving energy efficiency across our facilities, advancing renewable energy integration, and supporting nature-based solutions like reforestation. These actions reinforce our dedication to minimizing our environmental footprint while ensuring long-term operational sustainability.

We are continuously embedding climate-conscious strategies into our business processes, focusing on carbon sequestration, conservation, and substitution. As part of this commitment, we have undertaken mangrove reforestation initiatives as a key carbon sequestration strategy, alongside tree-planting campaigns and other environmental efforts. These collective actions not only help reduce our carbon footprint but also enhance biodiversity and strengthen key ecosystems.

In line with our climate goals, we are committed to reducing our reliance on fossil fuels by expanding the role of renewable energy in our energy mix. As part of this effort, we are increasing the use of solar power across our facilities, including our refinery, terminals, and service stations. Integrating renewable energy sources not only lowers the carbon intensity of our operations but also strengthens our long-term sustainability objectives.

Our refinery in Bataan remains at the forefront of our emission reduction efforts. Through continuous technological advancements and process optimization, we have achieved significant reductions in flue gas emissions and enhanced waste heat recovery systems. These initiatives align with both national and international environmental standards, contributing to lower emissions across our operations.

At our Terminals, we continue to implement measures to reduce fugitive emissions, improve fuel efficiency, and uphold the highest levels of safety and environmental stewardship. This includes regular monitoring of emission levels and the implementation of corrective actions as necessary.

We are also enhancing emission management at our service stations by actively exploring the introduction of cleaner fuel options, such as low-sulfur fuels, and adopting energy-efficient practices. These efforts help minimize the environmental impact of our service stations while supporting the transition to more sustainable fuel solutions. As the world moves toward more cleaner energy solutions, we are also making our strides to support the shift to sustainable mobility.

Our progress

Direct (Scope 1) GHG emissions and Energy indirect (Scope 2) GHG emissions

In 2024, our total GHG emissions amounted to 3,530,341.34 tons of carbon dioxide equivalent (tCO₂e). Our Scope 1 emissions totaled 3,491,360.78 tCO₂e, reflecting an 11.93% decrease from our 2023-reported emissions. This reduction was primarily driven by operational efficiencies at our Refinery, including enhanced process optimization and fuel management strategies that lowered overall fuel consumption.

Meanwhile, our Scope 2 emissions had a significant reduction of 26.86%, dropping from 53,293.25 tCO₂e in 2023 to 38,987.93 tCO₂e in 2024. This was largely due to our continued shift towards self-sustained energy generation, made possible by the full integration of our Phase 3 co-generation facility. This facility further minimized our reliance on imported electricity, allowing us to optimize energy use within our operations. Additionally, the expansion of solar-powered lighting at our terminals and facilities contributed to reducing our electricity demand.

Moving forward, we remain committed to refining our sustainability strategies. By investing in cleaner technologies, optimizing energy use, and working closely with our suppliers and customers, we aim to make further strides in reducing our carbon footprint while ensuring operational efficiency.

Scope 1 and 2 GHG emissions (in MT, CO ₂ e)			
Requirements	2024	2023	2022
Gross Direct (Scope 1)	3,491,360.78	3,964,260.97	3,561,286
Gross location-based energy indirect (Scope 2)	38,987.93	53,293.25	64,992
Total GHG Emissions	3,530,348.71	4,017,554.22	3,626,278
Biogenic CO ₂ emissions	122.65	152.65	503.80

Energy and GHG emissions intensity and GHG emissions reduction

Energy intensity			
Facility	2024	2023	2022

Petron Corporation 2024 Sustainability Report

Refinery	419 GJ / MB Crude Processed	454 GJ / MB Crude Processed	497 GJ / MB Crude Processed
Co-Generation Facility	3.16 GJ / MWH	3.05 GJ / MWH	3.22 GJ / MWH
Integrated (Refinery + Co-Generation Facility)	649 GJ / MB Crude Processed	684 GJ / MB Crude Processed	717 GJ / MB Crude Processed

GHG emissions intensity			
Facility	2024	2023	2022
Refinery	27.08 Tons/MB Crude Processed	30.42 TCO ₂ e / MB Crude Processed	33.8 TCO ₂ e / MB Crude Processed
Co-Generation Facility	0.321 Tons/MWH	0.31 T CO ₂ e/MWH	0.34 T CO ₂ e/MWH
Integrated (Refinery + Co-Generation Facility)	50.49 TCO ₂ e / MB Crude Processed	54.01 TCO ₂ e / MB Crude Processed	58.1 TCO ₂ e / MB Crude Processed

Our continued focus on energy efficiency has led to a further reduction in energy intensity. In 2024, the Refinery's energy intensity improved to 419 GJ/MB of Crude Processed, down from 454 GJ/MB in 2023. The Co-Generation Facility achieved an energy intensity of 3.16 GJ/MWh, contributing to a combined energy intensity (Refinery + Co-Generation Facility) of 649 GJ/MB of Crude Processed.

A key factor in this progress was the commissioning of a more efficient co-generation facility in Phase 3, which replaced the refinery's thermal power plant. This facility simultaneously generates both steam and power, producing high-pressure steam at 1,800 psi—significantly higher than the previous system's 600 psi. Additionally, it optimizes energy use by repurposing excess low-pressure, low-temperature steam to preheat water, thereby reducing the fuel required for steam generation. These advancements not only enhance energy efficiency but also contribute to lower GHG emissions from fuel combustion.

In 2024, we have continuously reduced our GHG emissions intensity. Our Refinery's emissions intensity dropped to 27.08 TCO₂e/MB Crude Processed, a significant improvement from 30.42 TCO₂e/MB Crude Processed in 2023. This marks a 10.98% reduction year-over-year. Similarly, the intensity for our integrated facilities went down by 6.5%, further underscoring our continued efforts to optimize energy use and implement cleaner technologies.

Our Co-Generation Facility recorded a slight uptick of 0.321 TCO₂e/MW in emissions intensity, an increase of 3.5% compared to the previous year, owing to lower utilization of the power plant. While our integrated emissions data is still being assessed, we anticipate a continued downward trend, reflecting the effectiveness of our sustainability strategies in driving operational efficiencies and lowering our carbon footprint.

This progress is the result of several key initiatives, including enhanced energy efficiency measures, increased use of lower-carbon fuels, and process optimizations that have allowed us to lower our fuel consumption and operate more sustainably. By leveraging advanced monitoring systems and upgrading our infrastructure, we have significantly improved our ability to track, manage, and reduce emissions across our operations.

Emissions of ozone-depleting substances (ODS), nitrogen oxides (NOx), sulfur oxides (SOx), and other significant air emissions

We remain committed to strict compliance with the Philippine Clean Air Act (R.A. 8749) and continue to implement stringent air quality control measures across our operations. As part of our initiatives, we conduct regular third-party emissions testing to ensure adherence to environmental regulations, and our results consistently meet the required standards.

In 2024, our emissions of nitrogen oxides (NOx) and sulfur oxides (SOx) showed notable reductions compared to the previous year. NOx emissions decreased significantly from 1,546.68 MT in 2023 to 963.53 MT in 2024. Similarly, SOx emissions declined from 15,341.90 MT in 2023 to 11,177.31 MT in 2024. This improvement can be attributed to improved availability of Sulfur Recovery Units that resulted to lower acid gas flaring.

Our emissions of particulate matter (PM), meanwhile, rose from 159.17 MT in 2023 to 257.64 MT in 2024. While this increase is noted, we are actively managing it through continuous monitoring and control measures to minimize particulate dispersion. Additionally, air conditioning units in our offices use ozone-depleting substances (ODS) solely as refrigerants, generating negligible fugitive emissions.

Emissions of ozone-depleting substances (ODS), nitrogen oxides (NOx), sulfur oxides (SOx), and other significant air emissions (in MT)			
Requirements	2024	2023	2022
NOx	963.53	1,546.68	1,886.31
SOx	11,177.31	15,341.90	9,334.00
Persistent organic pollutants (POP)	0	0	0
Volatile organic compounds (VOC)	0	Not being measured	Not being measured
Hazardous air pollutants (HAP)	0	Not being measured	Not being measured
Particulate matter (PM)	257.64	159.17	444.83

Fueling an Energy-Efficient Future

In 2024, we inaugurated our first Electric Vehicle (EV) Charging Station, located at the Petron Express Center (PEC 1) along the northbound side of NLEX in Marilao, Bulacan. This premier EV charger delivers an output of 60 kilowatts through CCS2 and CHAdeMO compatible connectors, generally enabling a full charge in under two hours. This innovation not only supports the growing demand for EV infrastructure in the Philippines but also redefines energy consumption practices at service stations. With Petron’s extensive retail network, we envision providing accessible and convenient EV charging infrastructure for our communities, making clean transport a feasible option. Petron currently has a partnership with auto giant BMW to install AC EV Chargers in selected expressway stations. Particularly, our PEC 2 Expressway station in Balagtas, Bulacan has two operational BMW 22 KW AC EV chargers.

Moreover, we contribute to broader goals of reducing carbon emissions and mitigating risks associated with climate change. In doing so, we also enhance our financial value through achieving cost savings and expanding our services to accommodate the dynamic shift in consumer preferences, allowing us to proactively respond to emerging industry trends.

Feature Story

PUNO NG BUHAY: Effectively Measuring and Managing our Environmental Footprint

“Puno” translated in Filipino can mean either of the two: full, or tree. Thus Petron’s reforestation program PUNO NG BUHAY is fittingly termed: the mangroves and trees we plant are life-giving, life-saving, and life-nurturing, as they provide the lungs for our planet to breathe better, absorb the carbon that fills the air, and provide food, shelter, and clothing – all of life’s essentials.

For Petron, Puno ng Buhay takes on a greater sense of importance as we look to reforestation to help us minimize our environmental footprint while supporting our broader commitment to climate change mitigation. Since 2016, we have been partnering with our stakeholders in communities where we are present to identify areas for us to plant trees. Since then, our collaboration with the DENR, local governments, and people’s organizations has given us a total of 55 hectares in Luzon, Visayas, and Mindanao. We are not limited to just planting the propagules and seedlings, but to also ensure their protection and, where possible, expand areas for reforestation.

Vital to this task is ensuring that we put the science behind our reforestation efforts. Throughout 2024, we laid the groundwork to engage the University of the Philippines Los Baños-College of Forestry and Natural Resources (UPLB-CFNR), through the UPLB Foundation Inc. in a five-year partnership with the goal of quantifying the carbon sequestration (C-sequestration) rates at our reforestation sites. Drawing on UPLB-CFNR’s expertise in Forest Carbon Analysis, GIS/Remote Sensing, and Mangrove Silviculture, the initiative will establish a baseline inventory of plant species in selected locations across the provinces of Davao, Roxas, and Bulacan, with the first C-sequestration report expected by late 2025. The processed data will then be submitted to the DENR for certification through their Carbon Accounting Verification and Certification System (CAVCS). This certification not only validates Petron’s carbon sequestration efforts but also enhances the credibility of our environmental initiatives, as this will also allow us to better evaluate our sustainability performance and further refine our reforestation strategies and targets.

The partnership with UPLB-CFNR is more than just a strategic collaboration; it is a vision for the future – we are also tapping into their expertise to identify more potential forest sites (coastal and upland), such as in Bataan, to expand and improve our GHG reduction goals and integrate environmental resilience into our operational planning.

Waste Circularity

GRI 3-3, 306-1, 306-2, 306-3, 306-4, 306-5

Topic 11.5 Waste

Topic 11.8 Asset integrity and critical incident management

Our approach

Optimizing waste management enhances operational efficiency and ensures regulatory compliance. We are committed to reducing waste generation and strengthening our waste recovery efforts. Recognizing that rapid waste accumulation can disrupt operations and impact the well-being of neighboring communities, we prioritize efficient waste management as a core aspect of our sustainability strategy. Despite our extensive operational scale, we implement initiatives to minimize waste output, prevent environmental degradation, and promote the health and development of surrounding communities.

Our commitment to waste reduction extends beyond our internal operations through strict adherence to our "no single-use plastic" policy. This initiative has significantly reduced the environmental impact associated with disposable plastics across our facilities. Our recycling initiatives further support sustainability by repurposing materials such as tires, plastic bottles, and drums into plant pots, promoting sustainable gardening and landscaping within our sites. Additionally, we enhance our concrete mix for non-load-bearing pavement by integrating shredded waste and plastic seals, demonstrating our dedication to circular economy principles. Each of our operational sites features Material Recovery Facilities (MRFs) for the temporary staging of segregated solid waste, alongside compost pits that utilize organic waste for gardening purposes. Effective waste segregation plays a crucial role in strengthening our overall waste management strategy, ensuring compliance with environmental regulations while fostering responsible resource utilization. Beyond our facilities, we actively participate in coastal clean-up campaigns, reinforcing our commitment to reducing marine pollution and protecting biodiversity in our surrounding communities.

Responsible hazardous waste management is imperative to our efforts, particularly at our Refinery, where most of our hazardous waste is generated. Through our Refinery, we have implemented a dedicated program to recover spent materials for use as fuel in our power plant, reducing waste while optimizing resource efficiency. Project Solhaze further strengthens our waste management approach by analyzing hazardous waste streams and identifying reduction opportunities. Key initiatives under this program include dewatering waste sludge to reduce volume, optimizing the phenolic caustic treatment unit to eliminate off-site disposal, and repurposing oily sludge in the delayed coker unit. Additionally, we continue to enhance hazardous waste management practices to improve operational efficiency and minimize environmental impact.

Our progress

Waste generated

In 2024, our waste generation totaled 15,149.20 MT, encompassing both hazardous and non-hazardous waste, and reflects an increase compared to 2023. The increase in hazardous waste generation is attributable to the refinery turn-around, which generated non-recoverable waste oil. The hazardous waste generated by our operations consists of waste oily sludge and oil contaminated. In contrast, spent materials primarily contribute to our non-hazardous waste. For other waste types, there have been no significant changes in the annual rates of waste generation.

Waste generated (in MT)			
Requirements	2024	2023	2022
Hazardous Waste	11,999.36	4,584.34	7,453.78
Non-hazardous Waste	3,149.84	2,843.91	4,426.39
Total	15,149.20	7,428.25	11,880.17

Waste diverted from disposal and waste directed to proposal

While the amount of waste generation has drastically increased, we took a proactive stance in diverting hazardous and non-hazardous waste from disposal through our recycling initiatives. In 2024, 3,833 MT of hazardous waste were diverted from disposal. The disposal costs for hazardous waste represent a significant portion of our total waste management expenditure. Our ongoing initiatives at the Refinery yielded considerable cost savings, estimated at approximately PHP 20.85 million in 2024. For non-hazardous waste, we successfully diverted 394.37 MT of non-hazardous waste generated from disposal.

Waste diverted from disposal by recovery operation (in MT)			
	Onsite	Offsite	Total
Hazardous Waste			
Preparation for reuse	0	56	56
Recycling	3,777	0	3,777

Feature Story

Elevating Circular Economy Practices in Our New Lube Oil Blending Plant

At Petron, sustainability is an evolving commitment to reducing environmental impact while enhancing operational efficiency. One of our facilities, the New Lube Oil Blending Plant (NLOBP), embodies this vision by integrating responsible resource utilization, waste minimization, and energy efficiency into its state-of-the-art design. Through innovative production processes and circular economy principles, NLOBP underscores our dedication to a more sustainable future.

At the heart of NLOBP is an integrated approach that prioritizes reuse, recycling, and resource efficiency. Empty drums previously used for additives and raw materials are reconditioned and reused, significantly cutting down the demand for virgin raw materials while reducing our carbon footprint. By classifying drums into Class A and Class B for reconditioning or recycling, we reinforce our commitment to circularity. Additionally, carton boxes from the delivery of our new lube containers are returned to our suppliers for reuse. Our efforts in packaging sustainability continue to advance with lightweight container designs, stand-up pouches, and the use of post-consumer resins (PCRs), aligning with the EPR Law. We have set a bold target in our five-year roadmap, aiming for an 80% reduction in plastic packaging footprint by 2028.

The Petron Ecowatch Program plays a critical role in monitoring and improving environmental performance across our facilities. By tracking key metrics such as CO₂ absorption, wastewater reduction, and recycling rates, we ensure our sustainability targets are met while continuously refining best practices. This initiative also strengthens our compliance with the EPR Law, reinforcing Petron's leadership in corporate environmental responsibility.

Beyond waste reduction and recycling, NLOBP has been designed to optimize production processes, reduce costs, and improve efficiency. The Simultaneous Metering Blending (SMB) system enhances precision in blending operations, preventing material waste and ensuring consistent product quality. Automated filling lines and robotics streamline operations by reducing labor-intensive tasks, further minimizing the plant's environmental footprint.

Like any large-scale sustainability initiative, implementing programs in NLOBP has come with challenges, particularly in recycling processes and stakeholder engagement. However, we have proactively addressed these issues through targeted education programs, community engagement efforts, and continuous process optimization. By maintaining transparency and fostering collaboration, we continue to strengthen our commitment to sustainable business practices.

Looking ahead, we remain steadfast in expanding our sustainability initiatives. By increasing the integration of recycled materials across our operations and continuously refining our environmental strategies, we are well-positioned to achieve our long-term sustainability goals. Through innovation, resource efficiency, and responsible production, we are setting new benchmarks in environmental stewardship. By investing in sustainable technologies and industry-leading best practices, we reaffirm our ambition in energy sustainability, driving meaningful progress toward a greener future.

DEEPENING OUR IMPACT ON SOCIAL RESPONSIBILITY

Every step we take brings us closer to a more sustainable and prosperous future. At the heart of this progress are our employees -- the driving force behind our success— bringing dedication, expertise, and a shared vision to everything we do. Their collective efforts not only fuel national growth but also create lasting value for our company and the broader socio-economic landscape.

This journey is not ours alone. By strengthening our partnerships with stakeholders, we expand our impact, championing a collaborative agenda rooted in resilience and inclusive development. Together, we move forward—toward a future shaped by innovation, excellence, and shared success.

Workplace Excellence

GRI 2-7, 2-8, 3-3, 401-1, 401-2, 401-3

Topic 11.10 Employment practices

Topic 11.11 Non-discrimination and equal opportunity

Our approach

As we aim to be the employer of choice in the oil industry, we take immense pride in upholding the highest employment standards. Our commitment extends beyond compliance, offering competitive compensation and benefits that exceed mandatory government requirements—reinforcing our dedication to employee well-being. We prioritize excellence in talent selection and foster an environment where our workforce can grow, thrive, and succeed.

Our Human Resources Management Department (HRMD) leads strategic talent attraction initiatives, utilizing rigorous screening processes to identify candidates who not only meet job requirements but also align with our company’s culture and values. We integrate human rights principles into our HR policies, ensuring a fair, inclusive, and supportive workplace that safeguards employee welfare.

We believe open communication is essential to a strong and cohesive work environment. Employees are encouraged to voice their concerns in a secure and supportive setting. Our Labor Relations Officer and Legal Team handle workplace matters with professionalism, ensuring due process and adherence to company policies.

To enhance employee engagement, we leverage various evaluation tools, including learning assessments, program reviews, and annual performance appraisals. These mechanisms align individual achievements with company goals while providing continuous feedback through one-on-one meetings between staff and supervisors. We systematically document employee feedback and use it to refine policies and programs, driving continuous improvement.

We are committed to upholding General Labor Standards in collaboration with our business partners, including third-party service providers (TPSPs). Regular labor compliance audits verify adherence to labor laws, while the Department of Labor and Employment (DOLE) wage orders issued in 2023 are promptly implemented across all affected terminals and offices.

By fostering a culture of excellence, fairness, and continuous growth, we strengthen our workforce and build a sustainable future—one where our employees and stakeholders thrive together.

Our progress

Our platform in the industry allows us to work with employees from different backgrounds and locations nationwide. As of 2024, we contracted with TPSP a total of 4,112 employees and 26 direct hires for security, utility, plant maintenance and repair, and janitorial staff.

We engage TPSPs on a project-by-project basis, depending on the expertise required for our operations. Nationwide, we have an average of 37 TPSP employees in the Refinery, plant, and facility every month, depending on the project. They can be assigned to ground maintenance and repair in terminals/depots at the Refinery, as well as for utility, janitorial, mailing, or security services.

Moreover, we employed 18 consultants and engaged 25 project hires, whose work is controlled by our Company, but not our employees.

Benefits provided to full-time employees that are not provided to temporary or part-time employees

Beyond the required benefits by the government, we are proud of our provided comprehensive benefits package to our full-time employees that covers healthcare, retirement plans, and leave options. This showcases our commitment to prioritizing employee well-being in the endeavors of Petron’s human capital development.

- Life, Accident, and Corporate Travel
- Group Health Care Plan
- Permanent Disability
- Maternity, Paternity, and Solo Parent Leaves
- Retirement benefits

Parental leave

Our Company ensures compliance with relevant laws and regulations concerning parental leave, which mandate 105 days for female workers and seven days for male workers. All our employees are entitled to parental leave, and a total of 110 availed of this benefit in 2024. For this reporting period, we have a 100% return to work rate and 87.72% retention rate for employees who took parental leave in 2024. These reflect our dedication to cultivate not only the professional development of our employees but also allowing them to prioritize their personal and family development.

Requirement	Male	Female
Total number of employees that were entitled to parental leave	1,492	699
Total number of employees that took parental leave	72	38
Total number of employees that returned to work in the reporting period after parental leave ended	48	34
Total number of employees that returned to work after parental leave ended that were still employed 12 months after their return to work	57	43
Total number of employees due to return to work after taking parental leave	48	34

Feature Story

Women Engineers Driving Innovation

Scaling a 100-meter refinery structure is no easy feat, but for Charlotte Louise Egos, a Petron engineer, it is just another day at work. In a traditionally male-dominated industry, women at Petron are breaking barriers, proving that gender is no obstacle to success. In 2024, we continue to champion diversity and inclusion, empowering women engineers to thrive in an environment that values skills, innovation, and equal opportunities.

Our commitment to diversity goes beyond words—it is embedded in action. We foster a workplace where gender equality, empowerment, and community engagement are not just encouraged but celebrated. Particularly in the traditionally male-dominated work environment of the refinery, 121 women comprise its 879-strong workforce. Female engineers continued to be a regular, if not growing presence, in PBR, with 84 or 9.6% of the total complement of engineers working in refinery's various process units and operating facilities. This commitment is reflected in the experiences of our talented female engineers, each of whom has a unique story of resilience, achievement, and ambition.

Charlotte's journey into engineering was inspired by her brother, sparking her passion for the field. *"For women, the question often becomes what type of engineering? Petron has shown me there are no limits,"* she shares. Her experience inspecting a 100-meter structure at PBR tested both her physical and mental resilience, reinforcing her belief that women can excel in this field. *"It's rewarding to see what I'm capable of,"* she adds. Petron's support extends beyond the workplace, fostering a culture of encouragement and shared success.

For Ayra Patricia Palad, an Environmental Engineer, joining Petron was not just a career move—it was a calling. *"Even the smallest efforts make a greater impact on the people around us,"* she says. Her passion for environmental sustainability fuels her work, knowing that her contributions at Petron drive meaningful change. While acknowledging the challenges of working in a male-dominated industry, she highlights how Petron has provided her with the support and opportunities to excel. *"Petron provides equal opportunities for all and evaluates capabilities based on skills and performance, not gender,"* she affirms.

Aira May de Rosas, an OPEX Engineer, shares how Petron's inclusive culture helped her overcome initial doubts. At Petron, gender is never a barrier—she is treated as an equal by her colleagues. *"It is fulfilling to see impactful proposals receive funding,"* Aira says, emphasizing that empowerment extends beyond professional growth; it enables individuals to turn aspirations into tangible achievements. Though working alongside experienced maintenance professionals was initially daunting, her enthusiasm to learn and improve pushed her forward. She expresses her gratitude for Petron's scholarship program, which played a crucial role in supporting her education and shaping her career.

Similarly, Charmaine Hortado, a Process Engineer, was inspired by her father's engineering career and pursued the field to tackle real-world challenges. *"Solving current issues at work is what makes this job rewarding,"* she explains. Charmaine never felt limited by her gender; instead, she credits Petron's supportive environment for building her confidence and career growth. Fueled by passion and opportunity, she is focused on achieving even greater milestones in her field.

Despite the progress made, breaking barriers in engineering remains an ongoing effort. Maridil Joy Isidro, a Tulong Aral ng Petron scholar from grade school to college, underscores the importance of focusing on skills rather than gender. *"It's about how you think and troubleshoot problems,"* she says, adding that diversity fosters innovation and drives progress in industries traditionally dominated by men. Thriving in this field requires cementing one's presence and believing in the ability of women to achieve the same successes as men.

Petron understands that diversity is more than just representation, it is integral to business success. Embracing diversity fosters innovation, enhances problem-solving, and improves operational efficiency—key drivers of our company's growth. To reinforce this commitment, we actively engage with our female engineers by celebrating International Women's Day and promoting increased representation in leadership roles across technical services, operations, and maintenance. These efforts reflect our dedication to continuous improvement and empowering women at all levels of the organization.

Petron Corporation 2024 Sustainability Report

As we look to the future, the stories of these women serve as both inspiration and proof that inclusion drives progress. *"Wag matakot, kaya ng lalaki, kaya mo naman"* (*"Don't be afraid—what a man can do, you can do too"*), Maridil asserts. Their journeys, fueled by Petron's support and their own determination, represent a shift toward a more inclusive industry. Petron's sustainability agenda is not just a slogan—it is a commitment to action, ensuring that the engineering landscape continues to evolve, one empowered woman at a time.

Strong Labor-Management Relations

GRI 2-30, 3-3, 402-1

Topic 11.7 Closure and Rehabilitation

Topic 11.10 Employment practices

Our approach

Effective labor-management relations are essential to our operational success and the creation of a cooperative workplace. We cultivate a culture of trust and respect that enhances productivity and innovation by fostering open communication and employee engagement. Encouraging employees to participate in decision-making ensures their concerns are heard and addressed proactively, leading to higher job satisfaction and retention.

Strong labor-management relations not only optimize internal operations but also contribute to the overall stability of the oil sector. This stability is vital because it directly impacts local economies and maintains investor confidence. Through collaboration, we effectively balance operational demands while maintaining a firm commitment to safety, security, and environmental standards. This approach strengthens our market position and reinforces our commitment to sustainable growth and responsible corporate governance.

To support a harmonious and efficient work environment, we have implemented robust mechanisms for communication and grievance resolution. These efforts align with the labor standards set by DOLE and adhere to global best practices in labor relations.

At Refinery, we conduct regular labor-management meetings to address workforce concerns collaboratively. Focus group discussions and team-building activities are organized to foster teamwork and enhance operational efficiency. Our training programs are also tailored to equip refinery workers with the latest industry advancements and reinforce safety protocols.

In our Terminals, we leverage platforms such as PETHUB and Microsoft (MS) Teams to facilitate clear and transparent communication. These tools enable efficient dissemination of operational updates, safety guidelines, and company initiatives. Regular inter-departmental meetings further ensure the alignment of objectives and the proactive resolution of potential issues.

We promote we promote a strong sense of belonging and purpose among employees through community-based engagement initiatives across our service station network. Regular check-ins between station operators and management ensure that frontline staff members' concerns are promptly addressed. We also conduct training programs focused on customer service excellence and workplace safety to enhance service quality and employee well-being.

To further strengthen communication between management and employees, we have invested in various digital platforms such as HRMDListens email, ExchangeAdmin, Viber groups, and MS Teams. These channels streamline information sharing and provide employees with accessible avenues to voice concerns or suggestions. Regular engagement sessions with union representatives ensure that all stakeholder perspectives are considered in decision-making processes.

Our commitment to strong labor-management relations goes beyond compliance; it reflects our dedication to fostering an inclusive and equitable workplace. By prioritizing labor-management relations, we cultivate a resilient and adaptive workforce that aligns with our long-term sustainability goals. Our focus remains on creating an inclusive workplace where every employee's contribution and perspective are valued, driving both individual and organizational success.

Our progress

Petron upholds collective bargaining agreements (CBAs) with three labor unions: (i) the Bataan Refiners Union of the Philippines (BRUP), affiliated with the Philippine Transport and General Workers Organization; (ii) the Petron Employees Labor Union (PELU); and (iii) the Petron Employees Association (PEA), linked to the National Association of Trade Unions. By the end of December 2024, these agreements covered approximately 26% of our company's workforce in the Philippines. For employees outside the scope of CBAs, we enforce company policies that safeguard their rights and interests.

The duration of CBAs varies based on their provisions. Representation-related aspects remain in effect for five (5) years, while other provisions are valid for three (3) years in accordance with the Philippine Labor Code. As of this year, all CBAs with the three unions remain in force.

To ensure proper communication on operational adjustments, employees under CBAs and their representatives receive at least 16 hours' notice before significant changes take effect; a minimum of seven (7) calendar days' notice is required for cases of employee transfers. The consultation and negotiation process, including the stipulated notification periods, are explicitly outlined in the agreements. These guidelines are documented in the CBA booklet for transparency and to promote adherence to agreed-upon procedures throughout the agreement's duration.

Petron is also active in other labor relations initiatives through its involvement in the Bataan Industrial Peace Council and the Mandaluyong City Tripartite Industrial Peace Council. These engagements serve as key platforms for collaboration, discussion, and knowledge-sharing. By participating in these councils, the company stays updated on relevant labor advisories and regulatory changes, enabling it to respond effectively to the evolving needs of its workforce.

Safety-driven Workplace

GRI 3-3, 403-1, 403-2, 403-3, 403-4, 403-5, 403-6, 403-7, 403-8, 403-9, 403-10

Topic 11.9 Occupational health and safety

Our approach

Safety in the workplace is deeply embedded in Petron's culture and mission. As we deliver quality products and services to our customers, we ensure that our employees operate in a safe and conducive work environment.

To continuously improve our overall safety performance, we implement a robust Occupational Health and Safety (OHS) Management System that extends to all employees, contractors, and workers. This system undergoes thorough internal and external audits and is verified through certifications from third-party experts.

For our employees, we conduct regular orientations to reinforce safety awareness and emphasize the importance of strict adherence to safety and health protocols. We also update our safety programs, guidelines and procedures, and policies. Our safety manual includes programs focused on preventing or mitigating significant occupational health and safety risks. We also enhance the competencies of our employees and contractors in emergency preparedness, equipping them to proactively identify and manage potential risks and unforeseen events.

All of our OHS management systems are implemented company-wide to ensure consistent compliance with government standards, including but not limited to the following:

Petron Corporation 2024 Sustainability Report

- Philippine Occupational Safety and Health Standards
- Department Order 198-18 Implementing Rules and Regulations of Republic Act No. 11058 entitled “An Act Strengthening Compliance with Occupational Safety and Health Standards and Providing Penalties for Violations Thereof”
- R.A. No. 9514 or The Fire Code of the Philippines
- DOEs Philippine National Standards on Petroleum
- Philippine Mechanical Engineering Code
- Philippine Electrical Code
- National Oil Spill Contingency Plan (NOSCOP)
- Occupational Safety and Health Administration (OSHA) Standards
- National Fire Protection Association (NFPA) Standards
- American Petroleum Institute (API) Standards
- American National Standards Institute (ANSI) Standards
- International Safety Guide for Oil Tankers and Terminals (ISGOTT)

Beyond compliance, we are committed to cultivating a safety-driven culture through various programs, measures, and initiatives. We offer opportunities for OSH-related consultations and promote a safety-conscious workplace. Notable programs include:

- Health and Safety Advisories
- KamOSHtahan sa Terminal
- Townhall Meetings
- Petron Safety Council Meetings
- SMC HOC Safety Committee Meetings
- SMC Safety Council Meetings
- HSE Coordination Meetings
- Toolbox Meetings
- Contractor Safety Meetings

Our safety programs undergo regular internal and external audits, including:

- Oversight Safety Inspections conducted by the CTSG Safety DOLE Accredited OSH Consultants, Practitioners, and Safety Officers
- IMS Audit conducted by Internal and External ISO accredited auditors
- Multifunctional Audits conducted by SMC-CTA
- Government inspections conducted by DOLE, BFP, PCG, and DOE

In addition to audits, we actively engage employees in developing, implementing, and evaluating our OHS management system through consultations, initiatives (e.g., KamOSHtahan sa Terminal), and health and safety advisories. Additionally, formal joint management-worker health and safety committees convene monthly.

Our progress

We take pride in sharing that 100% of our 2,344 non-employee workers are included in our OHS Management System. Additionally, all workers undergo internal and external audits or certifications by third-party entities.

To identify, assess, and manage work-related risks and hazards in the workplace, we employ a systems-based OHS Management approach, which includes:

- Hazard Identification Risk Assessment and Control (HIRAC)
- Hazard and Operability (HAZOP) Study
- Human Organizational Performance (HOP)
- Behavior-Based Safety (BBS)
- Job Hazard Analysis (JHA) / Job Safety Analysis (JSA)
- Work Permit System (WPS)
- Contractor Safety Management (CSM)
- Accident/Incident Investigation
- Root Cause Analysis

As a result of our assessment, we have identified the following types of work-related injuries among our employees and workers:

Main Types of Work-Related Injury for Employees and Workers	
	Stepping on, striking against, or being struck by objects
	Being caught in between objects
	Slips, trips, and fall
	Exposure to or contact with harmful substance
	Exposure to or contact with extreme temperature
	Overexertion
	Animal Bite

We implement various preventive measures, including eliminating identified hazards, replacing obsolete equipment, designing facilities based on safety standards, and providing Personal Protective Equipment (PPE) to mitigate risks and enhance workplace safety. We also utilize HOP incident alerts, BBS alerts, and conduct incident and accident investigation.

In the event of an incident or accident, immediate investigations are conducted by relevant groups. Moreover, our Petron Safety groups, such as CTSG Safety, OPS-HSSE, PBR Safety, Retail Engineering and Network Development Safety, Industrial Safety, Fleet Safety, and Marine Safety conduct a separate revalidation investigation.

For this reporting period, we recorded 50 work-related injuries among our employees and workers, with 3 classified as high-consequence. These were a result of various mishaps that included slips or falls, unintentional exposure to harmful substances or extreme temperatures, among others.

Work-related injuries and work-related ill-health		
Requirement	Employees	Workers who are not employees but whose work and/or workplace is controlled by the organization
Number of fatalities as a result of work-related injury	0	0
Number of high-consequence work-related injuries	2	1
Number of recordable work-related injuries	22	28
Number of fatalities as a result of work-related ill health	0	0
Number of cases of recordable work-related ill health	0	0

These incidents were readily identified and carefully assessed through the previously mentioned systems-based OHS Management approach, along with corresponding actions using the hierarchy of controls to address the safety concerns, such as eliminating the identified hazards, replacing of obsolete units that

may potentially cause accidents, ensuring that our facilities strictly conform to applicable standards, providing continuous safety trainings and implementing programs such as LPS and BBS Tools, and making sure that we provide our workers with the complete PPEs for their job.

These incidents notwithstanding, we remain committed to continuously enhancing our OHS Management System to ensure the safety and well-being of our employees, workers, contractors, and partners, and encourage their active involvement in our safety programs.

Training and Development for the Future

GRI 3-3, 404-1, 404-2, 404-3

Topic 11.7 Closure and rehabilitation

Topic 11.10 Employment practices

Topic 11.11 Non-discrimination and equal opportunity

Our approach

Training and education are fundamental to driving our employees toward growth and excellence. By equipping our workforce with the skills and knowledge needed to adapt to the evolving business landscape, we empower them to take confident steps in their personal and professional journeys. In turn, a skilled and motivated workforce strengthens our Company's long-term success. Providing continuous learning and development opportunities ensures that our employees are prepared to tackle challenges, seize opportunities, foster innovation, and contribute meaningfully to our shared goals.

Recognizing that our employees are integral to our operational success, we are committed to fostering their professional development alongside the advancement of our products and services. Our approach begins with a structured new hire orientation and onboarding program that enhances competencies in management, technical expertise, and leadership. We also offer both local and international training programs, which are systematically communicated to all staff through formal training agreements. These modules are designed to align with industry trends and employee needs to ensure effectiveness and measurable outcomes. By incorporating feedback mechanisms and conducting learning assessments, we continuously evaluate the impact and relevance of these initiatives. Furthermore, performance reviews help identify areas for improvement and growth for each employee.

We facilitate access to a diverse range of professional development programs through our annually published Learning and Development Calendar. In collaboration with our parent company, we also implement in-house and other tailored training initiatives that create opportunities for employees to enhance their skills, maximize their potential, and advance their careers.

Regular transition assistance programs address specific employee needs by offering courses such as Essentials of Supervision and Leadership. We also take pride in grooming our leaders through progression programs, including the Accelerating Leadership Potential, Labor Management, and the Ateneo Leadership

Management Development Program (LMDP) for Managers and the AIM Executive Management Development Program (EMDP) for our senior Managers and executives.

As part of our talent development efforts, especially of leadership development, we have established programs on Coaching (Top Emerging Achievers or TEA Program and Mentoring (Petron Mentoring Program) in 2024, we welcomed new batches of Coachees (TEAs) and Coaches, while for mentoring, a number of divisions have subscribed to the program as an intervention to expedite the development of select high potential employees

Ensuring the effectiveness of these programs remains a top priority to equip our workforce with the capabilities required to meet evolving business demands.

Our progress

We have implemented a comprehensive performance and career development review process, ensuring that 100% of our employees participate regularly. In 2024, we had an average of 198.42 training hours for male employees and an average of 137.65 training hours for female employees. This initiative is part of our commitment to providing equal opportunities for professional growth and development across the organization. We are dedicated to fostering an inclusive environment that supports the advancement of all employees.

Training hours (by gender)			
Category	Total Number of Training Hours	Number of employees	Average training hours
Male	326,415	1,645	198.42
Female	96,083	698	137.65

**Gender specified by the employees themselves.*

Employee training in 2024 encompassed a wide range of learning initiatives, including: (1) on-the-job training for all probationary hires during the year; (2) documented training hours under the Education Reimbursement Plan (ERP) for grantees with approved reimbursements in 2024; and (3) long-form leadership programs offered through our parent company, such as the one-year Ateneo Leadership and Management Development Program (LMDP) and the five-month Executive Management Development Program (EMDP) at the Asian Institute of Management.

As in previous years, 100% of our employees received regular performance and career development reviews, reinforcing our commitment to personal and professional growth at every level of the organization.

Petron Bataan Refinery also launched the inaugural Refinery Technical Forum (RTF) in 2024 to further advance our workforce development agenda. With the theme “Beyond Boundaries – Sustaining Employee Innovativeness for Refinery Progress,” the forum celebrated the ingenuity and forward-thinking mindset of our technical teams.

The RTF program provided a platform for employees to ideate and present solutions aimed at enhancing performance across four key areas: Operational Excellence; Energy Management and Hydrocarbon Loss Prevention; Environmental Stewardship; and Workplace Safety. A total of 51 breakthrough initiatives were

submitted, focusing on refinery growth, cost efficiency, optimized energy use, waste and loss reduction, and enhanced safety protocols. Three projects from Production B and one from RSFFPP emerged as champions out of the nine finalists.

Beyond serving as a technical showcase, the RTF has also become a catalyst for continuous improvement, a space for challenging industry norms, and a driver of innovation culture within the organization. Set to become an annual event and will continue to be a hub for knowledge exchange and creative problem-solving. The RTF will strengthen our competitive edge and support the sustained leadership of our refinery operations in the Philippine oil industry.

Sustained Community Partnerships

GRI 3-3, 413-1, 413-2

Topic 11.15 Local communities

Our approach

Our dedication to community welfare and environmental stewardship aligns with our broader goal of contributing to nation-building. As a leader in the local oil industry, our role extends beyond profitability and operational excellence. We are driven by a vision to create meaningful and lasting impacts on the lives of the Filipino people by championing inclusivity and social well-being.

Building strong and enduring relationships with local communities is a fundamental pillar of our operations and expansion strategy. We prioritize active collaboration with communities near our facilities to ensure that our programs, services, and products address their specific needs. Through our CSR arm, Petron Foundation, Inc., we implement nationwide initiatives focused on education, environmental sustainability, health, human services, livelihoods, and advocacy. These programs are reinforced through partnerships with schools, LGUs, and community organization to enable seamless coordination from planning to execution.

Volunteerism plays a crucial role in our initiatives, with stakeholders actively engaging in programs such as TAP and Brigada Eskwela. We establish performance metrics and conduct regular site visits to ensure alignment with objectives to measure the effectiveness of these efforts. Our data-driven approach includes thorough community assessments to evaluate socio-economic conditions, environmental concerns, and

overall impact. These insights help us refine our strategies, mitigate risks, and enhance the safety and well-being of local communities.

Environmental stewardship is embedded in our operations through initiatives such as Petron Ecowatch and SMC’s Water for All program. We proactively monitor and manage environmental impacts, including water consumption, emissions, and waste generation, through a robust risk management framework. Compliance with local and international regulations is ensured through collaboration with LGUs, the DENR, and non-governmental organizations (NGOs). A Multipartite Monitoring Team (MMT) and certified environmental officers oversee adherence to high environmental standards across all service stations. Our community engagement strategy transforms stakeholders into active partners, fostering a sense of ownership and shared responsibility. This participatory approach allows us to tailor initiatives to each community’s unique needs, ensuring measurable benefits while upholding ethical practices, particularly in engagements with indigenous groups.

As we continue to drive nation-building and sustainability, we remain committed to refining our programs and strengthening partnerships, particularly in the context of post-pandemic recovery. Our efforts reflect an enduring dedication to fostering resilience, inclusivity, and social well-being, ensuring a lasting positive impact on society.

Our progress

In 2024, we have continued to fuel hope for our local communities through our CSR arm, PFI. Our efforts are divided into various thrusts, recognizing the importance of a holistic and integrated approach to supporting our communities.

Education remains at the forefront of our CSR initiatives, with our flagship education program, TAP supports deserving children and youth through elementary, high school, and college in partnership with the DepEd and DSWD.

We remain cognizant of our environmental impact and continue our efforts to reduce our carbon footprint. We also contribute to improving the quality of life of our community partners through entrepreneurship programs and health and livelihood services.

As a testament to our dedication, we have achieved the following milestones this year across PFI’s key CSR thrusts:

CSR Thrust	2024 Milestones
Education	<u>Tulong Aral ng Petron</u> <ul style="list-style-type: none">▪ PFI had over 2,400 TAP scholars from Elementary to College nationwide, including 300 new Grade 1 scholars who came from priority areas as recommended by and in support of Petron’s Terminal Operations.▪ Just over 92% of TAP scholars successfully transitioned from grade school to high school, while close to 98% of all TAP scholars stayed in school for the same period.▪ PFI resumed the distribution of school supplies for TAP scholars in SM Stores since the pandemic. Scholars in areas inaccessible to nearby SM department stores had their school supplies distributed in their respective schools.▪ PFI resumed the Best U Can Be life skills program for Petron’s high school scholars after pausing it prior to the pandemic. This initiative provides the scholars additional benefit of getting them ready for life post-high school, through developing core skills deemed critical for today’s generation: active listening, active reading, effective and concise writing, and effective and empathetic speaking. The workshop designed was developed by AHA! Learning center with activity-driven, class-type sharing and learning sessions not just

	<p>for our scholars but for their parents as well. The activity also provided opportunities for Petron employee volunteers from different business units of Petron to co-facilitate the activities. We were also joined by some TAP parent volunteers during the whole day activity.</p>
	<p>Bataan scholarships</p> <ul style="list-style-type: none"> Under the Refinery Engineering scholarship program, Petron supported thirty (30) new Electrical and Mechanical Engineering scholars from Bataan Peninsula State University for the school years 2023-2024 and 2024- 2025. Four of its previous graduates in electrical engineering passed the Licensure Board Exam in April and September 2024 and are awaiting the results of their application in Petron for possible hiring. Additionally, 18 recent graduates, including 14 from BS Mechanical Engineering and 4 from BS Electrical Engineering, received support for their upcoming board exams scheduled for February and April 2025.
	<p>Brigada Eskwela</p> <ul style="list-style-type: none"> PFI continued to support DepEd's Annual Brigada Eskwela National Schools Maintenance Week by donating materials and mobilizing volunteers to clean classrooms or paint tables and chairs in time for the opening of classes. In 2024, we supported 121 public schools nationwide together with some 206 Petron employee volunteers from the Bataan Refinery and Terminal Operations, as well as from Head Office. Additionally, PFI supported the Ready-for-School campaign of the Philippine Business for Social Progress (PBSP) in preparing two public schools in NCR (Rivera Village ES in Pasay City and Placido del Mundo ES in Quezon City).
Environment	<p>Carbon capture and biodiversity conservation</p> <ul style="list-style-type: none"> Through our <i>Puno ng Buhay</i> program, we are continuing to implement long-term reforestation activities in a total of 55 hectares of mangrove areas in: <ul style="list-style-type: none"> Hagonoy, Davao Del Sur - 20 hectares Municipality of Ivisan, Roxas City - 25 hectares Brgy. Salambao, Obando, Bulacan - 10 hectares We likewise secured Management approval to officially engage the University of the Philippines at Los Baños-College of Forestry and Natural Resources and the UPLB Foundation Inc. to undertake carbon sequestration (C-sequestration) measurement. This five-year engagement will have experts from the university on Forest Carbon Analysis, Flora and Fauna, GIS/Remote Sensing, Socioeconomics, and Mangrove Silviculture implementing a science-based assessment of carbon sequestration and avoided emissions specifically for Petron's reforestation sites initially in Davao, Roxas and Bulacan. The first C-sequestration report is expected to come out in 2025. At the same time, PFI continued to support the greening efforts of Operations and Refinery, which collectively planted 36,766 seedlings and mangrove propagules in various activities celebrating Earth Month, Environment Month, and International Coastal Cleanup Day. Additionally, our support to Operations and Refinery for cleanup activities resulted in at least 25 tons of debris removed from approximately 31 kilometers of coastal areas, rivers, and esteros. <p>Bataan Integrated Coastal Management Program (BICMP)</p> <p>We remained actively involved in the implementation of the Bataan Integrated Coastal Management Program, particularly through the efforts of the Petron Bataan Refinery:</p> <ul style="list-style-type: none"> In 2024, 100% of the activities targeted for the year for the five-hectare mangrove conservation project under DENR's Project TRANSFORM was completed. This includes the Fence repair & nipa hut construction, as well as regular monitoring and monthly cleanup activities in the project site in Sitio Bakawan, Abucay, Bataan. Also as part of this project funded by Petron, some 50 members of the partner Peoples Organization -- the Samahan ng Mananahong ng Sitio Bakawan -- are now benefiting from the recently constructed <i>tahungan</i>, where they now cultivate mussels to sell at the local fish port.

	<ul style="list-style-type: none"> • Efforts to rehabilitate a 7.5-kilometer fish sanctuary off the coast of Limay resulted in the deployment of nearly 300 artificial reefs, establishment of floating flag markers, and the construction of a floating raft, among others. With the expected nursing of fish in the sanctuary, the 3,600+ fisherfolk in Limay anticipate a bountiful catch in the immediate future. • To complement the rehabilitation of the Limay Fish Sanctuary, PFI extended its support to the Samahan ng mga Maliliit na Mangingisda ng Barangay Lamao Inc. (SMMBLI) by providing funds for their fishing gear paraphernalia to bolster their livelihood. More than 170 SMMBLI members benefited from this support. • Through PFI, we also continued to support the 1Bataan PawiCAN Conservation Alliance Network, primarily with sustained advocacy through the annual Pawikan Festival in Morong. In addition, Petron helped establish a Pawikan hatchery in Bo. Luz in Limay, in partnership with LGU Limay, Brgy. Kitang 2 and Luz and the Bataan Provincial Government. We also remained an active participant in the Pawikan Conservation Alliance Network as a Private Sector Associate Member in Limay.
Entrepreneurship and Livelihood	<p><u>Petron Automotive Care Education (ACE)</u></p> <p>PFI revived the Petron Automotive Care Education, or ACE program as another avenue to make PFI's mission of alleviating poverty through education possible. For its initial run, Petron ACE targeted to professionally train and certify automotive mechanics that will serve as a pool of talent for Petron Car Care Centers (CCC) and Lube Bay Stations. In the 3rd quarter of 2024, PFI conducted the first specialized training for automotive servicing together with program partner Don Bosco-One TVET Philippines and Petron Lube Trade. A total of 18 Petron CCCs and Lube Bay personnel from Cebu, Davao, Iloilo, Surigao and Iligan graduated from their six-day training in Cebu City and are in the process of securing their NC-1 and 2 certifications from TESDA. In December 2024, a second batch of 11 trainees from NCR undertook the same specialized training at the Don Bosco Technical Institute in Makati City.</p>
	<p><u>Livelihood support for Limay stakeholders</u></p> <ul style="list-style-type: none"> • PFI provided financial assistance to the Carbon-Alangan Upland Farmers Association (CAUFA) in Limay, Bataan to help establish a small-scale piggery and vegetable farming ventures. Twenty-five (25) CAUFA families benefited from this initiative.
Health and Human Services	<p><u>Petron Clinics</u></p> <ul style="list-style-type: none"> • Petron Clinics in Rosario, Pandacan and Limay remained closed to the community, still partly due to continuing Covid precautions and also as part of re-evaluating the preparedness of the clinics to meet the requirements of DOH Administrative Order 2021-0037 ("New Rules and Regulations Governing the Regulation of Clinical Laboratories in the Philippines"). In the fourth quarter of 2024, the Petron Rosario Clinic renewed its laboratory License to Operate for 2025.
	<p><u>Community Engagement</u></p> <ul style="list-style-type: none"> • We continued to monitor our livelihood group under the Sulong Pangkabuhayan (livelihood assistance project). The womenfolk group SALAPI or Samahang Alangan at Lamao para sa Pag-unlad, Inc. (SALAPI) has been supplying Petron Bataan Refinery's rag requirements. We also sustained support to the TAP Parents Association of Rosario, Cavite, whose members continued to produce eco-bags made from used Petron tarpaulins. As part of the 1st SMC Sustainability Fair, PFI engaged the group to produce and sell their bags, which netted them PHP 18,000 in sales during the two-day event. This has also expanded the potential market for the group, with orders/inquiries coming from SMC group employees.
	<p><u>Engaging employees and partners</u></p> <p>Petron employees continued to take to heart their responsibility to society through active participation in the Volunteers in Action program. Employee volunteers from various divisions in the Company in 2024 participated in the following:</p> <ul style="list-style-type: none"> • Cleaning of classrooms in Rivera Village Elementary School, Pasay City • TAP school supplies distribution nationwide

	<ul style="list-style-type: none">• Co-facilitation of training sessions under the Best U Can Be program for TAP High School scholars• Participated in various activities celebrating Earth Month, Environment Month, and International Coastal Cleanup Day• Repacking of emergency food rations for calamity victims at the DSWD National Relief Operations Center (NROC) in Pasay
	<p><u>Adopt-a-School Program</u></p> <p>Petron’s education investments as enrolled under DepEd’s Adopt-a-School program since 2006 has totaled to PHP 536.6 million and has supported scholarships from elementary to high school, building and repair of classrooms in Petron’s host communities nationwide.</p>

Customer Safety and Social Responsibility

GRI 3-3, 416-1, 416-2

Topic 11.3 Air emissions

Our approach

We are steadfast in our commitment to enhancing safety and responsibility across all facets of our operations—from refining to distribution. Given the inherent risks associated with fuel handling and storage, we implement stringent safety measures to protect public health and the environment. Our comprehensive risk management strategy upholds the highest safety standards for our customers while ensuring full compliance with regulatory requirements.

We enforce strict safety protocols at our retail outlets to ensure that employees are well-trained in proper product handling and operational procedures. Additionally, we have expanded customer education programs to promote the safe use of fuels and best practices at service stations. These initiatives are essential in mitigating risks, preventing accidents, and reinforcing a culture of safety across our entire organization, in line with global safety standards.

Our safety framework is anchored in a robust Corporate Safety Management System (CSMS), aligned with international standards such as ISO 45001:2018. This system enables us to systematically manage safety protocols across all operational phases, ensuring not only regulatory compliance but also excellence in protecting stakeholders. Continuous monitoring and proactive risk assessments allow us to identify and mitigate potential hazards before they escalate.

Specific safety initiatives are at the core of our strategy, particularly at our refinery, terminals, and service stations. At the Petron Bataan Refinery, we conduct extensive safety audits and hazard analyses to ensure strict adherence to the highest industry standards. Regular environmental assessments monitor air quality, noise levels, and other health impacts, reinforcing a safe operational environment.

Our Terminals are equipped with advanced fire detection systems, complemented by routine safety training for personnel to ensure compliance with fire safety regulations. This multilayered approach not only protects our customers but also safeguards employees and the surrounding communities, reinforcing our commitment to safety and risk prevention.

Site assessments play a crucial role in our safety protocols, allowing us to swiftly and effectively address potential hazards. Our Corporate Safety team collaborates with technical experts to conduct both virtual and on-site inspections, ensuring compliance with all health and safety regulations while continuously improving our safety measures.

Customer feedback remains a cornerstone of our health and safety strategy and their inputs prove invaluable in driving continuous improvement. Through our listening channels, we actively listen to customer concerns related to health and safety to foster trust and enhance our services based on real-world feedback. In 2024, we received over 253,000 feedback (both voice and non-voice) from our customers through our communication platforms such as the Petron Customer Interaction Center, Petron Talk2Us, Petron Gasul Express Delivery or PGED, and Petron’s new Social Media Community Management group SMCM. Focused on engaging with customers on Petron Rewards, Petron Gasul, and Fiesta Gas Facebook pages, the SMCM transactions were included as a new line item for 2024 Petron Customer Care.

Our *Lakbay Alalay* program, which provides free service check-ups and roadside assistance, exemplifies our commitment to customer safety and strengthens our role as a caring and responsive service provider.

We remain dedicated to continuous improvement in customer health and safety. By adopting evolving regulatory standards and integrating innovative safety practices, we go beyond compliance to raise industry benchmarks. We strive to create a secure and reliable environment for both customers and communities, through rigorous management systems, proactive initiatives, and ongoing stakeholder engagement, ensuring their well-being remains our top priority.

Our progress

At Petron, safety remains our top priority, ensuring that our operations, products, and services meet the highest standards. In 2024, we conducted rigorous health and safety assessments across all facilities, evaluating 100% of potential impacts through comprehensive inspections. This proactive approach reinforces our commitment to risk mitigation and the protection of customers, employees, and communities.

For the second consecutive year, we recorded zero incidents of regulatory non-compliance that resulted in fines or penalties. However, we received Notices to Comply (NTC) from the Bureau of Fire Protection (BFP) and the DOLE for two service stations. The BFP’s NTC cited a station’s non-compliance with the required six-meter safety distance between dispensing pumps and public ways, while the DOLE’s NTC addressed the absence of a designated Safety Officer 3 (SO3) at another station. Though these did not incur fines, we are addressing them promptly to ensure full compliance. Meanwhile, we upheld our record of zero non-compliance with voluntary codes, reaffirming our commitment to exceeding safety standards.

Incidents of non-compliance concerning the health and safety impacts of products and services

Requirement	2024			2023			2022		
	Refinery	Terminals	Service Stations	Refinery	Terminals	Service Stations	Refinery	Terminals	Service Stations
Incidents of non-compliance with regulations resulting in a fine or penalty	0	0	0	0	0	0	0	0	2
Incidents of non-compliance with regulations resulting in a warning	0	0	2	0	1	0	0	3	1

Incidents of non-compliance with voluntary codes	0	0	0	0	0	0	0	0	0
--	---	---	---	---	---	---	---	---	---

Consumer safety remained a key focus in 2024. We enhanced initiatives to assist motorists, including our *Lakbay Alalay* program, which continued to provide free vehicle inspections and medical assistance during peak travel seasons. Expanding on past successes, we have expanded our Car Care Center Free Safety Check initiative from 41 centers to a broader network. This month-long campaign offered complimentary inspections and exclusive service discounts to encourage proactive vehicle maintenance.

We also strengthened advocacy for the proper implementation of the LPG Law (R.A. No. 11592) in collaboration with the Department of Energy (DOE) and industry partners. Through regulatory discussions and educational forums, we reinforced best practices and stringent safety measures in the LPG sector. Additionally, we continued to raise awareness about the dangers of illegally refilled LPG cylinders, emphasizing the importance of choosing legitimate Petron LPG products that meet the Department of Trade and Industry (DTI) safety and quality standards. Consumers can access detailed safety guidelines on our website.

While we recognize opportunities for continuous improvement, we take pride in our sustained commitment to safety and compliance. Moving forward, we will further refine our processes, strengthen safety programs, and collaborate with regulatory bodies to ensure the highest level of protection for our stakeholders.

Responsible Marketing and Labeling
GRI 3-3, 417-1, 417-2, 417-3

Our approach

Promoting responsible marketing and labeling is fundamental to ensuring transparent communication about our socio-environmental impacts while reinforcing our commitment to accountability. By providing clear, accurate information about our products and services, we enhance trust among stakeholders, customers, and investors. This transparency not only safeguards our reputation but also cultivates a culture of responsibility across the industry, setting higher standards and driving more ethical business practices.

As a key industry representative, Petron ensures the Philippines remains an active participant in the Asia-Pacific Economic Cooperation (APEC) and adheres to the Globally Harmonized System of Classification and Labeling of Chemicals (GHS). This commitment guarantees compliance with internationally recognized labeling protocols and responsible marketing standards, spanning our operations from refining to end-customer distribution. By continuously improving our integrated marketing communications, we empower customers and stakeholders with precise and reliable product information.

At Petron, we prominently display fuel octane ratings and strictly adhere to DOE’s labeling guidelines, enabling customers to make well-informed decisions. Beyond compliance, we prioritize product stewardship and workplace safety, ensuring the accurate labeling of lubricants and greases while providing Material Safety Data Sheets (MSDS). This dedication to transparency reinforces our commitment to regulatory compliance while strengthening consumer confidence in our products and services.

MSDS plays a crucial role in our product stewardship and workplace safety initiatives by offering comprehensive guidance on proper material handling and use. These documents contain essential information on physical properties, toxicity, potential health effects, first aid measures, reactivity, storage

conditions, disposal methods, and spill-response protocols. By equipping our employees with these critical insights, we foster a safer and more informed working environment.

Moreover, our lubricants and greases are produced in full compliance with internationally recognized industry standards, ensuring superior quality and performance. We adhere to specifications set by the American Petroleum Institute (API), the Society of Automotive Engineers (SAE), and ISO for viscosity grade and service levels. Compliance with National Lubricating Grease Institute (NLGI) standards further reinforces our ability to meet the diverse needs of engines, equipment, and vehicles.

Our progress

Our marketing communications and product labeling practices are anchored on regulatory standards and ethical principles, ensuring full transparency. In 2024, we had no incidents of non-compliance with established regulations concerning product and service information labeling as well as marketing communications, including the Advertising Standards Council Code of Ethics and the DTI's promotional guidelines. This achievement underscores our steadfast commitment to integrity and adherence to legal requirements.

Additionally, we ensure that all additives, fuels, lubricants, and petroleum-related products comply with international standards. This is systematically achieved through the implementation of GHS-compliant MSDS and accurate product labeling. By transitioning our product labels to align with GHS requirements, we not only strengthen compliance in domestic markets but also enhance our competitiveness for export opportunities. Concurrently, we invest in employee safety through GHS training programs for personnel involved in purchasing, logistics, customs clearance, warehousing, emergency response, and chemical handling.

At Petron, responsible marketing is central to building customer trust and brand integrity. In 2024, we launched the “Tapat sa ’yo” campaign to reinforce our long-standing commitment to being the most trusted name among Filipino motorists. This campaign was anchored on five customer-centric pillars that define our value proposition:

- ✓ **Abot-Kaya** (Affordable Pricing) – delivering fuel that fits the Filipino’s budget
- ✓ **Ramdam Ko ang Hatak ng Makina** (Quality Performance) – emphasizing fuel efficiency and engine responsiveness
- ✓ **Tuluy-Tuloy na Papremyo** (Exciting Promotions) – providing continuous rewards that add value to every purchase
- ✓ **Tamang Sukat, Bawat Karga** (Accurate Fueling) – ensuring customers get the exact amount they pay for
- ✓ **Serbisyong Mapagkakatiwalaan** (Fast and Reliable Service) – delivering consistent service excellence across our network

This integrated communications campaign was reinforced by a Brand Health Tracking (BHT) study, whose 2024 results confirmed a strong association between Petron and the attribute “The brand I trust the most.”

“Tapat sa ’yo” is more than a marketing message—it reflects our promise of loyalty, fairness, and partnership with every Filipino customer. By the fourth quarter of 2024, BHT results reaffirmed Petron’s position as the leading brand in consumer trust, consistently outperforming competitors in this critical metric.

Collectively, these initiatives underscore our commitment to regulatory compliance and workforce safety. By fostering a secure workplace and ensuring the accuracy of product information, we reinforce ethical business practices and solidify our industry leadership. Through continuous process enhancements and employee training, we remain strategically positioned to exceed global standards and meet evolving customer expectations.

Customer Privacy and Service Excellence

GRI 3-3, 418-1

Our approach

In this digital age, we continuously strengthen our commitment to customer privacy while enhancing service excellence. We recognize the vital importance of protecting personal information and have implemented robust safeguards in how we collect, store, process, and share data. Serving millions of customers, we prioritize clear communication and swift responsiveness. We systematically collect specific personal information to facilitate timely and accurate feedback on inquiries, enabling our Customer Relations Group to address concerns efficiently. Our Corporate Affairs Department also works closely with them to ensure that all issues are promptly resolved. Together, these teams uphold our commitment to customer satisfaction and foster lasting trust with stakeholders.

At Petron, we reinforce our dedication to customer privacy through the strategic implementation of our Data Privacy Policy, approved by the Board in May 2017. This policy provides a structured framework guided by core principles such as transparency, legitimate use, and proportionality in data processing. Before accessing our online platform, customers are presented with a comprehensive privacy statement outlining the intended use of their information and requesting their explicit consent, ensuring clarity and accountability in data ownership.

Our Data Privacy Officer plays a critical role in ensuring rigorous oversight and enforcement of privacy measures. Additionally, the Customer Relations Group and Corporate Affairs Department proactively manage and resolve inquiries related to data privacy.

Our progress

Our integrated approach not only safeguards personal information but also ensures its use remains aligned with communicated purposes. As a result, there were no substantiated complaints in 2024 concerning breaches of customer privacy and losses of customer data.

As we move forward, we remain dedicated to generating long-term value for our stakeholders while upholding financial resilience and ethical business practices.

Through our strong economic performance, we create jobs, stimulate local economies, and contribute to national development. Our impact extends beyond our core operations through strategic partnerships and social investment programs that we undertake to foster inclusive growth. We maintain strict adherence to governance policies, ensuring full compliance with laws and regulations while promoting a culture of fairness, respect, and accountability.

By integrating financial strength with environmental and social responsibility, we take decisive steps toward a more inclusive, resilient, and sustainable future—one where progress benefits not only our Company but also the broader society.

Enhanced Economic Value

GRI 3-3, 201-1, 201-2, 201-3, 201-4

Topic 11.2 Climate adaptation, resilience, and transition

Topic 11.14 Economic impacts

Topic 11.21 Payments to governments

Our approach

We are committed to driving economic growth by optimizing operations, expanding market reach, and strengthening industry leadership. As the largest integrated oil refining and marketing company in the Philippines, we play a vital role in ensuring national energy security, job creation, and industrial

development. Apart from fuel supply stabilization, the scope of our economic contributions foster broader economic stability through infrastructure investments and regional market engagement, including petrochemical exports and non-fuel product distribution.

Our mission is to create lasting value for stakeholders, employees, and communities. This year, we are focused on future-proofing our business by embracing innovation, exploring cleaner energy solutions, and enhancing resilience against climate-related risks. While the transition to renewable energy presents challenges, we continue to integrate sustainability into our strategy to safeguard our long-term success and the energy needs of our communities.

Our ability to navigate fluctuating market conditions underscores our strong economic performance, delivering consistent value to stakeholders. We go beyond regulatory compliance by implementing proactive risk management strategies to address financial, physical, and environmental risks, including natural calamities and market volatility. Investments in automation, digital solutions, and sustainability initiatives such as the Terminal Ecowatch Program drive operational efficiency and environmental stewardship.

We continue to diversify our portfolio through investments in renewable energy sources such as solar and biofuels to strengthen our position in the evolving energy landscape. These efforts help mitigate market risks while reinforcing our commitment to environmental responsibility and community development. Our partnerships further amplify our role in addressing climate change and ensure sustainable growth.

Looking ahead, we remain steadfast in balancing economic growth with sustainability, reinforcing our legacy as a pioneer in the Philippine oil sector. We continue to drive the industry towards a future where economic prosperity and environmental stewardship go hand in hand through continuous innovation and transformation. Our financial health remains a cornerstone of our operations, thereby supporting broader economic stability in the regions we serve.

Direct economic value generated and distributed

Our total revenue in 2024 increased compared to 2023 despite ongoing challenges in the market. Nonetheless, we maintained our ability to streamline operations and effectively meet the fuel needs of our customers. As for economic value distribution, our operating costs decreased because of significant efforts to optimize resources and implement innovative and sustainable practices, which resulted in savings for our Company. Meanwhile, employee wages and benefits, payments to providers of capital, and payments to the government all increased, reflecting our priority to continuously enhance employee welfare, investor relations, and tax compliance.

Petron also received tax relief and credits from the government amounting to PHP 128 million from duties, value added tax (VAT, excise tax exemption, and income tax holiday for registered projects under the Board of Investments (BOI).

Direct economic value generated and distributed			
Requirement	2024 (in million PHP)	2023 (in million PHP)	2022 (in million PHP)
I. Direct economic value generated			
Total revenue	870,892	803,929	860,056
II. Economic value distributed			
Operating costs	778,705	677,483	776,205
Employee wages and benefits	6,653	5,731	5,422

Payments to providers of capital	26,742	26,097	17,855
Payments to government	45,254	79,545	49,843
Community investments	52	52	123
III. Economic value retained (calculated as 'Direct economic value generated' less 'Economic value distributed')	13,486	15,021	10,608

Financial implications and other risks and opportunities due to climate change

Our ability to navigate fluctuating market conditions underscores our strong economic performance, delivering consistent value to stakeholders. We go beyond regulatory compliance by implementing proactive risk management strategies to address financial, physical, and environmental risks, including natural calamities and market volatility.

We acknowledge that our business operations inherently carry certain risks which include:

1. **Financial Risks:** Changes in government regulations concerning fuels or oil markets, such as pricing, taxation, and business practices, can impact our organization.
2. **Physical Risks:** Natural calamities have the potential to damage our facilities and disrupt operations.
3. **Climate-related Developments:** The shift towards renewables and the growing demand for sustainable energy pose risks, such as reduced demand and sales, and increased expenses.

To mitigate these risks posed by climate change, we have established insurance mechanisms and conduct proactive measures to prepare for calamities that could affect our operations.

Defined benefit plan obligations and other retirement plans

We attribute our economic success largely to our dedicated employees, and we prioritize their well-being and financial security. We actively contribute to various social security programs of the government, such as SSS, Pag-IBIG, and Philhealth. These programs ensure that our employees receive retirement benefits upon separation from the Company.

Our Company pays partial contributions to the retirement fund through the calendar year depending on the financial capacity to pay of the Company and at the same time requirements of the fund to pay out benefits.

In addition to these government-mandated programs, Petron has implemented a robust Savings Plan. This initiative allows employees to contribute a portion of their salaries, with the Company matching these contributions. Together, these initiatives form a comprehensive retirement benefits package that acts both a retention tool and a means of providing financial assistance for employees' daily needs. More importantly, these benefits promote long-term financial security by empowering our employees to plan for their future retirement.

Defined benefit plan obligations and other retirement plans			
Requirement	2024	2023	2022
If the plan's liabilities are met by the organization's general resources, the estimated value of those liabilities	1,980,784,001.58	2,447,064,510.75	3,009,650,143.70

Market Presence and Local Impact

GRI 3-3, 202-1, 202-2

Topic 11.11 Non-discrimination and equal opportunity

Topic 11.14 Economic impacts

Our approach

At Petron, we are committed to driving economic growth in the regions where we operate. Strengthening our market presence starts with prioritizing local talent recruitment, including in managerial roles, while maintaining stringent qualification standards. This strategy fosters strong and mutually beneficial relationships, deepens our understanding of local market dynamics, and creates grassroots economic opportunities. To support our workforce, we offer salaries that exceed the minimum wage to reinforce our industry competitiveness and attract and retain top-tier professionals. Our comprehensive benefits package further enhances employees' financial well-being. Likewise, we actively promote workplace equality by ensuring that all employees receive the same opportunities and benefits. These efforts reflect our dedication to fostering a diverse and inclusive environment within the oil sector.

Through PFI, we nurture future industry leaders with our scholarship program, which recognizes outstanding students committed to academic excellence. This initiative goes beyond financial assistance by providing scholars with a pathway to join Petron after graduation and advance their careers within the company. It underscores our long-term investment in talent development and industry leadership.

Apart from individual career growth, the employment opportunities we provide significantly contribute to the economic progress of the local communities where we operate. We reinforce our commitment to making a meaningful and lasting impact on the socioeconomic landscape of the regions we serve by driving job creation, fostering professional development, and supporting local economies.

Our progress

We are committed to fostering fair and equitable compensation practices across our workforce. All our employees, including rank and file, are compensated through monthly salaries, and none are classified as minimum wage earners. Instead of a standardized daily wage by gender, we implement a structured salary framework that is based on role, qualifications, and experience—ensuring internal equity and competitiveness in the industry.

We are equally committed to upholding meritocracy in hiring and leadership development. We recognize that our senior management roles at significant operational sites have yet to be filled by individuals sourced directly from the local communities. To this end, we remain focused on expanding local talent pipelines and investing in long-term strategies that would enable capable professionals from host communities to advance into leadership roles.

These compensation and recruitment practices reflect our broader goals of inclusivity, competitiveness, and sustainable human capital development.

Growth with Purpose

GRI 3-3, 203-1, 203-2

Topic 11.14 Economic impacts

Our approach

We recognize that our business creates an impact that goes beyond the financial success of Filipinos. Our nationwide presence through our strategically-situated terminals and extensive network of service stations not only fuels commerce, but also contribute to improving the lives of people, especially among the communities that host and surround our facilities. As part of our broader vision for sustainable development, we strive to be the trusted partner of the Filipino people in realizing long-term, inclusive progress. PFI, our corporate social responsibility arm, manages and amplifies these indirect economic contributions. It implements a diverse range of programs that lead to socio-economic development. By leveraging strategic partnerships and targeted interventions, we ensure that our initiatives drive meaningful and sustainable progress in the areas where we are present and effect tangible, long-term benefits for our communities.

Our flagship advocacy initiative, Fuel HOPE, demonstrates our dedication to fostering inclusive and sustainable transformation. This program strategically directs our resources to uplift marginalized sectors and strengthen community resilience. By focusing on education, economic empowerment, and environmental sustainability, Fuel HOPE serves as a catalyst for positive change.

Aligned with Fuel HOPE's objectives, our initiatives prioritize key thrusts on education, livelihood, health & human services, and community engagement. Our Tulong Aral ng Petron program provides educational assistance to thousands of students, giving them the essential support needed to reach their full potential. We support their formal education from elementary to high school and cultivate their skills to eventually become part of the Company.

Our livelihood programs -- including community-based initiatives such as rag-making and dressmaking -- create sustainable income opportunities that foster economic self-sufficiency. Our health and community engagement efforts, such as Petron Clinics, also ensure that members of our host communities have access to quality healthcare and essential support, thereby reinforcing our commitment to improving overall well-being.

Our progress

As part of our investments, we have built Petron Schools near our Petron facilities and in the Muslim Mindanao region to provide additional venues for learning. We have also established Petron Clinics in Pandacan, Manila; Limay, Bataan; and Rosario, Cavite that offer specialized services such as X-ray, laboratory tests, ECG, and ultrasound to complement nearby local health centers.

We also equally invest in environmental protection. We established a five-hectare Mangrove Conservation Project in Sitio Bahawan, Abucay, Bataan Province, under the DENR's Project TRANSFORM, which includes constructing a nipa hut and repairing fences to support regular monitoring and monthly cleanup activities at the project site. As part of this Petron-funded initiative, we also constructed a *tahungan* (mussel farm) for members of our partner people's organization, Samahan ng Mananahong ng Sitio Bakawan, enabling them to cultivate and sell mussels at the local fish port.

In Limay, we signed a formal agreement with the local government and the Panguluhan ng Maliliit na Mangingisda ng Limay (PangMaMali) Fisherfolk Association to rehabilitate a 7.5-kilometer fish sanctuary. Initially established in 2005 with Petron's assistance, the sanctuary aimed to address overfishing, habitat degradation, and the risks posed by fishing near PBR's coastal operations.

As part of this renewed dedication, 288 new artificial reefs were installed, supplementing the 24 already in place. The results are already visible as local fishers report increasing sightings of valuable species such as *talakitok* (jackfish) and *salaysay* (skipjack tuna), signaling a revitalization of marine biodiversity. Also Included in this initiative was the establishment of floating flag markers, and the construction of a floating raft.

The sanctuary is not just about protecting marine life as it also serves as a platform for community empowerment. Part of Petron’s support is offering training workshops for fisherfolk’s wives on fish processing and value addition to create new income opportunities. We have also provided other vital resources such as:

- Repurposed drums as sinkers and floating markers for artificial reefs
- Financial and technical assistance for habitat restoration
- Capacity-building initiatives to support sustainable fishing practices

The Municipality of Limay complemented these efforts by providing speedboats for monitoring and enforcement to ensure the sanctuary remains well-protected. Despite these successes, challenges remain. Illegal fishing continues to threaten marine life, while environmental factors such as “*masamang tubig*” (bad water) pose additional risks. To combat these issues, the local government and Petron are working to:

- Enhance enforcement efforts and implement stricter regulations
- Improve monitoring capabilities, including the potential use of underwater cameras to track fish populations

Looking ahead, the local government is committed to ensuring the sanctuary’s long-term sustainability through stronger conservation regulations, ongoing habitat restoration efforts, and continued community engagement.

Lastly, we established a *pawikan* (sea turtle) hatchery in Bo. Luz, Limay, in partnership with LGU Limay, Barangays Kitang 2 and Luz, and the Bataan Provincial Government. This effort is part of a provincewide movement to protect endangered giant marine turtles nesting in Bataan. Since becoming a sponsor of the Bataan Pawikan Festival in 2007, we have expanded beyond awareness campaigns to direct conservation initiatives, including habitat protection and partnerships with LGUs, NGOs, and community stakeholders. In 2022, we strengthened our commitment by joining the One Bataan PawiCAN Conservation Alliance Network (1PawiCAN Program), institutionalizing marine turtle conservation not just in the towns of Morong and Bagac, but also in Mariveles and Limay.

By aligning our initiatives with broader goals of coastal and marine ecosystem protection such as saving the endangered *pawikan*, we envision an even stronger collaboration with our stakeholders, where conservation efforts not only protect endangered species but also create sustainable economic opportunities for local communities.

Ethical and Fair Business Practices

GRI 3-3, 205-1, 205-2, 205-3, 206-1

Topic 11.19 Anti-competitive Behavior

Topic 11.20 Anti-corruption

Our approach

Integrity serves as the foundation of our organizational processes and guides every aspect of our operations. By embedding transparency and accountability in all business activities—from supplier negotiations to internal governance—we cultivate trust-driven relationships that strengthen our credibility and reinforce our commitment to ethical excellence.

We firmly believe that fair competition is essential for fostering a dynamic and thriving market. To uphold this principle, we implement proactive measures that prevent any form of collusion with competitors and ensure that our business practices are rooted in fairness, trust, and integrity.

Our commitment to anti-corruption is a core component of our business values. Our Code of Conduct and Ethical Business Policy strictly prohibits corruption and bribery at all levels of the organization. To reinforce this, we integrate anti-corruption training into our mandatory programs, including employee orientations, corporate governance seminars, and labor relations workshops. This ensures that our workforce is well-equipped to identify, prevent, and address unethical behavior. These practices help us foster a culture of integrity as we aim to earn and sustain the trust of our stakeholders and the communities we serve, setting the standard for ethical business leadership.

Our Code of Conduct and Ethical Business Policy also emphasizes our commitment to fair competition and compliance with antitrust regulations. We continuously enhance corporate integrity while encouraging our stakeholders and customers to uphold similar ethical standards. Through our efforts to promote an equitable and transparent market, we contribute to broader societal benefits and actively support sustainable development goals.

Our progress

To date, Petron has maintained a clean record, with no confirmed incidents of corruption—a testament to our steadfast commitment to ethical business conduct and strong governance. All our operations (100%) are assessed for risks related to corruption. The Board of Directors has also formalized the Revised Conduct and Ethical Business Policy, strengthening the ethical framework for directors, officers, and employees. This reinforces our goal of conducting business in a manner that is not only ethical but fully compliant with applicable laws and fosters a culture of integrity across the organization.

In instances where credible suspicions of corruption arise, the Internal Audit department, in collaboration with the pertinent operational divisions, will initiate a detailed investigation. This process will encompass evidence collection, witness interviews, and a review of relevant records. Should the investigation yield sufficient evidence of misconduct, appropriate disciplinary actions will be implemented, which may include suspension or termination of employment. All these are part of our commitment to maintaining high standards of ethical conduct and accountability, underscoring the gravity of corrupt activities and their potential repercussions.

This year, no anti-corruption training was conducted for the directors. However, we successfully held an anti-corruption training program and briefings for all employees.

In recognition of our commitment to effective governance and ethical business practices, we received two Golden Arrows at the ASEAN Corporate Governance Scorecard (ACGS) Arrow Awards, conferred by the Institute of Corporate Directors in September 2024. This achievement reinforces our strategic focus on upholding rigorous ethical standards in our anti-corruption efforts.

Furthermore, we maintained a clean track record in fair competition, with no instances of anti-competitive behavior and violations of anti-trust and monopoly legislation in 2024.

Tax Transparency and Responsible Governance

GRI 3-3, 207-1, 207-2, 207-3, 207-4

Topic 11.21 Payments to governments

Our approach

Tax compliance is a fundamental pillar of our operations, reinforcing our commitment to economic development and societal well-being. We ensure adherence to local and international regulations throughout our business. By prioritizing efficient tax governance, strategic planning, and responsible remittance, we position ourselves as a key contributor to national growth while maintaining the highest standards of accountability.

We actively collaborate with government agencies to support initiatives that enhance fairness and transparency in the industry. Our active participation in the Fuel Marking Program, for example, is instrumental in combating fuel smuggling and ensuring the equitable collection of government taxes. This initiative underscores our commitment to upholding transparency and fair-market practices in the oil sector.

Furthermore, we uphold transparency through comprehensive tax disclosures, including country-by-country reporting, which strengthens public trust and reaffirms our role as a responsible corporate citizen. By integrating sustainability principles into our tax strategy, we contribute to the long-term economic stability of the communities we serve while allowing us to remain steadfast in our commitment to ethical business practices and national economic progress.

Our progress

Country-by-country reporting

We continue to make a faithful accounting and documentation of taxes for our resident entities, which cover multiple jurisdictions, such as the Philippines, Malaysia, Bermuda, Singapore, the British Virgin Islands, Mauritius, and Hong Kong. For purposes of consistency with our declared reporting boundaries, comprehensive tax disclosures have been limited to our Philippine operations in this report.

From Risk to Resilience: A Proactive Approach to Business Stability

Our Enterprise-Wide Risk Management (“ERM”) framework and ERM programs are designed to enable us to achieve our corporate objectives through managing risks that may adversely impact such objectives. Risk management is integrated in the daily operations and performance across our entire organization. Identified risks are analyzed and evaluated, while major risks are regularly reported and raised to top management level for continuous monitoring and decision-making. The risk management process is integrated in the yearly business planning of all major divisions and departments, with the resulting annual business plan formulated being presented to the Board for approval. The ERM framework, which is based on ISO 31000, likewise searches for strategic risks that present opportunities and may create or add value to the Company.

We have a Chief Risk Officer who supervises our entire enterprise risk management process of the Company and spearheads the development, implementation, and continuous improvement of the Company’s enterprise risk management processes and documentation. He heads the ERM Group, tasked to lead the enterprise risk management program of our Company. All the heads of the Company’s divisions are designated risk owners of all risks emanating from their respective groups and each group is represented in the Risk Management Committee, the working group which is the conduit in cascading risk management efforts of Management to all employees and in receiving any feedback from them.

In assessing the risks that confront each division and the entire corporation in general, we are guided by our risk appetite and tolerances such that risks that poses high likelihood of occurrence and huge financial impact are given priorities in providing means to eliminate or at least mitigate these risks so as not to pose hindrances in attaining our business objectives. The following were given such priority attention in 2024:

OPERATIONAL RISKS	These may be caused by unplanned events such as serious process or machine failure, accidents, weather-related events, or human error at the Company’s refinery, terminals, depots and other facilities. These disruptions may result in injury or loss of life, damage to Company property, or damage to other properties in the immediate area where the facility is situated or in financial losses from product run-outs, loss of sales or loss of margins from required spot purchases.	To mitigate these risks, the Company ensures that the Petron Bataan Refinery and the terminals adopt best practices in operations and adhere to a program of planned, preventive and predictive maintenance. For the Petron Bataan Refinery, in 2024 a scheduled shutdown maintenance was completed which is periodically carried out in accordance with an established turnaround planning cycle. In addition, routine, preventive and corrective reliability and maintenance programs are implemented, supported by adequate and advanced instrumentation with the appropriate tools and equipment. The Petron Bataan Refinery, the country’s only oil refining facility, continues to be Integrated Management System (“IMS”)-certified which demonstrates the Company’s continuous adherence to global standards on safety, health, quality and environmental management. The Company’s IMS certification covers the Environmental Management System (EMS, ISO
--------------------------	--	--

		<p>14001:2004), Quality Management System (QMS, ISO 9001:2008S) and Occupational Health and Safety Management System (OHSMS, 18001:2007).</p> <p>All of the Company's 30 terminals have been certified under the ISO 9001:2015 (QMS), while 29 terminals received certification for ISO 14001:2015 (EMS), and ISO 45001:2018 (Occupational Health and Safety Management System) standards. Moreover, the Petron pier facilities are compliant with the International Ship and Port Facility Security or ISPS Code which is certified by the Office for Transportation Security under the Department of Transportation.</p> <p>The Company likewise maintains insurance which covers property, marine cargo and third party liability, as well as personal injury, accidental death and dismemberment, sabotage and terrorism, and machinery breakdown. One of the main insurance policies of the Company, the Industrial All Risk policy, covers the Petron Bataan Refinery for material damages, including machinery breakdown cover.</p>
CRUDE AND PRODUCT PRICE VOLATILITY RISKS	<p>The Company is exposed to uncontrollable price fluctuations of input crude and output finished products. Price movements and volatility are brought about by changes in global supply and demand for crude oil and finished products, international economic conditions, global conflicts and geopolitical issues, and other factors over which the Company has no control. Currently, events such as the war in Gaza, conflicts at the Red Sea, the Russia-Ukraine war, and US tariff imposition and trade war have resulted in oil price swings. Such volatility may result in cash flow variability and increase in financing expenses.</p>	<p>The Company mitigates this risk by entering into commodity hedging for its crude and product exposure. The Company has a Commodity Risk Management Committee that actively evaluates hedging policies and strategies to protect the Company from risks of inventory losses and margin contractions. The Company also regularly assesses refinery utilization considering the latest price outlook and demand forecasts and prudently manages its capital and operating expenses and receivables, particularly during times of high volatility.</p>
FINANCIAL RISKS	<p>The Company is capital intensive and spends substantially for the processing and purchase of crude oil and other fuel products, and investments in upgrading and maintaining the Company's facilities, which requires Petron to incur debt to finance these expenses. With</p>	<p>To manage these financial risks, the Company maintains an optimum mix of fixed and floating rate loans, and peso and foreign-denominated loans. The Company also engages in hedging activities using forwards and other derivative instruments, and generating</p>

	<p>loan levels both in peso and foreign currencies, the Company faces financial risks from increase in interest rates and fluctuations in foreign exchange. An increase in interest rate would mean an increase in interest payments to the lenders, while swings in foreign exchange would impact our foreign-denominated debt and interest payments in peso terms.</p>	<p>dollar-denominated sales to reduce foreign exchange exposure. Finally, the Company negotiates for tighter spreads of loan facilities for long-term loans.</p> <p>Moreover, the Company uses an enterprise resource planning software that monitors financial transactions. This planning tool allows real-time awareness and response to contain losses posed by foreign exchange exposure.</p>
CYBER SECURITY RISKS	<p>As the Company becomes more reliant on technology to support operations and enable efficiency and innovation, Petron becomes susceptible to information technology (“IT”) security threats that may impact business continuity, data integrity, and regulatory compliance. These threats may come from inside and outside of the organization, can be intentional, as with cybercriminals, or unintentional, as with employees, contractors or vendors who accidentally click malicious links or download malware. And as these IT security and cybersecurity threats continue to escalate in ferocity and complexity, the Management Information Systems Department (“MISD”) of the Company has implemented IT security strategies that combine a range of security systems, framework/programs and technologies to protect Petron’s entire IT infrastructure, including hardware systems, software applications and endpoints, to prevent or mitigate the impact of known and unknown threats.</p>	<p>Since these threats are fast-evolving, the Company has been continuously working on strengthening its foundation and improving the response plan to maintain a confident security posture. The Company also implemented proactive measures to further improve our threat detection, response and prevention capabilities. As cyberattacks, such as phishing attacks exploit human vulnerabilities, the Company is also focused on user training and empowerment to educate employees to recognize security threats and practice secure workplace habits.</p>

In assessing the risks that confront each Division and the entire corporation in general, the Company, is guided by its risk appetite and tolerances such that risks that poses high likelihood of occurrence and huge financial impact are given priorities in providing means to eliminate or at least mitigate these risks so as not to pose hindrances in attaining its business objectives. In 2024 the following were given such priority attention.

The Heart of Integrity: Good Governance as a Business Imperative

Strong governance continues to guide us as we take a leap forward toward sustainability. Our commitment starts with our leaders, whose vision drives us to take meaningful action. With this, we continuously strengthen our governance framework—upholding transparency, accountability, and ethical leadership at every level.

Governance structure and composition (GRI 2-9)

In 2024, our Board of Directors comprised 15 members, three (3) of whom are independent. Petron is led by Mr. Ramon S. Ang, our President and CEO, and Mr. Lubin B. Nepomuceno, our Director and General Manager.

NAME	AGE	NATIONALITY	POSITION	YEAR APPOINTED AS DIRECTOR
RAMON S. ANG	71	Filipino	President and CEO	2009

Role of the highest governance body in overseeing the management of impacts (GRI 2-12)

The Board of Directors is tasked with strengthening our Company's vision, mission, strategic goals, policies, and procedures, guiding our operations and effectively monitoring Senior Management's performance. Our annual operating plan and quarterly results are reported to and approved by the Board of Directors.

Furthermore, our Board of Directors is supported by the following committees:

COMMITTEE	DESCRIPTION
Executive Committee	<ul style="list-style-type: none"> Generally exercises the powers of the Board of Directors when the latter is not in session. Composed of three (3) regular members with two (2) alternates who shall sit if any one of the regular members is unable to attend the meeting.
Corporate Governance Committee	<ul style="list-style-type: none"> Tasked to assist the Board of Directors in the performance of its corporate governance, nomination, and remuneration responsibilities and ensure compliance with and proper observance of corporate governance principles and practices. Has at least three (3) independent directors as members, including the Chairperson.
Audit Committee	<ul style="list-style-type: none"> Oversees Senior Management in establishing and maintaining an adequate, effective and efficient internal control framework; ensures that systems and processes are designed. Provides assurance in areas including reporting, monitoring compliance with laws, regulations and internal policies, efficiency and effectiveness of operations, and safeguarding of assets. Composed of at least three (3) appropriately qualified non-executive directors, the majority of whom shall be independent directors; the Chairperson also an independent director and shall not be the Chairperson of the Board of Directors or of any other Board of Directors Committee.
Risk Oversight Committee	<ul style="list-style-type: none"> Responsible for the oversight of the enterprise risk management system of the Corporation to ensure its functionality and effectiveness. Composed of at least three (3) appropriately qualified non-executive directors, the majority of whom shall be independent directors; the Chairperson also an independent director and shall not be the Chairperson of the Board of Directors or of any other Board of Directors Committee.
Related Party Transaction Committee	<ul style="list-style-type: none"> Reviews all material related party transactions of the Company. Composed of at least three (3) non-executive directors, two (2) of whom shall be independent directors; Chairperson also an independent director.

Nomination and selection of the highest governance body (GRI 2-10)

Our Board of Directors brings the necessary skills, expertise, and experience to guide us towards accomplishing our strategic goals. We prioritize diversity within our Board of Directors, considering factors such as age, skills, industry background, gender, competence, knowledge, and other distinctions among directors to ensure well-rounded representation. This emphasis enriches discussions, enhances decision-making processes, and fosters the development of comprehensive solutions to address challenges and capitalize on opportunities for our business. The Corporate Governance Committee oversees the selection process for our Board of Directors.

We implement rigorous measures, ensuring that the candidates meet the following requirements:

- possess the knowledge, skills, experience, and particularly in the case of non-executive directors, independence of mind given their responsibilities to the Board of Directors and in light of the Company's business and risk profile;
- have a record of integrity and good repute;
- have sufficient time to carry out their responsibilities; and
- have the ability to promote smooth interaction between members of the Board of Directors.

Guided by our leadership team, we continue to strengthen our policies and internal processes to ensure that we stay on course on our sustainability path, firmly grounded in our vision, purpose, and core values.

Policy commitments [\(GRI 2-23\)](#)

Guided by our leadership team, we continue to strengthen our policies and internal processes to ensure that we stay on course on our sustainability path, firmly grounded in our vision, purpose, and core values.

Corporate Policy	Description
Revised Whistle-blowing and Non-Retaliation	<p>This expands the coverage of the original policy. In addition to concerns on accounting, internal controls, auditing or financial reporting matters such as malpractice, impropriety, theft or fraud, gross mismanagement or waste of funds, the policy now also covers illegal or non-compliant conduct and misconduct such as violations of any law or regulation, violations of the Revised Code of Business Conduct and Ethical Business Policy and other policies of the Company, and improper or unethical behavior likely to cause financial loss or prejudice to company reputation or constituting abuse of authority, harassment or duress. A Whistleblowing Relations Officer and a Whistleblowing Committee have been designated for the conduct of investigations.</p> <p>The Company also reiterates under this policy our commitment against retaliation, which action will be subject to appropriate sanctions that include dismissal or termination of contractual relations with the Company.</p>
Anti-Corruption and Anti-Money Laundering and Sanctions Compliance	<p>Under this policy, the Petron Group reiterated its compliance with all applicable laws on anti-corruption and -bribery, anti-money laundering and combating terror financing (“AML-CTF”), and trade and economic sanctions.</p> <p>This policy also sets forth the Petron Group’s policy of zero-tolerance for bribery, corruption, money-laundering, terror financing, and sanctions violations.</p>
Anti-Sexual Harassment	<p>The Petron Group values the dignity of every individual, strives to enhance the development of their human resources, guarantees full respect for human rights and uphold the dignity of their employees, applicants for employment, consultants and service providers. Towards this end, all forms of sexual harassment against any</p> <p>personnel in the workplace are prohibited. The Petron Group is committed to upholding the rights and dignity of all its personnel through the creation of a work environment characterized by professionalism, fairness, openness, trust and respect. In addition, the Petron Group has adopted procedures for the handling and investigation of sexual harassment cases. Not only does this policy document the Petron Group's zero-tolerance policy for any form of sexual harassment in the workplace, it also expressly states the position of the Petron Group against victimization for making a reasonable complaint.</p>
Conflict of Interest	<p>This policy highlights and reiterates the principle in the Company’s Revised Code of Conduct and Ethical Business Policy that officers and employees of the Petron Group have a duty to act in the best interest of the Petron Group. The Petron Group shall be protected by</p>

	<p>identifying and resolving any possible conflict of interest between the Petron Group and its officers and employees that will negatively affect current and future business, legal obligations, and good governance. The officers and employees of the Petron Group agree and acknowledge that they are not influenced by personal, family, financial or other considerations which might affect their judgment as to what is best for the Petron Group and that there is a conflict of interest if they compromise their exclusive commitment to the Petron Group. If the personal business interests of an officer or employee may conflict with the interests of the Petron Group, the proper disclosure by the relevant officer or employee and a review by higher Management are required to resolve the conflict.</p>
Diversity, Equity, and Inclusion	<p>This policy documents the dedication of the Petron Group to foster a welcoming and positive working environment. Recognizing that the workplace is an extension of an employee's social and cultural identity, the Petron Group aligns this with its core values and cultivates an open and safe space for its most valuable asset, its human capital. With this policy, the Petron Group expressly and consciously advocates an inclusive organization which is representative of all the sectors of society, and which promotes an equal and inclusive workplace, respects diversity, and accepts differences to attract and retain skilled employees, enhance productivity, and foster loyalty and unity within the Petron Group.</p>
Child and Forced Labor	<p>This policy reiterates the Petron Group's commitment to value the dignity of every human person, including children, and guarantees the respect of individual rights. Children shall be afforded special protection from all forms of exploitation and other conditions prejudicial to their development, including child labor. Moreover, the Company expressly commits that it shall not engage, tolerate, or support forced or involuntary labor.</p>
Board of Directors Diversity	<p>This policy provides a framework for inclusion to promote diversity in the Board of Directors of Petron by promoting the inclusion of a wide range of perspectives and ideas that can inspire creativity and drive innovation and improve decision-making and corporate governance. In determining the structure and composition of the Board of Directors, diversity will be considered from varied aspects, including, but not limited to, gender, age, ethnicity, religion, culture, sexual orientation, skills, backgrounds, competencies, knowledge, experience, length of service of directors, and applicable regulatory rules and regulations. The Board of Directors is also tasked to strive to maintain a balanced mix of executive, non-executive, and independent directors, having due regard to the requirements of the Company and the Board of Directors.</p>
Revised Code of Conduct and Ethical Business	<p>The Company's Code of Conduct and Ethical Business Policy was likewise updated to specifically include in its anti-bribery coverage all commercial or private transactions of the Company. A conflict of interest in relation to the employment by another person also now extends to any organization engaged in a business that is directly in competition with any of the businesses of the Petron Group.</p>

Awards and Recognition

AWARD	RECOGNIZING BODY	DATE RECEIVED	BRIEF DESCRIPTION OF ACHIEVEMENT RECOGNIZED
<ul style="list-style-type: none"> ▪ 13th Gawad Kaligtasan at Kalusugan (GKK) Awards <ul style="list-style-type: none"> ○ National Bronze Award (Transportation & Storage Industry Category) - Petron Tagoloan Terminal ○ Special OSH Award (Industry Category) – Petron Zamboanga Terminal and Petron Bawing Terminal 	Department of Labor and Employment	November 22, 2024	The Gawad Kaligtasan at Kalusugan or GKK is an award given by the DOLE in recognition of outstanding achievement of establishments and individuals in terms of responding to the safety and health needs of workers, of workplaces and community
<p>Safety Excellence Award for the following Petron facilities:</p> <ol style="list-style-type: none"> 1. Petron Head Office 2. JOCASP 3. New Lube Oil Blending Plant (NLOBP) 4. Jimenez 	Workplace Advocates on Safety in the Philippines Incorporated (WASPI)	October 18, 2024	The "Workplace Advocates on Safety in the Philippines Incorporated (WASPI) - Safety Excellence Award" is a recognition given to companies in the Philippines that demonstrate outstanding commitment to occupational safety and health standards, typically awarded to businesses with a record of no lost time accidents or disabling injuries over a specified period; essentially signifying a high level of workplace safety compliance within the organization.
<ul style="list-style-type: none"> ▪ Golden Arrow Award 	Institute of Corporate Directors	September 19, 2024 (during the ASEAN Corporate Governance Scorecard (ACGS) Golden Arrow Awards)	Arrow Award recipients demonstrate compliance with the Philippine Code of Corporate Governance and globally recommended corporate governance practices. Companies are scored according to publicly available disclosures on a company's website regarding shareholder rights facilitation, transparency, and accountability in disclosing material information, and board performance, among others.
<ul style="list-style-type: none"> ▪ Best Community Programme Award (Silver Category) for Tulong Aral 	Co-organized by the Pinnacle Group International and	April 25, 2024 (given at the 16 th Annual Global CSR & ESG	The Global CSR & ESG Summit and Awards 2024™ is Asia's most prestigious recognition awards

ng Petron (TAP) and the Petron Refinery's Bataan Engineering Scholarship Program.	Sustainable Technology Centre	Summit and Awards)	programme for Corporate Social Responsibility and ESG. The programme recognizes and honors companies for outstanding, innovative and world-class products, services, projects and programs implemented in the past or present. These projects should demonstrate the company's leadership, sincerity and on-going commitment in incorporating ethical values, compliance with legal requirements, and respect for individuals, communities and the environment in the way they do business.
Recognized as: <ul style="list-style-type: none">one of the 10 most valuable Filipino brands for 202483rd most valuable brand in the ASEAN regionthe only oil company to also land in the top 10 in terms of Sustainability Perceptions Value	Brand Finance 2024 Brand Finance Philippines 30 report	May 2024	Brand Finance's Brand Value Report provides a complete breakdown of the assumptions, data sources, and calculations used to determine companies' brand's value, as well as brand equity research. Each report includes expert recommendations for growing brand value, driving performance, and gaining insights into the company's position against peers.

Moving Forward: Charting a Course Towards a Sustainable Tomorrow

As sustainability becomes ever integral in the business landscape, we continue to take the steps necessary not only to survive in the fast-paced downstream oil industry but to stay ahead of the competition, as well as the rapidly evolving challenges of doing business. As markets grow more unpredictable, climate change compounding the risks to operations, political upheavals heightening uncertainties and upending stability, we also grow increasingly mindful of the need to embrace sustainability as a way of life in every facet of our work. The progress of our performance that we have continuously been consistently measuring, monitoring and declaring in our past sustainability reports indicates that we are on the right track in charting our course towards an enduring future. At the same time, we know that we can do more and be better.

- Taking off from the process of reporting, we will continue measuring our economic, environmental, and social performance vis-à-vis the targets we set at the start of each year. At the same time, we will monitor how our efforts also contribute to attaining the goals indicated in the San Miguel blueprint – doing what is good for the planet, good for people, and good for progress. Even as we continue to anchor our ESG accomplishments on the GRI standards on sustainability reporting, we are anticipating the new International Sustainability Standards Board (ISSB) to be mandated by the SEC for all Philippine companies and have initiated efforts to prepare for its eventual implementation, beginning with a training among members of Petron’s ESG Technical Working Groups on the basics of the IFRS S1 (sustainability-related risks and opportunities) and S2 (climate-related disclosures). In the process, we will still align our efforts to help contribute to the UN Sustainable Development Goals and the Philippine Development Plan.
- We will scale up energy management initiatives through improvements in energy and process efficiencies and reducing/recovering waste heat in the Refinery, while also continuing to

transition to more energy efficient LED lighting and solar panels in facilities of the refinery, terminals and service stations, upgrading to inverter AC units and heightened practice of basic emergency conservation measures, even as we assess relevant environmentally sound technologies for possible adoption.

- We aim to further intensify our carbon sequestration efforts by complementing existing operational activities with coastal and upland reforestation, using science-based assessment of carbon sequestration and avoided emissions by experts from the UPLB-CFNR, specifically from the 55 hectares of mangrove sites in Capiz, Davao del Sur, and Bulacan under our Puno ng Buhay reforestation program. This will assist us in improving the company's GHG reduction goals and strategies.
- We will continue to adopt the practice of circularity in our business processes. Specifically, we are looking to level up support to the EPR Law by upping our compliance, incentivizing the recycling of empty Petron lube containers, conducting third-party audits and engaging more plastic credit suppliers. Vital to this effort will be the full and active participation of our Petron Dealers Association or PETDA.
- Even as we strive to encourage our supply chain to share in our values and aspirations for a sustainability future, we are also developing procedures internally that will enhance our business planning process to assess the inclusion of ESG initiatives in capital expenditure proposals as added consideration for budget approval. This is a way to embed sustainability practices in every project and further raise the level of awareness in every business unit.

Making that leap forward means looking beyond the horizon and envisioning our business beyond today. The past 92 years of Petron has been about building sturdy and resilient foundations that will ensure we not only reach our centennial but remain as the industry leader in the coming years. We need to stay focused on our goals, be bold in our thinking, remain patient in our steps, and always be ready to translate our efforts into opportunities to grow further, well into the future.

	301-2 Recycled input materials used	p. 24					
	301-3 Reclaimed products and their packaging materials	p. 25					
Energy							
GRI 3: Material Topics 2021	3-3 Management of material topics	pp. 25-27					11.1.1
GRI 302: Energy 2016	302-1 Energy consumption within the organization	p. 27					11.1.2
	302-2 Energy consumption outside of the organization			Energy consumption outside of the organization	Data not monitored		11.1.3
	302-3 Energy intensity	p. 37					11.1.4

	302-4 Reduction of energy consumption	p. 27					
	302-5 Reductions in energy requirements of products and services			Reductions in energy requirements of sold products and services achieved during the reporting period	Data not monitored		
Water and Effluents							
GRI 3: Material Topics 2021	3-3 Management of material topics	pp. 30-32					11.6.1
GRI 303: Water and Effluents 2018	303-1 Interactions with water as a shared resource	pp. 30-32					11.6.2
	303-2 Management of water discharge-related impacts	pp. 30-32					11.6.3
	303-3 Water withdrawal	p. 31					11.6.4
	303-4 Water discharge	pp. 31-32					11.6.5
	303-5 Water consumption	p. 32					11.6.6
Biodiversity							
GRI 3: Material Topics 2021	3-3 Management of material topics	pp. 33-35					11.4.1
GRI 304: Biodiversity 2016	304-1 Operational sites owned, leased, managed in, or adjacent to, protected areas and areas of high biodiversity value outside protected areas	p. 34					11.4.2
	304-2 Significant impacts of activities, products and services on biodiversity	p. 35					11.4.3
	304-3 Habitats protected or restored	p. 34					11.4.4
	304-4 IUCN Red List species and national conservation list species with habitats in areas affected by operations		No IUCN Red List species and national conservation list species were affected by our operation.				11.4.5

Emissions							
GRI 3: Material Topics 2021	3-3 Management of material topics	pp. 35-39					11.1.1 11.2.1 11.3.1
GRI 305: Emissions 2016	305-1 Direct (Scope 1) GHG emissions	p. 37					11.1.5
	305-2 Energy indirect (Scope 2) GHG emissions	p. 37					11.1.6
	305-3 Other indirect (Scope 3) GHG emissions			Gross other indirect (Scope 3) GHG emissions	Scope 3 not included in the 2024 report		11.1.7
	305-4 GHG emissions intensity	p. 37					11.1.8
	305-5 Reduction of GHG emissions	p. 38					11.2.3
	305-6 Emissions of ozone-depleting substances (ODS)	pp. 38-39					
	305-7 Nitrogen oxides (NOx), sulfur oxides (SOx), and other significant air emissions	pp. 38-39					11.3.2
Waste							
GRI 3: Material Topics 2021	3-3 Management of material topics	pp. 41-43					11.5.1 11.8.1
GRI 306: Effluents and Waste 2016	306-3 Significant spills		While we recognize critical incidents as a potential risk due to the nature of our industry, we have an Enterprise-Wide Risk Management Framework in place that addresses such risks to ensure business continuity while at the same time preventing, if not mitigating, negative impacts to our community and the public in general. For preventive and preparatory measures, we have in place contingency plans, standard operating procedures and manuals, regular drills and practices, regular inspections by authorities, insurers, consultants, and constant training of personnel. We are focused on the risk of oil spills, a risk that is				11.8.2

			considered to have a high impact, but a low probability of occurrence. For 2024, we have no incidents of significant oil spills.				
GRI 306: Waste 2020	306-1 Waste generation and significant waste-related impacts	pp. 41-43					11.5.2
	306-2 Management of significant waste-related impacts	pp. 41-43					11.5.3
	306-3 Waste generated	pp. 41-42					11.5.4
	306-4 Waste diverted from disposal	p. 42					11.5.5
	306-5 Waste directed to disposal	p. 43					11.5.6
Employment							
GRI 3: Material Topics 2021	3-3 Management of material topics	pp. 46-48					11.10.1 11.11.1
GRI 401: Employment 2016	401-1 New employee hires and employee turnover	pp. 47-48					11.10.2
	401-2 Benefits provided to full-time employees that are not provided to temporary or part-time employees	p. 48					11.10.3
	401-3 Parental leave	p. 48					11.10.4 11.11.3
Labor/Management Relations							
GRI 3: Material Topics 2021	3-3 Management of material topics	pp. 51-52					11.7.1 11.10.1
GRI 402: Labor/Management Relations 2016	402-1 Minimum notice periods regarding operational changes	p. 52					11.7.2 11.10.5
Occupational Health and Safety							
GRI 3: Material Topics 2021	3-3 Management of material topics	pp. 52-55					11.9.1
GRI 403: Occupational Health and Safety 2018	403-1 Occupational health and safety management system	p. 53					11.9.2
	403-2 Hazard identification, risk	p. 54					11.9.3

	assessment, and incident investigation						
	403-3 Occupational health services	p. 52					11.9.4
	403-4 Worker participation, consultation, and communication on occupational health and safety	pp. 52-53					11.9.5
	403-5 Worker training on occupational health and safety	pp. 52-53					11.9.6
	403-6 Promotion of worker health	pp. 52-53					11.9.7
	403-7 Prevention and mitigation of occupational health and safety impacts directly linked by business relationships	pp. 52-53					11.9.8
	403-8 Workers covered by an occupational health and safety management system	p. 53					11.9.9
	403-9 Work-related injuries	p. 54					11.9.10
	403-10 Work-related ill health	p. 54					11.9.11
Training and Education							
GRI 3: Material Topics 2021	3-3 Management of material topics	pp. 55-57					11.7.1 11.10.1 11.11.1
GRI 404: Training and Education 2016	404-1 Average hours of training per year per employee	p. 56					11.10.6 11.11.4
	404-2 Programs for upgrading employee skills and transition assistance programs	pp. 56-57					11.7.3 11.10.7
	404-3 Percentage of employees receiving regular performance and career development reviews	p. 56					

Local Communities							
GRI 3: Material Topics 2021	3-3 Management of material topics	pp. 57-60					11.15.1
GRI 413: Local Communities 2016	413-1 Operations with local community engagement, impact assessments, and development programs	p. 58					11.15.2
	413-2 Operations with significant actual and potential negative impacts on local communities	pp. 58-60					11.15.3
Customer Health and Safety							
GRI 3: Material Topics 2021	3-3 Management of material topics	pp. 61-63					11.3.1
GRI 416: Customer Health and Safety 2016	416-1 Assessment of the health and safety impacts of product and service categories	p. 62					11.3.3
	416-2 Incidents of non-compliance concerning the health and safety impacts of products and services	p. 62					
Marketing and Labeling							
GRI 3: Material Topics 2021	3-3 Management of material topics	pp. 63-64					
GRI 417: Marketing and Labeling 2016	417-1 Requirements for product and service information and labeling	pp. 62-64					
	417-2 Incidents of non-compliance concerning product and service information and labeling	p. 63					
	417-3 Incidents of non-compliance concerning marketing communications	p. 63					
Customer Privacy							
GRI 3: Material Topics 2021	3-3 Management of material topics	p. 65					

GRI 418: Customer Privacy 2016	418-1 Substantiated complaints concerning breaches of customer privacy and losses of customer data	p. 64
